Dear Sir:

According to your wishes expressed in your welcome letter data 9 last February, I send you the principal results I obtain in the work untitled values of entire functions represented by gap Dirichlet series

About the same theme I shall publish very soon a broad paper in the Revista de la Academia de Ciencias de Zaragoza and the paper I presented in the meeting of the American Mathematical Society, of which you had notice, will be published too, if the redaction thinks it is convenient, in the Proceedings of the A.M.S. As soon as I have the issues of this two papers I shall remitte them to you very willingly.

I include a copy of two notes in which I indicate a similar results to the over mentioned, But in the Taylor series, and another copy too, without any connexion with the former in wich it is studied the representation by Dirichlet series.

In this way, I should be very grateful to you, if when publishing your works and results, you are kind enough to send me a annex as I have

done.

I wish to remain
yours sincerely
