Dear Professor Sunyer:

I am delighted to hear of the well-deserved recognition bestowed on your work by the Institut d'Estudis Catalans. We are very pleased indeed to have been associated with this mathematical research and extend to you our warmest congratulations. We look forward to seeing the prize-winning paper and also the monograph you mention in your letter of 26 April 1966.

We should receive two reprints of each of these publications when they are available. If you expect a long delay in publication, we would very much appreciate a chance to see a manuscript copy beforehand.

With very best regards.

Sincerely yours,

LEILA D. BRAM
Head, Mathematics Branch
