Multidisciplinary Repositories for Open Access Data

UAB — Universitat Autònoma de Barcelona, Servei de Biblioteques

	UAB	CERN	Digital Science (Macmillan)	IQSS (Harvard University)	NCSU	Elsevier
1.Thematic and geographical area	Multidisciplinary UAB institutional repository	Multidisciplinary International	Multidisciplinary International	Multidisciplinary International	With emphasis on science and medicine International	Multidisciplinary International
2. Type of data (software, images, raw data…)?	All kind of formats and published documents: final research data, publications, gray literature, images, plain text ..	All kind of formats and published documents: publications, grey literature, images and audio, plain text …	All kind of formats: figures, datasets, images and audio, grey literature, filesets …	All kind of formats Certain formats with specific functions (Stata, SPSS, R, Excel, CSV….)	All kind of formats (excluding software) and with preference for open source formats	All kind of formats: plain text, images and audio, PDF, HTML…
3. Open, embargoed, restricted or closed data?	Open Temporarily embargoed	Open Closed Restricted Embargoed (Policies)	Open Closed (by default, until they are published) Restricted Embargoed	Open Restricted The description (title....) of a set of data is public but the files can be public or restricted. No information on embargoes	Open Embargoed	Open Closed (by default, until they are published) Restricted Embargoed
4. Approximate size of the files to submit?	Up to 5GB per dataset. For larger sizes, please contact with ddd.bib@uab.cat	Up to 50 GB per dataset. For larger sizes, please contact them	Up to 5GB	Up to 2GB. For larger files, please contact support@dataverse.org	Up to 1GB per file and 20GB per dataset (additional cost over 20GB)	Up to 10 GB
5. Licenses used to spread the data?	CC0. Can be changed by another CC	Allows a variety of licenses although we recommend open licenses. The description of the data is under CC0	-CC0 for data (*metadata* & *datasets*) -CC-BY for non data (audio, *papers*....) -MIT for code and software	By default CC0 , but it may be changed	CC0 (FAQ)	Allows a variety of licenses : CC-BY 4.0, CC-BY-NC, CC0 1.0, MIT, Apache 2.0, BSD 3 clause, BSD 2 clause, gplv3

6. Persistent identifier	URI	DOI	DOI	DOI	DOI	DOI
7. Conditions for depositing or removing content	To deposit content: UAB community with ORCID To remove content, contact with ddd.bib@uab.cat	It is allowed to withdraw the data explaining the reason. DOI and URL will be retained	Data can be deleted	Allows to delete datasets and files even though they have already been published	Data can be deleted only in specific cases by contacting curator@datadryad.org	It is allowed to remove the data before publishing. Once published, contact with Mendeley
8. Cost	Free of charge for the UAB community	Free. But by paying, it is possible to have more space (FAQS)	Free up to a certain size: -5GB for individual files -20GB of private space -Unlimited public space -10 collaborative spaces For more space, you should contact them	Free	120 $ for a dataset (up to 20GB) (Payment plans Data publishing charges)	Free. It's not rule out that in the future it have to be pay if certain limits are exceeded
9. Data linked to publications	It allows to add links to related documents	It allows to add links to related documents	It allows to add links to the full text or related documents	It allows to add links to related documents	-The data must be associated with a research paper, published or in publication process - Integration of publications (Submission integration)	No information
10. Preservation	Digital preservation policy (in Catalan and Spanish)	Data stored at CERN Data Center	Preservation (Preservation policies)	Harvard Dataverse Preservation Policy	Data stored at DataONE and DANS	Data stored at Amazon S3 and DANS
11. Document versions	It allows to have different versions of the final files	It allows to have different versions of a file (*DOI versioning*)	Allows different versions of a file already published	It allows to have different versions of a file	It allows to have different versions of a file	It allows to compare different versions of a file
12. Meets the requirements of European grants?	Pending approval	Recommended for European projects. Link H2020 research with OpenAIRE automatically	No information	No information	No information	No information

13. More information (URL)	**Sobre el DDD**	**FAQS** **Policies** Features About	**FAQS** **Features** Blog Tools About	**User guide** (general Dataverse) **Demo** (Harvard) **About** (general) Blog	**FAQS** **Terms of service** Wiki Blog	**FAQS** Terms of use
10. Others	- Download stats - Public data is seen in Google Scholar - Export quotations to bibliographic managers and social networks - Perpetual availability of published data	- Integration with ORCID and GitHub - Collaborative platforms (*Community collections*) - Allows you to export citations to bibliographic managers and social networks	- Integration with ORCID and GitHub - Collaborative spaces - Statistics of downloads - The public data is available at Google Scholar - Allows adding social networks links and links to your publications to your personal profile - Allows you to export citations to bibliographic managers and social networks - It allows to create collections with a common theme	- Application of open source (institutions and researchers can create their own Dataverse) - Integration with ORCID, HitHub and Google - Allows you to obtain the citation in XML, RIS or BibTeX format - Allows you to share a set of data in social networks	- Integration with ORCID - Statistics of downloads - Allows you to obtain the citation in RIS or BibTeX. And to share it in social networks	- The incorporation of files is very simple (just drag them) -Integration with Plotly, which allows graphical visualization of worksheets (for example excel files)

More information in the list of thematic repositories: http://www.re3data.org

Note: Developed from a working document by the support group to research at CSUC
