EVT performed in Catalonia during study period
(N = 6096)
5159 patients not meeting inclusion criteria
n = 440 EVT involving posterior circulation
n = 4719 without tandem lesion
Patients elegible for the study
(N = 937)
359 patients not meeting inclusion criteria after review
n = 98 with lack of critical follow-up information
n = 159 incorrectly classified as tandem occlusion
n = 102 with non-atherosclerotic etiology of the ICA lesion
Patients included in the analysis
(N = 578)
