Dear Colleague,

In consonance with your kind wishes expressed in your favour of the 6th ult. I have pleasure in advising you that I immediately got in touch with the librarian of the Real Academia de Ciencias of Barcelona and was assured that they will write you directly in order to establish an interchange of the publications of the said Academy and those of the American Mathematical Society

Trusting that you will find this satisfactory, I wish to remain
yours sincerely :

P. Sunyer i Balaguer
