Dear Professor Kamthan,

Your paper "MEAN VALUES OF ENTIRE FUNCTIONS (II)" seems to me interesting in principle. However I think there is some small error in the proof of theorem 2. As I am at present on holiday at my summer home here, it is impossible to consult the bibliography you cite, and so until my return to Barcelona I shall not be able to give you a definite opinion. As I shall be here for some time yet, and you may think it strange to hear nothing from me this letter is only to explain the reason for the delay

With kindest regards,

I am,

Yours sincerely

F. Sunyer Balaguer
