impact of the center and its researchers, and the support provided by CREAM's staff during proposal preparation. My incorporation to CREAM, after two years in the USA, has been very positive, both in terms of my research group dynamics and the center's opportunities for career development (e.g. training)"

TESTIMONIALS

SÉBASTIEN CHAUVIN

Director of the European project FORESPIR

"At FORESPIR we collaborate with CREAM in 3 international cooperation projects: **CERES**, **CONNECTFOR** and **MONTCLIMA**. The seriousness, pragmatism and excellent skills of CREAM researchers are essential to the successful completion of these complex projects. They know how to listen to the partners, while quickly identifying the problems and proposing operational solutions. We hope that these three experiences on ecological connectivity and natural climate risks are the first of a long list of future projects in the service of mountain forests"

NEW PROJECTS

Related to the project **INCASE**, we will perform inter alia promotion and/or implementation of data sharing and management activities, supporting the European Environment Agency.

Joan Masó Pau

"Our knowledge on geospatial data is applied to help organizing the in-situ data in Europe both in terms of what we've already got and what we need. We believe that our experience in the field of Essential Variables consolidated in the GEOessential project can be instrumental in classifying the data sources in a way that will favour future exploitation"

Alba Brobia Ansoleaga

"InCASE is an opportunity for further consolidation of the ConnectinGEO and GEOessential projects. The challenge is improving the quality and interoperability of in-situ data collected by the European Environmental Agency, in compliance with climate adaptation policies and the SDG and in the framework of the European wetlands"

 **AGENDA**

Ophélie Ronce, "Evolution of plant phenology under a changing climate: insights from various theoretical models"

Friday 29th April 2022 - 12pm
Onsite & online

[Institut des Sciences de l'Evolution de Montpellier](#) researcher Ophélie Ronce's talk will focus on plant phenology, such as the timing of bud burst in spring for trees or the timing of flowering in many species, shows strong plastic responses to a warming climate. [CREAFTalk 2022 programme](#).

European Geoscience Union general assembly 2022

Monday to Friday, 23 - 27 May 2022

The [European Geoscience Union general assembly 2022](#) to be held on 23 - 27 May 2022 in Vienna (Austria) and online, will bring together geoscientists from all over the world for one meeting covering all disciplines of the Earth, planetary, and space sciences. Some researchers from CREAM and GRUMETS-UAB participate in this assembly with presentations and publications.
