TESTIMONIALS

Tom Wild

Principal Investigator H2020 CONEXUS project

"Working together with CREAM on educational programmes, we can learn about local contexts, and different opportunities for progress in **responding to some of the tricky, intractable problems and urban issues using nature-based solutions**. We really need all the practical and theoretical knowledge we can access, including on these kinds of educational programmes. **CREAF's work in this is vital and exciting**, and we're really looking forward to learning more."

NEW PROJECTS

CREAF's researcher **Pilar Andrés** leads the project **Pastosoil**, in which researcher **Stefania Mattana** is also involved. The project addresses carbon sequestration in the soils in relation to the type of cattle management (intensive versus regenerative), in Menorca (Islas Baleares).

AGENDA

12th SER-Europe Conference 2021

From 7th to 10th September 2021

The **SER Europe 2021 conference** will focus on 'A new Green Deal for Europe's nature. Science and political action towards socio-ecological restoration'. The University of Alicante leads the European conference this year, together with the organizing committee. CREAM researcher **Pilar Andrés Pastor** will coordinate a seminar on soil restoration as part of the congress.
