Dear Professor Sunyer i Balaguer:

The referee of your paper recommends it for publication, with the suggestion that you should explain that you are using Mandelbrojt's notations. I have added a note to this effect, ~~and~~ made a few stylistic changes, and shortened the title. If you approve of my changes, please return the manuscript to me; it is not necessary to re-type it.

I also enclose a correction by Rahman, to whom I communicated your comments. I should be grateful if you would look it over and see if the correction is correct.

In addition, I recently received a paper by Srivastava in the same field. I should appreciate it if you would be willing to act as referee of this paper; perhaps you will be glad to see the results before publication (if they are worth publishing).

Sincerely yours,

R. P. Boas, Jr.
