Prof. P. Kr. Kamthan  
9, Kaiser Bagh  
Lucknow  
India

Dear Professor Kamthan,

With reference to your wish to amplify your studies here I have communicated with the "Research Council" of Spain and they require your "Curriculum Vitae" together with a formal request which states the work which you wish to do here and the time needed and the economic help required. With this the Council can decide the case.

With regard to your letter of the 2 inst I am of course pleased to receive any paper of yours. However our journal "Collectanea Mathematica" has a large number of papers awaiting publication and so I will try to have yours published in "Revista Hispano Americana" of Madrid. Although I do not know whether this journal also has perhaps a number of originals waiting.

Your first paper accepted for publication in "Collectanea Mathematica" do not will probably appear before December.

The translations of my papers into English I will send you as soon as I have time to do it but at the moment I am extremely ~~much~~ busy.

In view of the above you will write me directly and I will take the necessary steps with the "Research Council."

With kindest regards

I am,

Yours sincerely
