Prof. J.E. Thompson
Minneapolis

Dear Professor Thompson,
I have seen in Bull. Amer. Math. Soc. November 1951 an abstract of your paper entitled Some studies of conformal mapping on the boundary. Since this topic interests me very much for my own research work, kindly advise me of the magazine or book where it will be published and if possible, advise me of some of the results obtained by you. Thanking you in anticipation for whatever you may do for me in this respect, I wish to remain, dear Professor,
your sincerely:

F. Sunyer y Balaguer
