TESTIMONIALS

Sihem Jebari

Researcher at the Tunisian National Research Institute for Rural Engineering, Water and Forestry, (INRGREF)

"CREAF has been **my window to the research dynamic in Europe**. The synergies set during the past years within this outstanding center were mainly characterized by experience sharing, knowledge and know-how transfer, as well as accomplishments, in a creative atmosphere. This allowed INRGREF and myself to be well-backed up while dealing with **climate change adaptation** and **democratization of science for natural resources management**."

NEW PROJECTS

CREAF's researchers **Corina Basnou, Joan Pino, Josep M Espelta** and **Lluís Pesquer** take active part in the brand new [Uforest project](#).

Corina Basnou

Joan Pino

"It is important to explain to university students what nature-based solutions are and specifically what urban forests are, so that they are aware of the professional opportunities they offer."

"Uforest fills a knowledge gap in forest management in cities and its key that provides tools and promotes entrepreneurship as part of its commitments."

AGENDA

3rd Ecosystem Services Science Europe Conference

Monday, 7th June 2021

The Ecosystem Services Partnership and the Estonian University of Life Sciences organize the 3rd Ecosystem Services Partnership Europe Conference, to be held in Tartu (Estonia), focused on policy and practices in the face of global changes.
