A man in a blue shirt is smiling and pointing towards a stack of three white electronic instruments, which are lock-in amplifiers. The text "Time to get excited." is written in blue above the instruments, followed by "Lock-in Amplifiers – from DC to 8.5 GHz". A "Find out more" button is in the bottom right corner, and the Zurich Instruments logo is at the bottom right.

# Erratum: “Thermal transport in silver-coated polymer sphere composites by the bidirectional $3\omega$ method” [J. Appl. Phys. 131, 125107 (2022)]

On p. 125107-2 of the original paper,<sup>1</sup> a sentence reading “As a rule of thumb,  $V_{3\omega}$  is typically three orders of magnitude larger than  $V_0$ .” should read as “As a rule of thumb,  $V_{3\omega}$  is typically three orders of magnitude smaller than  $V_0$ .”

The correction reported here does not affect the findings of the original paper.
