Barcelona april 20, 1949

Prof. J. F. Pitt
New York

Dear Professor, ^{paper}

I am working on the generalization to the Dirichlet series of certain results obtained for the Taylor series and, in order to find this generalization it will be very useful for me to read your ^{paper} report which appeared in American Journal of Mathematics Vol 50. 1928. pp 73-86. I shall be very grateful, therefore, if you can kindly send me a

copy of this Report, not having been able to find it in any of the Barcelona Libraries.

In order to show you the subjects I am mailing you herewith a copy of the Notes appearing in the C. R. of the Paris Academy, in which Notes I have exposed the aforementioned results for the Taylor series.

I shall be very grateful indeed for your great kindness and hoping to be advised of the amount to be remitted for the Report, I wish to remain yours sincerely:

F. Sunyer i Balaguer

F. SUNYER i BALAGUER.
