

SIR EDWARD COLLINGWOOD, C.B.E., F.R.S.

LILBURN TOWER,
ALNWICK,
NORTHUMBERLAND.
Tel. WOOPERTON 226.

25 February 1968

Dear Madam,

It was with deep sorrow and regret that I learned your sad news of the death of your brother Professor Sunyer Balaguer. I had, as you know, exchanged publications with him for many years; and I had intended to send him a copy of my recent book on the Theory of Cluster Sets written in collaboration with Professor A.J. Lohwater, which I thought might interest him. I always looked forward to receiving the rather beautiful Christmas cards in the form of fine drawings which you used to send me on his behalf and I have carefully preserved them all. I shall keep them now as a memento. I notice they are all signed M. Cardona.

Your brother was a mathematician of great distinction who did much important work in his chosen field of classical analysis. He was certainly one of the leading analysts in Spain and was regarded with great respect abroad. I learnt something of his physical disabilities from Professor Miloux

and this knowledge enhanced my admiration for his achievements. That he should have done so much, even with the magnificent support I know he received from his family, was very remarkable and showed extraordinary courage and determination as well as intellectual qualities of a very high order. You must be proud of what he achieved and of the support you were able to give him to make his achievement possible.

May I express to you my very deep sympathy with you in your grievous loss which is also a grievous loss to science which is felt by all his colleagues in England. May I also say that I much appreciate your having sent me news of this sad event.

Yours sincerely

E. F. Colingwood -

Senosa M. Carlona Balaguer.
