### Correction to: Supportive Care in Cancer

<https://doi.org/10.1007/s00520-022-07376-w>

The article "mRNA-1273 SARS-CoV-2 vaccine safety and COVID-19 risk perception in recently transplanted allogeneic hematopoietic stem cell transplant recipients" written by Nil Albiol et al, was originally published online September 28, 2022 has an error.

The correct author group is now reflected in this article.

The correct Contributions statement is the below:

NA was responsible for designing and writing the study protocol, writing the main draft, designing and filling the main database, gathering variable data and analyzing them, interpreting results, creating tables and figures, and manufacturing reference lists. OA was responsible for obtaining data and organizing patients' schedules, as well as obtaining written consents. LG-P filled a substantial amount of the database with the gathered data. MT, NR, and EL equally obtained patient and variable data. AE, JS, and RM reviewed and corrected the final form of the manuscript. IG provided infrastructural coordination and

freed nurses' schedules to work on the study. JL-C provided vaccination timelines and infrastructure, organized patients' appointments for vaccination, and coordinated the Infectious Diseases Department with ours. RM also gave feedback on the study design and methods and contributed to the interpretation of the results. IG-C was responsible for designing and writing the study protocol, contributing to structuration, designing and writing the main draft as well as correcting the final form, obtaining ethics committee approval, obtaining financial support, gathering the research team, identifying the population of the study, obtaining patients' data, interpreting results, and eventually coordinating the study overall.

**Data Availability** The data that support the findings of this study are available from the corresponding author, IG-C, upon reasonable request.

**Publisher's note** Springer Nature remains neutral with regard to jurisdictional claims in published maps and institutional affiliations.
