Professor Ferran Sunyer I Balaguer
University of Barcelona
Meeting of the American Mathematical Society
Columbia University
New York, N.Y.

Dear Professor Balaguer:

May I introduce myself as an Instructor in the University System of Georgia. At the present time I am teaching here in North Georgia College.

While looking through the Program of the Society meeting to be held in New York City I noticed your paper on gap Dirichlet series. I have become interested in generalized Dirichlet series and plan to write a Dissertation on this subject. I would greatly appreciate an abstract of your paper and any comments which you will pass on to me about this topic, and in general any comments on generalized Dirichlet series which you have.

Thanking you for any considerations, I remain

Very truly yours,

Bradford F. Hadnot
