

Supporting informations

Table S1. Measurement periods and ranges of soil temperature, moisture, and respiration of the seven sites in the different treatments.

Soil temperature measured at 5 cm soil depth, soil moisture measured at the soil depths presented in Table 2.

Overall average values are in bold within brackets.

Country	Site	Measurement periods yyyy.mm	Treatments	Number of data points	Soil temp.	Soil moist.	Soil respiration
					°C	Vol%	$\mu\text{mol m}^{-2} \text{s}^{-1}$
