

## Treball de Fi de Màster

2014/2015

Code: 42537

ECTS Credits: 12

| Degree                                       | Type | Year | Semester |
|--|------|------|----------|
| 4313410 Reptes de la Filosofia Contemporània | OB   | 0    | A        |

### Contact

Name: Marta Tafalla González

Email: Marta.Tafalla@uab.cat

### Use of languages

Principal working language: català (cat)

Some groups entirely in English: No

Some groups entirely in Catalan: Yes

Some groups entirely in Spanish: No

### Prerequisites

.

### Objectives and Contextualisation

.

### Skills

- Classify the various manifestations of contemporary art systematically and revealingly, especially those associated with new traditions and formats.
- Connect concepts and knowledge within the different areas of current research in philosophy that concern the dependencies between science and technology and the ethical and political implications of these dependencies.
- Critically analyse and summarise information from a specialist article or monograph, or information of high quality available on internet.
- Define, design, plan and draw up an original unpublished research project on philosophy, following the established academic and scientific parameters.
- Establish and take into account the implications of scientific research and knowledge for advanced philosophy research.
- Organise timeframes and resources for carrying out a research project: set priorities, objectives, calendars and actions.
- Seek out, select and manage information autonomously, both from structured sources (databases, bibliographies and specialist journals) and from internet.

### Learning outcomes

1. Critically analyse and summarise information from a specialist article or monograph, or information of high quality available on internet.
2. Establish the connection with scientific and technological knowledge and its influence on society when writing.
3. Establish the implications of findings for understanding the human condition.
4. Explain how the above fields inter-relate, using a precisely-drawn concept map.
5. Organise timeframes and resources for carrying out a research project: set priorities, objectives, calendars and actions.

6. Seek out, select and manage information autonomously, both from structured sources (databases, bibliographies and specialist journals) and from internet.
7. Write a master's dissertation with conceptual findings that are precise and significant.
