Professor F. Sunyer Balaguer,
Angel Giumera 36, pral 2^a
Barcelona-17,
SPAIN.

Dear Professor Balaguer:

I hope you might have received my letter of July 28 where I had made certain clarifications regarding your answer to the convexity of $\log A_{\delta}(\sigma)$ and the solution of the result

$$A_{\delta}(\sigma, f^{(s)}) \leq \frac{K}{n^{2\delta}} A_{\delta}(\sigma+n).$$

May I request you about your reply. Further, in all my three papers to be published by your journal, kindly make the following change of address:

Professor P. K. Kamthan,
Department of Pur Mathematics,
University of Waterloo,
WATERLOO, Ontario,
Canada.

With kindest regards,

Sincerely yours,

P. K. Kamthan
