Severo Ochoa postdoctoral programme

A great option if you are an experienced researcher looking to give your career a boost by working abroad.

Josep Barba Ferrer, Severo Ochoa Research Fellow

"Stimulating environment"

The essential ingredients of living soils

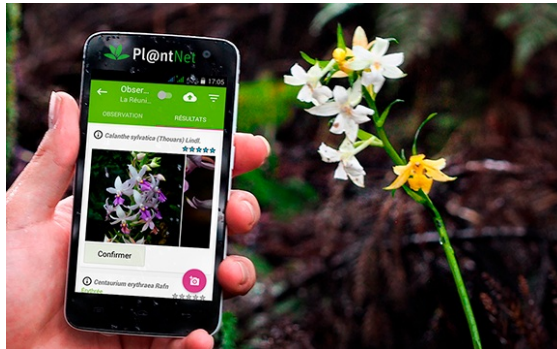

and flexibility. After several years doing research abroad, I rejoined CREAM last year. The center has changed and grown a lot in that period, bringing new opportunities and massive challenges to adjust to, but I still recognize two of the most important CREAM identities: a stimulating environment for discussing science, and flexibility to set my own line of research and to explore collaborations"

TESTIMONIALS

SASHA WOODS

Researcher for Impact and Innovation at Earthwatch Europe

"CREAF are known for being specialists in interoperability, and of course they bring that expertise into any project they work on. More than that, however, they bring a passion for scientific research and a strong sense of collaboration to the team. They are excellent communicators, with their style of communication helping to make the complex topic of interoperability more accessible to a wider audience. It is an absolute pleasure to partner with them"

Earthwatch works with CREAM in the [Cos4Cloud project](#).

NEW PROJECTS

The [EOSC Focus project](#) supports the co-programmed EOSC Partnership in delivering its mission of establishing Open Science as the "new normal".

Joan Masó

"The EOSC Focus project intensifies our contribution to the construction of EOSC and our knowledge on FAIR geospatial data and standards as it **enablers of global research**. The collective work of Cos4cloud towards **integrating citizen observatories technologies** in the European Open Science Cloud opened us **new horizons**, becoming involved in the EOSC Task Forces that are helping to define how EOSC will work."

Kaori Otsu

"EOSC Focus will become the hub of key stakeholders in the European research environment to establish a federated infrastructure **enabling open sharing of scientific results**. The highlighted objective is to support the technical development and interoperability for updating the Strategic Research and Innovation Agenda (SRIA), in collaboration with a wide range of research communities across the diverse European regions and disciplines."

 **AGENDA**

1st edition of the Master in Health & Science Management

2022-2023

Do you want to help shape the future of science, technology and medicine? We are pleased to announce the creation of the **new Master in Health & Science Management** and the collaboration of CREAM in this amazing joint initiative between Universitat Autònoma de Barcelona, Facultat de Biociències & Vall d'Hebron Institute of Oncology (VHIO).

13th SERE CONFERENCE
5th – 9th SEP 2022
ALICANTE, SPAIN

13th European conference on ecological restoration

Monday 5 - Friday 9th September 2022
Onsite & online

Some CREAM researchers will present both posters and oral communications in the Conference. Prof. Espelta is also co-organizing a symposium with INRAE researcher Arndt Hampe. Have a look at the programme!<https://www.cream.cat/events/events/13th-european-conference-ecological-restoration>
