FERRAN SUNYER I BALAGUER

Professor Arnold Dresden
American Mathematical Society

Dear Professor Arnold Dresden: I have duly received your est. letter of July 13th, 1949 with which you were kind enough to advise me that the American Mathematical Society were willing to lend me some books from their library, paying of course all expenses in sending here and returning there the aforesaid books.

Since it is quite impossible for us in Spain to prepay postage from the States to this country, I thought that perhaps a convenient solution could be found, if, - when paying my membership-fees -, I should send a larger amount from which the expenses of sending the books to me could be deducted. On the other hand, postage on Books, when returned, would be paid direct, in Spanish money, in this country.

I shall be very thankful indeed for your kind reply at your early convenience, advising me whether my proposal is acceptable to the American Mathematical Society, indicating me at the same time the amount that you think will be necessary for covering these expenses in that country.

Thanking you for all your great kindness and trusting to be excused the trouble I am giving you, I wish to remain

yours sincerely:

Ferran Sunyer i Balaguer
