Table S1

Description and reliability indices of the measures used for criterion, convergent and discriminant validity of the PCL:YV

Measures	Main construct	Informant	Score	# Items	Scales used	Cronbach's $\alpha$ (MIC)
<i>Sample 2</i>						
Youth Psychopathic Traits Inventory (YPI; Andershed et al., 2002; authorized Spanish version by Hiltzman et al., 2006).	Psychopathic traits in youth	Youth	4-point Likert scale from 1 = <i>Does not apply at all</i> to 4 = <i>Applies very well</i>	20 15 15 50	Grandiose-Manipulative Callous-Unemotional Impulsive-Irresponsible Total score	.89 (.28) .70 (.14) .72 (.14) .88 (.13)
Inventory of Callous-Unemotional Traits Youth Self-Report (ICU-Y) and Teacher's Report (ICU-T; Frick, 2003; authorized Spanish version by Ezpeleta et al., 2013).	Callous-Unemotional traits	Youth Social educator	4-point Likert scale from 0 = <i>Not at all true</i> to 3 = <i>Definitely true</i> 4-point Likert scale: from 0 = <i>Not at all true</i> to 3 = <i>Definitely true</i>	24 24	Total score Total score	.79 (.14) .91 (.29)
Achenbach System of Empirically Based Assessment (ASEBA) school-age instruments (Achenbach & Rescorla, 2001; Willoughby et al., 2011).	Psychopathology	Youth	3-point Likert scale from 0 = <i>Not true</i> to 2 = <i>Very true or often true</i>	13 8 10 11 12 9 15 17	Anxious/Depressed Withdrawn/Depressed Somatic complaints Social problems Thought problems Attention problems Rule-breaking behavior Aggressive behavior	.76 (.19) .55 (.13) .79 (.27) .71 (.18) .68 (.15) .66 (.18) .77 (.18) .79 (.18)

	Social educator	3-point Likert scale from 0 = <i>Not true to often true</i>	16 8 9 11 10 26 12 20	Anxious/Depressed Withdrawn/Depressed Somatic complaints Social problems Thought problems Attention problems Rule-breaking behavior Aggressive behavior	.72 (.14) .79 (.31) .73 (.23) .69 (.17) .44 (.07) .91 (.27) .80 (.25) .93 (.38)
Reactive and Proactive Aggression Questionnaire (RPQ; Raine et al., 2006; authorized Spanish version Andreu et al., 2009).	Reactive and Proactive aggression	Youth	3-point Likert scale from 0 = <i>Never to 2 = Often</i>	11 12 23	Reactive aggression Proactive aggression Total score
Antisocial Process Screening Device – Self Report (APSD-SR; Frick & Hare, 2001).	Psychopathic traits in youths	Youth	3-point Likert scale from 0 = <i>Not at all true to 2 = Definitely true</i>	7 6 5 20	Narcissism Callous/Unemotional Impulsivity Total score
Karolinska Scales of Personality (KSP; Af Klinterberg et al., 1986; authorized Spanish version Ortet et al., 2002).	Personality traits	Youth	4-point Likert scale from 1 = <i>Does not apply to 4 = Applies completely</i>	10 10 10 10 10 10 10 10 20	Psychic Anxiety Somatic Anxiety Muscular Tension Psychasthenia/Lack of Energy Inhibition of Aggression/Lack of Assertiveness Detachment/Distance Impulsiveness Monotony Avoidance/Sensation Seeking Socialization

				5	Indirect Aggression	.68 (.30)
				5	Verbal Aggression	.42 (.13)
				5	Irritability	.41 (.12)
				5	Suspicion	.26 (.07)
				5	Guilt	.65 (.16)
				10	Social Desirability	
Sensitivity to Punishment and Sensitivity to Reward Questionnaire (SPSRQ; Torrubia et al., 2001).	Individual differences of the inhibition systems and behavioral approach	Youth	Yes/No response	24	Sensitivity to Punishment	.85 (.19)
				24	Sensitivity to Reward	.80 (.15)

Note. MIC = Mean interitem correlation.
