

**Table 2.** Characteristics of treatment interruptions in the interruption group.

	Interruption Group (n=27)
Total number of interruptions	55
Cause of interruption	
Structured treatment interruption	23 (41.8)
Toxicity	12 (21.8)
Individual decision	20 (36.3)
Months under interruption*	17.2 (18.5)
Total time under interruption/Total time on treatment x 100	15.5
Months since last interruption*	37.6 (37)
Patients with:	
1 interruption	13 (48.1)
2 interruptions	5 (18.5)
3 interruptions	4 (14.8)
4 interruptions	2 (7.4)
≥5 interruptions	2 (7.4)
Patients with plasma viral rebound	13 (48.1)
Total number of plasma viral rebounds	19 (34.5)

Data expressed as frequency (percentage), except when specified.

\*: Mean (standard deviation).

Plasma viral rebounds after interruption.
