29 June 1965

Dear Professor Balaguer

Thanks for your letter.

If you were to go as a visitor to Lawrence or a similar place the duties would be subject to discussion. I don't see why you should not lecture in French. Graduate students have to learn some written French and might like to learn it and a mathematics course at the same time. But the arrangement might be confined to research as far as a formal commitment was concerned.

There is always a great deal of discussion about these things. I was in negotiation with four places before arranging my own Sabbatical leave.

So even if Kansas find they cannot make a suitable arrangement with you Professor Shah will sometime or other meet with another possibility.

I hope to leave in a few weeks time and am very busy.

Yours sincerely

A. J. Macintyre
