190 Associated Groups

# Presentation

Despite the current economic downturn, 2013 has been a year of consolidation for IIB Sant Pau. Our scientific production has advanced and our research groups have continued to produce new results and publications.

A significant milestone this year has been the organization of a wide range of courses and seminars, the objective of which was to promote awareness and interesting scientific activity at IIB Sant Pau, both inside and outside the Institute. The fruits of these efforts are evident in the new relationships that have been established among research groups, not only within the Institute itself but also externally, widening the scope of our researchers.

We have also managed to attract further private and public investment this year, and this has contributed substantially to safeguarding our independence. The involvement of all concerned, particularly the researchers, has boosted the continuity and growth of our lines of research.

A center like IIB Sant Pau that brings researchers from various institutions together can only be consolidated through the constant effort and commitment of all the professionals, from researchers to support staff, who work together each day. It is this dedication that provides continuity and makes IIB Sant Pau a leader in translational research in Catalonia and in Spain.

Jaume Kulisevsky  
IIB Sant Pau Manager

# IIB Sant Pau Scientific Structure

IIB Sant Pau has seven research areas that can be divided into two research lines: vertical, transversal and associated groups.

## **The vertical line has five main areas:**

- Cardiovascular Diseases
- Genetic, Metabolic and Inflammatory Diseases
- Haematological and Oncological Diseases
- Neurological and Mental Disorders
- Uronephrology and Experimental Surgery

## **The transversal line consists of two areas:**

- Epidemiology, Public Health and Healthcare Services
- Molecular, Genomic, Cellular and Kinetic-Dynamic Bases for Diseases and their Treatment

Activities in the transversal line complement and support research in the vertical line.

# Who We Are

The Sant Pau Biomedical Research Institute (IIB Sant Pau) conducts research into basic, clinical and epidemiological medicine and healthcare services. Ten entities cooperate to perform high-level research into new techniques and processes aimed at improving the quality of life of patients. Stakeholders include the following:

- Hospital de la Santa Creu i Sant Pau Healthcare Management Foundation
- Hospital de la Santa Creu i Sant Pau Private Foundation
- Hospital de la Santa Creu i Sant Pau Research Institute
- Autonomous University of Barcelona - Ageing Institute
- Catalan Institute of Cardiovascular Sciences
- Puigvert Foundation
- Blood and Tissue Bank
- Iberoamerican Cochrane Centre
- Barcelona-Sardenya Primary Health Care Centre
- Public Health Agency of Barcelona

IIB Sant Pau was founded in 2009 as an association of healthcare entities carrying out their own research. Throughout 2010, IIB Sant Pau became consolidated as a research centre, while continuing to implement an accreditation process as a Healthcare Research Institute with the Spanish Ministry of Science and Innovation. This accreditation was finally obtained in early 2011. The institutions participating in IIB Sant Pau, which together form a natural alliance for historical and geographical proximity reasons, jointly implement research activities and cooperate in other scientific areas. The cooperation between these institutes represents a qualitative leap in terms of fostering translational research projects that bridge the gap between basic and clinical research.

The knowledge developed in this kind of research is channelled to society by the application of discoveries to clinical practice and to healing patients. The most tangible benefits are the application of technology to health and the scientific communication of new knowledge. This research infrastructure also generates employment and spotlights Catalonia's contributions to biomedical research. The success as a research centre ultimately translates to patient health.

# Strategic Objectives

IIB Sant Pau's mission is to manage, promote, develop and communicate research into the health sciences.

To fulfil its mission, IIB Sant Pau has set itself a number of strategic objectives that guide its activities:

- Promote and consolidate relationships and knowledge exchanges between IIB Sant Pau researchers and with other public and private organizations, prioritizing the implementation of joint projects and the creation of multidisciplinary teams so as to strengthen alliances and implement translational research with a bearing on clinical activities.
- Organize courses, conferences, open days, seminars and workshops aimed at communicating scientific advances to society and at facilitating innovation and technology transfers to the productive sector.
- Organize and participate in continuous professional development, whether by developing teaching activities or arranging grant-aided stays abroad for researchers.
- Participate in developing policies aimed at coordinating biomedical research in Catalonia, while ensuring a strong presence in national and international research projects and networks of excellence.
- Acquire, maintain and optimize use of scientific and technological infrastructures and equipment.

# IIB Sant Pau Entities

## Hospital de la Santa Creu i Sant Pau Healthcare Management Foundation

The Hospital de la Santa Creu i Sant Pau Healthcare Management Foundation (HSCSP Healthcare Management Foundation) is a high-technology specialist care hospital performing patient care, teaching and research activities in the clinical, epidemiological and healthcare services fields. It offers accredited specialist and undergraduate health science training courses.

## Hospital de la Santa Creu i Sant Pau Research Institute

The Hospital de la Santa Creu i Sant Pau Research Institute (HSCSP RI) promotes, manages and communicates biomedical research conducted in the HSCSP. It raises and manages funds and other resources for health science research in the basic, clinical, epidemiological and healthcare service fields.

## Hospital de la Santa Creu i Sant Pau Private Foundation

The Hospital de la Santa Creu i Sant Pau Private Foundation (HSCSP Private Foundation), which owns the HSCSP, is responsible for building, improving and maintaining buildings and premises used for medical care and associated and complementary activities.

## Autonomous University of Barcelona (UAB) - Ageing Institute

The UAB, a leading university renowned for quality and innovation in research, coordinates an influential scientific and technological centre, called Esfera UAB, responsible for promoting new business projects. The UAB also projects its productive activity in such a way as to disseminate new knowledge in society.

The Ageing Institute, attached to this university, is a non-profit foundation governed by a board of trustees formed by the UAB, the UAB Foundation and the Agrupació Mútua del Comerç i de la Indústria. Its mission is to improve knowledge of different aspects related to ageing with the aim of enhancing the quality of life of older people and promoting actions that contribute to adapting society and people to the challenges of demographic change.

### Catalan Institute of Cardiovascular Sciences (ICCC)

The ICCC performs basic and clinical research into cardiovascular and heart diseases. The fact that it competes successfully at the international level enables it to avail of the infrastructure necessary to transfer basic research to the development of therapies and diagnostic methods, ultimately improving medical care for patients.

### Puigvert Foundation

The Puigvert Foundation has the aim of deepening medical knowledge and perfecting medical techniques in the field of research and treatment of urinary and male reproductive system disorders and diseases. More specifically, it performs urology, nephrology and andrology research, focusing particularly on medical care, teaching, training and studies.

### Iberoamerican Cochrane Centre

This independent, not-for-profit organization has as its main aim the promotion of medical practice based on the best available scientific evidence. To this end, it ensures that valid, useful, up-to-date and thoroughly reviewed information is made available for clinical and healthcare decision making.

### Barcelona-Sardenya Primary Care Centre

Part of the public healthcare system, this teaching and care centre provides primary care services in its catchment area of Barcelona and has a research unit which performs clinical trials and epidemiology studies.

### Public Health Agency of Barcelona

This autonomous body, created by the Barcelona Health Consortium, has as its main mission to analyse and monitor the health of the population of Barcelona with a view to improving health and preventing risk. It is also responsible for epidemiological surveillance and the provision of medical care to substance abusers. It has an excellent track record in the public health and applied research fields.

### Blood and Tissue Bank

The Blood and Tissue Bank is a public healthcare body which carries out patient care, teaching and research activities in the blood transfusion and tissue bank fields.

# Vertical Areas of Research

## Cardiovascular Diseases

The incorporation of new technologies that facilitate molecular profiling and gene regulation has led to innovative research into heart disease. The great diversity of the groups in this area gives research varied perspectives, whether in developing or testing the effectiveness of new biomarkers (as in the investigation of the metabolic and genetic bases of diseases) or improving the range of results and possible applications in short-term therapies.

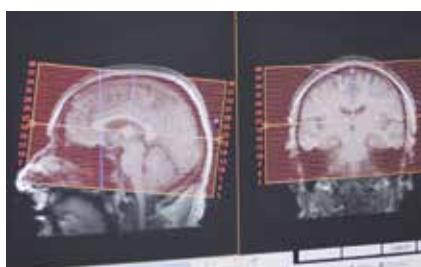

## Genetic, Metabolic and Inflammatory Diseases

Identifying the genes and mutations responsible for genetic diseases is an essential component of knowledge and understanding of the physiological bases of metabolic pathways and also in the development of new forms of treatment for common diseases affecting large proportions of the population, such as diabetes and obesity, known but with a hereditary diseases, infectious diseases (AIDS, tuberculosis, etc) and rare diseases (not well known but with a devastating impact on those affected).

## Haematological and Oncological Diseases

A broad range of research is conducted in this area, particularly in head-and-neck, breast, ovary, colorectal and haematological cancers, among others. Research covers a wide range of fields, with disciplines that include nanomedicine, new anticancer agents and predictive molecular markers. Initiatives of specific relevance include the GAIT (Genetic Analysis of Idiopathic Thrombophilia) project, a world pioneer in the identification of genes influencing the risk of thromboembolic disease, and research into antitumour immunotherapy in animals and humans.

## Neurological, Mental Disorders and Ageing

This area covers research in a broad range of disciplines. Besides the study of ageing and the most common neurodegenerative disorders such as Alzheimer and Parkinson, neurological research is also focused on stroke, neuroimmunology and neuromuscular diseases. Research into cognitive, affective, psychotic and personality disorders ranges from identification and evaluation of new therapeutic targets to neurogenesis and the effects of deep-brain stimulation. Research in this field has the support of the Drug Research Centre, which assesses the effectiveness of new drugs and therapies in humans.

## Uronephrology and Experimental Surgery

IIB Sant Pau promotes experimental surgery in the knowledge that this area has a promising future both as an independent research line and as a complement to general surgery. This interdisciplinary approach provides valuable new insights and ensures techniques and procedures of great clinical relevance. Current areas of interest include the development of minimally invasive techniques and the application of deep-brain stimulation in different pathologies. In the fields of andrology, urology and nephrology research, the Puigvert Foundation is a leading centre in Spain.

# Transversal Areas of Research

## Epidemiology, Public Health and Healthcare Services

Research in these fields aims to determine the magnitude and distribution and identify the determinants of public health problems in order to evaluate the effectiveness and efficiency of public interventions and prevention practices. This area also aims to reduce patient risk and make healthcare safer by promoting evidence-based medical practice and ensuring the use of conscious, explicit and rational decision making concerning patient care.

## Molecular, Genomic, Cellular and Kinetic-Dynamic Bases for Diseases and their Treatment

This area focuses on the structure of proteins associated with neurodegenerative diseases and inflammatory processes and on factors linked to the innate immune system. Research is also conducted in the area of osteoporosis, ageing-related macular degeneration and coagulation-cascade factors closely linked to cardiovascular disease and haemophilia. Such studies are vital to the understanding of diseases of the heart, blood and nervous systems and to advances in the fields of cancer and epidemiology.

# Associated Groups

This area includes HSCSP Research Institute groups that do not form part of IIB Sant Pau because they have not, as yet, been accredited by the External Scientific Committee.

## Steering Committee

### Chair

Dr. Alberto Salazar  
Hospital de la Santa Creu i Sant Pau Healthcare Management Foundation

### Members

Dr. Jordi Bachs  
Hospital de la Santa Creu i Sant Pau Private Foundation  
  
 Dr. Lluís Tort  
Autonomous University of Barcelona  
  
 Dr. Lina Badimon  
Catalan Institute of Cardiovascular Sciences  
  
 Mr. Martí Masferrer  
Puigvert Foundation  
  
 Dr. Jordi Sierra  
Blood and Tissue Bank  
  
 Dr. Xavier Bonfill  
Iberoamerican Cochrane Centre  
  
 Mr. Conrad Casas  
Public Health Agency of Barcelona  
  
 Mr. Jaume Sellarès  
Barcelona-Sardenya Primary Care Centre  
  
 Dr. Jaume Kulisevsky  
Hospital de la Santa Creu i Sant Pau Research Institute

## Executive Committee

### Chair

Dr. Jaume Kulisevsky  
IIB Sant Pau Manager

### Representatives of Associated Entities

Dr. Manel Trias  
Autonomous University of Barcelona  
  
 Dr. Ramon Mangues  
Hospital de la Santa Creu i Sant Pau Research Institute  
  
 Dr. Xavier Bonfill  
Iberoamerican Cochrane Centre  
  
 Dr. Juan Cinca  
Hospital de la Santa Creu i Sant Pau Healthcare Management Foundation  
  
 Dr. Gemma Craywinckel  
Hospital de la Santa Creu i Sant Pau Private Foundation  
  
 Dr. Lina Badimon  
Catalan Institute of Cardiovascular Sciences  
  
 Dr. Helena Isabal  
Puigvert Foundation  
  
 Dr. Jordi Sierra  
Blood and Tissue Bank  
  
 Dr. Carme Borrell  
Public Health Agency of Barcelona  
  
 Dr. Carlos Brotons  
Barcelona-Sardenya Primary Care Centre

## Internal Scientific Committee

### Chair

Dr. Jaume Kulisevsky  
IIB Sant Pau Manager

### Vice-Chair

Dr. Antonio López Pousa  
Chair, Clinical Research Ethics Committee

### 4 members designated by the IIB Sant Pau Manager

Dr. Antoni Salvà  
Autonomous University of Barcelona - Ageing Institute

Dr. Carlos Brotons  
Barcelona-Sardenya Primary Care Centre

Dr. Lina Badimon  
Catalan Institute of Cardiovascular Sciences

Dr. Sílvia Mateu  
Puigvert Foundation

### 2 members each representing IIB Sant Pau thematic areas

#### Cardiovascular Diseases

Dr. Jordi Ordóñez  
Hospital de la Santa Creu i Sant Pau:  
Cardiovascular biochemistry

Dr. Luis Vila  
Hospital de la Santa Creu i Sant Pau  
Research Institute: Vascular biology and  
inflammation

#### Genetic, Metabolic, Inflammatory and Infectious Diseases

Dr. Cándido Juárez  
Hospital de la Santa Creu i Sant Pau:  
Inflammatory diseases

Dr. Carlos Guarner  
Hospital de la Santa Creu i Sant Pau:  
Cirrhosis complications

### Haematological and Oncological Diseases

Dr. Josep Nomdedéu  
Hospital de la Santa Creu i Sant Pau:  
Haematological diagnosis

Dr. Jaime Prat  
Hospital de la Santa Creu i Sant Pau:  
Molecular cancer pathology

### Neurological, Mental Disorders and Ageing

Dr. Víctor Pérez  
Hospital de la Santa Creu i Sant Pau: Clinical  
psychiatry

Dr. Alberto Lleó  
Hospital de la Santa Creu i Sant Pau Research  
Institute: Neurobiology of dementia

### Urology and Experimental Surgery

Dr. José Ballarín  
Puigvert Foundation: Nephrology research

Dr. Manel Trias  
Hospital de la Santa Creu i Sant Pau:  
General and digestive surgery

### Epidemiology, Public Health and Healthcare Services

Dr. Gerard Urrútia  
Hospital de la Santa Creu i Sant Pau:  
Clinical epidemiology and healthcare  
services

Dr. Carles Ariza  
Public Health Agency of Barcelona:  
Evaluation of public health policies and  
programmes

### Molecular, Genomic, Cellular and Kinetic-Dynamic Bases for Diseases and Treatments

Dr. Jordi Sierra  
Blood and Tissue Bank: Generation of  
advanced treatments

Dr. José Manuel Soria  
Hospital de la Santa Creu i Sant Pau Research  
Institute: Genomics and bioinformatics for  
genetically complex disease

## External Scientific Committee

Dr. José López-Barneo  
Physiology professor  
Institute of Biomedicine of Seville (Spain)

Dr. Ángel María Carracedo  
Genomic medicine group researcher  
Institute of Legal Medicine  
Faculty of Medicine and Dentistry  
Santiago de Compostela University  
(Spain)

Dr. Vicente Vicente  
Haematology group researcher  
Faculty of Internal Medicine  
Murcia General University Hospital (Spain)

Dr. José Palacios  
Head of the pathology/anatomy  
Department  
Ramón y Cajal Hospital (Madrid, Spain)

Dr. Agustín Gómez de la Cámara  
Clinical epidemiology group researcher  
Doce de Octubre Teaching Hospital  
(Madrid, Spain)

Dr. John Louis McGregor  
Director of Research-INSERM Unit 689  
Cardiovascular Research Centre-  
Lariboisière Hospital (Paris, France)

Dr. Jordi Alonso  
Health Services Research Unit  
Hospital del Mar Municipal  
Institute for Medical Research (Barcelona,  
Spain)

Mr. Guillem López Casasnovas  
Professor  
Faculty of Economics and Business  
Sciences  
Pompeu Fabra University (Barcelona,  
Spain)

# Financial Data

## Public/Private Income Summary 2005-2013

## Income Statement year ending 31 December 2013

Income from activities	11,234,116
Services	3,435,878
Collaborations with partners and sponsors	448,897
Government grants	6,505,216
Other grants, donations and legacies	1,148,249
Repayment of grants, donations, etc	-304,124
Stocks and supplies	-1,388,522
Material and equipment for activities	-1,388,522
Other income	5,100
Additional and management income	5,100
Personnel expenditure	-7,995,917
Salaries	-6,283,016
Social security	-1,712,900
Other operating expenses	-3,629,883
External services	-3,049,299
Repairs and maintenance	-169,564
Freelance services	-451,631
Insurance	-78,406
Banking	-18,679
Sundry	-236
Other services	-2,330,784
Taxes	-16,548
Loss, deterioration and variation in provisions for operations	-22,964
Other operating expenses	-541,072
Depreciation of fixed assets	-1,115,140
Grants, donations and bequests transferred to results	914,047
Deterioration and gains/losses on disposal of fixed assets	-80,691
Gains/losses from disposal and other	-80,691
Other gains/losses	-1,122
Incidental expenses	-132,828
Incidental income	131,706
<b>OPERATIONAL PROFIT/LOSS</b>	<b>-2,058,010</b>
Financial income	531,535
From investments in equity instruments	0.00
Negotiable costs	531,535

<b>OVERALL PROFIT/LOSS</b>	<b>-1,683,576</b>

In euros

# Scientific Outcomes

Outcomes for IIB Sant Pau's scientific activities are summarized in the following pages as follows:

- **Publications with an Impact Factor (IF):** This figure shows IIB Sant Pau publications over the years with an impact factor, one of the most important indicators used to identify the relevance of a science journal in its field and to give an approximate idea of the quality of the publications of researchers.
- **Publications by Thematic Area:** This figure reflects the relative importance of each of the thematic areas covered by IIB Sant Pau.
- **Publications by Quartile:** This figure depicts IIB Sant Pau publications by quartiles that reflect the importance of the scientific journal. The journals in a specific category are listed in descending order according to their impact factor and the list is divided into four equal quartiles. Thus, journals in the top quartile (Q1) are the most important journals in their category.
- **Research Resources and Training:** These tables show the list of institutions providing support to IIB Sant Pau and sharing its vision of research.
- **Doctoral Theses:** This table reflects the potential of up-and-coming IIB Sant Pau staff members and their ability to generate new ideas and drive new projects.
- **Patents:** This table shows the patents requested by IIB Sant Pau researchers between 2009 (foundation year) and 2013.
- **Technology Transfer Agreements:** This table reflects agreements signed between 2009 (foundation year) and 2013.

# Research Support Services

The main objective of the research support services, which are divided into two blocks, is the sharing and pooling of resources as an effective way to optimize funds and boost research.

## Research Support Services

These provide facilities and equipment that are exclusively available to any specific research group but are shared among groups at all institutions within IIB Sant Pau.

IIB Sant Pau has 13 services:

- Clinical Trial Documentation Management
- Research Institute Management
- Tumour Bank
- Quality and Information Systems Unit
- Radioactivity Unit
- Centre for Drug Research (CIM Sant Pau)
- Central Clinical Research and Clinical Trials Unit (UCICEC Sant Pau)
- Animal Housing
- Transfer and Innovation Unit
- Author Editing
- Communications Coordination Team
- Clinical Research Ethics Committee
- Clinical Research Ethics Committee Secretariat

## Scientific and Technical Service Platforms

The main aim of these support services is to manage, allocate and optimize the top-level research resources available to IIB Sant Pau. They provide researchers with support and scientific and technical assessment and advise on the most appropriate methods to prepare samples and to plan optimal work flows for each objective.

IIB Sant Pau has 5 platforms:

- Genomics and Transcriptomics Platform
- Functional and Cellular Analysis Platform
- Microscopy and Immunohistochemistry Platform
- Innovation Platform i2Health Sant Pau
- Biobank

The platforms also have access to equipment available for general use to complement their functioning.

## Clinical Trial Documentation Management

**Functions:**

- > Manage and supervise all documentation associated with active clinical trials in the experimental phase and destruction of documentation for terminated clinical trials located in the external archive.
- > Store the supplies until the end of the studies, when they are destroyed or recycled.
- > Oversee and manage documentation of completed trials for the Centre for Drug Research (CIM)
- > Maintain and update the clinical workstation database and manage clinical studies.

- > Manage restricted access by clinical trial monitors to the clinical workstation.
- > Supervise data processing and management.
- > Coordinate researchers and monitors; draw up agendas for meetings and study monitoring.
- > Provide logistical support to the cold area and the clinical materials store associated with clinical trials in the experimental phase.
- > Ship biological samples to central laboratory services.

**Facilities:**

Several areas have been designated to implement these functions:

- > Head office and administration area
- > Data processing and management area

- > Clinical trial monitoring meeting rooms
- > Documentation filing area
- > Cold room.
- > Archive.

## Research Institute Management

**Functions:**

- > Management of HSCSP Research Institute and IIB Sant Pau finances: manage accounts and fiscal matters; design, administer and control budget-related issues; manage and monitor financial and material resources.
- > Management of public body funding requirements: fulfil obligations imposed by government and official regional and state entities; ensure compliance with current fiscal, financial, labour and legal regulations and with HSCSP Research Institute–IIB Sant Pau management policies.
- > Administration and management of activities, providing management support for research groups in different areas; project

management, human resources, procurement, invoicing, control and monitoring of projects, general administration, management of services (courses, travel and continuing professional development).

- > Design, elaboration, development and maintenance of information systems for management area units, both for HSCSP Research Institute–IIB Sant Pau and research groups.

**Coordinator:**

Jordi Virgili  
jvirgili@santpau.cat

**Staff:**

Susana Daniel  
Catalina Pérez

## Quality and Information Systems Unit

### Functions:

> General:

- Support management with strategic projects (accreditation, CERCA evaluation, biobank legalization, evaluation of research groups, etc).
- Manage IIB Sant Pau research groups: creation, dissolution and changes in composition.
- Manage new laboratory works performed under the contingency plan.
- Implement the functional plan for the new research building.
- Support management of the IIB Sant Pau Internal Scientific Committee, External Scientific Committee, Executive Committee and Delegate Committee.
- Implement policies for the dissemination of research among the general public and especially among secondary pupils and health science university students.
- Manage the HSCSP Research Institute Biosafety Committee.
- Participate in the Animal Experimentation Ethics Committee.
- Participate in the UCICEC Sant Pau Technical Committee.
- Represent the HSCSP Research Institute before external organizations.

> Quality:

- Implement policies to improve quality under GLP, GCP, GMP and ISO 9001 standards.

- Lead the quality assurance programme at CIM Sant Pau and in clinical trials where the HSCSP Research Institute acts as sponsor.
- Oversee auditing for protocols, databases, experimental phases, facilities, processes and final reports for clinical trials.
- Oversee supplier audits.
- Monitor non-conformity in internal and external audits.
- Draw up own SOPs and provide support for SOPs preparation by other units.
- Establish mechanisms to assess quality and good scientific practices in IIB Sant Pau.

> Information systems:

- Design mechanisms and implement tools for the collection and organization of data and information to feed decision making.
- Manage and transform information and data to contribute to the fulfillment of objectives and strategies.
- Respond to external requests for data and information (statistical surveys, SIRECS, etc).
- Implement policies to improve information systems.
- Develop new indicators of use for the institution.
- Update research group staff details on the intranet.

# Research Support Services

**Coordinator:**

Montserrat Ribas  
mribas@santpau.cat

**Supervisor in charge:**

Josep Julve  
jjulve@santpau.cat

## Radioactivity Unit

**Functions:**

- > The Radioactivity Unit provides groups with specific research laboratories in which to work with radioactive isotopes in liquid form. These areas are fully equipped and adapted for the handling of radioactive material and apply optimum measures for the safety and radioprotection of staff and the environment.
- > This area has been authorized by the nuclear safety authority and its staff supervise compliance with the corresponding laws, guidelines and regulations..

**Facilities:**

The Radioactivity Unit has the following facilities:

- > 1 room for radioactive material storage.
- > 7 equipped laboratories, one of them refrigerated.
- > 1 room for gamma- and beta- counters.
- > 1 room for radioactive waste storage.
- > 1 room for controlled disposal of radioactive waste.
- > Radioactive liquid waste containers for controlled radioactive waste disposal.

- > Services include support for:

- In vitro labelling of proteins, lipoproteins and liposomes.
- Cellular proliferation and toxicity.
- Nucleic acid labelling.
- Immunoassay techniques.
- Determination of enzymatic activities using radiolabelled substrates.
- Analysis and separation of labelled molecules.
- Cellular cholesterol efflux.
- Metabolism in vivo.

- > Shielding accessories for radiation safety (table top shields, shielded containers, protective equipment, etc)

- > Portable radiation and environmental contamination detectors.

- > 1 ventilated rack for in vivo studies.

- > 2 chemical safety cabinets for gas extraction.

- > 1 vertical laminar air flow cabinet for cell cultures.

- > 1 CO<sub>2</sub> incubator for cell cultures.

**Manager:**

Jaime Prat  
jprat@santpau.cat

**Coordinators:**

Lluís Catasús  
lcatasus@santpau.cat  
Íñigo Espinosa  
iespinosa@santpau.cat

**Staff:**

Maria Jesús Nagel  
Jorge Pena

## Tumour Bank

**Functions:**

- > Create and maintain a collection of healthy and diseased tissue samples in optimal conditions for use in research projects that may include morphology, phenotype and molecular analyses and which may also be used in diagnosis.
- > Guarantee the quality of stored material by means of morphology analyses of samples,

assuring anatomical and pathological correlation with definitive diagnoses for tissues.

- > Supply material to research groups on a non-profit basis (investigators may apply for samples as long as their project complies with current regulations and is scientifically, technically and ethically viable).

**Equipment:**

- > 4 fast-freeze apparatus (isopentane bath, stored at -50°C).
- > Storage and cryopreservation systems: 2 freezers -80°C and 1 deposit for liquid nitrogen.
- > 1 cryostat.
- > 1 manual tissue arrayer.

## Centre for Drug Research (CIM Sant Pau)

### Functions:

Perform clinical drug trials and/or clinical research in compliance with methodological, ethical and legal requirements in the context of international GCP guidelines concerning:

- > Clinical trials that are not of therapeutic interest for participants (phase I, special populations, psychopathological research, biomarkers, proof of concept).
- > Clinical trials in neuropsychopharmacology.
- > Clinical trials in initial developmental phases.

### Facilities:

Three separate work areas have been designated for the trials:

#### Healthcare:

- > Admission zone.
- > 24 beds distributed in 4 units: trials in healthy volunteers and patients.
- > 2 individual rooms for CNS studies.
- > Ambulatory zone.
- > 4 consulting rooms for complementary testing, mainly related to CNS.
- > 3 cubicles to evaluate psychomotor performance.

#### Logistical support:

- > Rest area for clinical trial participants with bathrooms and kitchen.
- > Areas for the preparation, centrifugation and separation of biological samples.
- > Cold room.
- > Archives.

#### Management, administration and data processing:

- > Offices.
- > Area for monitors.
- > IT equipment for clinical trial activities of a non-experimental nature.

## Communications Coordination Team

### Functions:

- > Coordinate IIB Sant Pau communications.
- > Prepare IIB Sant Pau annual reports and other communication materials.
- > Provide an effective news distribution service and generate positive media coverage.
- > Respond to media enquiries.
- > Update website content.

- > Establish standards concerning graphics and linguistic style to ensure visual uniformity in all IIB Sant Pau communications.

### Coordinators:

Pablo Ayesta  
payesta@santpau.cat

Sara Garcia  
sgarciago@santpau.cat

### Staff:

# Research Support Services

## Central Clinical Research and Clinical Trials Unit (UCICEC Sant Pau)

### Functions:

Comprehensive methodological, regulatory, administrative, financial and practical support to researchers developing independent research projects (not supported by the pharmaceutical industry).

#### **Coordinator:**

Rosa M. Antonijoan  
rantonijoana@santpau.cat

#### **Staff:**

Claudia E. Delgado, Ma Teresa Garrido, Nàdia Llaver, Enrique Peña, Romy Rodríguez

#### Knowledge Management:

- > One-stop information and advice for independent research group projects.
- > Communications point for researchers and technical units.
- > Notification of adverse events.
- > Knowledge management:
  - Project dimensionality and viability studies.
  - Project needs analyses.
  - Documentation preparation advice: protocol, informed consent, final report.
  - Identification of spinoff projects.
  - Exploitation of research results.
  - Publication planning.
  - Training needs analyses.

#### Methodological and statistical support unit:

- > Study design.
- > Data collection.
- > Data processing.
- > Statistical reports.
- > Electronic CRF validation and management.
- > Documentation and reports.

#### Documentation, archiving, monitoring and follow-up unit:

- > Document drafting: EUDRA/ requests / follow-up.
- > Monitoring .
- > Initial, monitoring and final reports.
- > Processing of applications, amendments and clarifications regarding clinical trials, post-authorization studies and other studies: Spanish Medicines and Health Products Agency (AEMPS), clinical research ethics committees, health authorities, etc
- > Custody of the sponsor's master file.
- > Other communications to ethics committees, the Catalan government and the AEMPS.

#### Finance and administration unit:

- > Management of clinical trial contracts with participating centres when the HSCSP Research Institute is the sponsor.
- > Management of collaboration agreements regarding funding with laboratories/companies.
- > Management of clinical trial-related contracts (CROs, E-CRFs, statistics, rights transfers, etc.).
- > Management of clinical trial-related client and supplier invoices.
- > Management of clinical trial insurance policies for HSCSP Research Institute as sponsor.
- > Preparation of financial reports for the submission of studies to ethics committees.
- > Payment of AEMPS clinical research fees.
- > Collaboration with HSCSP Research Institute Projects Unit to financially evaluate grants in the presentation phase.

**Coordinator:**

M. Antònia Rubio  
arubioc@santpau.cat

**Staff:**

Animal welfare advisor:  
M. Antonia Rubio

Veterinary surgeon:  
Eder Fredy Mateus

Animal care workers:  
Margarita Domingo, Luis Garcia

## Animal Housing

**Functions:**

- > Produce different small rodent strains in-house for research and teaching purposes.
- > Manage the purchase and transportation of animals from domestic and international breeding and supply centres.
- > Receive and house incoming animals and deliver them to users once quarantine and health requirements are met.
- > House and maintain experimental animals while ensuring their welfare.
- > Regularly check rodent health status.
- > Perform twice-yearly health checks.
- > Clean and sterilize of materials and maintain the pathogen-free area.
- > Feed animals according to experimental protocols.
- > Provide support for animal surgery, anaesthesia and euthanasia.
- > Supply laboratory materials and collect samples.
- > Monitor mating, mating plugs, pregnant females and weaning.
- > Provide healthcare.
- > Advise the animal welfare expert.
- > Perform periodic health checks with sentinel screening in all rooms.
- > Maintain monitoring protocols.
- > Ensure the hygiene and safety of facilities and equipment.
- > Manage waste disposal.
- > Attend training in relation to all protocols developed in the animal house.
- > Advise on the drafting of research projects involving the use of animals.
- > Attend training in relation to all protocols developed in the animal house.
- > Advise on the drafting of research projects involving the use of animals.

**Facilities:**

Conventional Animal Facility:

- > Mice rooms (2), total capacity 2400.
- > Rat room, capacity 200.
- > Quarantine room.
- > Washroom.
- > Clean-storage room.
- > Standard storeroom.
- > Surgery room.
- > CO<sub>2</sub> euthanasia equipment.
- > Treatment room.
- > Office.
- > Shower.
- > WC.

Pathogen-free area:

- > Pre-changing room.
- > Changing room.
- > Air shower.
- > Work room.
- > Mice room and changing area.
- > S.A.S.
- > Autoclave and washing area.
- > storage room.

## Transfer and Innovation Unit

**Functions:**

- > Promote an innovation culture and education.
- > Develop a framework for innovation management.
- > Evaluate technological opportunities originating with IIB Sant Pau staff, detect inventions and assess their protection, transfer and commercialization.
- > Manage the intellectual property of the institution.
- > Establish links with the business sector.
- > Assist researchers in developing projects with companies.
- > Manage competitive official innovation announcements.
- > Manage competitive European official research announcements.
- > Develop technological platforms.

## Clinical Research Ethics Committee

The Ethics Committee for Clinical Research (CEIC) of the HSCSP Healthcare Management Foundation is an independent body that, according to the laws that accredit it, has the mission to ensure the protection of rights, safety and welfare of the subjects involved in a trial and provide public assurance of that

**Its specific functions are:**

- > Evaluate the methodological, ethical and legal aspects of:
  - Clinical trials with drugs and health products.
  - Observational studies.
  - Pharmacogenetic and pharmacogenomic studies.
  - Studies evaluating surgical or psychological treatments.
  - Studies involving invasive procedures or the use of health data or biological samples.
- > Evaluate the relevant amendments in projects approved by the CEIC.
- > Monitor of clinical drug trials and clinical research with medical devices.

protection, protection by reviewing the protocol, the suitability of the researchers, facilities, equipment and methods to be used in obtaining and documenting the informed consent of the subjects.

**Coordinator:**  
Milagros Alonso  
[malonsoma@santpau.cat](mailto:malonsoma@santpau.cat)

**Administrative Staff:**  
Vanesa Mansilla  
Marisol Mogollón  
Albert Querol

## Clinical Research Ethics Committee Secretariat

The Clinical Research Ethics Committee is an independent agency whose mission is to protect the rights, safety and wellbeing of persons participating in HSCSP research projects which may entail physical or psychological harm. The Secretariat of the Clinical Research Ethics Committee evaluates the methodological, ethical and

legal aspects as well as any other relevant information regarding all research projects listed in the minutes of the Committee's meetings. It also advises researchers in the HSCSP and the HSCSP Research Institute regarding the preparation and presentation of clinical research projects.

### Functions:

- > Receive, log and validate documentation for clinical research projects submitted to the Committee for evaluation.
- > Arrange and call Committee meetings, inform members of the agenda and provide them with copies of protocol summaries and patient informed consent and information sheets.
- > Prepare and submit reports to the Committee containing a methodological, ethical and legal description and analysis (and any other relevant information) of the research projects listed in agendas.
- > Act as a reference point in communications with and between researchers, sponsors, medical administrators and managers and healthcare authorities regarding all aspects of the activities of the Committee and of the research projects evaluated by the Committee.
- > Prepare and sign the reports of the Committee and communicate its decisions to the corresponding sponsors and researchers.
- > Prepare the minutes of meetings and distribute them to Committee members within the established period.
- > Manage all documentation associated with the operations and activities of the Committee and with the research projects evaluated by the Committee.
- > Administer contracts for all clinical trials to be performed at the HSCSP.
- > Certify the actions of the Committee.
- > Prepare the annual report of the Committee.
- > Ensure compliance with the SOPs of the Committee.

**Coordinator:**  
Carolyn Newey  
[cnewey@santpau.cat](mailto:cnewey@santpau.cat)

## Author Editing

### Functions:

- > Review and edit research papers, abstracts, posters, presentations and other scientific documents written in English.
- > Assist in the preparation and delivery of presentations, lectures, speeches, etc in English for meetings, conferences and similar events.

eserrano@santpau.cat

## Genomics and Transcriptomics Platform

### > GENOMICS LABORATORY

#### Functions:

- > Next-generation sequencing: full transcriptome genotyping, RNA-Seq, Ampli-Seq, ChIP-Seq, amplicon sequencing and sequencing and identification of microorganisms.
- > Capillary sequencing: mutational analysis, microorganism identification and validation of cell lines.
- > Analysis of fragments: microsatellite instability, loss of heterozygosity studies in pathological conditions, mutation detection and genotyping, quantification of gene copy numbers, methylation studies and studies of polymorphisms associated with disease states.

#### Equipment:

- > Ion Torrent Personal Genome Machine.
- > Ion OneTouch (TM) System.
- > 3130xl Genetic Analyzer capillary electrophoresis sequencer.

### > TRANSCRIPTOMICS LABORATORY

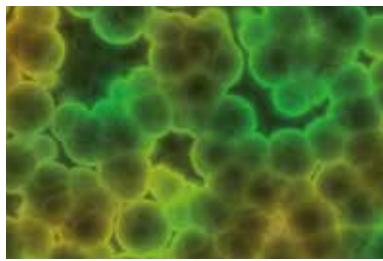

#### Functions:

- > Hybridization and analysis of Affymetrix microarrays:
  - RNA and micro-RNA expression profiles in normal conditions and in diseases and treatment.
  - Loss of heterozygosity, copy number analysis and genome-wide mutation detection.
  - Genome-wide linkage and association studies.

- Real time quantitative PCR (gene expression, allelic discrimination).
- Nucleic acid quality assessment.
- Quantification of nucleic acids (Bioanalyzer, Nanodrop).

#### Equipment:

- > Affymetrix array platform (upgrade 7G).
- > Real time quantitative PCR ABI 7900HT (384-well plates and TLDA).
- > Bioanalyzer 2100
- > Nanodrop 2000.

[msolerC@santpau.cat](mailto:msolerC@santpau.cat)

Cell Culture Laboratory:

Rosa Antón  
[RAnton@santpau.cat](mailto:RAnton@santpau.cat)

## Functional and Cellular Analysis Platform

### > FLOW CYTOMETRY LABORATORY

**Functions:**

- > Conventional cytometry in homogenous (cell line) or heterogeneous (biological fluid) samples:

- Detection of the presence of proteins and determination of cell populations (cell markers).
- Studies of signalling cascades (cell cycle, cell proliferation, apoptosis, intracellular calcium determination).
- Quantification of transfection efficiency.
- Phenotype changes and relative and

absolute presence.

- Production of mediators.
- Detection of minority populations.

> Cell separator (separation of cell populations in sterile conditions):

- Microarrays.
- Western blot.
- Cell cultures.
- RT-PCR.

**Equipment:**

- > FACSCalibur (BD) conventional flow cytometry.
- > MACSQuant (Miltenyi Biotech) conventional flow cytometry.
- > FACSaria (BD) flow cytometry cell sorter.

### > CELL CULTURE LABORATORY

**Functions:**

- > To make adequate facilities and equipment available to researchers working with cell cultures in a BSL2 laboratory.

**Equipment:**

- > 4 CO<sub>2</sub> incubators.
- > 2 hypoxia incubators (2-21% O<sub>2</sub>).
- > 2 IIA biosafety cabinets (BSL2).
- > 2 hypoxia cabinets (BSL1).
- > Culture baths.
- > Olympus inverted microscope with high-resolution colour camera.
- > Refrigerated centrifuge.
- > Fridge 4°C and freezer -20°C.
- > Thermo-desinfector and autoclave.

Microscopy Laboratory:  
Eva Companys  
eCompanysa@santpau.cat

## Microscopy and Immunohistochemistry Platform

### > IMMUNOHISTOCHEMISTRY LABORATORY

#### Functions:

- > Tissue processing.
- > Microtome paraffin-block cutting and OCT.
- > Block cutting with microtome/cryostat.
- > Automatic immunostaining (simple and dual).
- > Staining (Giemsa, haematoxylin-eosin, trichromic, PAS, Oil Red, etc).
- > Preparation of tissue arrays.
- > Image acquisition and analysis using high-resolution colour microscopy and specialist software.

#### Equipment:

- > Tissue processor (Sakura).
- > Paraffin bath (Sakura).
- > Microtome (Microm).
- > Cryostat (Leica).
- > Immune autostainer AS48 (Dako).
- > Autostainer (Sakura).
- > Semiautomatic tissue arrayer.

### > MICROSCOPY LABORATORY

#### Functions:

- > Confocal microscopy in live and fixed cells:
  - Immunofluorescence of 2 to 5 fluorochromes.
  - Reconstruction of 3D and 4D images.
  - Colocalization studies.
- > Inter- and intra-interactions (FRET and FLIM).
- > Molecular diffusion times (FCS).
- > Conventional fluorescence microscopy (immunofluorescence with 1 or 2 fluorochromes, FISH) in live and fixed cells.

#### Equipment:

- > Confocal multispectral Leica SP5 AOLS with high-resolution scanning system and high-speed tandem scanning, FLIM/FCS modules and time-lapse incubation system.
- > Zeiss digital time-lapse microscope.

## Biobank

**Functions:**

- > Create and maintain a collection of healthy and diseased biological human samples in optimal conditions for use in research projects.
- > Facilitate collaboration projects by putting investigators in touch and making biological human sample cession possible.
- > Supply (non-profit) human biological samples to research groups, in accordance with legal regulations.

> Obtain, process and store human biological samples in accordance with international standards, maintaining sample traceability and security in accordance with legal requirements.

> Provide training in legal and ethical regulations governing biological human sample management.

**Grants:**

- > HSCSP Research Institute. Biobank Network 2009. Amount: €138,000.00.

**Coordinator:**

Elena Serrano

## Equipment for General Use

> **IMAGE ANALYSIS LABORATORY:**

**Equipment:**

- > Revolution 4200 microarray scanner (Vidar).
- > Image Station 4000MM Pro (Kodak) gel documentation: luminescence, fluorescence, absorption.

> **OTHER EQUIPMENT**

**Equipment:**

- > Precision weighing balances (Sartorius).
- > Bioanalyzer 2100 (Agilent).
- > Nanodrop 2000 (Thermo).
- > Infinite 200 (Tecan) microplate reader: spectrophotometer, fluorometer, luminometer.

**Grants:**

- > HSCSP Research Institute. Innovation Network 2009. Amount: €123,414.
- > Kulisevsky, J. Expert system integrating teleassistance and medicine to prevent dependence and promote autonomy of the elderly in the home environment. E-HEALTH Platform for Healthy Ageing. Plan Avanza. Amount: €60,848.55.

------------	----------

**Main Lines of Research**

- ▶ Cardiac electrophysiology and arrhythmias (clinical and experimental).
- ▶ Heart failure.
- ▶ Ischaemic heart disease.
- ▶ Valvular heart disease.
- ▶ Cardiac imaging.

**Challenges**
**Electrophysiology**

- ▶ Describe the mechanisms and clinical significance of electrocardiographic alterations in patients with acute myocardial infarction, using translational research in pig heart models.
- ▶ Characterize ECG patterns and prognosis in patients with left circumflex coronary occlusion.
- ▶ Describe the behaviour of myocardial electrical impedance in normal and acute ischaemic models using new bioimpedance methods developed in our laboratory.

**Heart failure**

- ▶ Develop new risk scores for ambulatory heart failure patients predicting death and re-hospitalizations.
- ▶ Research new biomarkers in patients with heart failure included in the Spanish registry Redinscor II (RIC), with 1500 patients (our group is the national coordinator).

- ▶ Develop new markers for early detection of cardiac graft rejection in transplanted patients.
- ▶ Develop palliative care programmes for patients with advanced heart failure.

**Ischaemic heart disease**

- ▶ Set up a programme for patients with refractory angina.
- ▶ Treat complex atherosclerotic coronary artery lesions using international techniques.

**Valvular heart disease**

- ▶ Implement new percutaneous techniques for the treatment of mitral valve regeneration and degenerative aortic stenosis.

**Cardiac imaging**

- ▶ Implement new imaging software analysis to detect structural abnormalities of the myocardium (fibrosis, necrosis).
- ▶ Implement new software analysis for fusion imaging in patients undergoing coronary interventions.

**Active Grants**

- ▶ José M. Guerra, Comparative study of electro-mechanical effects of epicardial and endocardial biventricular stimulation of the left ventricle in an animal model of heart failure, PI10/01149, FIS Project, Carlos III Health Institute, 2011–2013, €184,101.50.
- ▶ Juan M. Cinca (coordinator) Programme 6: Clinical and Translational Cardiology. RD12/0042-RIC (Cardiovascular Research Network), Thematic Networks for Cooperative Research at the Carlos III Health Institute, 2012–2015.
- ▶ Juan M. Cinca, Preclinical development of a new technique to guide the electrical ablation of ventricular arrhythmias in patients with chronic myocardial infarction based on bioimpedance measurements, PI13/00765, Carlos III Health Institute, 2013–2015, €169,702.50.

## Collaborations

### **Collaborations with other IIB Sant Pau Groups**

- ▶ Concepción Vicenta Llorente-Cortés, ICCC-CSIC.
- ▶ Leif Hove Madsen, ICCC-CSIC.
- ▶ Jordi Ordoñez Llanos, HSCSP Biochemistry Laboratory.
- ▶ Antoni Capdevila, HSCSP Radiodiagnostics.
- ▶ María Poca Sans, HSCSP Digestive Disorders.
- ▶ Enric Álvarez, HSCS Anaesthesiology.
- ▶ Ricard Serra, HSCSP Psychiatry.

### **External Collaborations**

**Juan M. Cinca Cuscullola (HSCSP),  
Programme 6: Clinical and Translational  
Cardiology, RD12/0042-RIC  
(Cardiovascular Research Network):**

- ▶ Alfredo Bardají Ruiz, Hospital Universitari Joan XXIII, Tarragona, Spain.
- ▶ Fernando Worner Diz, Hospital Universitari Arnau de Vilanova, Lleida, Spain.
- ▶ Andrés Grau Sepúlveda, Hospital Son Dureta, Palma de Mallorca, Spain.
- ▶ Xavier Rosell Ferrer, Universitat Politècnica Catalunya (UPC), Barcelona, Spain.
- ▶ Rafael Vázquez García, Hospital Universitario Virgen de Valme, Seville/Hospital Puerta del Mar, Cadiz, Spain.
- ▶ Joaquín Lucena Romero, Instituto Medicina Legal Sevilla, Spain.

▶ José M. Cubero Gómez, Hospital Virgen del Rocío, Seville, Spain.

▶ Antonio Fernández Romero, CHARE Utrecht SAS, Seville, Spain.

▶ Josep Brugada Terradellas, Hospital Clínic, Barcelona, Spain.

▶ Julián Pérez-Villacastín, Hospital Clínico San Carlos, Madrid, Spain.

▶ Juan Francisco Delgado Jiménez, Hospital 12 de Octubre, Madrid, Spain.

▶ Jose Luis Zamorano, Hospital Ramón y Cajal, Madrid, Spain.

▶ Mariano Valdés Chavarri, Hospital Universitario Virgen de la Arrixaca, Murcia, Spain.

▶ José Ramón González, Hospital Clínico Universitario, Santiago de Compostela, Spain.

▶ Luis Alonso-Pulpón Rivera, Hospital Puerta del Hierro, Madrid, Spain.

▶ Covadonga García González, Hospital Guadarrama, Madrid, Spain.

▶ José Miguel Rivera, Hospital La Fe, Valencia, Spain.

▶ Alfonso Castro Beiras, Complejo Hospitalario Universitario, A Coruña, Spain.

▶ Francisco Fernández Avilés, Hospital Gregorio Marañón, Madrid, Spain.

▶ Ignacio Flores Hernández, National Cardiovascular Research Centre–CNIC, Madrid, Spain.

### **Antoni Serra Peñaranda (HSCSP), TEAM 2014:**

▶ Eulogio García, Hospital Clínico San Carlos, Madrid, Spain.

▶ Carlos Macaya Miguel, Hospital Clínico San Carlos, Madrid, Spain.

▶ Andrés Iniguez Romo, Complejo Hospitalario de Vigo, Spain.

**Xavier Viñolas Prat (HSCSP), RETAC Group/European Network for the Treatment of Arrhythmias in Cardiology:**

▶ Philippe Lagrange, Clinique Saint Pierre, Perpignan, France.

▶ Benoît Guy-Moyat, Hospital Universitaire de Limoges, France.

▶ Franck Halimi, CMC. Parly II-Le Chesnay, France.

▶ Luc De Roy, Clinique Universitaire De Saint Godinne, Yvoir, Belgium.

▶ Serge Boveda, Clinique Pasteur, Toulouse, France.

▶ Julio Martí, Hospital del Mar, Barcelona, Spain.

▶ Pascal Defaye, Hospital Universitaire de Grenoble, France.

▶ Antonio Curnis, Spedali Civili, Brescia, Italy.

▶ Marc Zimmermann, Hôpital de la Tour, Geneva, Switzerland.

▶ Thomas Arentz, Herzzentrum Bad Krozingen, Germany.

## Awards

### **Doctoral Theses**

- ▶ Xavier Viñolas Prat, Cardioversion in atrial fibrillation: current use and clinical implications, Josep M Alegret (supervisor), November 2013, Universitat Rovira i Virgili (EU). Underway.
- ▶ Jesús Álvarez García, Acute occlusion of the atrial arteries during elective coronary angioplasty in humans: prospective study of the clinical, biochemical and electro-mechanical consequences, Juan M. Cinca Cuscullola (supervisor).
- ▶ Gerard Amorós Figuera, Preclinical development of a new technique for detecting and characterizing myocardial infarction scars based on bioimpedance measures, Juan M. Cinca Cuscullola (supervisor).

▶ Miquel Vives Borrás, Clinical, electrocardiographic and prognostic characterization of acute myocardial infarction secondary to acute occlusion of the circumflex coronary artery, Juan M. Cinca Cuscullola (supervisor).

▶ Francisco Javier Noriega Sanz, Clinical and electrophysiological characterization of reciprocal changes in the electrocardiogram in acute myocardial infarction, Juan M. Cinca Cuscullola (supervisor).

▶ Albert Duran Cambra, Study of the safety of a rapid diagnosis strategy for chest pain of possible coronary origin in emergency rooms, Juan M. Cinca Cuscullola (supervisor).

▶ Sònia Mirabet Pérez, Early detection of graft vasculopathy in cardiac transplantation: markers in peripheral blood, Eulàlia Roig Mingueu (supervisor).

## Main Lines of Research

- ▶ Investigation of the genetic basis of venous and arterial thrombosis. GAIT-1 and GAIT-2 projects.
- ▶ Investigation of new antithrombotic drugs: thrombin inhibitors, molecules against activated factor X, low molecular weight heparin with oral activity, among others.
- ▶ Biomarkers of prothrombotic states in patients under 55 years with venous thromboembolic disease, acute ischaemic stroke, or acute myocardial infarction. VEREMA project.

- ▶ Applied clinical development of the self-management model of oral anticoagulant treatment.
- ▶ Mathematical models of prediction of the individual risk of thromboembolic disease. RETROVE and PAN projects.
- ▶ CITA project. Centre for Antithrombotic Therapy Management. Research into a new ambulatory management model for patients receiving any kind of antithrombotic therapy (anti vitamin-K, new oral anticoagulants, low molecular weight heparins, antiplatelets) by incorporating new educational programmes, specialized nursing and new communication technologies.

## Challenges

- ▶ Study QTL detected in GAIT-1 families in relation to phenotypes of haemostasis with thrombosis risk (resistance to activated protein C, factor VIII, homocysteine, factor XII, body mass index and others).
- ▶ Replicate QTL related to thrombosis in GAIT-1 families by means of the linkage analysis using new GAIT-2 families.
- ▶ Conduct genome-wide association study (GWAS) of phenotypes involved in GAIT-1.
- ▶ GWAS of phenotypes included in GAIT-2.
- ▶ Analyse RNA expression in the GAIT-2 families.
- ▶ Investigate miRNA associated with thromboembolic disease in GAIT-2.
- ▶ Complete recruitment for the RETROVE project.
- ▶ Recruit team for the MIRTO project (Modelling Individual Risk of Thrombosis in Oncology), with the goal of establishing an individual risk score for venous thromboembolism (RETROVO sub-project) and for ischaemic stroke (SINO subproject) in patients with cancer.
- ▶ Research plasma proteins associated with the risk of venous thromboembolism by using high affinity proteomics developed at Karolinska Institutet. VEREMA project, joint collaboration between the European case-control studies VEBIOS (Sweden), RETROVE (from our unit) and MARTHA (France).
- ▶ Continue collaboration with the RCV Spanish cardiovascular patient network and with other European groups, mainly with the goal of applying GAIT project findings to cohorts of patients with venous and arterial thrombosis in Spain and other European countries.
- ▶ Evaluate the effectiveness of an educational programme for patients taking antiplatelet therapy (aspirin and/or clopidogrel) in reducing severe complications: EDUCANT clinical trial.

## Active Grants

- ▶ Juan Carlos Souto (PI), Cardiovascular Research Network (RIC), HSCSP, RD12/0042/0032, Carlos III Health Institute, MINECO, 2013-2016, €211,600.
- ▶ Juan Carlos Souto (PI), Search for a clinical algorithm to define individual risk profiles for venous thromboembolic disease (RETROVE), HSCSP, PI12/00612, Carlos III Health Institute, MINECO, 2013-2015, €62,315.
- ▶ Joan Martí, Neurology (PI), J. Mateo, UHiT (collaborating researcher), Cerebral haemorrhage from oral anticoagulants in the secondary prevention of stroke: predictive value of leukoaraiosis and microbleeds detected by MRI (HERO), HSCSP, PI11/00296, Carlos III Health Institute, MINECO, 2012-2014, €37,741.,,
- ▶ Cándido Villanueva, Digestive Pathology (PI), J. Mateo, M. Carrasco, UHiT (collaborating researchers), Randomized controlled study comparing acenocoumarol versus bemiparin in patients requiring anticoagulation restart after a severe gastrointestinal bleeding episode (HEPACO), HSCSP, EC10-135, Ministry of Health and Social Policy, 2012-2015.

## Awards

- ▶ JM Soria, JC Souto, M Carrasco, L Martín-Fernández, A Muñoz, Modelling the Individualized Risk of Thrombosis in Oncology (MIRTO), Award for Basic and Clinical Research Projects (second prize), Spanish Thrombosis and Haemostasis Foundation 2013, 55th National AEHH Congress and 29th National SETH Congress Seville, Spain, 2013.

## Collaborations

### Collaborations with other IIB Sant Pau Groups

- ▶ Genomics of Complex Diseases (GAIT1, GAIT 2, RETROVE, VEREMA and MIRTO design).
- ▶ Stroke Unit (HERO, EDUCANT and MIRTO design).
- ▶ Clinical and Translational Cardiology (EDUCANT)
- ▶ Vascular Surgery (EDUCANT)
- ▶ Medical Oncology (MIRTO design)
- ▶ Clinical Haematology (MIRTO design)
- ▶ Digestive Diseases (HEPACO).

### External Collaborations

- ▶ Cardiovascular Research Network (RIC).
- ▶ Karolinska Institutet, Stockholm, Sweden: GAIT2 and VEREMA.
- ▶ La Timone Hospital, Marseilles, France: GAIT2 and VEREMA.
- ▶ Pierre and Marie Curie University, INSERM, UMR-S 1166, Paris, France: GAIT2 and VEREMA.
- ▶ Université de Genève, Switzerland: GAIT2.
- ▶ Texas Research Institute (formerly Southwest Foundation for Biomedical Research), San Antonio, USA: GAIT1 and GAIT2.
- ▶ Universitat Politècnica de Catalunya, Barcelona, Spain. Centre for Biomedical Engineering Research: RETROVE and MIRTO design.
- ▶ Thrombosis Group of the Spanish Medical Oncology Society (SEOM): ONCOTHROMB and MIRTO.

## Main Lines of Research

### Atherosclerosis mechanisms

- ▶ Analysis of apolipoprotein J (apoJ) as a marker of CVR.
- ▶ Use of mimetic peptides derived from apoJ as therapeutic tools.
- ▶ Involvement of LDL(-) on lipid accumulation in cardiomyocytes and heart failure.

### Inflammatory mechanisms induced by LDL(-) on monocytes from patients with diabetes.

- ▶ Diagnosis of chronic or acute cardiovascular diseases
- ▶ Development of algorithms for ruling-out acute coronary disease.
- ▶ Assessment of new biomarkers of acute cardiovascular disease: cardiac troponins, natriuretic peptides, ST-2.
- ▶ Development of methods for point-of-care biomarker measurement.
- ▶ Vulnerability markers in atheromatous plaque: electronegative LDL, LDL size, HDL function, myeloperoxidase, phospholipase.

## Challenges

- ▶ Determine the intracellular mechanisms involved in the inflammatory response induced by LDL(-) and the components of the particle that entail atherogenicity.
- ▶ Analyse the therapeutic potential of mimetic peptides derived from apo J to delay the development of atherosclerosis in animal models.

- ▶ Demonstrate that electronegative LDL is a marker of vulnerable atheromatous plaque.
- ▶ Find new markers of cardiovascular risk in diseases such as diabetes, HIV or cardiac failure.

## Active Grants

- ▶ Jordi Ordóñez-Llanos, Cardiovascular Biochemistry Group, Funds in support of Catalan research groups, AGAUR, 2009 SGR 1205, August 2009-December 2013, €46,800.
- ▶ Jose Luis Sánchez-Quesada, Molecular strategies to inhibit aggregation and binding to arterial wall proteoglycans of low-density lipoproteins, PI10/00265, ISCIII/FIS, 2011-2013, €99,220.

- ▶ Jordi Ordóñez-Llanos, TRAPID (hsTnT for the RAPID rule-out of AMI), Roche Diagnostics, 2012-2013, €90,000.
- ▶ Jordi Ordóñez-Llanos, Cardiovascular Research Network (RIC), ISCIII/FIS, RD12/0042/0043, 2013-2016, €128,000.
- ▶ Sonia Benítez, Effect of modified LDL on the expression and activation of CD14, TLR4 and adhesion molecules in monocytes of patients with type 2 diabetes, ISCIII/FIS, PI12/00967, 2013-2015, €45,000.

**Collaborations with other IIB Sant Pau Groups**

- ▶ Metabolic Bases of Cardiovascular Risk (Dr F. Blanco Vaca).
- ▶ Endocrinology, Diabetes and Nutrition (Dr A. Pérez).
- ▶ Angiology, Vascular Biology and Inflammation (Dr L. Vila).
- ▶ Clinical and Translational Cardiology (Dr J. Cinca).
- ▶ Lipids and Cardiovascular Pathology (Dr C. Llorente).

**Research into atherosclerosis mechanisms**

- ▶ Dr Petri Kovanen, Wihuri Research Institute, Helsinki, Finland.
- ▶ Dr Kati Öörni, Wihuri Research Institute, Helsinki, Finland. Pre-doctoral stay by Montserrat Estruch (4 months).
- ▶ Dr Olga Gursky, Boston University School of Medicine, Boston, USA. Post-doctoral stay by Anna Rull (6 months).
- ▶ Dr Sandra Villegas, Biochemistry and Molecular Biology Department, UAB, Barcelona, Spain (ISCIII/FIS coordinated project under PI10/00265).

**Research into diagnosis**

- ▶ Dr Daniel Podzamczer, HIV Unit, Infectious Disease Service, Bellvitge University Hospital, Barcelona, Spain (ATADAR, SPIRAL and BICOMBO clinical trials).
- ▶ Formation and maintenance of a bank of samples within the Cardiovascular Research Network (RIC), Programme 6 (Clinical and Translational Heart Failure).
- ▶ Cardiovascular Research Network (RIC): Dr Francisco Marín, Cardiology, Hospital Virgen de Arrixaca, Murcia, Spain, 3-month stay by Dr Juan Antonio Vilchez (during a Rio Hortega contract) in our collaborative studies laboratory.
- ▶ Dr Mariano Valdés, Hospital Virgen de Arrixaca, Murcia, Spain, 3-week stay by Dr Carmen Puche in our collaborative studies laboratory.

- ▶ Dr Laura Dos (D. Garcia-Dorado), Integrated Adult Congenital Heart Disease Unit of Vall d'Hebron University Hospital, Barcelona, Spain (Evedes study).
- ▶ Dr Domingo Pascual-Figal, Cardiology Department, Virgen de la Arrixaca University Hospital, Murcia, Spain.
- ▶ Dr Rafael Vázquez, Cardiology Service, Puerta del Mar University Hospital, Cadiz, Spain.
- ▶ Dr Antoni Bayes-Genís, Cardiology Department, Germans Trias i Pujol University Hospital, Barcelona, Spain.

**IFCC Task Force on Clinical Applications of Cardiac Biomarkers (Dr Jordi Ordóñez-Llanos, member):**

- ▶ Dr Fred S. Apple, Department of Laboratory Medicine and Pathology, University of Minnesota, USA.
- ▶ Dr Paul O. Collinson, Cardiovascular and Laboratory Departments, St. George's Hospital, London, UK.
- ▶ Dr Alan S. Jaffe, Mayo Clinic, Cardiovascular Division, Rochester, New York, USA.
- ▶ Dr James L. Januzzi, Cardiology Division, Massachusetts General Hospital, Boston, USA.

**Participation in multicentre studies**

- ▶ MUSIC (sudden death in heart failure) Risk Score, Spanish Society of Cardiology.
- ▶ MAGGIC (meta-analysis global group in chronic heart failure), European Society of Cardiology.

## Main Lines of Research

### Cardiovascular research

- ▶ Inflammatory mechanisms involved in vascular disorders.
- ▶ Genetic basis of vascular pathologies: atherothrombosis, aortic aneurism and chronic venous insufficiency.
- ▶ New, more effective targets. Research into pharmacologic targets for NSAIDs of cardiovascular interest.

### Cancer research

- ▶ Role of inflammatory mediators in head and neck squamous carcinoma and in regulating gene expression in tumour relapse.

## Challenges

- ▶ Increase cooperation between clinicians and experimental researchers to enhance the translation level of our research by setting up training programmes for clinical physicians.
- ▶ Increase the number of researchers with PhDs in the group.

- ▶ Increase funding sources by establishing collaborations with the industrial sector.
- ▶ Improve research quality in terms of standard evaluation indexes.

## Active Grants

- ▶ Luis Vila Navarro (PI), Microsomal PGE-synthase-1 as a target for generation of new anti-inflammatory drugs useful in cardiovascular disorders: study in the abdominal aortic aneurysm context, MICINN SAF2010-21392, 2011–2014 (extended), €145,200.
- ▶ Luis Vila Navarro (PI), Microsomal PGE-synthase-1 as a target for generation of new anti-inflammatory drugs useful in cardiovascular disorders: study in the abdominal aortic aneurysm context, MICINN SAF2010-21392, 2011–2014 (extended), €145,200.
- ▶ Luis Vila Navarro (PI), Cardiovascular Research Network (RIC), RD12/0042/0051, FIS, Carlos II Health Institute, Jan 2013–Dec 2016, €235,600 (approx).

## Collaborations

### Collaborations with IIB Sant Pau Groups

- ▶ Ear, Nose and Throat Cancers (Drs Xavier León, Jacinto Gracia and Miquel Quer).
- ▶ Genomics of Complex Diseases (Dr JM Soria).
- ▶ Thrombosis and Haemostasis (Dr JC Souto).
- ▶ Arteriosclerosis and Vascular Biology (José Martínez, PI).

## Main Lines of Research

- ▶ Physiopathological role of LRP family proteins in chronic diseases.
- ▶ Identification and characterization of transcription factors and genetic targets. Role of HDL and LDL.
- ▶ Vascular impact of ischaemia and angiogenesis in heart disease. Cell therapy.

## Challenges

- ▶ Broaden the experimental focus to include transgenic animal models with/without cardiovascular risk factors in order to proceed to in-depth analysis of molecules involved in the modulation of new proteins identified by post-genomic technologies and systems biology approaches.
- ▶ Maintain present scientific networks and establish new multidisciplinary collaborations.
- ▶ Increase international funding for the extension of new and established platforms in order to implement proposed activities.

## Transfer Products

# Inflammation and Vascular Remodelling

**Coordinator**

Cristina Rodríguez ICCC  
crodiguezs@csic-iccc.org

**Researchers**

Maria Estefanía IR-HSCSP  
Saray Galán ICCC  
Segalés Varona ICCC

**Technician**

Silvia Aguiló ICCC

**Main Lines of Research**

- ▶ Inflammation and vascular remodelling: regulation of vascular homeostasis by extracellular matrix components and modifying enzymes.
- ▶ Molecular and cellular mechanisms in atherosclerosis: identification of new therapeutic targets.
- ▶ Molecular basis of abdominal aortic aneurysm (AAA): new pharmacological strategies.
- ▶ Epigenetics in cardiovascular diseases.

**Challenges**

- ▶ Identify new therapeutic targets, progression markers and biomarkers in atherosclerosis and AAA.
- ▶ Establish genetically modified animal models that could become useful disease models in atherosclerosis and AAA.
- ▶ Expand and consolidate scientific staffing.
- ▶ Increase regular funding through national and international calls.
- ▶ Set up new stable collaborations within IIB Sant Pau and with national and international groups and consolidate those already established.

**Active Grants**

- ▶ Dr Cristina Rodríguez Sinovas (PI), Epigenetic mechanisms involved in remodelling of the extracellular matrix associated with AAA: new therapeutic strategies (P112/01952), Carlos III Health Institute, 2013-2015, €153,065.
- ▶ Dr Cristina Rodríguez Sinovas (PI), Epigenetic mechanisms involved in the control of intimal hyperplasia: role of lysyl oxidase (LOX) in restenosis, Spanish Society of Cardiology (SEC), Basic Research Grant 2012-2013, €18,000.
- ▶ Dr José Martínez González (PI), Cardiovascular Research Network (RIC) (RD12/0042/0053), MINECO-ISCIII, 2013-2016, €205,000 (approx).

**Awards**

- ▶ Orriols M, Guadall A, Galán M, Alonso J, Ferrán J, Rodríguez-Calvo R, Navarro MA, Osada J, Martínez-González J, Rodríguez C. Overexpression of LOX in the vessel wall limits neointimal thickening induced by carotid artery ligation. Best Oral Communication, Scientific Meeting of the Cardiovascular Thrombosis Working Group, Murcia, Spain, September 2013.

## Collaborations

### **Collaborations with other IIB Sant Pau Groups**

- ▶ Angiology, Vascular Biology and Inflammation (PI: Luis Vila).
- ▶ Cardiac Rhythm and Contraction (PI: Leif Hove-Madsen).
- ▶ Atherosclerosis and Vascular Biology (PI: José Martínez González).

### **External Collaborations**

- ▶ Jain K. Mukesh, Case Western Reserve University School of Medicine, Cleveland, Ohio, USA.
- ▶ Mark Slevin, Manchester Metropolitan University, United Kingdom.
- ▶ Vicente Andrés, National Cardiovascular Research Centre (CNIC), Spain.
- ▶ José Manuel Redondo, National Cardiovascular Research Centre (CNIC), Spain.

- ▶ Jesús Egido, Jiménez Díaz Foundation, Madrid, Spain.
- ▶ Jesús Osada, CIBERONN, University of Zaragoza, Spain.
- ▶ Manel Vázquez Carrera, CIBERDEM, University of Barcelona, Spain.
- ▶ Mercedes Salaices, Autonomous University of Madrid, Spain.
- ▶ Victoria Cachofeiro, Complutense University of Madrid, Spain.
- ▶ Francisco Marín, Department of Cardiology, Hospital Clínico Universitario Virgen de la Arrixaca, Murcia, Spain.
- ▶ Jerzy Krupinski, Hospital Mutua Universitaria de Terrassa, Barcelona, Spain.
- ▶ Francisco Sánchez Madrid, Hospital de la Princesa, Madrid, Spain.

**Main Lines of Research**

- ▶ Identification of new biomarkers of atherothrombosis and ischaemic heart disease with potential use in diagnosis and prognosis, using cell culture studies, animal models of cardiovascular disease and human samples of patients with coronary heart disease risk factors.

**Challenges**

- ▶ Advance research aiming to identify and characterize new biomarkers of vascular injury, atherothrombotic disease and/or ischaemic, coronary and cerebrovascular syndromes using postgenomic techniques.
- ▶ Generate new information on potential soluble biomarkers (in serum, plasma) and in microparticles circulating in blood, as well as in blood and/or vascular cells, using proteomic and lipidomic techniques based on liquid chromatography and bidimensional electrophoresis, antibody array systems and mass spectrometry (MALDI-ToF/ToF; linear ion trap).
- ▶ Validate biomarkers identified in the diagnosis and prognosis of cardiovascular and/or cerebrovascular disease using specific quantitative techniques (confocal microscope, ELISA, multiplex assays, etc).
- ▶ Characterize molecular and functional mechanisms for selected biomarkers in cardiovascular pathology (biology of systems).
- ▶ Consolidate the lipidomic platform.
- ▶ Lead the Biobank in the SAFE-T European project.

**Collaborations**
**Collaborations with IIB Sant Pau Groups**

### Books or Chapters with ISBN

- ▶ Badimon L, Padró T, Vilahur G., Nutraceuticals and atherosclerosis: human trials, in Mahabir S, Pathak YV (eds), Nutraceuticals and Health: Review of the Human Evidence, CRC Press. ISBN 978-1466517226.

# Lipids and Cardiovascular Pathology

## Coordinator

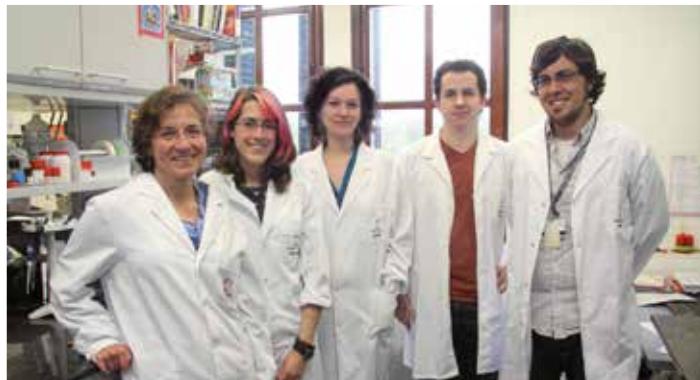

Vicenta Llorente-Cortes ICCC  
cllorente@csic-iccc.org

## Researchers

David de Gonzalo-Calvo  
(post-doctoral researcher)  
Elena Revuelta Lopez AGAUR  
(research grant 2013FI-B 01008)

## Technicians

Laura Nasarre Miarnau

## Main Lines of Research

- ▶ Molecular mechanisms involved in the modulation of LRP1 by cardiovascular risk factors.
- ▶ Impact of LRP1 on vascular and myocardial cholesterol accumulation.
- ▶ Impact of lipoproteins and angiotensin II on LRP1-Intracellular signal pathways.
- ▶ Alterations in LRP1 expression and LRP1-intracellular signal pathways in hypoxia/ischaemia in *in vitro* and *in vivo* models.
- ▶ Lipids and diabetic cardiomyopathy.
- ▶ LRP1 and breast cancer.
- ▶ LRP1 and inflammation.

## Challenges

- ▶ Develop transgenic mice with tissue-specific LRP1 modulation to proceed to in-depth analysis of LRP1-dependent mechanisms.
- ▶ Maintain and amplify relationship with IIB Sant Pau groups regarding translation in this research area.
- ▶ Maintain and strengthen international collaborations to set up future applications for European funding.
- ▶ Establish collaborations with companies with the aim of developing new products useful for prognosis and diagnosis.

## Active Grants

### International projects

- ▶ Dr Concepción Vicenta Llorente-Cortés, Cardiovascular Research Centre, CSIC-ICCC, IIB Sant Pau, and Dr Gustavo Alberto Chiabrando, CIBICI-CONICET/FCQ-UNC, Cordoba, Argentina, CONICET-CSIC 2013: PICT-2012-2607: Study of the molecular and cellular aspects that regulate the intracellular traffic of the alpha-2-macroglobulin receptor LRP1 and its implications for cell migration control, June 2013-May 2016, €29.72.
- ▶ UAB and Justus Liebig Universität, PROMISE International Research Training Group. Protecting the heart from ischaemia. Role of LRP1 in vascular and myocardial cells, 2010-2013.

### National projects

- ▶ David de Gonzalo Calvo (PI), Regulation of LRP1 receptor gene expression by microRNAs: a new therapeutic target in the treatment of atherosclerosis? Spanish Atherosclerosis Society, Jan 2014-Dec 2015, €8500.

### Networks

- ▶ Lina Badimon (PI), Francisco Fernández-Avilés (Coordinator), Cardiovascular Research Network (RIC).
- ▶ Programme 1: Research programme on adverse ventricular remodelling, RD12/0042/0027, Jan 2013-Dec 2015, €85,600 (2013).

## Awards

- ▶ Vicenta Llorente-Cortes (PI), Development of a blocking agent for the massive entry of cholesterol into cardiomyocytes in hypoxia/ischaemia, Selected Project (Ref. No. 023), InnoPharma-USC 2013 call for the InnoPharma Open-Lab initiative designed to share experience and know-how with projects for discovering new drugs. Lipids and Cardiovascular Pathology Group, CSIC-ICCC, IIB Sant Pau.

## Collaborations

### **Collaborations with IIB Sant Pau Groups**

## Main Lines of Research

- ▶ Receptor-mediated changes in intracellular calcium handling in atrial fibrillation.
- ▶ Contribution of genetic variants to electrical remodelling and arrhythmogenesis.
- ▶ Effects of development and ageing on calcium handling in cardiac myocytes.
- ▶ Functional effects of lipid accumulation in cardiomyocytes.

## Challenges

- ▶ Consolidate the group as a reference in research into calcium handling in atrial fibrillation and establish it within other lines of research by including emerging technologies and fields of research. Specifically:
  - Develop computational tools and models to improve the analysis and understanding of intracellular calcium handling in cardiac myocytes.
  - Incorporate emerging technology such as stretching and measurements of force development in single cardiomyocytes.
- ▶ Consolidate current national and international collaborations and establish new strategic collaborations within emerging fields of research such as the use of super-resolution fluorescence imaging (STORM, STED techniques), the detection and role of reactive oxygen species in diseased cardiomyocytes and the role of telomere length in cardiac senescence and regeneration.
- ▶ Obtain international funding for incorporation of scientific expertise and participation in multidisciplinary international research projects.

## Active Grants

- ▶ Hove-Madsen L (PI), Functional cellular bases of PITX2 involvement in human atrial fibrillation, Spanish Ministry of Science and Technology, July 2011–Nov 2014.
- ▶ Hove-Madsen L (PI), Effects of atrial fibrillation on the distribution and frequency of spontaneous calcium release events in human atrial myocytes, Spanish Ministry of Science and Technology, Jan 2012–Dec 2014.
- ▶ Hove-Madsen L (PI), Cristina Espinosa Molina (beneficiary), EU, Marie Curie FP7-PEOPLE-2012-IEF, April 2013–Mar 2015.
- ▶ Cinca J (PI), National Research Network on Heart Failure in Spain (REDINSCOR), Carlos III Health Institute, Spanish Ministry of Health and Consumer Affairs, Dec 2006–Dec 2012.

## Collaborations

### Collaborations with IIB Sant Pau Groups

- ▶ Clinical and Translational Cardiology
- ▶ Lipids and Cardiovascular Pathology
- ▶ Artherosclerosis and Vascular Biology

### External Collaborations

- ▶ Professor SR Wayne Chen, Department of Physiology and Pharmacology, University of Calgary, Canada.

## Main Lines of Research

- ▶ Pharmacogenetics: genetic determinants in drug-response profiles.
- ▶ Monogenic muscular disorders: dystrophinopathies, dysferlinopathies, limb girdle dystrophies. Myotonic dystrophy.
- ▶ Hereditary breast/ovarian cancer.
- ▶ Molecular detection of circulating tumour cells (CTCs) in breast cancer.
- ▶ Introduction of next-generation sequencing (NGS) techniques in the diagnosis of monogenic disorders.

- ▶ Motor neuron disorders: pathogenic mechanisms during human development and validation of biological markers for therapeutic follow-up.
- ▶ Monogenic blood disorders: haemochromatosis, haemophilia A and B, thalassemic syndromes.

## Challenges

### Pharmacogenetics

- ▶ Colorectal and lung cancer treatments.
- ▶ Chronic inflammatory disease treatment.
- ▶ HIV infection treatment.

### Muscular dystrophies

- ▶ Post-transcriptional regulation of the dystrophin gene using nonsense-mediated decay analysis in DNA from patients with Duchenne muscular dystrophy.
- ▶ Genes associated with new phenotypic forms of limb girdle muscular dystrophy.
- ▶ Workflow development for the analysis of DMD gene by NGS techniques.

### Hereditary breast/ovarian cancer

- ▶ DNA studies to classify DNA variants found in the BRCA genes as pathogenic or neutral.
- ▶ CTCs as prognostic markers in patients with locally advanced and disseminated breast cancer.
- ▶ Workflow development for the analysis of BRCA1 and BRCA2 genes by NGS techniques.

### Hereditary motor neurone diseases

- ▶ Development of neuromuscular junction studies in health and disease.
- ▶ Broadening of the spectrum of motor neuron diseases to include bulbar and spinal muscular atrophy, distal muscular atrophies and amyotrophic lateral sclerosis.

## Doctoral Theses

- ▶ Jonás Juan Mateu, Molecular characterization in dystrophinopathies, genotype-phenotype correlation, University of Barcelona, Dr Pía Gallano (supervisor), University of Barcelona, April 2013.

## Transfer Products

- ▶ PM GenExperts (Personalised Medicine Gene Experts) spin-off: HYPERLINK "<http://www.pmgeneexperts.com>" <http://www.pmgeneexperts.com>. Registry details: Vol. 5416, p. 62, entry 1, sheet: BI-63242, CIF B95743399.

## Active Grants

- ▶ Dr Vives, Dr Badell (PIs), Creation of a Catalan network for the diagnosis and clinical management of rare anaemias due to major haemoglobinopathies, 101730, TV3 Marathon Foundation, 2011-2013.
- ▶ Dr Baiget (PI), Pharmacogenetic studies in the treatment of colorectal cancer using biological therapies, PI11/01711, Carlos III Health Institute, 2012-2014, €68,529.56.
- ▶ Dr Gallano (PI), Development of molecular diagnosis panels for hereditary monogenic pathology using Fluidigm access array system and next-generation sequencing GS junior system PI 11/02586, Carlos III Health Institute, 2012-2014, €94,682.
- ▶ Dr Tizzano (PI), Translational research in spinal muscular atrophy: phenotype modifiers, iPSCs derived motor neurons and developmental neuromuscular pathology, PI11/02606, Carlos III Health Institute, 2012-2014, €107,000.
- ▶ Dr Tizzano, Dr Chertkoff (PIs), Genotypic characterization of Argentinian patients with spinal muscular atrophy, National Programme for the Internationalization of R&D, International Projects Subprogramme: Mobility Projects (Integrated Actions), 2012-2014.
- ▶ Dr Baiget (PI), Pharmacogenetic phase II randomized study to evaluate the efficacy and safety of FOLFIRI scheme with high doses of irinotecan in metastatic colorectal cancer patients, according to the UGT1A1 genotype, EC11-36, Carlos III Health Institute, 2012-2014, €64,700.

## Collaborations

## Main Lines of Research

- ▶ HDL and susceptibility to diabetes, arteriosclerosis and breast cancer: this relationship is being analysed through the study of metabolic disorders, genetic modification, and dietary or drug intervention.
- ▶ Genetic determinants of metabolic factors of cardiovascular risk: dyslipidaemia, type 2 diabetes, hyperhomocysteinaemia.

- ▶ Positive health effects of phytosterols.
- ▶ Development, validation and application of new clinical laboratory methods in the field of metabolic and cardiovascular medicine.

## Challenges

- ▶ Analyse the effects of diabetes mellitus and hyperhomocysteinaemia in reverse cholesterol transport in vivo.
- ▶ Determine the pathogenic relevance of alterations in cholesterol metabolism in diabetic retinopathy.
- ▶ Compare the effects of niacin and fenofibrate in the HDL of patients with type 2 diabetes.

- ▶ Study anti-cancer mechanisms of HDL genetic modification and phytosterol consumption.
- ▶ Develop new molecular techniques to diagnose metabolic inherited diseases to be used in the clinical laboratory.

## Active Grants

- ▶ J.C. Escolà Gil (PI), Therapeutic and nutritional strategies based on improvement of antioxidant and anti-inflammatory HDL function in type 2 diabetes and breast cancer, FIS PI12/00291, Carlos III Health Institute, 2013–2015, €198,440.
- ▶ Helena Quesada (PI), Sara Borrell Contract, CD12/00533, Carlos III Health Institute, 2013–2015, €75,600.
- ▶ Josep Julve (PI), HDL functionality in diabetes mellitus and hyperhomocysteinaemia: studies in patients and in animal models, PI100277, Carlos III Health Institute, 2011–2014, €63,525.
- ▶ F. Blanco Vaca (PI), Functionality of high density lipoproteins (HDL) and pleiotropic effects in diabetes, retinopathy and breast cancer, PI011/01076, Carlos III Health Institute, 2011–2014, €88,341.
- ▶ F. Blanco Vaca (PI), CIBER07/08/0016, Centre for Networked Biomedical Research in Diabetes and Associated Metabolic Disorders (CIBERDEM), 2008–, €62,425 (2013).
- ▶ D. Kardassis (PI), F. Blanco-Vaca (Spanish representative), HDL-from biological understanding to clinical exploitation, COST-HDL BM0904, COST Actions, EU, 2011–2014, €300,000.

## Doctoral Theses

- ▶ Jesús Méndez González, Effects of sterols and stanols on the enterohepatic metabolism of cholesterol and triglycerides, Department of Biochemistry and Molecular Biology, Autonomous University of Barcelona, Francisco Blanco-Vaca, Joan Carles Escolà Gil (supervisors), HSCSP Teaching Unit.

- ▶ Innovation in assistance in the clinical laboratory. Use of Seqpro Lipo, a kit (reagent+software) to diagnose familial hypercholesterolaemia by next-generation sequencing. Seqpro Lipo® is a product of Progenika Biopharma Grifols and Roche Diagnostics and our laboratory, as the reference for this kind of molecular diagnosis in Catalonia, is the first laboratory to use it.
- ▶ Development of molecular diagnostic studies of thyroid hormone resistance and intermittent porphyria.

#### Collaborations with IIB Sant Pau Groups

- ▶ Cardiovascular Biochemistry (JL Sánchez and J Ordoñez).
- ▶ Breast Cancer (E Lerma).
- ▶ Endocrinology, Diabetes and Nutrition (R Corcoid and A de Leiva).
- ▶ Genomics of Complex Diseases (JM Soria).

#### External Collaborations

- ▶ Kovanen PT, Silvennoinen R, Lee-Rueckert, Wihuri Institut, Helsinki, Finland.
- ▶ Jauhainen M R, National Institute of Health and Welfare, Helsinki, Finland.
- ▶ Andres-Lacueva C, University of Barcelona, Spain.
- ▶ Nilsson SK, Umea University, Sweden.

- ▶ Lookene A, Tallinn Technical University, Tallinn, Estonia.
- ▶ Lechuga-Sancho AM, Hospital Universitario Puerta del Mar, Cádiz, Spain.
- ▶ Sloan JJ, Eli Lilly and Company, Indianapolis, USA.

## Main Lines of Research

- ▶ The role of the natural immune system in the development of autoimmune and inflammatory processes.
- ▶ Immunological response and clinical course in immunomodulator treatment.
- ▶ The role of autoantibodies, components of the adaptive immunity system, in the pathogenesis of autoimmune processes and their use as diagnostic and prognostic markers in these diseases.
- ▶ Mechanisms involved in immunodeficiency.
- ▶ Study of lymphocyte subpopulations involved in chronic graft rejection in cardiac posttransplant patients.

## Challenges

- ▶ Role of cells and molecules of the innate immune response in the development and control of inflammatory processes, in the appearance of autoimmune phenomena, immunodeficiencies, infections, cardiovascular diseases and development of tumours.
- ▶ Role of TLR and STAT signalling in inflammatory diseases.
- ▶ Involvement of STAT family of transcription factors in response to superantigens.
- ▶ Study of mechanisms involved in immunodeficiency caused by alterations of the CD8a molecule.
- ▶ Role of perivascular adipocytes and TLR signalling pathways in the development of atherosclerosis.
- ▶ Inflammation and rejection in heart transplantation.
- ▶ Effects of immunobiological treatments on immunological variables.
- ▶ Analysis of the evolution of immunological parameters and their correlation with clinical response to treatment with immunomodulators.
- ▶ Effects of rituximab, tocilizumab and adalimumab in immunological variables and their correlation with the clinical response in patients with inflammatory diseases.

## Active Grants

- ▶ Candido Juarez (PI), Mechanisms involved in the action of rituximab in myasthenia gravis: differential effects on autoantibodies to AcHR and anti-MuSK, FIS 2011, 2011–2014.
- ▶ Silvia Vidal (PI), Study of the inflammatory mechanisms via TLR involved in intestinal tumorogenesis, FIS PS09/132, 2010–2013.

## Collaborations

## Main Lines of Research

- ▶ Endocrine neoplasms: investigation of tumour dedifferentiation mechanisms through genomic, proteomic and bioinformatic procedures.
- ▶ Autoimmune diabetes mellitus (classic type 1 and LADA).
- ▶ Telemedicine and intelligent systems for therapeutic optimization of diabetes mellitus.
- ▶ Prediction, prevention and optimization of the treatment of obesity, hyperlipidaemia, metabolic syndrome and complications.
- ▶ Diabetes and endocrine disorders in pregnancy.

## Challenges

### Endocrine neoplasms

- ▶ Molecular markers of the epithelial thyroid lineage: expression of the ABCG2 gene/BCRP1 transporter.
- ▶ Thyroglobulin and antithyroglobulin antibodies as prognostic prediction markers in differentiated epithelial thyroid cancer.
- ▶ Transcriptomics and proteomics as prediction and prognosis instruments for epithelial thyroid cancer.
- ▶ Intramural CELL-NANO-THYROID project: human mesenchymal cell capacity as an instrument for administering antitumour cell drugs in the form of conjugated nanoparticles.

### Autoimmune diabetes mellitus and gestational diabetes

- ▶ Heterogeneity of autoimmune diabetes susceptibility.
- ▶ LADA type diabetes: prevalence of metabolic syndrome among patients with LADA compared to prevalence among

patients with classic type 1 and type 2 diabetes and the general non-diabetic population in European countries.

- ▶ Diabetes and pregnancy: clinical research aimed at optimizing care for women with pre-gestational and gestational diabetes at different pre-conception, pregnancy, birth and postpartum stages.

### Treatment optimization of obesity, hyperlipidaemia, metabolic syndrome and complications

- ▶ Optimal treatment and prevention of cardiovascular risk associated with, obesity, hyperlipidaemia, metabolic syndrome and diabetes mellitus 2.
- ▶ Research into impaired glucose tolerance in women suffering from polycystic ovary syndrome.
- ▶ Acquisition of information to help assess the clinical and socioeconomic relevance of cardiometabolic risk.

## Awards

- ▶ Alberto de Leiva, Honorary Member, Romanian Society of Diabetes, Nutrition and Metabolic Diseases (2013).

## Active Grants

## Coordinator

Susan Webb HSCSP  
swebb@santpau.cat

## Researchers

Anna Aulinás	HSCSP RI
Iris Crespo	HSCSP RI
M. Antonia Martínez	CIBERER
Eugenia Resmini	CIBERER
Alicia Santos	HSCSP RI
Elena Valassi	HSCSP RI

## Nursing Researchers

Olga Roig	CIBERER
-----------	---------

## Collaborators

Xavier Badia	CIBERER
M. José Barahona	CIBERER
Nuria Sucunza	CIBERER

## Main Lines of Research

- ▶ Morbimortality, low-grade inflammation and cardiovascular risk in patients with acromegaly or Cushing syndrome.
- ▶ ERCUSYN: European Registry on Cushing syndrome. Initiated with funding from SANCO, EU Public Health Programme.
- ▶ Neuroradiological, neuropsychological and clinical study of endogenous hypercortisolism: comparison of Cushing syndrome and chronic major depressive disorder.
- ▶ Validation of psychological properties of specific questionnaires to evaluate health-related quality of life (HRQoL) in Cushing syndrome and acromegaly.
- ▶ Study of signal transduction of GH in muscle by gene expression in a C2C12 cell line stimulated with GH.
- ▶ Aetiology of cardiopathy in acromegaly and its relation to body composition.
- ▶ Role of telomeres in endocrine diseases.

## Challenges

- ▶ Investigate the neuropsychological, neuroradiological and clinical correlation of patients with endogenous hypercortisolism (due to Cushing syndrome or chronic major depressive disorder) or exogenous exposure to low-dose glucocorticoids (due to treatment of adrenal insufficiency or rheumatoid arthritis). Similar studies for acromegaly.
- ▶ Study gene expression in cultured muscle cells after exposure to GH using microarrays.
- ▶ Correlate neuropsychological status and circadian rhythm of cortisol in patients with hypercortisolism (Cushing syndrome) and without hypercortisolism (non-functioning pituitary adenomas) compared to normal controls.
- ▶ Evaluate long-term morbidity and mortality in patients who have had Cushing syndrome or acromegaly in the last 25 years.
- ▶ Analyse and update the European database of patients with Cushing syndrome (ERCUSYN), which at the end of 2013 included over 1100 patients from 57 centres in 36 countries.
- ▶ Conduct in vitro molecular analysis of operated pituitary adenomas within the REMAH (Molecular Registry of Pituitary Adenomas) study, sponsored by the Spanish Endocrinology and Nutrition Society.
- ▶ Investigate correlations of telomere length and different clinical and biochemical parameters in patients with Cushing syndrome.

## Transfer Products

Co-author and copyright owner of three disease-specific quality of life questionnaires (only ones used in clinical practice and clinical trials worldwide) generating revenue which is reinvested in research:

- ▶ AcroQoL, for acromegaly (published in 2002).

- ▶ CushingQoL for Cushing syndrome (published in 2008).
- ▶ PHPQoL for primary hyperparathyroidism (published in 2013).

## Active Grants

- ▶ Aetiology of cardiopathy in acromegaly and its relation with body composition, PI 1100001, FIS-ISCIII, 3 years, €198,000.
- ▶ Aetiology of cardiopathy in acromegaly and its relation with body composition, Merck Serono grant 2012 (Clinical Research in Endocrinology), Fundación Salud 2000, 2 years, €20,000.

## Collaborations

### Collaborations with IIB Sant Pau Groups

- ▶ Neuromuscular Diseases (Prof. I. Illa).
- ▶ Clinical and Translational Cardiology (Dr R Leta, FIS 01/0001).
- ▶ Multi-organ Damage (Dr Malouf, Validation of a health-related quality of life questionnaire in patients with primary hyperparathyroidism, an observational study, AMGEN SA, FIS 01/0001 and Merck Serono grant).
- ▶ Radiology (Dr J Llauger, FIS 01/0001 and Merck Serono grant).
- ▶ Clinical Psychiatry (Dr M Portella, study of depression and personality limit abnormalities, resulting several publications in 2013).

### External Collaborations

- ▶ Jordi Surrallés, UAB (PI), Correlations of telomere length and different clinical and biochemical parameters in patients with Cushing syndrome: a contribution to premature ageing and specific morbidity? Group 745, CIBERER (see publication by Aulinás et al, ?????).
- ▶ ERCUSYN project (European coordinators), agreement with the European Society of Endocrinology (collaboration with 57 centres throughout Europe), financed by pharmaceutical industry.
- ▶ Spanish Acromegaly Registry (REA), led by the Spanish Endocrinology and Nutrition Society (SEEN) (see publication by Sesmilo G et al, ?????).

- ▶ REMAH study (Molecular Pituitary Adenomas Registry) led by SEEN.
- ▶ CRISALIDA study: Observational descriptive transversal study of efficacy of late night cortisol in saliva for the screening of hypercortisolism in populations at risk, controlled with the dexamethasone suppression test, protocol GNE-2012-01, SEEN (in collaboration with Dr E Urgell of the Biochemistry Unit).
- ▶ ACROSTART study: Retrospective and observational Spanish study to determine the time elapsed until hormone normalization is achieved, depending on initial dose and administration interval of Somatulín Autogel commonly used in clinical practice for treatment of patients with acromegaly, Ipsen, 2012-2013.
- ▶ ACROSAHS study: Detection of acromegaly in a cohort of patients with a snoring problem or suspected sleep apnoea-hypopneas and active screening of acral growth, Ipsen (in collaboration with Dr M Mayos of the Chronic Respiratory Diseases Group), 2012-2013.
- ▶ A Aulinás, S Webb, members of the International Consortium of Familial Isolated Pituitary Adenomas (led by Prof. Marta Korbonits from St. Bartholomew's Hospital, University of London, UK).
- ▶ Study of the effect of GH on cardiomyocytes, Group 708 CIBERER (Juan Bernal, PI) and CSIC-ICCC Sant Pau (Leif Hove, PI).
- ▶ Observational study on validation of a health-related quality of life questionnaire in patients with primary hyperparathyroidism (promoted by our Pituitary Gland Disorders Group), AMGEN, SA.

## Clinical Trials

### Active in 2013

- ▶ S Webb (PI), Phase 3, multicentre, randomized, double blind study, to evaluate the efficacy and safety of pasireotide LAR in patients with Cushing disease, Protocol CSOM230G2304, Novartis Farmacéutica SA.
- ▶ S Webb (PI), CP-4-00S Phase 3, multicentre study designed to evaluate the efficacy and safety of a long acting HGH product (mo 0-4023) in adult subjects with growth hormone deficiency, Prolor Biotech Ltd.
- ▶ S Webb (PI), Phase 2 randomized, open-label, parallel group study of the safety, tolerability, pharmacokinetics and efficacy of two subcutaneous dosing regimens of atl1103 in adult patients with acromegaly, Protocol 1103-CT02, Antisense Therapeutics.

## Doctoral Theses

- ▶ María Antonia Martínez Momblán, Impact of an educational study for patients with Cushing syndrome: multicentre study, Nursing Department, University of Barcelona, I. Ubeda, SM Webb, E. Resmini (supervisors). 6 March 2013.

## Main Lines of Research

### Experimental research

- ▶ Experimental rat model of cirrhosis and ascites.
- ▶ Mechanisms and prevention of bacterial translocation in rats with cirrhosis.
- ▶ Experimental model of spontaneous and induced bacterial peritonitis: physiopathology and treatment.
- ▶ MiRNAs expression profile in inflammatory bowel disease after stimulation with toll-like receptor ligands.

### Clinical investigation

- ▶ Physiopathology, diagnosis, treatment and prevention of bacterial infections, ascites and hepatorenal syndrome in cirrhosis.
- ▶ Diagnosis and treatment of hepatic encephalopathy in cirrhosis.
- ▶ Cognitive impairment, falls and quality of life in patients with cirrhosis.

▶ Physiopathology, diagnosis, treatment and prevention of digestive haemorrhage due to portal hypertension of non-varicose origin.

▶ Diagnosis and treatment of chronic hepatitis B and C.

▶ Diagnosis and treatment of hepatocarcinoma.

▶ Physiopathology, diagnosis and treatment of intestinal inflammatory disease (inflammatory bowel disease).

▶ Diagnosis and treatment in advanced gastrointestinal endoscopy.

▶ Diagnosis and treatment of acute pancreatitis.

▶ Prevention of acute post-ERCP pancreatitis.

▶ Chronic pancreatitis and pancreatic neoplasms: molecular studies, early detection and treatment.

## Challenges

- ▶ Consolidate the CIBEREHD research group by studying complications in cirrhosis.
- ▶ Expand the hepatology research lab and develop new research.
- ▶ Consolidate the portal hypertension research group.
- ▶ Consolidate the pancreatic illness research line.

▶ Consolidate the inflammatory bowel disease research line.

▶ Consolidate the polyps and colon cancer research line.

▶ Develop a digestive endoscopy research line.

## Doctoral Theses

- ▶ Eva Román, Falls in patients with cirrhosis. Relationship with cognitive deterioration and quality of life, Dr Germán Soriano (supervisor), UAB, 8 May 2013.

## Active Grants

- ▶ Guarner C, Clinical and experimental study of bacterial translocation in cirrhosis by pyrosequencing, FIS, Carlos III Health Institute, 2011–2014.
- ▶ Villanueva C, Prevention of portal hypertension developing clinically significant hepatic cirrhosis compensated by selective hepatic vasodilation (multicenter, double-blind, randomized trial), FIS, Carlos III Health Institute, Jan 2011–Dec 2013.
- ▶ Villanueva C, Clinical study on the effects of prolonged administration of albumin 20% on the kidney cardiocirculatory function and hepatic haemodynamics in patients with advanced cirrhosis and ascites, Grifols Institute, Jan 2011–Dec 2013.
- ▶ Villanueva C, Efficacy and safety of self-expanding oesophageal prosthesis versus Sengstaken balloon catheter as emergency haemostatic therapy in patients with acute variceal bleeding and failure of endoscopic and pharmacological treatment, FIS, Carlos III Health Institute, Jan 2009–Dec 2013.
- ▶ Villanueva C, Association of statins to standard therapy in the prevention of rebleeding in patients with cirrhosis and variceal bleeding (multicentre study), Clinic Foundation, Jan 2010–Dec 2013.
- ▶ Villanueva C, Multicentre randomized double-blind, placebo-controlled study on the efficacy of treatment with beta-blockers to prevent decompensation of cirrhosis with portal hypertension, FIS, Carlos III Health Institute, Jan 2009–June 2013.
- ▶ Villanueva C, Randomized, controlled study comparing acenocoumarol versus bemiparin in patients requiring anticoagulation restart after an episode of severe gastrointestinal bleeding, Ministry of Health, Social Services and Equality, Jan 2011–Dec 2013.
- ▶ Soriano G, Effects of administration of rifaximin in patients with severe acute alcoholic hepatitis (comparative pilot study), EC11-489, Ministry of Health and Social Policy, April 2013–Dec 2014.
- ▶ Soriano G, Effects of administration of ornithine phenylacetate (OCR-002) in patients with cirrhosis and upper gastrointestinal bleeding, FIS 10/1028, Ministry of Health, Carlos III Health Institute (Río Hortega) and Ocera Therapeutics, EudraCT 2009-017819-16, May 2011–Sept 2014.
- ▶ Torras X, A phase II randomized, partially double-bind and placebo-controlled study of BI 207127 in combination with faldaprevir and ribavirin for chronic genotype 1 hepatitis C infection in an extended population of treatment naïve patients that includes those ineligible to receive peginterferon, EudraCT 2012-003535-27, Jan 2013–Dec 2015.
- ▶ Torras X, Epidemiological study to assess the management of patients with chronic hepatitis C with prior treatment failure, 2009/3595, Hospital del Mar-Municipal Institute for Medical Research, Feb 2012–April 2015.
- ▶ Soriano G, Treatment of hepatorenal syndrome with terlipressin infusion adjusted to the hemodynamic response, FIS PI 08/0126, Fundació per a la Recerca Biomèdica Clínic (Hospital Clínic), EudraCT 2011-002166-20, Feb 2012–Dec 2014.
- ▶ Soriano G, Albumin administration in the prevention of hepatorenal syndrome and death in patients with cirrhosis, bacterial infections other than spontaneous bacterial peritonitis and high risk of hospital mortality, Fundació Clínic per a la Recerca Biomèdica on behalf of the EASL-CLIF Consortium, EudraCT 2013-002416-27, Jan 2013–Dec 2015.
- ▶ Soriano G, Study of the effect of VSL#3 on the risk of falls, cognitive function and quality of life of patients with cirrhosis, VSL3-PHARMA, EudraCT IBSP-VSL-2012-124, Mar 2013–Mar 2015.
- ▶ Torras X, Phase III, randomized, double bind and placebo-controlled study of 240 mg once daily of BI 201335 for 12 or 24 weeks in combination with pegylated alpha interferon and ribavirin in patients with genotype 1 chronic hepatitis C infection who failed a prior PegIFN/RBV treatment, Boehringer Ingelheim, EudraCT 2010-021715-17, June 2011–Mar 2014.
- ▶ Guarner C, Validation of a questionnaire of adherence to treatment in patients infected with hepatitis B, Hospital del Mar-Municipal Institute for Medical Research, EudraCT AC/10/123/3126 (code: Habit 01), Feb 2012–July 2013.
- ▶ Torras X, Clinical trial phase III randomized, double-blind, placebo-controlled of BI201335 120 mg once daily for 12 or 24 weeks or BI 201335 240 mg once daily for 12 weeks in combination with pegylated interferon alpha and ribavirin in patients who have not received previous treatment (naïve) and have chronic hepatitis C genotype 1, Boehringer Ingelheim, EudraCT 2010-021716-42, June 2011–Mar 2014.
- ▶ Torras X, Phase II, open-label study of once daily BI 201335 240mg for 24 weeks in combination with pegylated interferon alpha (PegIFN) and ribavirin (RBV) in patients with genotype 1 chronic hepatitis C infection who failed a prior PegIFN/RBV treatment, Boehringer Ingelheim, EudraCT 2011-000141-20.
- ▶ Román E, Fragility syndrome in cirrhotic patients, FIS PI12/0629, Mar 2012–2015.
- ▶ Guarner-Argente C, Multicentre, randomized, double-blind clinical trial on the use of prophylactic antibiotic EUS puncture of cystic lesions of the pancreas, PI13/00609, Carlos III Health Institute, 2014–2016.

## Transfer Products

## Main Lines of Research

### Clinical microbiology

- ▶ Study of resistance mechanisms.
- ▶ Tuberculosis, epidemiology and antituberculosis resistance mechanisms.
- ▶ Molecular biology applications in infectious disease detection, taxonomy and epidemiology.
- ▶ Medical care projects.

### Kidney transplantation

- ▶ Vaccines in patients at high risk of CMV infection post-transplantation.
- ▶ Detection of patients IgG positive for CMV but with posttransplantation risk of CMV infection.
- ▶ Biomarkers for BKV in urine samples.
- ▶ Medical care projects.

### Infectious pathologies

- ▶ Restricted-use policies for antibiotic and antimicrobial agents and suitable use of antimicrobial agents.
- ▶ Study of infections associated with foreign bodies (joint prostheses, catheters, cardiac prostheses and pacemakers).
- ▶ Study of infections due to multiresistant microorganisms or requiring isolation.
- ▶ Tuberculosis.

## Challenges

### Clinical microbiology resistance mechanisms

- ▶ Study of increased resistance as a result of gene carrier-vector spread.
- ▶ Continuity of work in the context of the Spanish Network for Research into Infectious Pathologies (REIPI), heading certain projects (e.g., epidemiology of class C beta-lactamases in Spain) and cooperating with a project on the epidemiology of resistance to amoxicillin-clavulanic acid among others.
- ▶ Advancement of other research lines, both in-house and in cooperation with other centres, leading to two doctoral theses.

### Tuberculosis, epidemiology and resistance mechanisms

- ▶ Prospective monitoring of primary and acquired Mycobacterium tuberculosis re-

sistance to first-second-line drugs.

- ▶ Molecular detection of resistance using a molecular antibiogram.
- ▶ Study of the epidemiology and spread of resistant strains and assessment of the impact of immigration and the contribution of new *Mycobacterium* tuberculosis families (Beijing, EAI, CAS).

### Molecular biology applications to infectious disease detection, taxonomy and epidemiology

- ▶ Study of the usefulness of the 16S RNA gene for microbiological diagnosis and molecular identification.
- ▶ Genotype characterization of *Cryptosporidium* spp. oocysts from stool samples collected by the HSCSP Microbiology Unit.

## Challenges

## Active Grants

### **Medical care**

- ▶ Government health department agreement (ongoing) regarding the development of epidemiological surveillance support functions for nosocomial infections and flaccid paralysis.
- ▶ Study of mycoses in depth, especially invasive fusariosis and aspergillosis and respiratory tract viral infections in patients with onco-haematological diseases.
- ▶ Multicentre studies of HIV (ongoing).
- ▶ Monitoring of congenital infection in pregnant women with Chagas disease.

### **Kidney surgery**

- ▶ Vaccine in patients with high risk of CMV infection post-transplantation: Phase 2 randomized, double-blind, placebo-controlled trial of MCMV5322A/MCMV3068A for the prevention of cytomegalovirus disease in high-risk kidney allograft recipients, Clinical trial sponsored by Genetech.
- ▶ Detection of patients IgG positive for CMV with high or low risk of CMV infection post-transplantation: Translation study to assess the clinical utility of determination pre-transplant of IFN-γ secreted by CD8 + T-cell-specific guide for the prevention of CMV infection in patients of low risk of CMV infection. Clinical trial sponsored by Consejería de Sanidad y Bienestar Social de Andalucía, Spain.
- ▶ Biomarkers for BKV in urine sample: Determination of a diagnostic and prognostic biomarker in urine by proteomics of nephropathy by BK virus in renal transplant receptors, sponsored by the Infectious Diseases Department, Vall d'Hebron University Hospital, Barcelona,

Spain.

### **Infectious pathologies**

#### **Restricted-use antibiotic and antimicrobial policies**

- ▶ To minimize resistance, reduce cost and improve compliance with surgical prophylaxis (at the time of administration) through suitable use of antimicrobial agents.

#### **Epidemic outbreaks and infections caused by multiresistant microorganisms and microorganisms requiring isolation**

- ▶ To study epidemiology for our hospital.
- ▶ To reduce incidence.
- ▶ To prevent/contain epidemic outbreaks and work with the Microbiology Unit in epidemiology and molecular studies.

#### **Infections associated with foreign bodies (joint prostheses, catheters, cardiac prostheses, pacemakers)**

- ▶ To reduce incidence.
- ▶ To develop effective conservative treatment regimes.

#### **Infections in transplant patients (heart, haemopoietic progenitors)**

- ▶ To study current epidemiology.
- ▶ To assess the efficacy of prophylaxis and other preventive measures.

### **Tuberculosis**

- ▶ To cooperate with studies of resistance and with new treatment regimes for tuberculosis.

### **Other projects**

To continue with the government health department agreement regarding the development of support functions as follows:

- ▶ Epidemiological surveillance of nosocomial infections (VINCat).
- ▶ Tuberculosis control: Barcelona-Dreta Tuberculosis Operations Committee (coordinator: Dr Sambeat).
- ▶ New influenza control: Barcelona-Dreta Epidemiological Surveillance Operations Committee (coordinator: Dr López-Contreras).
- ▶ Database for monitoring CMV infections after renal transplantation.
- ▶ Database for monitoring BK virus infections after renal transplantation.
- ▶ Observational and multicentre case-controlled (1:2) study to compare the evolution of renal transplantation in patients with HIV infection (Dr Canal, Dr Facundo and Dr Serra), sponsored by the Andalusian Organ and Tissue Transplantation Society.
- ▶ Observational, epidemiological and retrospective study of management of CMV infection in a cohort of patients receiving solid organ transplantation in Catalonia (Dr Canal, Dr Facundo and Dr Serra), sponsored by the Catalan Transplantation Society.

- ▶ Ferran Navarro, Involvement of plasmids and bacteriophages in the dissemination of antimicrobial resistance and bacterial virulence factors in humans, PI13/00329, Carlos III Health Institute Research Fund, Jan 2014–Dec 2016.
- ▶ Natividad de Benito, Epidemiology of prosthetic joint infection in Spain over the last decade: evolutionary analysis of the aetiology and risk factors for multidrug antibiotic, MAPFRE Foundation 2012, Jan 2012–Dec 2016.
- ▶ Jesús Rodríguez Baño (Virginia Pomar), Fosfomycin vs meropenem in the targeted treatment of bacteraemic UTI by ESBL-producing *Escherichia coli*, FOREST project (EudraCT 2013-002922-21), PI13/01282, Carlos III Health Institute Research Fund, Jan 2014–Dec 2016.
- ▶ Lorena López Cerero (Pere Coll, Francesca March), Design and Evaluation of a rapid method to study the sensitivity of *Mycobacterium tuberculosis* based on microencapsulation technolo-

gy by focussing microfluidic (Flow Focusing), PI13/01649, Carlos III Health Institute Research Fund, Jan 2014–Dec 2016.

- ▶ Pere Coll, Ferran Navarro, Natividad de Benito, Montserrat Español, Manel Flores, Joaquín López-Contreras, Beatriz Mirelis, Mercè Gurguí, Núria Margall, Francesca March, Elisenda Miró, Carme Muñoz, Virginia Pomar, Fernando Sánchez, Núria Rabella, Spanish Network Research in Infectious Diseases (REIPI), RD12/0015/0017, Carlos III Health Institute Research Fund (RETICS), 2013–2015.
- ▶ Jesús Oteo (Elisenda Miró, Virginia Pomar), Public health impact of the spread of strains of carbapenemase-producing Enterobacteriaceae in Spain: molecular characterization of circulating strains, PI12/01242, Carlos III Health Institute Research Fund, Jan 2013–Dec 2015.
- ▶ Natividad de Benito, Virginia Pomar, Beatriz Mirelis, Mercè Gurguí, Multicentre study on the usefulness of monitoring plasma

## Collaborations

### Collaborations with IIB Sant Pau Groups

#### External Collaborations

- ▶ Quality control agreement as referral centre for the Spanish Society of Clinical Microbiology and Infectious Diseases (SEIMC), Jan 2013–.
- ▶ Study of *Bacillus cereus* var. *toyoi* resistance to tetracycline and chloramphenicol, collaboration Agreement with Rubinum SA, 2013–2014.

- ▶ Evaluation of new commercial preparations, agreement with Izasa Distribuciones Técnicas SA, 2013–2014.
- ▶ Validation of reactive syphilis BIOFLASH-BIO-FLASH HBeAg, Anti-HBe BIO-FLASH, all chemiluminescence immunoassays operating in the autoanalyzer BIO-FLASH, as well as other serological markers. Cooperation agreement, Biokit SA, 2014.

## Awards

- ▶ Fernández-Hidalgo N, Almirante B, Gavaldà J, Gurgui M, Peña C, de Alarcón A, Ruiz J, Vilacosta I, Montejo M, Vallejo N, López-Medrano F, Plata A, López J, Hidalgo-Tenorio C, Gálvez J, Sáez C, Lomas JM, Falcone M, de la Torre J, Martínez-Lacasa X, Pahissa A. Ampicillin plus ceftriaxone is as effective as ampicillin plus gentamicin for treating *Enterococcus faecalis* infective endocarditis. Clin Infect Dis. 2013 May; 56(9):1261–8. Emanuel Wolinsky Award 2013 (Clinical Infectious Diseases) and Dr Josep Barrio Best Scientific Article Award 2013 (Catalan Society of Infectious Diseases and Clinical Microbiology).

## Main Lines of Research

### Bone metabolism and osteoporosis

- ▶ Analysis of genetic influence on osteoporosis by means of aggregation studies in families of three or more generations with a minimum of 15 members.
- ▶ Bone structure study with quantitative CT of hip and spine, analysing the contribution of trabecular and cortical components using HRCT.
- ▶ Description of fat values and percentages in a normal population (in collaboration with the HIV Unit and CETIR Medical Group).
- ▶ Analysis of the influence of an intervention (physical exercise) on changes in the muscle compartment of patients with cirrhosis measured by DXA and HRQCT (in collaboration with the Gastroenterology Department).
- ▶ Description of bone structure in patients with a history of acromegaly assessed by DXA and HRQCT.

### Hypertension and vascular risk

- ▶ Hypertension and quality of life.
- ▶ Refractory hypertension.
- ▶ Use of alirocumab in hypercholesterolemia.

### Clinical management, internal medicine and geriatrics

- ▶ Health care quality indexes (mortality, readmissions, etc.).
- ▶ Perioperative medicine.
- ▶ Potentially inappropriate prescribing to older patients admitted to hospital.

### Rheumatology and rheumatoid arthritis

- ▶ Immunomodulation due to anti-CD20 (rituximab) treatment and study of polymor-

phisms.

- ▶ Pharmacokinetics of methotrexate.
- ▶ Evaluation of baricitinib in patients with moderately to severely active rheumatoid arthritis who have had an inadequate response to methotrexate or antiTNF therapy.
- ▶ Evaluation of tofacitinib in patients with moderately to severely active rheumatoid arthritis with inadequate response to biologic DMARD.
- ▶ Evaluation of the JAK-STAT pathway in patients with rheumatoid arthritis treated with tofacitinib.

### Systemic sclerosis

- ▶ Capillaroscopy patterns and correlation with auto-antibodies and pulmonary function tests.
- ▶ Evidence-based detection of pulmonary arterial hypertension in systemic sclerosis: the DETECT study.
- ▶ Use of endothelin receptor antagonism to prevent pulmonary arterial hypertension (in collaboration with Vall d'Hebron University Hospital, Barcelona, Spain).
- ▶ Genetic studies in systemic sclerosis and collaboration with DUO Registry and LAUDES study.
- ▶ Study of capillaroscopy patterns in diffuse connective tissue diseases: QuantiCAP study.

### Gout

- ▶ Epidemiology of hyperuricaemia and gout.

### Sjögren syndrome

- ▶ Clinical and epidemiological findings in Spanish patients with primary Sjögren syndrome (in collaboration with Spanish Society of Rheumatology).

## Challenges

- ▶ To establish stable work relations between the HSCSP Bone Metabolism and Genomics of Complex Diseases Groups and the Bone Metabolism Unit of Hospital del Mar-Municipal Institute for Medical Research and the Faculty of Biology of the University of Barcelona.
- ▶ To strengthen ties between the HSCSP Rheumatology and Immunology departments regarding the study of immunological diseases.

## Active Grants

- ▶ Dr Arroyo (PI), Cardiovascular risk in patients presenting to the emergency department with acute vascular accident, HSCSP Research Institute.
- ▶ Dr Arroyo (PI), Degree of control of risk factors one year after having suffered an acute stroke: acute coronary syndrome or CVA, HSCSP Research Institute.
- ▶ Dr Malouf (PI), Longitudinal epidemiological study for the assessment of arterial stiffness in patients with renal insufficiency and treatment with vitamin D3 and vitamin D analogues, HSCSP Research Institute.
- ▶ Dr Arroyo (PI), Effect of stress reduction based on mindfulness on blood pressure (BP) of patients with high BP or grade 1 hypertension (HTN). HSCSP Research Institute.
- ▶ Dr Arroyo (PI), SHOT study (Stroke in Hypertension Optimal Treatment Trial), European Society of Hypertension/Chinese Hypertension League.
- ▶ Dr Matas (PI), A randomized, double-blind study of the efficacy and safety of regn727 added on to rosuvastatin versus ezetimibe added on to rosuvastatin versus rosuvastatin dose increase in patients who are not controlled on rosuvastatin, Protocol R727-CL-1118, SANOFI Laboratories.
- ▶ Dr Matas (PI), A randomized, double-blind study of the efficacy and safety of regn727 added-on to atorvastatin versus ezetimibe added-on to atorvastatin versus atorvastatin dose increase in patients who are not controlled on atorvastatin, Protocol R727-CL-1110, SANOFI Laboratories.
- ▶ Dr Matas (PI), A randomized, double-blind, placebo-controlled, parallel group study to evaluate the efficacy and safety of alirocumab in patients with primary hypercholesterolemia not treated with a statin, Odyssey CHOICE II EFC13786, SANOFI Laboratories.
- ▶ Dr Matas (PI), A randomized, double-blind, placebo-controlled, parallel-group study to evaluate the effect of sar236553/regn727 on the occurrence of cardiovascular events in patients who have recently experienced an acute coronary syndrome, Odyssey OUTCOMES EFC 11570, SANOFI Laboratories.
- ▶ Olga H Torres (PI, and three researchers), Study on the misuse of drugs in elderly patients hospitalized in internal medicine in different Spanish hospitals for implementation and development at HSCSP (with Vall d'Hebron University Hospital, Bellvitge University Hospital, Hospital Clínic de Barcelona, Virgen de Rocío University Hospital, San Juan de Dios del Aljarafe Hospital, Hospital General Juan Ramón Jiménez), EC10-077, Ministry of Health and Social Policy, 16 Mar 2011–31 Dec 2014 .
- ▶ Susan Webb (PI), Etiopathogenesis of cardiopathy in acromegaly and its relation to body composition, 11/00001, FIS Grant, 2011-2014, €172,500.
- ▶ J Casademont (PI), Intermediate phenotypes in the risk of developing osteoporosis. GAO (genetic analysis of osteoporosis) project, Health Research Projects Subprogramme, FIS PI11/01175, Ministry of Science and Innovation-ISCIII, 2012-2014, €169,345.55.

## Collaborations

### Collaborations with IIB Sant Pau Groups

- ▶ Digestive Diseases (Dr Germán Soriano), Study by densitometry and ergospirometry of the effects of an exercise programme in overweight patients with liver cirrhosis.
- ▶ Orthopaedic Surgery and Traumatology Service (Dr José Carlos González Rodríguez),
- ▶ Randomized, double-blind, placebo-controlled clinical trial of parallel groups assessing the efficacy of subcutaneous denosumab for periprosthetic resorption decrease in patients with total knee prosthesis, IIBSP-DEN-2012-24, Eudra No: 2012-001285-15.
- ▶ Cardiovascular Risk Group (Dr Laiz Matas), Longitudinal epidemiological study for the assessment of arterial stiffness in patients with renal insufficiency and treatment with vitamin D3 and vitamin D analogues, IIBSP-VIT-2013-138.

### External Collaborations

- ▶ Dr Luis del Rio, Standardized measures of different tissues using dual-energy X-ray absorptiometry, CETIR Medical Group, Barcelona, Spain.
- ▶ Internal Medicine Pneumonia Study (ENEMI), coordinated by the Hospital General Universitario Gregorio Marañón, Madrid, Spain.
- ▶ Dr César Díaz Torné, panellist for the Guidelines to Clinical Practice for Gout (GuipClinGot), Spanish Rheumatology Society.

## Main Lines of Research

- ▶ Pathogenic mechanisms of gynaecological cancer (endometrial, ovarian, etc).
- ▶ Molecular mechanisms of stromal response and immunosuppression in endometrial cancer.
- ▶ Clinical application of prognostic factors
- ▶ Clinical application of tumour markers.
- ▶ Molecular biology of uterine and extra-uterine sarcomas.

## Challenges

- ▶ Progress as a productive translational gynaecological cancer research group, capable of competing with other highly visible groups in Barcelona that publish regular articles in reputable journals.
- ▶ Cooperate with other groups at the national and international levels.

## Active Grants

- ▶ Prat J, Role of CDC42-macrophages in the development of clear cell carcinoma and endometrioid carcinoma in endometriosis, 9438/2011, Mutua Madrileña Foundation, July 2011-July 2013, €16,000.
- ▶ Prat J, Agreement between the Department of Health and Farmaindustria, CATBIO-03, Farmaindustria, September 2010-June 2014, €44,694.
- ▶ Prat J, Retics Project, RD12\_4357-6116-0036-0011, Cancer Cooperative Research Thematic Network (RTICC), November 2012-December 2013, €44,275.
- ▶ Prat J, Tumour-stroma interaction in the

progression of endometrial carcinoma: the role of tumour microenvironment and microRNAs in myometrial invasion, PI11-01561, FIS, September 2011-June 2015, €144,000.

- ▶ Prat J, Molecular alterations related with progression in endometrial cancer (Stable Research Group), Spanish Association Against Cancer (AECC) 2011, September 2011-September 2016, €1,200,000.
- ▶ Espinosa I, CSF1-signature in uterine leiomyosarcomas, PI12/01645, FIS, €84,700.

## Collaborations

### Collaborations with IIB Sant Pau Groups

- ▶ Experimental Immunology (Silvia Vidal, HSCSP IR).

### External Collaborations

Molecular alterations related with progression in endometrial cancer (Spanish Association Against Cancer (AECC)):

- ▶ Dr Jaume Reventós, Vall d'Hebron Hospital Research Institute (VHIR), Barcelona, Spain.
- ▶ Dr Xavier Matias-Guiu, Institute for Biomedical Research, Lleida (IRB Lleida), Spain.
- ▶ Dr Miguel Abal, Santiago de Compostela University Hospital Complex (CHUS), Spain.
- ▶ Dr Gema Moreno, Fundación MD Anderson Internacional, Madrid, Spain.

**Scientific Production****Books or Chapters****With ISBN**

- ▶ Prat J, Damjanov I, Tumours of the female genital organs (Chapter 10, pp. 109-129), in Damjanov I, Fan F (eds), Cancer Grading Manual (2nd ed), Springer New York, 2013.

**Other Publications****Letters**

- ▶ Mozos A, Prat J. Epithelial-to-mesenchymal transition in endometrioid adenocarcinoma of the endometrium reply. *Hum Pathol* 2013; 44:1957.

**Video and DVDs**

- ▶ Prat J. Gynecologic Pathology (Masters of Pathology Series Vol. 1, Damjanov I, Ed). Video and DVDs (12). The Oakstone Institute. CMEinfo. Birmingham USA, 2013 (11 lectures, 20 hours).

## Main Lines of Research

### Asthma

- ▶ Asthma exacerbations.
- ▶ Severe asthma.
- ▶ Good clinical practice guidelines for asthma.
- ▶ Bronchial inflammation.
- ▶ Experimental asthma and pathogenic mechanisms.
- ▶ Multicentre biobank specializing in bronchial biopsies for research into asthma.
- ▶ Bronchial thermoplasty.
- ▶ Clinical trials.

### COPD and respiratory failure

- ▶ Non-invasive mechanical ventilation.
- ▶ Respiratory rehabilitation.
- ▶ Pathophysiology.
- ▶ Exacerbation.

### Obstructive sleep apnoea (OSA)

- ▶ Physiology and clinical, diagnostic and treatment consequences of sleep disorders.
- ▶ Obesity-hypoventilation syndrome.
- ▶ Analysis of airway inflammation in patients with OSA.

## Challenges

- ▶ Consolidate a leading clinical trial unit in respiratory diseases.
- ▶ Capture pre-clinical development contracts from the pharmaceutical and biotech industry, using the capabilities of our basic research lab and experimental animal models.
- ▶ Recruit research trainees seeking a doctoral degree.

- ▶ Support the development of multidisciplinary research networks such as the Barcelona Respiratory Network and the Programme for Integrated Research for Asthma of the Spanish Society of Pneumology and Thoracic Surgery (SEPAR), and collaborate with or become involved in existing networks such as CIBER-Respiratory Disorders.

## Awards

- ▶ Astrid Crespo, Eder Mateus, Montserrat Torrejón, Alicia Belda, Jordi Giner, Teresa Garriga, Carmen Granel, Silvia Vidal, Cándido Juárez, Vicente Plaza, Pneumology and Immunology Service (HSCSP), The percentage of neutrophils expressing TLR4 in induced sputum decreases in non-IgE-dependent asthmatics, Spanish Society of Pneumology and Thoracic Surgery (SEPAR) ORO Best Communication Award (Asthma Area) 2013.

## Active Grants

- ▶ Ramos Barbón, D (PI), Interaction between immune regulation and mechanisms of airway remodelling in asthma: pathogenic effects versus therapeutic potential, PI11/01001, FIS, Jan 2012-Dec 2014, €156,540.12.
- ▶ Ramos Barbón, D (PI), Development of a biobank subspecialized in bronchial biopsies for asthma research, 09/862, Spanish Society of Pneumology and Thoracic Surgery (SEPAR), June 2010-May 2013, €12,000.
- ▶ Crespo A (PI), Expression of toll-like receptors in sputum cells induced in asthmatic patients. Relationship with the phenotype, severity and level of asthma control, 2012 Maria Ravà Grant, Catalan Pneumology Foundation (FUCAP), Jan 2013-Dec 2014, €12,000.
- ▶ Solanes I (PI), Study of pulmonary defence mechanisms in severe COPD and their relation to infection of the airway, Catalan Pneumology Foundation (FUCAP), Jan 2011-Dec 2013, €12,000.
- ▶ Ramos Barbón, D (PI), Interaction between immune regulation and mechanisms of airway remodelling in asthma: pathogenic effects versus therapeutic potential. Catalan Pneumology Foundation (FUCAP), Jan 2013-Dec 2015, €9,000.
- ▶ Sibila O (PI), New diagnostic methods for bacterial colonization in COPD; electronic nose, microarrays and high-resolution CT. Spanish Society of Pneumology and Thoracic Surgery (SEPAR), /11, June 2012-May 2015, €12,000.
- ▶ Plaza V (PI), Expression of toll-like receptors in sputum cells induced in asthmatic patients. Relationship with the phenotype, severity and level of asthma control, 2011 Leti grant, Catalan, Pneumology Foundation (FUCAP), Jan 2012-Dec 2014.
- ▶ Mola A (PI), Study of cerebral hemodynamic and metabolic changes in patients with SAHS using optical transcranial spectroscopy techniques, Catalan Society of Pneumology (SOCAP), Jan 2011-Dec 2013, €16,000.
- ▶ Peiro M, Plaza V (PIs), Effectiveness of a programme of minimal educational intervention in asthma control and prevention of exacerbations (PROMETEO), Official College of Nurses of Barcelona (COIB), Jan 2011-Dec 2013, €6,000.
- ▶ Castillo Villegas D (PI), Functional and genetic characterization of pulmonary langerhans cell histiocytosis, 13/016/1404, Mutua Madrileña Foundation, 2013-2016, €6,000.
- ▶ Castillo Villegas D (PI), Functional and genetic characterization of pulmonary langerhans cell histiocytosis, 13/016/1404. EP-ID-Futuro Group, Spanish Society of Pneumology and Thoracic Surgery (SEPAR), 2013-2016, €24,320.
- ▶ Morante Vélez FE (PI), Impact of early rehabilitation respiratory on exacerbations in patients readmitted with chronic obstructive pulmonary disease (COPD), 229|2012, Spanish Society of Pneumology and Thoracic Surgery (SEPAR), June 2013-May 2016, €12,000.
- ▶ Güell Rous MR (PI), Effects of training after resection surgery in patients with lung cancer, Catalan Society of Pneumology (SOCAP), 2012-2015.
- ▶ Güell Rous MR (PI), Benefits of liquid oxygen in COPD patients without criteria for continuous domiciliary oxygen therapy, presenting with desaturation, Catalan Society of Pneumology (SOCAP), 2013-2016.
- ▶ Soto Retes L, (PI), EPONA study: evaluation and new perspectives in pathogenesis, detection and use of nasal nitric oxide and electronic nose, Spanish Society of Allergology and Clinical Immunology (SEAIC), 2013-2016, €15,000.
- ▶ Giner Donaire J (PI), Exhaled air temperature as a marker of bronchial inflammation in asthma, Spanish Society of Pneumology and Thoracic Surgery (SEPAR), 2011-2014, €8,000.
- ▶ Ramos Barbón, D. (PI), Interaction between immune regulation and mechanisms of airway remodelling in asthma: pathogenic effects versus therapeutic potential, 261|2012, Spanish Society of Pneumology and Thoracic Surgery (SEPAR), June 2013-May 2016, €12,000.

## Collaborations

### Collaborations with IIB Sant Pau Groups

- ▶ Dr V. Plaza, collaboration in the EPONA study with the Ear, Nose and Throat Cancers Group.
- ▶ Dr V. Plaza, collaboration in the TAGA study with the Genetics and Vascular Surgery Departments.

### External Collaborations

- ▶ Dr V Plaza, Emergent Asthma Group, SEPAR.
- ▶ Dr V Plaza, INASMA Group.
- ▶ Drs V Plaza and D Ramos Barbón, Integrated Research Programme (PII) for Asthma, SEPAR.
- ▶ Drs V Plaza and D Ramos Barbón, group associated with CIBER-Respiratory.
- ▶ Dr D Castillo Villegas, National Institute for Rare Diseases, Carlos III Health Institute, Madrid, Spain.
- ▶ Dr D Castillo Villegas, International Working Group on Langerhans Cell Histiocytosis and EUROHISTIONET.

- ▶ Dr D Ramos Barbón (PI), Multicentre Biobank of Bronchial Biopsies for Asthma Research, with collaborators as follows:
  - Dr Carlos Martínez Rivera from Hospital Universitario Germans Trias i Pujol, Badalona, Spain.
  - Dr Antolín López Viña from Hospital Universitario Puerta de Hierro, Madrid, Spain.
  - Dr Francisco Javier González Barcala from Complexo Hospitalario de Pontevedra, Spain.
  - Dr Teresa Bazús González from Hospital Universitario Central de Asturias, Oviedo, Spain.
  - Dr Luis Pérez de Llano from Hospital Lucus Augusti, Lugo, Spain (pending approval).
  - Dr Patrick Berger from Université Bordeaux 2, Bordeaux, France.
  - Dr James G Martin from McGill University, Montreal, Canada.

----------------	----------

## Main Lines of Research

### Clinical

- ▶ Development of new therapeutic strategies.
- ▶ Studies to improve tumour staging.
- ▶ Studies to detect residual disease.

### Translational

- ▶ Personalized anticancer therapy.
- ▶ Studies of predictive and prognostic molecular markers.

## Challenges

- ▶ Consolidate clinical research into cancer.
- ▶ Foster translational research into cancer in cooperation with other internal and external research groups.

- ▶ Consolidate the bank of tumours, DNA and serum for patients with cancer diagnosed and treated in our hospital.
- ▶ Develop new early-stage drugs (phase 0/1 studies).

## Active Grants

- ▶ Agustí Barnadas Molins (PI), Development of an algorithm to predict treatment response in patients with head and neck locally advanced squamous cell cancer, PI11-00525, FIS, Carlos III Health Institute.
- ▶ Agustí Barnadas Molins (PI), Identification of molecular markers predictors of genotoxic response in patients with locally advanced head and neck squamous cell cancer, Merck Serono Fundación Salud 2000 (2011 Call).
- ▶ Daniel Escuin Borras (PI), Mechanism of action and resistance to taxanes in breast cancer, PI10-00307, FIS, Carlos III Health Institute.

- ▶ Teresa Ramón y Cajal Asensio (PI), Mammographic density, genetic susceptibility and breast cancer in women from high-risk families (DM-BRCA project), PI10, FIS, Carlos III Health Institute.
- ▶ Daniel Escuin Borras (PI), Expression profile of miRNAs in primary breast tumor and sentinel lymph nodes: implications for the invasion mechanisms and value as metastatic markers, PI13-00110, FIS, Carlos III Health Institute.

## Collaborations

### Collaborations with IIB Sant Pau Groups

- ▶ Oncogenesis and Antitumour Drugs (Dr R Mangues).
- ▶ Molecular Pathology of Gynaecologic Cancer (Dr J Prat).
- ▶ Genetic Diseases (Dr M Baiget).
- ▶ Breast Cancer (Dr E Lerma).

### External Collaborations

- ▶ Tumoural progression modelling group at the Biomedical Research Institute (IRB) (Dr A Nebreda).
- ▶ Methylation and resistance to chemotherapy in ovarian cancer (Dr M Esteller).

## Main Lines of Research

- ▶ Development of novel animal models of disseminated disease in solid tumours and haematological neoplasms for the mechanistic study of metastases and preclinical drug development
- ▶ Identification of prognostic biomarkers in head and neck squamous cell carcinoma and their functional validation *in vivo*
- ▶ Development of nanoconjugates for targeted drug delivery of antitumour drugs to metastasis-initiating cells

## Challenges

- ▶ Obtain funding to ensure stable employment of senior researchers, attract postdoctoral fellows and reinforce current collaborations with clinicians.
- ▶ Develop molecular markers for therapeutic decision-making in head and neck carcinomas.
- ▶ Achieve antimetastatic effects by targeting antitumour drugs to metastasis-initiating cells.
- ▶ Enhance international collaboration and participation in EU networks and industrial projects.

## Active Grants

- ▶ Mangues R, Development of metastatic colorectal cancer models to study tumour relapse, PI12/01861, FIS, Carlos III Health Institute, Jan 2013-Dec 2014, €220,000.
- ▶ Mangues R, International Cooperative Project. ATL: Oncogenesis induced by HTLV-1 and inhibition of focal adhesions as a therapeutic strategy, PIB2010BZ-00563, Spanish Ministry of Economy and Conselho Nacional de Desenvolvimento Científico e Tecnológico (CNPq, Brazil), 15 Dec 2010-14 Dec 2013, €140,000.
- ▶ Barnadas A, Development of an algorithm predictor of response to therapy in locally advanced head and neck cancer patients, PS09/00334, FIS, Carlos III Health Institute, Jan 2010-Dec 2013, €220,715.
- ▶ Sierra J, Minimal residual disease in acute myeloid leukaemia: involvement of the bone marrow microenvironment and evaluation of nanoparticles for targeted gene therapy, PI11/00872, FIS, Carlos III Health Institute, Jan 2012-Dec 2014, €213,565.
- ▶ Sierra J, Coordinated Project: Evaluation of focal adhesions as novel therapeutic targets in acute myeloid leukaemia, 2010-100830, Marató de TV3 Foundation, HSCSP (coordinator) with Hospital Universitari La Fe de Valencia and Hospital Universitario de Salamanca, 4 Mar 2011-4 Mar 2014, €403,750.
- ▶ Trias M, Coordinated Project: Development of nanomedicines for enzyme replacement therapy in Fabry disease, 2010-101233, La Marató de TV3 Foundation, Hospital Vall d'Hebron (coordinator: S. Schwartz) with HSCSP, IBEC, ICMB-CSIC and UAB, 4 Mar 2011-4 Mar 2014, €475,050.

## Research Network Participation

- ▶ Mangues R, HypoxiaNet, Hypoxia sensing, signalling and adaptation, Roland H. Wenger, University of Zurich, Switzerland (chair), EU COST Action TD0901, 16 Dec 2009-15 Nov 2013, €480,000.
- ▶ Mangues R, CIBER- Bioengineering, Biomaterials and Nanomedicine, CB06/01/1031, Carlos III Health Institute, Jan 2013-Dec 2013, €98,000.
- ▶ Mangues R. Oncogenesis and Antitumour Drugs Group (IIB-Sant Pau), 2009-SGR-1437, AGAUR (consolidated research group funding), Jan 2009-Dec 2013, €69,680.

## Transfer Products

- ▶ Mangues R. Lead optimization for innovative, orally bioavailable wide spectrum antitumour drugs (WiPATDrug). Consortium: Elexopharm (Germany), Pharmacelsus (Germany), PharmBioTech (Germany), Admescope SBW/Novamass Ltd (Finland). Coordinator SME: Argon Pharma (Barcelona, Spain), Argon Pharma legal representative: R. Mangues, EU, 1.1.2013-31.12.2015, RDNET12-1-0003, EUROTRANSBIO, €1,500,000.

## Patents

- ▶ Vazquez E, Unzueta U, Ferrer N, Villaverde A, Céspedes MV, Casanova I, Mangues R, Methods and reagents for efficient and targeted delivery of therapeutic molecules to CXCR4 cells, Institut de Recerca, HSCSP, UAB and CIBER-BBN (titleholders), USA, China, Japan and EU (PCT Int. ## Main Lines of Research

### Malignant Haemopathologies

- ▶ Diagnostic activities: morphological, immunophenotyping, cytogenetic and molecular characterization (particularly of acute leukaemias).
- ▶ Biological characteristics responding to therapy.
- ▶ New treatments using cell line models aimed at molecular targets.
- ▶ Genomic (microarrays) and proteomic platforms for diagnosis.
- ▶ Murine models development.

### Noncancerous Haemopathologies

- ▶ Diagnosis and characterization of thrombocytopenias, thrombocytopathies and other platelet pathologies, especially complex pathologies (of genetic, mixed or unknown origin) and including unusual presentations of common diseases.
- ▶ In the framework of the GAIT-2 (genetic analysis of idiopathic thrombophilia, phase 2) project, to seek new phenotypes that favour the development of thrombosis, specifically related to the structure and function of platelets and other blood cells.

## Challenges

- ▶ Consolidate characterization of haematological tumours and complex, rare and genetic noncancerous haemopathologies.
- ▶ Include the results of mass-analysis genomic and proteomic platforms in diagnostic algorithms and establish prognostic factors for haematological disorders, preferably complex or genetic neoplasms and noncancerous pathologies.
- ▶ Develop functional cell culture and animal (murine) models.

- ▶ Consolidate cooperation with the GAIT-2 project, especially regarding platelet and other blood cell participation in thrombosis generation.
- ▶ Promote interaction and stable links with internal groups (clinical haematology, pathology, gastrointestinal, haemostasis and thrombosis, complex disease genomics areas) and with other groups in Spain and abroad, especially those with complementary technologies.

## Active Grants

- ▶ Josep F Nomdedéu Guinot (PI), WT1 mRNA levels in myeloid malignancies: digital PCR methods for prognostic stratification and relapse management, PI13/02729, FIS, Ministry of Science and Innovation (health research projects), 2014-2016.
- ▶ Diagnostic haematology, SGR 383, AGAUR, 2014.

## Collaborations

### Collaborations with IIB Sant Pau Group

- ▶ Haematology (Dr Sierra)
- ▶ Genetics (Dr Baiget)
- ▶ Proteins (Dr Pablo Fuentes Prior)

### External Collaborations

- ▶ Dr A Bigas, IMIM Hospital del Mar.
- ▶ Dr Pablo Menéndez, Josep Carreras Foundation (Hospital Clínic).
- ▶ Dr Alberto Villanueva, IDIBELL-Bellvitge Biomedical Research Institute.

## Main Lines of Research

- ▶ Genetic and molecular predictors of response to head and neck cancer (with the Oncogenesis and Antitumour Drugs group).
- ▶ Molecular mechanisms of inflammation in head and neck cancer (with the Inflammation Laboratory).

- ▶ Nasosinal endoscopic surgery: innovations in skull base techniques.
- ▶ Internal ear: aspects related to severe deafness, cochlear implants and otoneurological surgery of tumours.

## Challenges

- ▶ Promote clinical and translational research into head and neck cancer with a very large database of head and neck cancers.

- ▶ Study relevant clinical issues in depth (second-third neoplasms, staging concerns, prognostic factors, etc) and investigate translational aspects such as genetic and molecular predictors.

## Active Grants

- ▶ Xavier León, Role of the IL-1/NF-κB axis in squamous cell head and neck cancers, FIS PI11/02380, Carlos III Health Institute, 2012-2014, €84,000.
- ▶ Ramón Mangues Bafalluy, Oncogenesis and Antitumoural Group, Consolidated Research Group, AGAUR (Generalitat de Catalunya), 2009-2013.
- ▶ Manuel Doblaré (scientific director) and Ramón Mangues Bafalluy (PI), Participa-

tion in CIBER-Bioengineering, Biomaterials and Nanomedicine, Carlos III Health Institute and Ministry of Science and Innovation, 2010-2013.

- ▶ FX Bosch José (PI), The etiologic and prognostic role of papillomavirus in patients with oropharyngeal cancer, National R+D+I Plan 2011-2014, 2011-2014.

## Collaborations

### Collaborations with IIB Sant Pau Groups

## Main Lines of Research

- ▶ Study of the molecular and cellular pathophysiology of haematological cancers.
- ▶ Study of the prognostic value of clinical and biological parameters in haematological malignancies.
- ▶ Design of new modalities of chemotherapy, biotherapy and drug treatment targeting molecular mechanisms.

## Challenges

- ▶ Identify new prognostic parameters for risk and therapeutic stratification.
- ▶ Evaluate targeted therapy in cell lines and animal models (with the Oncogenesis and Antitumour Drugs group).
- ▶ Reduce toxicity and increase availability of allogeneic transplants.
- ▶ Molecularly characterize acute myeloid leukaemia and determine the prognostic value of known genes and other genes of uncertain significance (with the Haematology Laboratory).

- ▶ Design of new modalities of haematopoietic stem-cell transplantation and cell therapy.
- ▶ Psychological intervention and quality of life in patients with haematological malignancies.

## Transfer Products

- ▶ Rawstron AC, Böttcher S, Letestu R, Villamor N, Fazi C, Kartsios H, de Tute RM, Shingles J, Ritgen M, Moreno C, Lin K, Pettitt AR, Kneba M, Montserrat E, Cymbalista F, Hallek M, Hillmen P, Ghia P (European Research Initiative in CLL), Improving efficiency and sensitivity: European Research Initiative in CLL (ERIC) update on the international harmonised approach for flow cytometric residual disease monitoring in CLL, , 2013 Jan;27(1):142-9. DOI: 10.1038/leu.2012.216. Epub 2012 Jul 31.

## Active Grants

- ▶ Sierra J, Analysis of FcγRIIb expression and function in normal B cells and in chronic lymphatic leukaemia, Cellex Foundation, 2013-2016, €133,000.
- ▶ Sierra J, Evaluation of focal adhesions as a new therapeutic target in acute myeloid leukaemia, 100830/31/32, La Marató de TV3, 2011-2013, €403,750.
- ▶ Sierra J, Minimal residual disease in acute myeloid leukaemia: involvement of bone marrow microenvironment and evaluation of a new nanoparticle for targeted therapy, PI01100872, FIS, Carlos III Health Institute, 2012-2014, €252,258.
- ▶ Moreno C, Immunophenotypic and molecular characterization of residual leukaemic cells posttreatment in patients with chronic lymphatic leukaemia, PI01101740, FIS, Carlos III Health Institute, 2012-2014, €90,000.
- ▶ Brunet S, Prospective phase I/II toxicity and efficacy study of treatment of de novo acute myeloid leukaemia with the combination of increasing doses of idarubicin and cytarabine and priming with G-CSF, EC11-364FIS, Carlos III Health Institute, 2012-2014, €90,000.
- ▶ Sierra J, Diagnosis and treatment of haematological malignancies, 2009SGR-168, AGAUR (grants to support research groups in Catalonia), 2009-2013, €46,800.

Lavinia Dinia	HSCSP RI

## Nursing Researchers

Rebeca Marín	HSCSP RI
--------------	----------

## Main Lines of Research

- ▶ Brain neurorepair after stroke.
- ▶ Role of statins in ischemic and haemorrhagic stroke.
- ▶ Prevention of cerebral haemorrhage with anticoagulants.
- ▶ Endothelial progenitor cells in stroke.
- ▶ Aetiological classification of brain haemorrhage.
- ▶ Pathophysiology of hematoma growth in acute cerebral haemorrhage.
- ▶ Benefits and risks of intravenous thrombolysis.
- ▶ Sonothrombolysis.
- ▶ Non-invasive monitoring of cerebral flow with applied optic methods.
- ▶ Participation in clinical trials

## Challenges

- ▶ Enhance cooperation with other groups in the framework of Spanish stroke research.
- ▶ Network (RETICS/INVICTUS) and also intrahospital cooperation (the Catalan Institute of Cardiovascular Sciences and the Haemostasis-Thrombosis group) and extra-hospital cooperation (with groups managed by Dr. García-Verdugo in Valencia, Dr. Arús at the Autonomous University of Barcelona, Dr. Anna Planas at Clinic

Hospital, Dr. Turgut Durduran at ICFO). To obtain funding from FIS, regional authorities and private companies.

- ▶ Increase the number of contracted and grant-aided researchers and professionally develop existing researchers.

## Active Grants

- ▶ Joan Martí Fàbregas, Sonothrombolysis enhanced with microbubbles as a new treatment for acute ischaemic stroke: a pilot prospective randomized study, 334/U/2011, Fundació La Marató de TV3, 2nd year, €199,924.
- ▶ Joan Martí Fàbregas, RETICS-INVICTUS, RD012/0014, FIS, 2013-2016, €47,500.87/year.

- ▶ Joan Martí Fàbregas, Cerebral haemorrhage and oral anticoagulants in the secondary prevention of stroke. Predictive value of leukoaraiosis and microbleeds detected by MRI, FI12/00296, FIS, 2012-2014, €37,741.11.

## Transfer Products

- ▶ Rodríguez-Yáñez M, Castellanos M, Freijo MM, López Fernández JC, Martí-Fàbregas J, Nombela F, Simal P, Castillo J (Comité ad hoc del Grupo de Estudio de Enfermedades Cerebrovasculares de la Sociedad Española de Neurología), Díez-Tejedor E, Fuentes B, Alonso de Lechiñana M, Alvarez-Sabin J, Arenillas J, Calleja S, Casado I, Dávalos A, Díaz-Otero F, Egido JA, Gállego J, García Pastor A, Gil-Núñez A, Gilo

F, Irimia P, Lago A, Maestre J, Masjuan J, Martínez-Sánchez P, Martínez-Vila E, Molina C, Morales A, Purroy F, Ribó M, Roquer J, Rubio F, Segura T, Serena J, Tejada J, Vivancos J, Clinical practice guidelines in intracerebral haemorrhage, Neurologia. 2013 May;28(4):236-49. doi: 10.1016/j.nrl.2011.03.010. Epub 2011 May 13. PubMed PMID: 21570742.

**Collaborations with IIB Sant Pau Groups**

- ▶ Neuroradiology.
- ▶ Thrombosis and Haemostasis.
- ▶ Cardiovascular Biochemistry.
- ▶ Neurobiology of Dementias.
- ▶ Molecular Pathology and Therapies for Atherothrombotic and Ischemic Diseases.

- ▶ Dr Patricia Martínez, Hospital La Paz, Madrid, Spain.
- ▶ Dr Antonio Gil. Hospital Gregorio Marañón, Madrid, Spain.
- ▶ Dr Ángel Chamorro, Hospital Clínico de Barcelona, Spain.
- ▶ Dr Antonio Dávalos, Hospital Germans Trias i Pujol, Badalona, Spain.
- ▶ Dr Francesc Purroy, Hospital Arnau de Vilanova, Lleida, Spain.
- ▶ RETICS (cooperative health research network)/INVICTUS (ictus research)
- ▶ Clinical trials:
  - IMPACT-24b: Implant in the sphenopalatine ganglion to increase cerebral blood flow 24 hours after stroke onset.
  - IMPACT-24Bt: Implant in the sphenopalatine ganglion to increase cerebral blood flow 24 hours after stroke onset (rt-PA port).
  - CLEAR III: Evaluation of thrombolytic therapy in intraventricular haemorrhage.
  - LIFE: Multicentre, randomized, double-blind, parallel group, placebo-controlled study of the effect of treatment with F2695 (75 mg OD) in 3 months to improve functional capacity in patients with ischaemic stroke.

**External Collaborations**

- ▶ Dr García-Verdugo, Universidad de Valencia, Spain.
- ▶ Dr Carles Arús, Facultad de Ciencias, Universidad Autónoma de Barcelona, Spain.
- ▶ Dr Turgut Durduran, Instituto de Ciencias Fotónicas, Castelldefels, Barcelona, Spain.
- ▶ Dr Tomás Sobrino, Hospital General Universitario, Santiago de Compostela, Spain.
- ▶ Dr Israel Fernández, Dr. Joan Montaner, Hospital Vall d'Hebron, Barcelona, Spain.
- ▶ Dr Blanca Fuentes, Hospital La Paz, Madrid, Spain.

- ▶ Elena Jiménez Xarrié, Characterization of cell proliferation in the subventricular zones using spectroscopic magnetic resonance in a preclinical model of cerebral ischaemia, Autonomous University of Barcelona,a, Carles Arús, Joan Martí Fàbregas (supervisors), HSCSP.

## Main Lines of Research

### Autoimmune neuromuscular diseases

- ▶ Immunopathogenic studies with characterization of new target antigens in Myasthenia Gravis, and immune neuropathies (CIDP, GBS, MMN). Analysis of the innate immunity in inflammatory myopathies.
- ▶ Analysis of the impact of new immunomodulating therapies on IgG4 mediated NMD.
- ▶ Functional aspects of immune system cells (response to ligands, production of antibodies, etc).
- ▶ IGOS data base for Guillain Barre syndrome and NMD-ES Spanish registry for neuromuscular diseases.

### Muscular dystrophy, dysferlinopathy and distal myopathies

- ▶ Clinical characterization, MRI analysis as a biomarker of MD
- ▶ Molecular pathways involved in differentiation and molecular and functional interactions of dysferlin and other proteins involved in MD.
- ▶ Functional analysis of truncated forms of dysferlin with possible therapeutic implications.
- ▶ Natural history of dysferlinopathies, COS-study (Jain Foundation).

### New therapies in genetic diseases

- ▶ Bone marrow transplant in dysferlinopathy (animal model).
- ▶ Advanced therapy with stem cells and mesangioblasts in muscular dystrophies.

## Challenges

- ▶ Advance knowledge of the immunological mechanisms involved in the pathogenesis of autoimmune neuromuscular diseases (MG, CIDP, MMN) and inflammatory myopathies (DM, PM).
- ▶ Search for new antigens and develop diagnostic tests with new biomarkers in CIDP and MG.
- ▶ Implement new diagnostic methods for muscular dystrophies resulting from dysferlinopathy and other myopathies (miRNA and secretome biomarkers, MRI, etc).
- ▶ Advance knowledge of the pathogenetic

mechanisms involved in muscular dystrophy resulting from dysferlin deficiency and other muscular dystrophies.

- ▶ Implement cell therapy in mouse models of muscular dystrophy using mesoangioblasts and bone marrow to study possible applications in humans and immune system response to cell therapy in mouse models of human disease.
- ▶ Cleanroom access to manipulate cells for use in humans.
- ▶ Evaluate the effects of treatment with vitamin D in carriers of a DYSF gene mutation.

## Collaborations

### External Collaborations

- ▶ Jerome Devaux, Marseilles, France.
- ▶ Silvere van der Maarel, Leiden, The Netherlands.
- ▶ Xavier Navarro, Dept Medicina, UAB, Barcelona, Spain.
- ▶ R Martí, Hospital Vall Hebron, Barcelona, Spain.

# Neuromuscular Diseases

## Active Grants

- ▶ Eduard Gallardo, Search for biomarkers of muscular dystrophies with limb-girdle weakness, PI12/02291, FIS, 2013-2015, €109,550.
- ▶ Isabel Illa, Immunological studies regarding the development of therapeutic strategies for neuromuscular diseases, PI09/1964, FIS INTRASALUD, 2010-2013, €604,395.
- ▶ Eduard Gallardo, Research into neuromuscular diseases, 2009 SGR1004 (Consolidated Research Group), Generalitat de Catalunya, 2010-2014, €43,680.
- ▶ Isabel Illa, Clinical outcome study for dysferlinopathy, Jain Foundation, 2011-2016, €216,000.
- ▶ Eduard Gallardo, Combined cell transplantation as a therapeutic approach for dysferlinopathies and transversal study to evaluate the frequency of carriers of dysferlinopathy in Caucasian population using a monocytes test to detect dysferlin expression, Jain Foundation, 2012-2013, €91,361.
- ▶ John Newsom-Davies, A multi-centre, single-blind, randomized study comparing thymectomy to no thymectomy in non-thymomatous myasthenia gravis (MG) patients receiving prednisone, U01 NS042685-01A2, NIH, 2009-2013, €38,700.
- ▶ Isabel Illa, Research into advanced therapies in muscular dystrophy: marrow transplant and mesangioblasts in murine models, Fundación Mútua Madrileña, 2012-2013, €21,000.
- ▶ Isabel Illa, Research into advanced therapies in muscular dystrophy: marrow transplant and mesangioblasts in murine models, Fundación Gemio para la Investigación de las Distrofias Musculares o Otras Enfermedades Raras, 2009-2014, €400,000.
- ▶ Isabel Illa, Biomarkers in dysferlinopathies, Association Francaise contre les Myopathies, 2013-2014, €12,000.
- ▶ Isabel Illa, Role of RLR immunity in dermatomyositis, The Myositis Association, 2013, €32,000.

## Doctoral Theses

- ▶ Barbara Flix Ordoñez, Functional studies of dysferlin and therapeutic approaches in a mouse model of myopathy with dysferlin deficiency, Autonomous University of Barcelona, Eduard Gallardo Vigo (supervisor), IIB Sant Pau.
- ▶ Jordi Diaz Manera, Dysferlinopathy: new diagnostic and therapeutic aspects, Autonomous University of Barcelona, Isabel Illa Sandra (supervisor), IIB Sant Pau, EU.
- ▶ Luis Querol Gutiérrez, New antigenic reactivity in immune-mediated neuropathies, Autonomous University of Barcelona, Illa Sandra (supervisor), IIB Sant Pau.

# Parkinson Disease and Movement Disorders

## Main Lines of Research

### Cognitive impairment and behavioural dysfunctions in Parkinson disease:

- ▶ Knowledge and detection of the neural correlates of cognitive performance in Parkinson disease using neurophysiological techniques (event-related brain cognitive potentials) and structural and functional neuroimaging (voxel-based morphometry, cortical thickness and spectroscopy).
- ▶ Development of more sensitive tools for cognitive and functional assessment in Parkinson disease to detect subtle changes in cognitive performance and treatment response.
- ▶ Prospective follow-up analysis of cognition and mood in patients with deep-brain stimulation of the subthalamic nucleus.
- ▶ Physiological correlates and pharmacological approach to apathy in Parkinson disease and other movement disorders.
- ▶ Neurophysiological and cognitive correlates of impulse control disorders in Parkinson disease and other movement disorders: behavioural and pharmacological treatment.
- ▶ Surgery and treatment of continuous infusion in Parkinson disease.
- ▶ Follow-up and aetiological study of weight loss in patients treated with continuous infusion of intraduodenal levodopa.
- ▶ Follow-up and aetiological study of weight loss in patients treated with continuous infusion of intraduodenal levodopa.

### Essential tremor and other movement disorders:

- ▶ Molecular neuroimaging in essential tremor.
- ▶ Clinical, neurophysiological and neuroimaging assessment of patients with fragile X-associated tremor/ataxia syndrome.

### Translational research - parkinsonian animal models:

- ▶ Assessment of behavioural and cognitive modulations exerted by distinct antiparkinsonian drugs in murine models of Parkinson disease with lesions in particular neurotransmitter systems (dopaminergic and noradrenergic lesions).
- ▶ Assessment of behavioural and cognitive traits of murine models of HD

### Translational research – cell models:

- ▶ Assessment of cell cultures of neurons derived of induced pluripotent cells obtained from skin fibroblast as in vitro model for the modulation of key factors associated to both cognitive and neurotransmitter disturbances in Parkinson disease.

### Huntington disease:

- ▶ Metabolic correlates (18-FDG PET) of disease progression from pre-manifestation to the early stages.
- ▶ Metabolic correlates (18-FDG PET) of apathy and depression in pre-manifested gene carriers.
- ▶ Functional MRI study of reward sensitivity in pre-manifested and early-stage Huntington disease.
- ▶ Determination of prevalence and clinical significance of neuropsychiatric features in Huntington disease.
- ▶ Development of new instruments for cognitive and functional assessment in Huntington disease.
- ▶ Prospective observational study of Huntington disease in a European cohort (Registry Study).
- ▶ Molecular, clinical, behavioural and cognitive characterisation of the BACHD rat model of Huntington disease.

## Main Lines of Research

- ▶ Collaboration in multicentre and coordinated national projects:
  - Relationship between intermediate alleles and clinical manifestations (PI: Esther Cubo, Burgos).
  - Validation of the Spanish version of the Problem Behaviour Assessment Scale (PI: Jesús Ruiz, Barcelona).
  - Study of dietary intake in Huntington disease (PI: Esther Cubo, Burgos).
  - Multimodal neuroimaging approach to delineate emotional,

motor and cognitive corticostriatal pathways, PSI2011-2014, IDIBELL (PI: Ruth de Diego-Balaguer, Barcelona)

### Progressive supranuclear palsy:

- ▶ Development of a cognitive rating scale.
- ▶ Development of standarized eye movement evaluation.

## Challenges

### Cognitive and behavioural dysfunctions in Parkinson disease:

- ▶ Study and understanding of the neural substrates of cognitive impairment in Parkinson disease so as to improve diagnostic and therapeutic approaches.
- ▶ Development of specific tools to assess and track cognitive changes in Parkinson disease.

### Huntington disease:

- ▶ Study of the dynamics of mutant Htt protein aggregation and related neural and cognitive correlates along disease stages in Huntington disease.
- ▶ Validation of new instruments to assess and track subtle cognitive changes in pre-manifested and early-stage Huntington disease population.

### Essential tremor and other movement disorders:

- ▶ Genetic studies and genotype-phenotype correlations in essential tremor.
- ▶ Development of new therapeutic interventions in essential tremor.
- ▶ Neurochemical and structural neuroimaging studies on the pathophysiological bases of essential tremor.

### Translational research - animal models of parkinsonism:

- ▶ Behavioural, physiological and pharmacological characterization of animal models of parkinsonism with combined dopaminoergic and noradrenergic lesions.
- ▶ Physiopathology of motor, cognitive and behavioural complications linked to antiparkinsonian drugs in animal models of parkinsonism.

## Collaborations

### Collaborations with IIB Sant Pau Groups

- ▶ Neuroradiology and Nuclear Medicine (Huntington disease).

### External Collaborations

- ▶ Cognition and Brain Plasticity Group at the Bellvitge Health Science Campus attached to the Department of Basic Psychology, Faculty of Psychology, University of Barcelona and the IDIBELL (Bellvitge Biomedical Research Institute).

## Clinical trials

- ▶ Dr J Kulisevsky (PI), Open 6-12 months to evaluate the safety and efficacy of levodopa-carbidopa intestinal gel in patients with advanced Parkinson disease that responds to levodopa and severe motor fluctuations, Protocol GLORIA, Abbott.
- ▶ Dr J Kulisevsky (PI), Efficacy and safety of BIA 9-1067 in patients with idiopathic Parkinson disease and end-of-dose wearing-off treated with levodopa plus a decarboxylase inhibitor: multicentre, double-blind, randomized, placebo- and active substance-controlled parallel groups, Protocol BIA 9-1067 (BIPARK STUDY I), Bial.
- ▶ Dr J Kulisevsky (PI), Phase 3 study, 40 week, double-blind, double-dummy active-ingredient controlled study of preladenant in subjects with moderate to severe Parkinson disease, Merck.
- ▶ Dr J Kulisevsky (PI), Observational, retrospective, multicentre national study to assess the effectiveness of levodopa/carbidopa gel in patients with advanced Parkinson disease (Phase EPA-OD) Protocol ABB-LEV-2011-01 (e-DUO), Abbvie Farmacéutica SLU.

- ▶ Dr J Kulisevsky (PI), Phase IV multicentre, multinational, double-blind, placebo-controlled, three-arm study to evaluate the efficacy of rotigotine in apathy, motor symptoms and mood swings associated with Parkinson disease, Protocol PD0005 (BRIGHT), UCB.
- ▶ Dr J Kulisevsky (PI), Double-blind, placebo-controlled, fixed-dose, multicentre, 13-week follow-up to evaluate the efficacy and safety of modified release AFQ056 in reducing moderate to severe levodopa-induced dyskinesia in patients with Parkinson disease, Protocol CAFQ056A2223, Novartis.
- ▶ Dr J Kulisevsky (PI), Open study to evaluate the safety, tolerability and efficacy of AFQ056 in levodopa-induced dyskinesia in patients with Parkinson disease, Protocol CAFQ0562299, Novartis.

## Main Lines of Research

- ▶ Neuropharmacology of acute and chronic pain.
- ▶ Biochemical and molecular mechanisms involved in combined drug treatments.
- ▶ New strategies in the treatment of diabetic neuropathy.
- ▶ Identification of new targets in the modulation of emotional behaviour.

## Challenges

- ▶ Investigate new approaches to relieving-inflammatory and neuropathic pain using specific drug combinations that enhance the analgesic action of opioids and/or cannabinoids and avoid side effects.
- ▶ Advance knowledge in the molecular mechanisms involved in the antinociceptive actions of the heme oxygenase 1 enzyme during acute pain (inflammatory, visceral, heat) and chronic pain (arthritis, neuropathy).
- ▶ Identify new drugs to treat painful diabetic neuropathy and oxidative stress.
- ▶ Evaluate possible interactions between carbon monoxide and nitric oxide in the modulation of emotional behaviour.

## Active Grants

- ▶ Olga Pol, Study of new therapeutic targets in the treatment of chronic pain, PI09/0968, FIS, Carlos III Health Institute, January 2010-June 2014.

## Main Lines of Research

### Clinical trials with no therapeutic benefits to volunteer participants

- ▶ Phase I clinical trials (healthy volunteers) whose main objectives include: first-time-in-humans, safety and tolerability (local, systemic/dermatological, ophthalmological, vaginal), pharmacokinetics, bioavailability and bioequivalence (generic drugs), pharmacodynamics, interactions (drug-drug/drug-food), evaluation and characterization of biomarkers, proofs of concept, acceptability and preference studies.
- ▶ Follow-up studies in populations with the same or different characteristics (elderly, obese, postmenopausal, with liver or kidney failure).
- ▶ Collaboration with clinical services to conduct phase II/III studies.

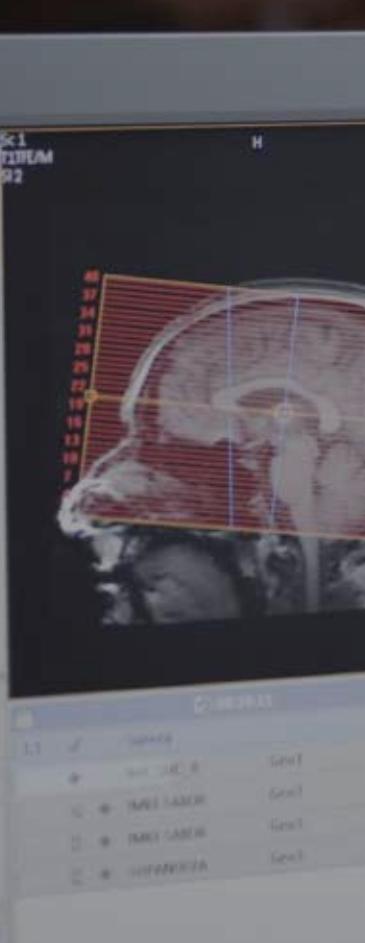

### Neuro-physio-pharmacology of sleep/wake states

- ▶ Investigate human brain activity in sleep and wakefulness, mechanisms involved in these states, problems derived from sleep disturbances and possible interventions.
- ▶ Approach the phenomenon as a continuum: appropriate interpretation of the impact of a certain intervention, whether pharmacological or not, should take into account the complementarity of evaluations performed during sleep and during wakefulness.
- ▶ Develop studies that consider the 24-hour day/night cycle as the phenomenon under study cannot be evaluated without taking this interactivity into account.
- ▶ Develop psychomotor performance tests, subjective evaluation scales, neurophysiologic recordings (quantitative EEG, evoked-sensorial potentials and polysomnography), psychophysiological tests and pupillometric tests.

## Challenges

- ▶ Consolidate and strengthen leadership in this field in Spain, conserve relationships with the pharmaceutical industry on a national level and strengthen and extend relations abroad with multinational enterprises and industries from other sectors.
- ▶ Broaden the range of questions to address in research projects along the lines of the neuro-physio-pharmacology of sleep/wake states, focusing on pharmacotherapeutic objectives and also on physiopathologic objectives in related fields, such as dreams.
- ▶ Develop neurophysiologic recording performance in ambulatory conditions, simplifying participation of volunteers but not lowering the quality of data obtained (non-negotiable element of their application as a research variable).

- ▶ Promote dissemination of our activity with a dual objective: to return knowledge generated to society and demystify research in humans, bringing it closer to the community so as to foster participation in clinical trials (particularly in specific sectors of the populations, such as the elderly).
- ▶ Set up educational activities related to our two main research lines: the application of good clinical practices in clinical research into sleep medicine and its medical (pathology, and treatment) and social (quality of life, prevention of accident risk) consequences.

## Active Grants

- ▶ Rosa Antonijoan (coordinator), INNPACTO 2012, IPT-2012-1208-300000, Ministry of the Economy and Competitiveness, nLife Therapeutics SL.

# Clinical Psychiatry

## Coordinator

Víctor Pérez Solà HSCSP  
vperez@santpau.cat  
(until juny 2013)

Maria J. Portella Moll HSCSP RI  
(from July 2013)  
Mportella@santpau.cat

## Researchers

Enric Álvarez	HSCSP
Maria Jesús Arranz	HSCSP RI
Illuminada Corripio	HSCSP
Santiago Duran-Sindreu	HSCSP
Juan Carlos Pascual	HSCSP
Josefina Pérez	HSCSP
Dolors Puigdemont	HSCSP
Joaquim Soler	HSCSP
José Soriano	HSCSP

## Technicians

Mirian Jubero HSCSP RI

## Administrative Staff

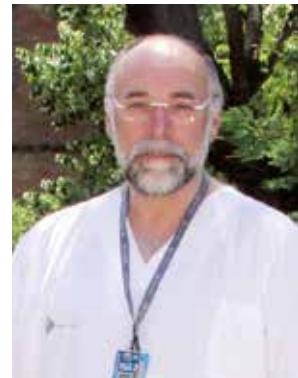

Saiko Allende CIBERSAM

## Nurse Researchers

Maria Figueras HSCSP

## Doctoral Students

Mireia Rabella	UAB
Anna Alonso	IR - HSCSP
Anna Martín	HSCSP
Matilde Elices (European Project)	IR HSCSP
Eva M. Grasa	CIBERSAM
Albert Feliu (European Project)	HSCSP RI
Maria Serra	HSCSP RI (AGAUR)
Mar Carceller	HSCSP RI
Francisco Javier de Diego	HSCSP

## Main Lines of Research

- ▶ Psychotic disorders (first episodes and persistent hallucinations).
- ▶ Affective disorders (major depression and validation of scales).
- ▶ Borderline personality disorder.

## Challenges

- ▶ Foster research that reduces the health-care, social and personal costs of mental illness by exploring areas such as epidemiology, aetiopathogenesis, physiopathology, prevention and treatment.
- ▶ Foster research into mental health therapies.
- ▶ Foster research to improve quality of life of patients with mental disorders.

## Psychotic disorders

- ▶ Study neuroimaging in first psychotic episodes.
- ▶ Study environmental, biological and genetic factors in psychosis.
- ▶ Study efficacy and effectiveness of anti-psychotic drugs.
- ▶ Study efficacy and effectiveness of psychotherapy for hallucinations.
- ▶ Study treatment resistance in schizophrenia.

## Affective disorders

- ▶ Identify and evaluate new therapeutic targets in depression.
- ▶ Study biological and genetic markers in affective disorders.
- ▶ Implement new therapeutic programmes.
- ▶ Evaluate depression and social aspects of depression.

## Personality disorders

- ▶ Implement clinical trials regarding the usefulness of mixed treatment in patients with borderline personality disorder and validate diagnostic instruments.
- ▶ Conduct genetic-neuroimaging studies of borderline personality disorder.
- ▶ Study efficacy and effectiveness of psychotherapy for treating borderline personality disorder.

## Awards

- ▶ Mar Carceller-Sindreu, Sara Vieira da Costa, Xavier Garcia-Moll, Maria Figueras, Cristina González, Maria J. Portella, Enric Álvarez, Citalopram, escitalopram and prolonged QT: alert or alarm? Bes Poster, Best Oral Communication and Second Prize, Les Jornades de Cloendes, Catalan Society of Psychiatry and Mental Health, Barcelona, June 2013.

## Active Grants

- ▶ De Diego J, Pharmacogenetics research into antidepressant-induced sexual dysfunction Catalan Psychiatry Society, 2013-2014, €3000.
- ▶ Álvarez E, Deep brain stimulation in treatment-resistant schizophrenia: a randomized, controlled, crossover pilot study, PI12/00042, FIS, 2013-2015, €110,715.
- ▶ Álvarez E, Clinical Psychiatry Group, 2009SGR 179, AGAUR Grants to Support Research Groups, Sept 2009-Dec 2013, €42,640.
- ▶ Pascual J, Study of genetic sensitivity to the environment in patients with borderline personality disorder: case-control study of gene-environment interaction, PI10/00253, FIS, Carlos III Health Institute, Jan 2011-Dec 2014, €150,040.
- ▶ Pérez V, Deep brain stimulation: functional neuroimaging studies, optimization of stimulation parameters and new indications in affective disorders, PI09/0580, FIS, Carlos III Health Institute, Jan 2010-June 2013, €92,565.
- ▶ Portella MJ, Study of structural and functional brain changes after deep brain stimulation of treatment resistant depression. Biomarkers of DBS antidepressant effects and optimization of parameters, CP10/00393, FIS, Carlos III Health Institute, Jan 2011-Dec 2014, €121,300.
- ▶ Berrocoso E, Universidad de Cádiz, MJ Portella, V Pérez, IIB Sant Pau (co-investigators), Deep brain stimulation for the treatment of resistant depression. Mechanism of action, preclinical and clinical studies, neuroimaging studies, CTS-7748, Junta de Andalucía Excellence project, 2012-2016, €267,458,95
- ▶ Catalán R, Hospital Clínic, J Pérez-Blanco, MJ Arranz, IIB Sant Pau (co-investigators), Evaluation of the cost-effectiveness of pharmacogenetic intervention in optimizing treatment with antipsychotics in patients with schizophrenia, PI11/02006, FIS, 2012-2014, €120,000.
- ▶ Corripio I (Dr Bernardo, Hospital Clínic, PI/coordinator), Clinical and neurobiological determinants of second episodes of schizophrenia. Longitudinal study of first psychotic episodes, PI11/00260, FIS, 2012-2014, €91,629,67.
- ▶ Pérez V (U Hegerl, University of Leipzig, EU coordinator), PREDI-NU: preventing depression and improving awareness through networking in the EU, A100893, European Commission, 2011-2014, €1,099,306.
- ▶ Pérez J, Pérez V (JL Ayuso, Hospital Princesa, Spanish coordinator; U Hegerl, University of Leipzig, EU coordinator), Immediate-release methylphenidate in symptomatic improvement of acute mania, EC10-297, Ministry of Health, Social Policy and Equality, 2011-2015, €6,000.
- ▶ Christine Freitag (PI), MJ Arranz (named collaborator in Dr Amaia Hervas' team), Neurobiology and treatment of adolescent female conduct disorder: the central role of emotion processing, FP7, €5,997,000.
- ▶ Portella MJ, Neurotoxicity of depressive illness. Longitudinal study of neuroimaging, neurocognitive and biological markers, PI10/00372, FIS, Carlos III Health Institute, 2011-2013, €168,000.
- ▶ Pérez V, Factorial structure, reliability, convergent validity, discriminatory capacity and sensitivity to change of the Spanish version of the Remission from Depression Questionnaire (RDQ), 11BI02, CIBERSAM (Instruments), 2011-2013, €5,150.
- ▶ Corripio I (PI/coordinator: Dr Sanjuan, University of Valencia), Cortical activity in schizophrenia: a translational study on the pharmacological response to hallucinations, 11INT03, Intramural CIBERSAM, 2011-2013.
- ▶ Pérez V (PI/coordinator: JL Ayuso, Hospital Princesa), Use of antidepressants in the last decade and its relation to mortality and suicide-related events, with special focus on children and adolescents, 11INT1, Intramural CIBERSAM, 2011-2015, €55,000.
- ▶ Pérez V (PI/coordinator: JL Ayuso, Hospital Princesa), Methylphenidate immediate release in the initial treatment of symptoms of acute mania, 11INT2, Intramural CIBERSAM, 2011-2015, €53,000.
- ▶ Trujols J (co-investigators: Portella MJ, Pérez V, de Diego J), Quality of life and treatment satisfaction of opioid-dependent patients on methadone maintenance: pilot study and development of two self-reports focused on the patient's perspective, 12BI07, CIBERSAM (Instruments), 2012-2014, €4,050.

## Collaborations

### Collaborations with IIB Sant Pau Groups

- ▶ Addictive Behaviours.
- ▶ Image Diagnostic Centre.
- ▶ Neurosurgery.
- ▶ Pituitary Gland Diseases (Department of Endocrinology).
- ▶ Centre for Drug Research (CIM Sant Pau).
- ▶ Pain Clinic and Anaesthesia.
- ▶ Department of Genetics.

### External Collaborations

- ▶ Hospital Clínic de Barcelona (Psychiatry Department), Spain.
- ▶ Hospital Parc Taulí (Psychiatry Department), Sabadell, Spain.
- ▶ Universidad Complutense de Madrid

### (Medicine-Pharmacology Department)

- ▶ Hospital Universitario de la Princesa (Psychiatry Department), Madrid, Spain.
- ▶ Universidad de Valencia (Medicine-Psychiatry Department), Spain.
- ▶ Leipzig University (Medicine-Psychiatry Department), Germany.
- ▶ Universidad de Cádiz (Medicine-Pharmacology Department), Spain.
- ▶ Hospital Benito Menni (FIDMAG) (Psychiatry Department), Barcelona, Spain.
- ▶ University of Oxford (Psychiatry Department), UK.
- ▶ Central Institute of Mental Health, Mannheim, Germany.
- ▶ University of Valencia (Personality, Evaluation and Psychological Treatment Department), Spain.

▶ Miguel Servet Hospital/University of Zaragoza/Health Sciences Institute of Aragon (REDIAPP: Network Health Prevention and Promotion Network), Spain.

▶ Mente Aberta Brazilian Centre for Mindfulness and Health Promotion, Federal University of São Paulo/UNIFESP (Department of Preventive Medicine), São Paulo, Brazil.

▶ CIBERONB-Obesity and Nutrition, Santiago de Compostela, Spain.

▶ Universitat Jaume I (Department of Basic and Clinical Psychology and Psychobiology), Spain.

▶ CIBER-Rare Diseases, Madrid, Spain.

▶ Anoia Healthcare Consortium/Hospital d'Igualada (Psychiatry and Mental Health Area), Spain.

# Genetics in Neurodegenerative Diseases

**Coordinator**

Jordi Clarimon HSCSP RI  
jclarimon@santpau.cat

**Researchers**

Oriol Dols HSCSP RI

**Technicians**

Laia Muñoz CIBERNED

**Collaborators**

Laura Cervera UPF  
Meritxell Perramon UAB

**Main Lines of Research**

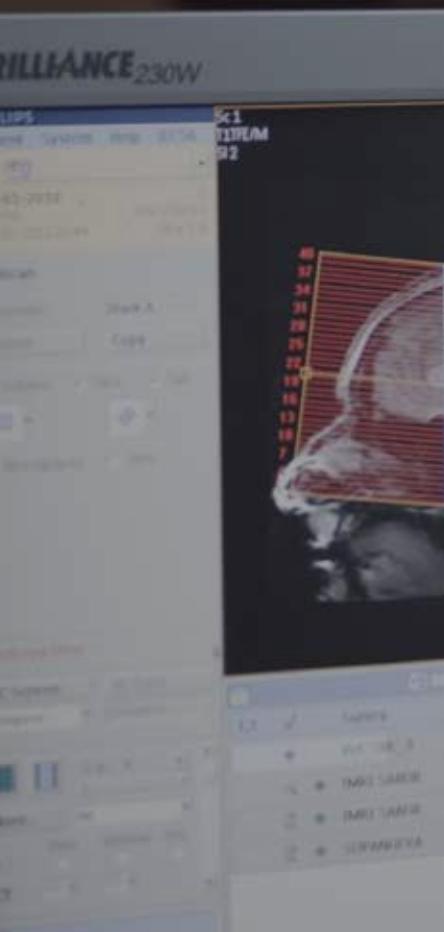

- ▶ Use of state-of the-art genomic strategies to study the genetic architecture of complex diseases caused by neurodegenerative processes, including Alzheimer disease and other dementias, Parkinson disease, and neuromuscular disorders.
- ▶ Cloning and evaluation of novel genes associated with neurodegenerative disorders through genomic analyses on families with Mendelian pattern of inheritance.
- ▶ Study of the relationship between biomarkers and endophenotypes at the individual genetic background.
- ▶ Evaluation of the effect of novel genes related to neurodegenerative disorders in the Spanish population through multicentre collaborative studies.

**Challenges**

- ▶ Assemble a research team of excellence in the international field of genetics of neurodegenerative disorders.
- ▶ Increase our capacity of funding through EU support.
- ▶ Develop a comprehensive genomic database from well-characterized Spanish patients of European origin suffering from neurodegenerative disorders.

**Active Grants**

- ▶ Rare genetic variants and their involvement in Alzheimer disease: use of new ultra-sequencing technologies, PI12/01311, Carlos III Health Institute.

**Collaborations with IIB Sant Pau Groups**

- ▶ Neurobiology of Dementia (Alberto Lleó).
- ▶ Parkinson Disease and Movement Disorders (Jaime Kulisevsky).
- ▶ Neuromuscular Diseases (Isabel Illa).

**External Collaborations**

- ▶ National and international consortiums
- ▶ European Early Onset Dementia Consortium (EU-EOD).
- ▶ European Alzheimer Disease Initiative (EADI).
- ▶ International Genomics of Alzheimer Project (IGAP).
- ▶ Dementia Genetics Spanish Consortium (DEGESCO).
- ▶ CIBER-Neurodegenerative Diseases (CIBERNED).

**Collaborations with international centres**

- ▶ Dr John Hardy, University College of London, UK.
- ▶ Dr Andrew Singleton, National Institutes of Health, USA.
- ▶ Dr Coro Paisán-Ruiz, Mount Sinai School of Medicine, USA.
- ▶ Dr Ekaterina Roganova, University of Toronto, Canada.
- ▶ Dr Mikko Hiltunen, Kuopio University, Finland.
- ▶ Dr Martin Ingelsson, Uppsala University, Sweden.
- ▶ Dr Liana Fidani, Aristotle University of Thessaloniki, Greece.
- ▶ Dr Philippe Amouyel, Institut Pasteur de Lille, France.

# Human Experimental Neuropsychopharmacology

**Coordinator**

Jordi Riba  
jriba@santpau.cat

HSCSP RI

**Collaborators**

Ana Maqueda

UAB

## Main Lines of Research

**General neuropsychopharmacology**

- ▶ Pharmacological modulation of the different neurotransmission systems to study the role of these systems in advanced cognitive functions (executive control) and emotions.

**Neuropsychopharmacology of abused substances**

- ▶ Effects on the central nervous system of psychodysleptic drugs such as ayahuasca, salvinorin A, dimethyltryptamine and THC.
- ▶ Assessment of the impact of long-term drug use on brain function (fMRI) and structure (VBM, DTI).

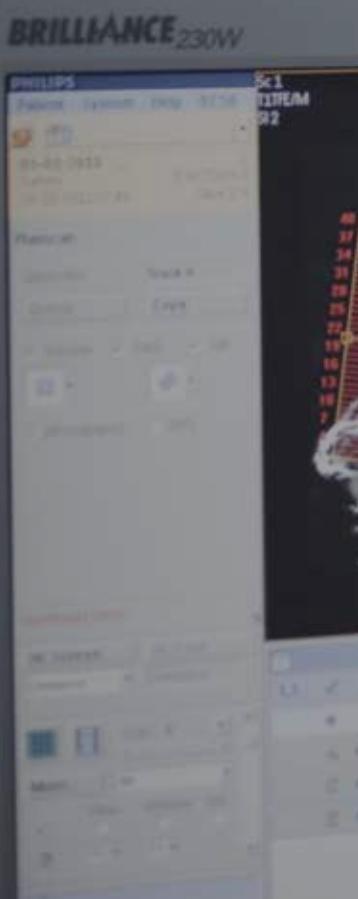

## Challenges

- ▶ Consolidate and extend existing research lines through possible cooperation agreements with other groups and according to internal growth.
- ▶ Obtain emerging-group recognition.
- ▶ Obtain stable funding and supporting technical staff.
- ▶ Communicate activities.

- ▶ Maintain existing external cooperation agreements.
- ▶ Establish new cooperation agreements within HSCSP RI.

## Active Grants

- ▶ Riba J, Human pharmacology of salvinorin A: study of pharmacokinetics, pharmacodynamics and mechanism of action by pharmacological blocking of the effects, PI12/02758, Ministry of the Economy and Competitiveness, 2012-2015.

## Collaborations

### Collaborations with IIB Sant Pau Groups

- ▶ Pharmacokinetic/Pharmacodynamic Modelling and Simulation.
- ▶ Parkinson Disease and Movement Disorders.
- ▶ Clinical Psychiatry.

### External Collaborations

- ▶ Cognition and Brain Plasticity Group (IDIBELL Bellvitge Biomedical Research Institute), Spain.
- ▶ Biomedical Engineering Research Centre, Universitat Politècnica de Catalunya (UPC), Spain.

- ▶ Brain Institute, Federal University of Rio Grande do Norte, Natal, Brazil.
- ▶ Neuroscience and Behaviour Department, Ribeirão Preto Medical School, University of São Paulo, Brazil.
- ▶ Psychiatry and Behavioral Sciences Department, Johns Hopkins School of Medicine, USA.
- ▶ Department of Comparative Biomedical Sciences, Louisiana State University, USA.

\*TIF: 3.988 \*\*MIF: 3.988

## Scientific Production

### ISI Web of Knowledge Indexed Publications with an IF

- 01 Bouso JC, Fabregas JM, Antonijuan RM, Rodriguez-Fornells A, Riba J, Acute effects of ayahuasca on neuropsychological performance: Differences in executive function between experienced and occasional users. (2013) *Psychopharmacology*, 230 (3), 415-424.

**IF: 3.988**

## Books or Chapters

### With ISBN

- ▶ Riba J, Barbanjo MJ, Farmacología de la Ayahuasca: Investigaciones con voluntarios mediante ensayos clínicos, in Labate BC & Bouso JC (eds), Ayahuasca y Salud. Los Libros de la Liebre de Marzo, 2013.

## Publications

### ISI Web of Knowledge Indexed Publications without an IF

- ▶ Riba, J, Vaquero, L, Bouso, J.; et al, Abnormal functional and structural corticostriatal connectivity associated to reward processing in cocaine dependence, Society for Neuroscience Abstract Viewer, Vol. 43.
- ▶ De Araujo, D, Bouso, J, et al, Long-term psychedelic drug use is associated with modifications in cortical thickness in the anterior and posterior cingulate cortices, Society for Neuroscience Abstract Viewer Vol. 43.
- ▶ Garrido, M, Charlotte, L, Riba J, et al, Low abuse potential and overall subjective effects after the sublingual administration of therapeutic single doses of tetrahydrocannabinol, cannabidiol or the combination of both drugs, Basic & Clinical Pharmacology & Toxicology Vol. 113; SI Suppl 2, pp: 12-13.

# Neurobiology of Dementia

## Coordinator

Alberto Lleó  
HSCSP  
alleo@santpau.cat

## Researchers

Rafael Blesa	HSCSP
Juan Fortea	HSCSP
Daniel Alcolea	HSCSP RI
Olivia Belbin	HSCSP RI
Maria Carmona	HSCSP RI
Marti Colom	HSCSP RI
Estrella Morenas	HSCSP RI
Marc Suarez	HSCSP RI
Isabel Sala	HSCSP
M. Belen Sanchez-Saudinós	HSCSP RI

## Technicians

Sofia Antón	HSCSP RI
Laia Muñoz	HSCSP RI

## Main Lines of Research

- ▶ Biomarkers in Alzheimer disease and other neurodegenerative dementias:
  - CSF biomarkers in Alzheimer disease, dementia with Lewy bodies and frontotemporal dementia.
  - Amyloid imaging in neurodegenerative dementias.

- Novel MRI markers in preclinical Alzheimer disease.
- ▶ Biomarkers of Alzheimer disease in Down syndrome
- ▶ Molecular basis of neurodegenerative diseases.

## Challenges

- ▶ Maintain and increase scientific production and funding in the next 5 years.
- ▶ Develop a training plan for researchers entering the group while maintaining its translational nature.

- ▶ Establish new cooperation agreements to increase number of applications for European and international projects.
- ▶ Establish links with technological innovation groups and companies to foster patent applications and contracts.

## Active Grants

- ▶ A Lleó Bisa (PI), Gamma-secretase complex: effect of genetic mutations and role as a therapeutic target in Alzheimer disease, PI10/00018, FIS, 2011-2014, €260,936.
- ▶ A Lleó Bisa (coordinator of 11 groups), Multicentre study of CSF biomarkers and neuroimaging in the Alzheimer disease preclinical-prodromal continuum (SIGNAL), CIBERNED, 2011-2013, €70,000.
- ▶ A Lleó Bisa (PI and WP leader), B Winblad, Karolinska Institutet (coordinator), Neurodegenerative diseases. Biomarkers for Alzheimer disease and Parkinson disease (BIOMARKAPD), Joint Programming for Neurodegenerative Diseases, Carlos III Health Institute, 2012-2014, €117,370.
- ▶ A Lleó Bisa (PI), T Iglesias (coordinator of 5 groups), Role of GSK-3 β in cortical network abnormalities in Alzheimer disease, 2010-

- 2013, CIBERNED, 2013-2015, €70,000.
- ▶ PJ Visser (coordinator), EMIF-AD, 7th Call, Innovative Medicines Initiative (EU), 2013-2018, €15,000/year.
- ▶ Blesa R, Cerebral amyloid deposits in pre-symptomatic Alzheimer disease: role of genetic risk factors and genes involved in neuroplasticity and synaptogenesis, FIS Grant, Carlos III Health Institute, PI10/01878, Jan 2011-Dec 2013, €328,515.
- ▶ Fortea J, Multimodal studies of cerebrospinal fluid and MRI in preclinical Alzheimer disease, PI11/02425, FIS, Carlos III Health Institute, Jan 2012-Dec 2014, €112,540.
- ▶ R Blesa, Alzheimer disease and Down syndrome. Multimodal studies of cerebrospinal fluid, MRI and amyloid PET, PI13/01532, €130,075.

## Transfer Products

- ▶ Agreement with the company Thrombotargets.

## Patents

- ▶ Mireia Coma, Patrick Aloy, Albert Pujol, Xavier Gomis, Baldomero Oliva, Alberto Lleó, José Manuel Mas, Combination therapies for treating neurological disorders, US Patent Application 20130116215.

**Collaborations with IIB Sant Pau Groups**

- Genetics in Neurodegenerative Diseases (Dr Jordi Clarimon).
- Molecular Physiology of the Synapse (Dr Alex Bayes).
- Cerebrovascular Diseases (Dr Joan Martí-Fabregas).
- Neuromuscular Diseases (Dr Isabel Illa).
- Parkinson Disease and Movement Disorders (Dr Jaume Kulisevsky).

## Main Lines of Research

- ▶ Health research into ageing:
  - Healthy ageing: physical activity, nutrition and cognition.
  - Frequent health problems in older adults: falls, frailty and sarcopenia, functional loss, Alzheimer and other dementias, malnutrition and other geriatric syndromes.
  - Epidemiological studies.
- ▶ Health and social services research.
- ▶ Research into caregivers of older adults.
- ▶ Promotion of active ageing among older people.
- ▶ ICT applications to health, social services and active ageing.

## Challenges

### Health research

- ▶ Improve quality of life among older people through health promotion and disability prevention.
- ▶ Conduct clinical and epidemiological observational and intervention studies into mobility, nutrition and cognition.

### Health and social services research

- ▶ Promote social and healthcare as key for the maintenance of autonomy, with a focus on:
  - Models of social and healthcare.
  - Health and social services organization.
  - Comprehensive needs assessment.
  - Care quality.

- Good caregiving practices.
- Assessment of dependence.
- Home care services.
- Cost analysis.

### Research into ICT applications to health, social services and active ageing:

- ▶ Work with technology companies to develop systems aimed at monitoring health, facilitating participation and ensuring safety, mainly focused on social appropriation of ICTs and e-health development.
- ▶ Develop new technological products to promote active ageing.

## Collaborations

### Collaborations with IIB Sant Pau Groups

- ▶ FIS Fragility, EAP Sardenya.
- ▶ FIS Memory Workshops, Public Health Agency of Barcelona and EAP Sardenya.

### External Collaborations

- ▶ EC-funded projects: PROFOUND and SAAPHO.
- ▶ Global Research Network of the International Association of Geriatrics and Gerontology (joint organization of a yearly course in Bar-

celona; International Conference on Frailty and Sarcopenia Research 2014).

- ▶ Participation in European groups: Nutrition and Cognitive Decline Group of the European Union Geriatric Medicine Society and MOBEX Group (mobility and falls).

**Active Grants**

- ▶ Salvà A, Secure Active Ageing: Participation and Health for the Old (SAAPHO), AAL-010000-2011-12, European Commission, 2011-2014. €3,078,799.34.
- ▶ Salvà A, Prevention of Falls Network for Dissemination (PROFOUND), CIP- 325087, European Commission, 2012-2015, €1,026,569.00.
- ▶ Salvà A, Frailty screening in the elderly according to cognitive status (FRAPEM), PI11/02001, FIS, 2012-2014, €74,266.
- ▶ Salvà A, Prevalence of sarcopenia among the elderly (ELLI), Spanish Geriatrics and Gerontology Society, 2012-2013.
- ▶ Salvà A, Randomized clinical trial to evaluate the efficacy of memory training workshops in elderly aged 65 to 80 years, PI11/02060, FIS, 2012-2013, €126,072.
- ▶ Salvà A, Active ageing, citizenship and participation, CSIC Foundation, 2012-2014, €207,719.

## Main Lines of Research

### Alcohol

- ▶ Usefulness of the EMCA, IRISA and SPECT scales with IBZM as possible predictors of outcomes in alcohol-dependent patients during the first 12 weeks of recovery.
- ▶ Escitalopram for the treatment of depression and anxiety associated with alcoholism.
- ▶ Efficacy of nalmefene in alcohol-dependent patients (randomized, double-blind, parallel, placebo-controlled study).

### Cocaine

- ▶ Evaluation of cocaine craving in hospitalization conditions.

### Smoking

- ▶ Multicentre, open, randomized clinical trial to measure the efficacy of proactive telephonic follow up as an aid to smoking cessation in comparison with in situ methods.
- ▶ Multicentre interventional project on smoking in psychiatric patients: treatment of smoking addiction with varenicline in psychiatric patients.

### Opiates

- ▶ Patient satisfaction concerning maintenance treatment with opioid agonists.
- ▶ Heroin-dependent patient satisfaction regarding methadone and methadone pharmacogenetics.

## Challenges

- ▶ Establish bidirectional links between clinical practice and investigation to suggest hypotheses and incorporate recent advances.
- ▶ Participate in controlled clinical trials on the treatment of addictive disorders.
- ▶ Develop clinical research studies into the perspective of patients with addictions.

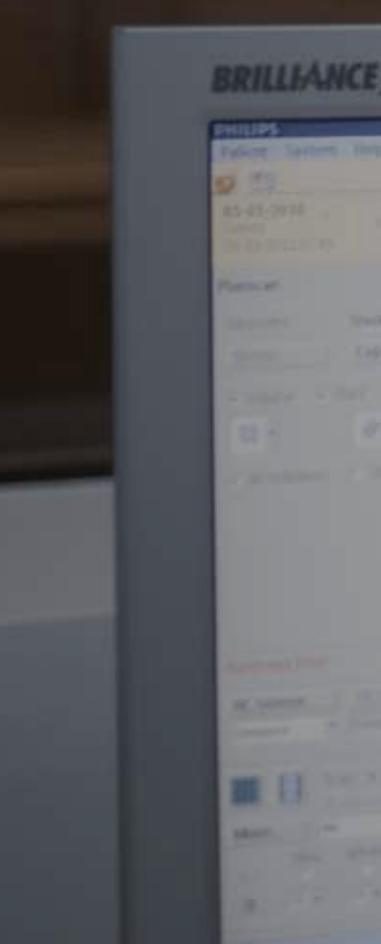

## Collaborations

### Collaborations with IIB Sant Pau Groups

- ▶ Clinical Epidemiology and Healthcare.
- ▶ Clinical Psychiatry.
- ▶ Genetic Diseases.

### External Collaborations

- ▶ DeustoPsych, R+D+I in Psychology and Health, University of Deusto, Bilbao, Spain.

## Active Grants

- ▶ J. Pérez de los Cobos, Towards the identification of mechanisms to inhibit cocaine craving: assessment of cognitive and motivational factors potentially related to the absence of craving in cocaine-dependent patients, PI12/00105, FIS, Spanish Ministry of the Economy, 2013-2015, €90,145.

# Surgery

A close-up photograph of a surgeon's hands and arms. The surgeon is wearing a dark blue scrub top and a surgical mask. They are holding a medical instrument, possibly a suction device or a light source, which is emitting a bright red glow. The background is dark, suggesting an operating room environment.

## Main Lines of Research

### Gastrointestinal surgery

- ▶ Application of laparoscopic surgery in diseases of the spleen.
- ▶ Application of laparoscopic surgery in disorders of the oesophagogastric junction.
- ▶ Advanced application of colorectal laparoscopy.
- ▶ New stratification and treatment options in colorectal cancer.

### Oncological and hepatobiliarypancreatic surgery

- ▶ Surgery for liver metastasis in colorectal cancer.
- ▶ Development of diagnostic and therapeutic techniques in the global context of treatment for liver metastasis in colorectal carcinoma.

- ▶ Surgery for primary hepatic tumours: determination of efficient prognostic parameters for surgical resection of hepatocarcinoma and likelihood of tumour recurrence after resection.
- ▶ Introduction of the laparoscopic methodology to biliary lithiasis.
- ▶ Surgery for sarcomas: participation in GIST research through the Spanish Sarcoma Research Group (GEIS) and other entities.
- ▶ Surgery for sarcomas: participation in the development and results of surgery for retroperitoneal tumours.

### Emergency care

- ▶ Collaborative project on clinical safety for the introduction of safe practices for polytraumatized patients.

## Active Grants

- ▶ M Trias Folch, Development of nanomedicines for enzymatic replacement therapy in Fabry disease, Marató TV3 (coordinated research project), 2013-2014, €399,975.
- ▶ Dr. A de Leiva Hidalgo (PI), The value of predictive-diagnostic molecular markers that form the genetic signature of poor prognosis in thyroid samples and implication for the tumour dedifferentiation process, PS09/02286, FIS, 2010-2013.
- ▶ Dr Antonio Moral Duarte (PI), Validation of the secondary sentinel node as a predictor of axillary node status in breast cancer, PI-13-007 (IRB-approved Nov 2013), Hospital Germans Trias i Pujol (Dr Miguel A. Luna Tomás).
- ▶ Dr. Alberto de Leiva Hidalgo (IP and coordinator), Use of nanoparticles as a delivery system for different inhibitor molecules for carcinoma thyroid therapy, CIBER-BBN and

EDUAB-HSPIP, 2013-2014.

- ▶ Dr MT Ramón y Cajal (PI), Impact of genetic counselling, study and results on diagnosis regarding surgical treatment for patients with suspected breast cancer, candidates for neoadjuvant chemotherapy: satisfaction with the decision to operate, concerns regarding cancer and secondary psychological distress, HSCSP Breast Cancer Department (research ethics approved by IIB-SP-IMP-2012-97), April 2013.
- ▶ European Association for Endoscopic Surgery: ESCO (enteral stents for colonic obstruction) and design of a 3D model to evaluate sleeve diameter and antrum size after sleeve gastrectomy and the impact on weight loss, 2011-2013.

## Doctoral Theses

- ▶ Dr. Franco Marinello, Laparoscopic approach to achalasia. Clinical outcomes, quality of life and long-term functional response, Autonomous University of Barcelona, EM Targarona and X Rius (supervisors), 22 Mar 2013.

**Gastrointestinal surgery**

- ▶ Design, develop and manage a dry laboratory for endoscopic surgery, creating a multifunctional research and teaching space to conduct applied technological research in minimally invasive surgery.

**Hepatobiliarypancreatic surgery**

- ▶ Development of techniques to study liver volume and function.
- ▶ Development of experimental studies on the function and healing of bilio-intestinal sutures.

- ▶ Studies of the value of nutrition in patients undergoing aggressive surgery for highly debilitating cancer.
- ▶ Suitable stratification of GIST tumours in accordance with an anatomopathological classification.
- ▶ Viability of surgical interventions considering the likelihood of disease recurrence.

**Emergency surgery**

- ▶ Consolidation of a multidisciplinary group for polytraumatized patient care.

**Breast surgery**

- ▶ Technological innovations in surgery.
- ▶ Possible role of genetic studies in diagnosis and follow-up.

**Endocrinial and cervical surgery**

- ▶ Technical innovations in surgery.

## Main Lines of Research

### Proteomics applied to nephrology and hypertension

- Water and sodium renal transport analysed from urinary exosomes, urinary proteomic characterization in diabetic nephropathy: evaluation of renal-angiotensin blockade.

### Hereditary kidney diseases

- Genetic and clinical studies in cystic and glomerular inherited kidney diseases such as polycystic kidney disease, Alport, corticoid-resistant nephrotic syndrome, Fabry disease, tuberous sclerosis and familial nephropathies of uncertain origin.

### Glomerular disorders

- Molecular and clinical studies in disorders such as membranous glomerulopathy and vasculitis with renal involvement, among others.

## Challenges

- Maintain the level of national and international publication.
- Continue with both clinical and basic research in all the previously described areas.
- Participate in the elaboration of clinical nephrology guidelines.
- Continue with active collection of research samples from CKD and transplant patients.
- Maintain participation in national working groups and increase international cooperation.
- Engage in new pharmaceutical clinical studies, including clinical trials.

## Doctoral Theses

- Deborah Grazia Lo Giacco, Genetics of male infertility: molecular study of non-syndromic cryptorchidism and spermatogenic impairment, Puigvert Foundation/Universitat Autònoma de Barcelona, E Ars (supervisor).

**Active Grants**

- ▶ Fernández-Llama, P, Diabetic nephropathy: characterisation of urinary proteoma and evaluation of renin angiotensin blocker treatment, PI10/01261, Carlos III Health Institute, 2011-2015, €181,742.
- ▶ Díaz, M, Involvement of the nucleoside transporter ENT1 in the modulation of macrophage-mediated renal fibrosis
- ▶ PI12/01524, Carlos III Health Institute, 2013-2015, €41,745.
- ▶ Torra, R, Genomic study of familial nephropathies of uncertain aetiology, PI12/01523, Carlos III Health Institute, 2013-2015, €109,505.
- ▶ Coll, E, Prognostic biomarkers and strategies to decrease morbimortality in chronic kidney disease patients, PI12/02559, Carlos III Health Institute, 2013-2015, €126,445.

# Public Health and Social Medicine

# Clinical Epidemiology and Healthcare Services

## Main Lines of Research

- ▶ Clinical epidemiology.
- ▶ Systematic reviews.
- ▶ Clinical practice guidelines.
- ▶ Health service evaluations.
- ▶ Clinical trials (phase III/IV).
- ▶ Methodological research.

## Areas of interest

- ▶ Evidence-based medicine.
- ▶ Cancer.
- ▶ Perioperative medicine.
- ▶ Cardiovascular medicine.
- ▶ Public health.

## Challenges

- ▶ Become a reference group in Spain and South America regarding the preparation of systematic reviews on the effects of healthcare interventions, enhancing the group's capacity to provide technical and methodological support and increasing its scientific production in the framework of the Iberoamerican Cochrane Network.
- ▶ Promote greater use of scientific evidence and evidence-based medicine tools in clinical and healthcare decision making by means of stable agreements with government, academic and scientific entities and institutions, thereby ensuring the ongoing development and dissemination of these tools and the implementation of training in their use.

- ▶ Become a reference group for independent applied clinical research that fosters relevant and scientifically sound studies aimed at meeting the real needs of the national healthcare system, whether on the group's own initiative or through networked relationships with similar groups.
- ▶ Set up clinical and epidemiological studies (phase III/IV trials with non-commercial interests for research into healthcare services and results and studies of research methodologies) and apply for additional public funding for new projects aimed at consolidating these research lines.

## Collaborations

### Collaborations with other IIB Sant Pau Groups

- ▶ Locomotor System Research.
- ▶ Evaluation of Public Health Policies and Programmes.
- ▶ Nephrology.
- ▶ Palliative Care.

### External Collaborations

- ▶ Blood and Tissue Bank.
- ▶ Ageing Institute.
- ▶ Public Health Agency of Barcelona.

## Active Grants

- ▶ Alonso P, Evaluation of the validity and updating strategies for clinical practice guidelines: analysis of the National Program GPC for the National Health System, PI10/00346, FIS, Carlos III Health Institute, Jan 2011-June 2015, €103,636.50.
- ▶ Alonso P, Developing and evaluating communication strategies to support informed decisions and practice based on evidence (DECIDE), 258583, EU, Jan 2011-Dec 2015, €245,979.60.
- ▶ Alonso P, Vascular events in patients undergoing non-cardiac surgery: prospective cohort study (VISION), 08/2330, La Marató de TV3 Foundation, Mar 2009-June 2013, €143,003.
- ▶ Alonso P, Vascular events in patients undergoing surgery for non-cardiac surgery (VISION), CP09/00137, FIS, Feb 2010-June 2014, €30,000.
- ▶ Alonso P, Clinical trial evaluating delayed antibiotic prescription for uncomplicated paediatric acute respiratory infections, EC11-339, Spanish Ministry of Health, Social Services and Equality, Jan 2012-Dec 2014, €30,248.
- ▶ Bonfill X, Clinical Epidemiology and Health Services Group, 2009SGR 786, AGAUR Grants to Support Research Groups in Catalonia, Sept 2009-Dec 2013, €41,600.
- ▶ Bonfill X, Multicentre and coordinated study on the health care process and observed outcomes in a cohort of patients diagnosed with urologic cancer (bladder and prostate), PI09/1204, FIS, Carlos III Health Institute, Jan 2010-June 2013, €123,420.
- ▶ Bonfill X, Overcome failure to publish negative findings (OPEN). 282543, EU, Nov 2011-Oct 2013, €57,929.
- ▶ Bonfill X, Multicentre, controlled, randomized clinical trial to assess the efficacy and cost-effectiveness of urinary catheters with silver alloy coating versus conventional catheters in spinal cord injured patients, 112210, La Marató de TV3 Foundation, Apr 2012-Apr 2015, €198,601.25.
- ▶ Bonfill X, Analysis and improvement of the degree of appropriateness of elective surgery for repairing abdominal aortic aneurysm, PI12/02530, FIS, Carlos III Health Institute, Jan 2013–Dec 2015, €58,685.
- ▶ Martínez MJ, Prevention of postoperative bleeding: a multicentre, randomized, parallel, controlled clinical trial evaluating the efficacy of tranexamic acid and fibrin glue in patients undergoing interventions for sub-capital femoral fracture, EC11-341, Spanish Ministry of Health, Social Services and Equality, Jan 2012-Dec 2013, €57,009.80.
- ▶ Martínez MJ, Assessment of quality of life in patients with subcapital femoral fractures, MAPFRE Foundation, €11,111.10.
- ▶ Mas G, Perceptions, attitudes and satisfaction of the general practice and patients about the delayed prescription in the non-complicated acute respiratory tract infections in primary care, PI12/03043, FIS, Carlos III Health Institute, Jan 2013-Dec 2015, €19,965.
- ▶ Osorio D (M De la Poza Abad, PI), Clinical trial for the assessment of delayed antibiotic treatment in the non-complicated acute respiratory tract infections in paediatrics (DAP-Paediatrics), FIS, Carlos III Health Institute, Jan 2012-June 2016, €81,003.45.

ASPB

## Main Lines of Research

- ▶ Public health injury surveillance.
- ▶ Evaluation of road safety strategies at the urban level.
- ▶ Evaluation of road safety strategies in Spain.
- ▶ Indicators of mobility exposure and risk of traffic injuries.
- ▶ Determinants of walking as a mode of transport.
- ▶ Health impact assessment of active transport (walking and cycling).

▶ Les pratiques de mobilité et risques d'accidents routiers des ménages: inégalités sociales, culturelles et territoriales en France et en Espagne, Agence Nationale de Recherche Française.

▶ Safety indicators for IRTAD cities, Joint Transport Research Centre of the OECD and the International Transport Forum.

## Research projects in the planning and design phase

- ▶ Record linkage between health and police registers to study road traffic injury determinants.
- ▶ Intersectoral transport policies: impact on the environment, health and equity.

## Participation in international projects

- ▶ Road safety data collection, transfer and analysis (DACOTA), European Commission FP7-(SST)-2008-TREN-1.
- ▶ Joint action on monitoring injuries in Europe (JAMIE), European Agency for Health and Consumers.

## Challenges

- ▶ Study injuries and their severity according to collision characteristics and vehicles involved, particularly in urban settings.
- ▶ Evaluate road safety policies and interventions.

- ▶ Calculate risk indicators using mobility exposure.
- ▶ Study motorized and non-motorized mobility and its impact on health.

## Doctoral Theses

- ▶ Marta Olabarria, Walking as transportation. Study of individual and contextual factors that influence walking as transportation and health implications, Agència de Salut Pública de Barcelona, Catherine Pérez (supervisor), Pompeu Fabra University.

## Transfer Products

- ▶ Mercè Gotsens, Marc Marí Dell'Olmo, Laia Palència, Catherine Pérez, Maica Rodríguez Sanz, Carme Borrell, Socioeconomic inequalities in mortality from falls in the elderly in 11 European cities, Ibero-American Epidemiology and Public Health Congress, 30th Scientific Meeting of the Spanish Epidemiology Society, Granada, Spain, 4-6 Sept 2013.
- ▶ Marta Olabarria, Catherine Pérez, Elena Santamaría Rubio, Ana María Novoa, Relationship between excess weight/obesity and daily mobility patterns of urban populations, Ibero-American Epidemiology and Public Health Congress, 30th Scientific Meeting of the Spanish Epidemiology Society, Granada, Spain, 4-6 Sept 2013.
- ▶ Catherine Pérez, Elena Santamaría Rubio, Ana María Novoa, Marta Olabarria, Does the Minimum Basic Data Set provide information on alcohol and drug abuse and dependence in people injured by traffic? Ibero-American Epidemiology and Public Health Congress, 30th Scientific Meeting of the Spanish Epidemiology Society, Granada, Spain, 4-6 Sept 2013.
- ▶ Catherine Pérez, Elena Santamaría Rubio, Ana María Novoa, Marta Olabarria, Head injury in hospitalized cyclists in Spain, Ibero-American Epidemiology and Public Health Congress, 30th Scientific Meeting of the Spanish Epidemiology Society, Granada, Spain, 4-6 Sept 2013.
- ▶ Puigdomènech Puig E, García Muñoz M, Valiente Hernandez S, Pérez K, Feijoo V, del Val JL, Martín Cantera, C, Characteristics of drivers of two-wheeled motor vehicles treated in primary care centres in the Barcelona metropolitan area: Baseline data of the injured cohort, International Road Safety Conference, Santander, Spain, 16-18 May 2013.

## Collaborations

### Collaborations with IIB Sant Pau Groups

- ▶ Health Inequalities (Carme Borrell).

### External Collaborations

- ▶ Working Group for Health Impact Evaluation of Injuries in Spain of the Spanish Epidemiology Society (led by Catherine Pérez).
- ▶ CIBERESP Social Inequalities Group.
- ▶ Transport and Health Study Group (European Committee member: Catherine Pérez).
- ▶ Catherine Pérez, Semi-separation of lanes in conventional roads: analysis of different systems and evaluation of interventions already made, 0100DGT22160, General Traffic Directorate Spain, 2013-2014, €38,701.85 (external contract).
- ▶ Catherine Pérez, Promotion and development of specific studies of accidents in Barcelona, Mobility Service, Barcelona City Council, 2013, €27,534.99 (external agreement).

----------------	------

## Main Lines of Research

### Application of new technologies to tuberculosis control

- ▶ International diffusion of the new technologies. Google Analytics offers a highly effective system for analysing website visits that enables us to profile visitors (2007, 13,429 visitors, 21% from Latin America).
- ▶ Production of scientific knowledge of relevance on the control, diagnosis, treatment and prevention of tuberculosis (key role in Spain and South America).

### Clinical trials for tuberculosis prevention and treatment

- ▶ Our centre, which is the only such centre in Europe, is part of a network of international centres (in Canada, Brazil, South Africa and Uganda) associated with the Tuberculosis Trials Consortium of the CDCs, promoting international involvement in laying the therapeutic and strategic bases for the treatment of tuberculosis and tubercular infection. Preliminary results have recently been presented at the ICAAC and other important international conferences e.g., the American Thoracic Society (the article with definitive study data is pending publication). A major research line aims to fix the bases for shortening treatment times for tubercular infection and, by extension, ensure compliance and control over the disease.

## Challenges

- ▶ Prevent sexually transmitted infections and other transmissible diseases.
- ▶ Evaluate HIV screening programmes in gay saunas.
- ▶ Improve detection and research into causes of hepatitis C.
- ▶ Improve detection and control measures of outbreaks.

### Community health worker's and notifiable disease control

- ▶ The experiment regarding the community health worker's role in the control of notifiable diseases has been presented at tuberculosis and primary care conferences and workshops and in journals (Emerging Infectious Diseases; Ethnicity and Health). Results of a comparative study have recently been presented as a thesis in fulfilment of the master in public health of Pompeu Fabra University and the Autonomous University of Barcelona (an article is undergoing final review before publication).

- ▶ The inclusion of community health workers in tuberculosis programme teams has led to the creation of new tuberculosis consensus protocols. Institute of Health studies are under development with sponsorship from the authorities and we are participating as instructors and students in the first intercultural mediation course in the healthcare arena. The concept of the community health worker has been included in the framework Tuberculosis Prevention and Control Plan for Spain. The short- to medium-term objective is for community health workers to continue working with us and for these professionals to be included in other public health areas.

## Active Grants

- ▶ JA Caylà, Comparison of 12 doses per week of 900 mg of rifapentine for 3 months of supervised treatment versus daily self-administration of 270 doses of 300 mg of isoniazid for 9 months (Study 26), CDC-USA/TBTC26, 2003- , \$188,777 (€113,266).
- ▶ JA Caylà, Impact of chronic viral hepatitis in discontinuation of treatment for latent tuberculosis infection due to hepatotoxicity (Study 26A), CDC-USA, 2004- .
- ▶ Joan A. Caylà, HIV-TB co-infection project. Euro TB Study, 2011-2013.
- ▶ JA Caylà, Country of probable acquisition of HIV infection and barriers to prevention and HIV testing of immigrants in Spain, 361036/10, FIPSE, 2011-2015, €24,750.
- ▶ C Tortajada (work package leader) JA Caylà, Screening for hepatitis B and C among migrants in the EU, SANCO 2010 grant, Executive Agency for Health and Consumers, 2011-2013, €72,054.
- ▶ P García de Olalla, Rapid HIV testing in Spain: description of programmes, impact assessment and analysis of potential as a strategy to promote early diagnosis, 240961/10, FIS,
- ▶ 2011-2013, €2,750.
- ▶ JA Caylà, Assessment of adherence to latent tuberculosis infection treatment of 12 doses of rifapentine and isoniazid self-administered once a week versus directly observed treatment: i-Adhere (Study 33), CDC-USA/TBTC33, 2012-2014, \$387,382 (€297,007)
- ▶ JA Caylà, Phase III contact tracing trial comparing the diagnostic performance of C-Tb to QuantiFERON®-TB Gold In-Tube, in combination with a double blind randomized split-body safety assessment of C-Tb versus 2 TU Tuberculin PPD RT23 SSI, Statens Serum Institut TESEC-06, 2012-2014, €42,673,42.
- ▶ JA Caylà, cribado de las enfermedades transmisibles en población inmigrante
- de un barrio con bajo nivel socioeconómico: comparación de dos estrategias, PI12/02573, FIS, 2013-2016, €78,712.92.
- ▶ J Pau Millet, Impact of the economic crisis on the major notifiable infectious diseases: a population-based study, PI13/02757, FIS, 2013-2016, €12,000.
- ▶ P García de Olalla, Analysis of competing risks in HIV/AIDS survival. Clinical applicability to the study of concurring diseases in HIV+ patients exposed to highly active antiretroviral therapy in the GEMES cohort, Ministry of Health and Social Policy, 2012-2014, €6,000.00.
- ▶ P García de Olalla, Effectiveness of a pilot study of proactive contacts of people infected with HIV, Ministry of Health and Social Policy, 2012-2014, €26,806.00.

## Transfer Products

- ▶ Improvements in tuberculosis control in large cities (video). Available at: <https://www.youtube.com/watch?v=mE1nZn3bCmE>
- ▶ Protocol of a partner notification programme for new HIV cases.
- ▶ Comparison of 12 doses per week of 900 mg of rifapentine for 3 months of supervised treatment versus daily self-administration of 270 doses of 300 mg of isoniazid for 9 months, Study 26 (clinical trial).
- ▶ Impact of chronic viral hepatitis in discontinuation of treatment for latent tuberculosis infection due to hepatotoxicity, Study 26A (clinical trial).

## Awards

- ▶ Caylà JA, Millet JP, García de Olalla P, Martín V, Nelson J, Orcau A, The current status of tuberculosis in the world: the influence of poverty, prisons, HIV, immigration and control programmes (Ch. 2, pp. 15-29), in Norazmi NM, Acosta A, Sarmiento ME (eds), The Art and Science of Tuberculosis Vaccine Development, Oxford Fajar Sdn Bhd, Malaysia, 2010, Annual Health Prize (book).
- ▶ Effectiveness of a pilot programme to study for new HIV diagnosis contacts. A multidisciplinary approach to the treatment and quality of life of patients with HIV, Best Communication Award of the Spanish Interdisciplinary AIDS Society, Madrid, 26 June 2014.

## Collaborations

### External Collaborations

- ▶ CDC.
- ▶ CASCADE.
- ▶ GEMES.
- ▶ SANCO.
- ▶ COHERE.

## Doctoral Theses

- ▶ Ignaci Monedero, Towards better control of multi-drug-resistant tuberculosis in developing countries, University of Barcelona, Joan A. Caylà, Rafael Vidal (supervisors), Hospital del Mar Barcelona.

## Main Lines of Research

- ▶ In-depth health inequalities according to social class in Spain and worldwide.
- ▶ Exploitation of information at census section level (as the maximum disaggregation unit) and at higher geographic aggregation levels (neighbourhood, town and region).

### Gender inequalities in health

- ▶ Sexual division between productive and reproductive work (gender roles) and sex

differences as the main structural factors that generate gender health inequalities.

- ▶ Social and political determinants of health and impact on policies and interventions
- ▶ Macroeconomic determinants of health inequalities between countries.
- ▶ Impact of the political context on population health and the conclusion that countries with better developed welfare states have better levels of health.

## Challenges

### Health inequalities according to different inequality axes

- ▶ Study social determinants of health in terms of social class and gender, with the purpose of integrating both axes and analysing inequalities among immigrants.
- ▶ Research the impact of residence on health, especially smaller urbanized areas.

### Gender inequalities in health

- ▶ Further explore the theoretical framework and explanatory charts developed to guide comprehension of gender determinants of health.

- ▶ Social and political determinants of health and impact on policies and interventions

- ▶ Study the influence of policies on population health and on social inequalities in health.

### Sex and reproductive inequalities in health

- ▶ Establish a line of research to investigate different aspects of sexual and reproductive health (sexuality, contraception, pregnancy, birth, miscarriage, abortion, birth rates, etc).

## Doctoral Theses

- ▶ Dolores Ruiz Muñoz, Socioeconomic inequalities in sexual and reproductive health in Spain, ASPB, Glòria Pérez (supervisor), Pompeu Fabra University (EU).

## Active Grants

- ▶ Carme Borrell, Evaluating the impact of structural policies on health inequalities and their social determinants, and fostering change-SOPHIE, 278173-2, European Commission, 2011-2015, €3,310,530.
- ▶ Carme Borrell, Effects of the crisis on population health and determinants in Spain, PI13/00897, Carlos III Health Institute, 2014-2016, €58,564.00.
- ▶ Glòria Pérez, The impact of the economic crisis on sexual and reproductive health and social and economic inequalities in Spain and its regions, PI13/02292, Carlos III Health Institute, 2014-2016, €32,518.75.
- ▶ Glòria Pérez, The role of sexuality in active and healthy ageing: evidence and effective interventions, RecerCaixa, 2011-2013, €71,480.00.
- ▶ Joaquín Salvador, Typology of European countries by policies to reduce gender inequalities in health, PI12/03114, Carlos III Health Institute, 2013-2015, €38,115.00.

# Epidemiology of Addictions

## Main Lines of Research

### Epidemiology of drug consumption and patterns of use

- ▶ Estimating cocaine use incidence and consumption patterns.
- ▶ Estimating heroin incidence and consumption patterns.
- ▶ Estimating the prevalence of problematic cocaine, heroin and alcohol users.

### Health problems associated with drug use

- ▶ Quality of life and psychiatric comorbidity in cocaine users.
- ▶ Service use in cocaine and alcohol users.
- ▶ Factors associated with cocaine addict and alcoholic retention in treatment programmes.
- ▶ Violent behaviour and aggressive atti-

tudes in young cocaine consumers.

- ▶ Mortality and its determinants in cohorts with substance abuse disorders (alcohol, heroin and cocaine).
- ▶ Factors associated with acute health problems developing after cocaine and heroin use.
- ▶ Social and health discrepancies between immigrants and native drug users.

### Health policies

- ▶ Social inequalities in the evaluation of results and adherence to treatment.
- ▶ Infectious diseases related to drug use.
- ▶ Brief motivational intervention programs as a treatment alternative for teenage users of psychoactive substances.
- ▶ Role of the workplace in drug consumption.

## Challenges

### Epidemiology of drug consumption and patterns of use

- ▶ Determine incidence and patterns of cocaine use.
- ▶ Determine incidence and patterns of heroin use.
- ▶ Determine prevalence of cocaine, heroin and alcohol use.

### Health problems associated with drug use

- ▶ Analyse aggressive and violent attitudes and behaviour in young cocaine users.
- ▶ Assess quality of life in users with psychiatric comorbidity.
- ▶ Determine use of services among young heroin, cocaine and alcohol users.
- ▶ Analyse factors associated with retention in treatment programmes for cocaine and alco-

hol addiction.

- ▶ Assess mortality and its determinants in cohorts of alcohol and cocaine-dependent subjects.
- ▶ Analyse factors associated with acute health problems following cocaine use.
- ▶ Analyse differential social and health determinants among immigrant users of illegal drugs.

### Health policies

- ▶ Evaluate supervised drug consumption rooms and other policies to reduce harm.
- ▶ Study social inequalities in evaluating results and adherence to treatment.
- ▶ Evaluate brief motivational intervention programmes as an alternative to disciplinary measures in teenage users of psychoactive substances.

**Active Grants**

Francesca Sánchez	CIBERESP
Gemma Serral	ASPB
Joan Ramon Villalbí	ASPB

## Administrative Staff

Gabriel León	CIBERESP
--------------	----------

## Main Lines of Research

### Evaluation of public health policies and programmes

- ▶ Monitoring of behaviours and other health risk factors such as environmental exposure.
- ▶ Process and impact evaluation of public health programmes and services (school-based prevention programmes for obe-

sity, smoking, alcohol and cannabis consumption, breast cancer screening programmes and memory training workshops for elderly people).

- ▶ Evaluation of ICT innovation in public health.
- ▶ Evaluation of food contaminants.

## Challenges

- ▶ Promote research into the evaluation of policies and programmes.
- ▶ Support the debate on conceptual and methodological aspects of results evaluation in prevention and health promotion.

▶ Consolidate the group's research, fostering less developed aspects such as financial assessment and evaluation of health protection interventions.

- ▶ Develop a theoretical corpus of concepts, principles, methods and examples that contribute to filling the gap in under- and postgraduate teaching regarding the design and evaluation of risk prevention and health promotion interventions.

## Active Grants

- ▶ María José López, Measurement of exposure to environmental tobacco smoke and estimated impact on mortality in Spain, PI10/00400, FIS, Carlos III Health Institute, Jan 2011–Dec 2013, €48,521.00.
- ▶ Anna Pérez, Factors associated with alcohol consumption in young people by place of origin and family migratory path, Exp. 2011/107, National Drug Plan, Spanish Ministry of Health, Social Services and Equality, 8 Nov 2011–31 Dec 2013, €74,900.30.
- ▶ Anna Pérez, Randomized clinical trial to evaluate the effectiveness of memory training workshops for people aged 65 to 80 years, PI11/02060, FIS, Carlos III Health Institute, Jan 2012–Dec 2014, €52,937.50.

▶ Francesca Sánchez (Gregorio Barrio, PI), Problems of legal and illegal psychoactive drugs among immigrants in Spain: identifying priority subgroups for intervention, PI11-01396, FIS, Carlos III Health Institute, Jan 2011–Dec 2014, €7,491.

## Main Lines of Research

### Genetic epidemiology and bioinformatics

- ▶ Algorithms for risk assessment.

### Genomics of complex diseases

- ▶ Genetic analysis of idiopathic thrombophilia (GAIT).
- ▶ Genetic analysis of osteoporosis (GAO).
- ▶ Genetics of chronic venous insufficiency.
- ▶ Genetics of abdominal aortic aneurysms

(TAGA).

- ▶ Modelling individual risk of thrombosis in oncology (MIRTO)

### Epigenomics

- ▶ miRNAs as novel biomarkers in thromboembolic diseases.

### Pharmacogenomics

- ▶ Markers of genetic susceptibility and pharmacogenomics of cardiovascular diseases.

## Challenges

- ▶ Consolidate the epigenomic, genetic epidemiology and bioinformatics research lines.
- ▶ Obtain human and material resources to achieve goals defined for different projects.

- ▶ Coordinate an international cardiovascular genomic project.
- ▶ Establish agreements with biopharmaceutical companies.

## Transfer Products

- ▶ Agreement with Leo-Pharma: OncoThromb project.
- ▶ Agreement with FerrerinCode: ThromboinCode project.
- ▶ Agreement with Stago: GOLIATH project.

## Awards

- ▶ José Manuel Soria (PI), MIRTO project, Special Award for Basic or Clinical Research into Haemostasis, Spanish Thrombosis and Haemostasis Society (FETH), 2013.

## Active Grants

- ▶ José Manuel Soria (PI), Genomics of Complex Diseases (Emerging Research Group), 2009 SGR-1240 Generalitat de Catalunya, 2009-2013, €41,600.
- ▶ Juan Carlos Souto (PI), José Manuel Soria (co-investigator), Carlos III Health Institute Cooperative Thematic Networks (RETICs): Cardiovascular Research Network (RIC), FIS call 2009, 2010-2013, €123,413.
- ▶ Jose Manuel Soria (PI), Identification of genetic determinants of the intrinsic coagulation pathway and its implications for thromboembolic disease, PI1100184, FIS, 2012-2014, €286,715.55.
- ▶ Yorgos Athanasiadis, Juan de la Cierva Postdoctoral Training Programme, JCI-2010-07202, Ministry of the Economy and Competitiveness, 2010-2013.
- ▶ Sonia López, Sara Borrell Postdoctoral Training Programme, CD8/00059, FIS, Carlos III Health Institute, 2009-2012 (extended to 2013 for personal reasons).
- ▶ Laura Martín Fernández, Predoctoral Health Research Training Grant, FI12/00322, FIS, Carlos III Health Institute, 2013.
- ▶ José Manuel Soria (HSCSP coordinator), Carlos III Health Institute Cooperative Thematic Networks (RETICs): Innovation in Medical and Healthcare Technologies (ITEMAS), FIS call 2009.
- ▶ Juan Carlos Souto (PI), Helena Brunel (co-investigator), Search for a clinical algorithm to define the individual risk profile for venous thromboembolism (RETROVE), PI12/00612, FIS, 2013-2015, €62,000.

## Collaborations

## Collaborations with IIB Sant Pau Groups

- ▶ Thrombosis and Haemostasis (GAIT, MIRTO, RETROVE).
- ▶ Multiorgan Damage – Internal Medicine (GAO).
- ▶ Angiology, Vascular Biology and Inflammation (TAGA and GAIT).
- ▶ Inflammation and Vascular Remodelling (TAGA).
- ▶ Metabolic Bases of Cardiovascular Risk (GAIT).
- ▶ Haematological Diagnosis (GAIT).

## External Collaborations

- ▶ Clinical Oncology Department, Hospital Gregorio Marañón, Madrid, Spain (OncoThtomb)
- ▶ Biomedical Engineering Research Centre, UPC, Barcelona, Spain (SUMMIT)
- ▶ Haematology Laboratory, Hospital Timone Marseille, France (GAIT)
- ▶ Department of Genetics, University of Geneva, Switzerland (GAIT)
- ▶ Department of Cardiology, Karolinska Institutet, Sweden (GAIT)
- ▶ INSERN UMRS 937, Université Pierre et Marie Curie, Paris (GAIT)
- ▶ Haematology Department, Karolinska Hospital, Sweden (VEREMA)

# Pharmacokinetic/Pharmacodynamic Modelling and Simulation

**Coordinator**

Marta Valle  
mvallec@santpau.cat

**Technicians**

Javier Estévez  
Maite Garrido

HSCSP RI  
HSCSP RI

**Main Lines  
of Research**

- ▶ Population pharmacokinetic analysis aimed at establishing the pharmacokinetic characteristics of drugs and at differentiating and quantifying intra- and inter-individual variability.
- ▶ Continuous response analysis aimed at the analysis of effects (in the presence or absence of drugs) where the variable being evaluated changes values gradually.
- ▶ Non-continuous response analysis for responses most frequently observed in clinical practice, such as categorical responses, survival, frequency and censored responses.

- ▶ Simulation of clinical trials and therapy applications aimed at assisting with the design of clinical trials to help the development new drugs (for pharmaceutical companies) and at improving the design of clinical trials (basic research and non-profit clinical studies) and to help in applications of therapeutic monitoring.

**Challenges**

- ▶ Obtain recognition as an emerging group.
- ▶ Maintain existing external cooperation agreements.
- ▶ Establish new cooperation agreements within the HSCSP RI.
- ▶ Generate sufficient financial resources to maintain and expand group staffing.
- ▶ Communicate the group's activities.

**Active Grants**

- ▶ Valle M, Clinical trial to evaluate the efficacy, safety and economic impact of the reduction of darunavir doses in HIV-infected patients treated with once-daily darunavir/ritonavir, Spanish Ministry of Health, Social Services and Equality grant, January 2012-December 2014.

**Collaborations****Collaborations with IIB Sant Pau Groups**

- ▶ Human experimental neuropsychopharmacology.
- ▶ Pharmacological research in humans.
- ▶ Pharmacy.
- ▶ HIV group
- ▶ Epidemiology and traumatology services

**External Collaborations**

- ▶ Lluita Contra la SIDA Foundation, Germans Trias i Pujol Hospital, Badalona, Spain.
- ▶ Pharmacy Service, Hospital Quiron, Mallorca, Spain.
- ▶ Department of Pharmacology, Liverpool University, UK.
- ▶ Anaesthesiology Service, Hospital del Mar, Barcelona, Spain.

**Doctoral Theses**

- ▶ Rita Moreira, Population pharmacokinetic analysis of vancomycin in neonates. Design of a new dose strategy (underway).
- ▶ Javier Estévez, Population pharmacokinetics of atazanavir: effect of ritonavir concentrations (underway).
- ▶ Maria Rosa Ballester, Development of a population pharmacokinetic/pharmacodynamic model for diazepam in healthy volunteers (underway).

- ▶ Jaume García, Use of analgesic drugs in the first day of the post-operative period (underway).
- ▶ Pedro Más, Pharmacokinetic/pharmacodynamic relationship of ertapenem in patients with cholecystitis and critically ill patients (underway).

## Main Lines of Research

### Emerging processes in prevalent diseases

- ▶ Study and analysis of processes frequently observed in emergency departments so as to transfer the results to clinical practice and provide better care to patients.

### Clinical organization and management (Mireia Puig and Josep Ris)

- ▶ Patient safety and emergency service quality. PI: Maite Álvarez.
- ▶ Nosocomial infection. PI: Albert Mauri.
- ▶ Short-stay unit. PI: JM Guardiola.

### Organ donation and coordination (Francisco Caballero and Jesús Leal)

- ▶ Respiratory pattern analysis in the return to spontaneous breathing. PI: Iván Díaz.
- ▶ Ventilatory pattern analysis in heart failure. PI: Sergio Herrera.
- ▶ Pneumonia in the emergency department. PI: Miriam Mateo.
- ▶ Noninvasive ventilation. PI: Miquel Turbau.
- ▶ Pulmonary embolism. PI: Laura Lozano.

### Cardiovascular system (Miquel Santaló)

- ▶ Acute coronary syndrome in elderly patients. PI: Josep Antoni Montiel.
- ▶ Acute coronary syndrome in women. PI: Marta Blázquez.
- ▶ Ultrasensitive markers in acute coronary syndrome. PI: Leopoldo Higa.
- ▶ Complications in patients implanted with an ICD. PI: Olga Trejo.
- ▶ Cardiac failure. PI: Aitor Alquézar, M Rizzi.
- ▶ Supraventricular arrhythmias. PI: Aitor Alquézar.

### Community disorders

- ▶ Diabetes care in emergency departments. PI: Iván Agra.
- ▶ Infection in emergency departments. PI: JM Guardiola.
- ▶ Drug abuse and HIV
- ▶ HCV in patients with HIV. PI: JM Guardiola.
- ▶ Acute intoxication. PI: Héctor Hernández.

## Main Lines of Research

### External beam radiotherapy

- ▶ Characterization of various in vivo dose measurement detectors for radiation therapy treatments with intensity modulation (IMRT).
- ▶ Validation of dose calculation algorithms for external beam radiotherapy planning systems
- ▶ Optimization of QA procedures for IMRT, stereotactic body radiation therapy (SBRT) and gating respiratory treatments.

### Computed tomography dosimetry

- ▶ Index dose assessment for multislice CT.

### Biological dosimetry

- ▶ Cytogenetic evaluation of the relative biological efficacy of low-energy X-rays (in cooperation with the Autonomous University of Barcelona team led by Dr. María Rosa Caballín).

## Active Grants

- ▶ Montserrat Ribas Morales (PI), Dosimetric impact of respiratory motion during the administration of dynamic IMRT, PI12/00521 FIS, Carlos III Health Institute, Jan 2013-Dec 2015, €19,965.

- ▶ Pablo Carrasco (PI), In vivo dosimetry in intensity modulated radiotherapy in the treatment of breast cancer, Barcelona Board of the AECC (Spanish Cancer Association), Jan 2013-Dec 2014, €18,000.

## Collaborations

### External Collaborations

- ▶ M Ribas, P Carrasco, T Eudaldo, N Jornet, A Latorre, A Ruiz, Cytogenetic and Molecular Studies of the Effects of Ionizing Radiation, Study of in-depth molecular and genetic mechanisms involved in the response to ionizing radiation and especially the formation of chromosomal abnormalities and their evolution during the cell cycle, 2009 SGR 584, 2009–2013.

**Main Lines of Research**

- ▶ Optimization of the functional rehabilitation of patients after cataract surgery using multifocal intraocular lens, and evaluation of vision quality in terms of parameters such as visual acuity, sensitivity to contrast and aberrometry.
- ▶ Ocular repercussions of allogeneic medullary transplants and evaluation of different clinical manifestations and response to treatment in graft-versus-host disease.

**Active Grants**

- ▶ Four-month, open-label, multicentre clinical trial to assess the tolerability, safety and health outcomes of fingolimod (FTY720) in patients with relapsing forms of multiple sclerosis, CFTY720D2316, EudraCT, 2010-019029-32.
- ▶ Multicentre, open-label, single-group clinical trial evaluating the long-term safety and tolerability of 0.5 mg fingolimod (FTY720) administered orally once daily in patients with relapsing forms of multiple sclerosis, CFTY720D2399, EudraCT 2010-020515-37.
- ▶ EPOCH study: Randomized, double-blind, placebo-controlled, parallel-group study of the efficacy and safety of MK-8931 in subjects with mild to moderate Alzheimer disease, MK-8931-017-02/P07738, EudraCT, 2011-003151-20.
- ▶ 26-week extension study to evaluate the safety and efficacy of ONO-4641 in patients with relapsing-remitting multiple sclerosis, ONO-4641POU007, EudraCT, 2010-018705-11.
- ▶ Clinical trial (Siponimod BAF312). Multicentre, randomized, double-blind, parallel-group, placebo-controlled variable treatment duration study evaluating the efficacy and safety of Siponimod (BAF312) in patients with secondary progressive multiple sclerosis, protocol code: CBAF312A2304.
- ▶ Randomized, double-blind, placebo-controlled, parallel-group study of the efficacy and safety of MK-8931 in subjects with mild to moderate Alzheimer disease (Phase II/III), MK-8931-017-03 (aka SCH 900931, P07738), EudraCT, 2011-003151-20.
- ▶ Phase 2, multicentre, randomized, double-blind, parallel-group, placebo-controlled study to investigate the efficacy and safety of RO4602522 added to base treatment with acetylcholinesterase inhibitors, donepezil or rivastigmine in patients with moderate Alzheimer disease, BP28248, EudraCT, 2012-000943-29.
- ▶ Lilly BACC study: Evaluation of the safety, tolerability and pharmacodynamic effects of LY2886721 in patients with mild cognitive impairment due to Alzheimer disease or mild Alzheimer disease, I40-MC BACC, EudraCT, 2011-005217-37.
- ▶ Phase 2, multicentre, randomized, double-blind, parallel-group, placebo-controlled, dose-finding study to evaluate the safety and efficacy of three different oral doses of MT-1303 administered over a period of 24 weeks to patients with relapsing-remitting multiple sclerosis, MT-1303-E04, EudraCT, 2012-002470-31.

## Active Grants

- ▶ SARIL-NIU-SATUR (amended trial No. 1): Randomized, double-masked, placebo-controlled study to evaluate the efficacy and safety of sarilumab administered subcutaneously every two weeks in patients with non-infectious, intermediate or posterior uveitis or panuveitis, ACT13480-SARIL-NIU-SATUR, EudraCT, 2012-004845-34.
- ▶ LUMINOUS study: Observational study of the efficacy and safety of LUCENTIS through individualized patient treatment and associated results, RFB002A2406.

## Collaborators

Marta García  
(Enriqueta Villavechia Foundation)

## Main Lines of Research

- ▶ Erythropoietin as an alternative to transfusion in paediatrics
- ▶ Clinical application of peritoneal drainage in the treatment of enterocolitis in infants
- ▶ Chronic functional constipation: treatment with PEG

- ▶ Creation of a Catalan diagnostic and clinical monitoring network for rare anaemias due to major haemoglobinopathies
- ▶ Minimal residual disease in risk assessment in the treatment of children with acute lymphoblastic leukaemia in the SHOP protocol (in collaboration with the HSCSP Haematology Department).

## Challenges

- ▶ Transplant haematopoietic progenitor cells from alternative donors
- ▶ Make pre-implant genetic diagnoses
- ▶ Transplant haematopoietic progenitor cells in congenital immunodeficiencies
- ▶ Transplant haematopoietic progenitor cells in congenital metabolic pathologies
- ▶ Research congenital immunodeficiencies
- ▶ Research Fanconi anaemia (group recognized by the UAB, Barcelona)

- ▶ Apply adaptive cell immunotherapy to tumours
- ▶ Intervention in postasphyxia neuronal damage in infants with asphyxia by applying therapeutic hypothermia (in the context of a Catalan network)
- ▶ Polytraumatized patient care programme. PPT implementation code in HSCSP and in CatSalut central register
- ▶ Implement a multidisciplinary institutional massive transfusion protocol in the HSCSP.

## Active Grants

- ▶ Dr. Isabel Badell (PI), Dr Montse Torrent, Project 101731T, Telemarató TV3 2010, Creation of a Catalan network for the diagnosis and clinical management of rare anaemias due to major haemoglobinopathies, 2011-2014.
- ▶ Dr. Isabel Badell (PI), Analysis of prophylaxis with micafungin in pediatric hematology patients (multicentre study), 2013-2014, Astellas Laboratory.
- ▶ Dr. Isabel Badell (PI), The Evoltra® European Registry Programme (Paediatric ALL), CLO08708, 2013-2014, Genzyme Laboratory.
- ▶ Dr. Isabel Badell (PI), Multicentre pediatric disease registry: essential thrombocythaemia, SPD422-404, 2013-2015, Pharm-Ol-

am International.

- ▶ Gemma Carreras (PI), Coordinated study for use in Spain of the new version of EuroQol (EQ-5D): Subproject 4: The digital version of EuroQol 5D-Y and KIDSCREEN for children and adolescents, PI12/01296, FIS, 2012-2015, €52,635.
- ▶ Gemma Carreras (PI), TEENS Project: Glycaemic control and quality of life in children, adolescents and young adults with type-1 diabetes mellitus described in a worldwide cross-sectional study in 2012: impact of age-patient-related, treatment-related, behaviour and structure of care-related variables, DIREG\_C\_05444, 2012-2013, Sanofi-Aventis, €8,000.

## External Collaborations

HSCSP

**Researchers**

Anna Domènech	HSCSP
Joan Duch	HSCSP
Montserrat Estorch	HSCSP
Alejandro Fernández	HSCSP
Albert Flotats	HSCSP

**Main Lines of Research**
**Oncology**

- ▶ New diagnostic methods based on the identification and visualization of molecular targets employing metabolic mechanisms, receptor systems, hypoxia, angiogenesis and apoptosis.
- ▶ New applications for sentinel node detection and radioguided surgery models.

**Cardiovascular research**

- ▶ New methods for non-invasive assessment of ischaemic heart disease and heart failure.

- ▶ Cardiovascular functional studies.

- ▶ New methods for assessing cardiac innervation.

**Functional neuroimaging**

- ▶ Development of new functional imaging methods for evaluating neurodegenerative diseases (Parkinson, Parkinson-Plus, Alzheimer, MCI).
- ▶ Dopaminergic system studies using IBZM and Datscan.

**Challenges**

- ▶ Introduce new technologies to clinical research (given that imaging techniques are evolving very rapidly towards multimodal systems that integrate biological, molecular, anatomical and functional information in a single examination) and include these technologies, mainly PET/CT and PET/MR, in the group and hospital's research activities.

**New molecular imaging techniques**

- ▶ Develop new hybrid molecular imaging

technologies, mainly PET/CT and PET/MR, building on pre-clinical and clinical molecular imaging models developed using SPECT and conventional nuclear medicine technologies.

**PET imaging biomarkers**

- ▶ Develop new PET radioactive tracers to be used as biomarkers in new imaging technologies building on our experience with radioactive tracers to view in vivo diagnostic and therapeutic targets.

**Collaborations**
**Collaborations with IIB Sant Pau Groups**

- ▶ Neuroradiology Group: research into neurological and mental disorders and ageing (Dr Camacho, member).
- ▶ Oncology, Gynaecology, Surgery, Radiology, Radiotherapy, Nuclear Medicine and Pathology Groups: Evaluation of the usefulness of PET CT with 18F-FDG in the staging of locally advanced breast carcinoma (Dr Duch, PI).
- ▶ Cerebrovascular Diseases Group (Dr Carrió: member).

## Challenges

- ▶ Study of the predictive-diagnostic value of genetic markers ANLN, BIRC5, UBE2C, IRAK1, ZMYCD11 and CENPA in PAF and their involvement in thyroid tumour dedifferentiation, PS09/02286, FIS, 2010-2013.
- ▶ Radium-223 chloride (Alpharadin) in castration-resistant (hormone-resistant) patients with bone metastasis, BAY 88-8223/16216, Bayer Health Care, 2012-2013.
- ▶ Phase 3, randomized, controlled study of carbozantinib (XL 184) vs. everolimus in patients with metastatic renal cell carcinoma that is refractory to or has progressed after prior VEGFR tyrosine kinase inhibitor therapy, METEOR XL184-308, Exelixis, 2013-2015.
- ▶ Deep brain stimulation in the treatment of refractory schizophrenia: a randomized, controlled, crossover pilot study, PI12/00042, FIS, 2013-2015.
- ▶ 90-week, multicentre, randomized, double-blind, placebo-controlled study in patients with mild Alzheimer disease to investigate the safety, tolerability and Abeta-specific antibody response following repeated IM injections of adjuvanted CAD106 (PET sub-study with flobetapir F18), CAD106-A2203, Novartis-Avid Radiopharmaceuticals, 2011-2013.
- ▶ Randomized double blind phase 3 efficacy and safety study of PF-00299804 versus ERLOTINIB for the treatment of advanced non-small cell lung cancer following progression after, or intolerance to, at least one prior chemotherapy, A7471009, PFIZER, 2011-2014.
- ▶ WN25203, using PET with an amyloid tracer, to assess changes in amyloid load over time in subjects with prodromal Alzheimer disease, WN25203-PET-substudy ROCHE, 2013-2016.

## Awards

- ▶ Dr. Carrión, Hybrid Imaging: The Journey from PET/CT to MR/PET, Global Grand Rounds Lecture at Harvard Medical School Department of Radiology, Massachusetts General Hospital and Brigham and Women's Hospital, 3 September 2013.
- ▶ Dr. Carrión, Brain Amyloid Imaging with PET, Lecture at The Royal College of Radiologists (RCR ASM 2013), The Barbican, London, 11 September 2013.

## Doctoral Theses

- ▶ Monica Sabaté Fernández, Selective sentinel node biopsy in differentiated thyroid cancer: diagnostic performance and clinical validation, Dr Carrión (supervisor), 10 Oct 2013.
- ▶ Fidel Núñez Marín, Patients with presenile Alzheimer's disease: study in high-field MRI (3T), Dr Carrión (supervisor), 9 Oct 2013.

## Main Lines of Research

- Acute respiratory failure and artificial ventilation.**
- ▶ Non-invasive ventilation.
  - ▶ New ventilation modes: proportional-assist ventilation and NAVA.
  - ▶ Prone decubitus in acute respiratory dysfunction syndrome.
  - ▶ Artificial ventilation withdrawal.
  - ▶ Expert ventilation systems.
  - ▶ Sleep and artificial ventilation.
  - ▶ Early and active mobilization of the critical patient.
  - ▶ Extracorporeal CO<sub>2</sub> removal in ARDS patients.
  - ▶ High-flow oxygen administration by nasal cannula in postextubation phase.

- ▶ Prevalence of drug interactions in critical care unit.

## New biomarkers in critically ill patients

- ▶ BNP in weaning from mechanical ventilation.
- ▶ NGAL protein in the renal prognosis of critically ill patients.
- ▶ Strict control of blood glucose in critically ill patients.
- ▶ Prophylaxis of acute gastric mucosal injury in critically ill patients.
- ▶ Haemodynamic effects of different antipyretic drugs in critically ill patients.
- ▶ Influence of position change to supine decubitus in intraabdominal pressure.

## Challenges

- ▶ Consolidate clinical and physiological research into ventilation in critically ill patients through multicentre and multinational networking.
- ▶ Create a stable and well-trained group of researchers in this discipline.

## Active Grants

- ▶ Lluís Zapata Fenor (PI), Role of echocardiography in weaning from mechanical ventilation, IIBSP-ECO-2013-159, HSCSP RI, Dec 2013-Dec 2014.
- ▶ Dr Yasser Sakr, Jena, Germany (PI), Dr Ricard Ferrer (coordinator for Spain), Dr Paula Vera (HSCSP PI), IC-GLOSSARI Study: The Intensive Care Global Study on Severe Acute Respiratory Infection, EC/13/150/3799, European Society of Intensive Care Medical Trials Group, Nov 2012-Oct 2014.
- ▶ Dr Mercedes Nieto Cabrera (national PI), Dr Paula Vera (HSCSP PI), MICAFEM Study:
- ▶ Observational, prospective, multicentre study in intensive care to evaluate the diagnostic reliability of PCR in patients with empirical antifungal therapy for suspected invasive candidiasis, AST-INF-2012-01, Astellas Pharma, Oct 2012-Oct 2014 (HSCSP RI funding of €200 per included, complete and evaluable patient).
- ▶ Joan Sabater Riera (multicentre PI), Dr AJ. Betbesé (HSCSP PI), Impact of CVHD with Increased Adsorption Membranes in Septic Acute Kidney Injury, FIS 12/01562 (NCT01790620), FIS, May 2013- Sept 2015/ Jan 2016, €23,000.

## Main Lines of Research

### Critical analysis of new clinical technologies

- ▶ Anaconda-inhaled sedation in patients undergoing postoperative mechanical ventilation.
- ▶ New monitoring systems for anaesthesia depth and cerebral oxygen status.

### Rationalization of perioperative fluid therapy and blood products

- ▶ Institutional protocolization of massive transfusions: patient blood management.
- ▶ Monitoring of coagulopathy due to massive bleeding from thromboelastography.
- ▶ Identification and recovery from preoperative anaemia in surgery with extensive bleeding.
- ▶ Prevalence of perioperative transfusions.
- ▶ Monitoring of perioperative fluid therapy.

### Perioperative medicine

- ▶ Institutional protocolization of care in clinical cases of cardiorespiratory arrest.

## Challenges

- ▶ Critical analysis of new clinical technologies.
- ▶ Patient blood management.
- ▶ Perioperative medicine.
- ▶ Development of new health service systems.
- ▶ Clinical and preclinical research into physiology, pharmacology and anaesthetic/analgesic techniques.

- ▶ Clinical pathways for patients requiring senile femoral neck fracture treatment, total knee replacement, total hip replacement and fast-track colorectal surgery.

- ▶ Epidemiological study of perioperative morbidity and mortality in collaboration with the epidemiology department of the HSCSP (Iberoamerican Cochrane Centre) and the European Society of Anesthesiology.

### New health service delivery systems

- ▶ Professional team preoperative evaluations.
- ▶ Zero preoperative stay.

### Physiology, pharmacology and anaesthetic techniques

- ▶ Intraoperative respiratory physiology.
- ▶ Efficacy and safety of levosimendan in postoperative refractory heart failure.

**Collaborations with IIB Sant Pau Groups****Cochrane Centre**

- ▶ SIRS (steroids in cardiac surgery) randomized clinical trial.
- ▶ POISE (perioperative ischemic study evaluation) randomized clinical trial.
- ▶ Systematic review: effectiveness of calcitonin and bisphosphonates in bone metastasis pain.

**European Society of Anaesthesiology**

- ▶ ETPOS (European transfusion practice and outcomes of surgery): multicentre observational study.
- ▶ PROVHILO (protective ventilation with high or low positive end-expiratory pressure): multicentre observational study.
- ▶ LAS VEGAS (local assessment of ventilatory management during general anaesthesia for surgery and effects on postoperative complications): prospective observational international multicentre cohort study.

## Main Lines of Research

- ▶ Pharmaceutical care.
- ▶ Artificial nutrition.
- ▶ Oncohaematology.
- ▶ Independent clinical trials.

## Transfer Products

- ▶ Alopurinol 3% cream for palmar-plantar erythrodysesthesia secondary to capecitabine treatment (in collaboration with IIB Sant Pau—Dermatology).

## Challenges

- ▶ Evaluate the impact on effectiveness and safety of pharmacological treatments in different pharmaceutical care programmes: clinical pharmacokinetics, health education for outpatients, medicine reconciliation and identification and prevention of medication-related problems.
- ▶ Evaluate the impact of artificial nutrition on the clinical evolution of patients.

## Awards

- ▶ M. Antonia Mangues and coworkers, Guarantee, Solvency and Sustainability of the Spanish National Health System: Qualitative Analysis from the Hospital Pharmacy, award from the Gaspar Casal Foundation.
- ▶ M. Antonia Mangues, Best Ideas in Health Award, Diario Médico, 2013.

- ▶ MA Mangues, A Feliu, M Riba, Jan T de Pourcq, Catalan Health Service programme to harmonize hospital outpatient medication dispensing, Award for the Best 2020 Initiative, Spanish Hospital Pharmacy Society (SEFH), 2013.

## Collaborations

### Collaboration with other IIB Sant Pau Groups

- ▶ Oncogenes and Antitumour Drugs.
- ▶ Spanish Hospital Pharmacy Society (SEFH).
- ▶ Intensive Care.
- ▶ Clinical Haematology.
- ▶ Dermatology.
- ▶ Orthopaedics and Traumatology.
- ▶ Digestive Diseases.
- ▶ Edurne Fernández de Gamarra (PI), Drug interactions in patients in an intensive medical

service of a university hospital, HSCSP Intensive Care Group, 2013 (non-funded).

### External Collaborations

- ▶ Delgado O, Genúa MI, Ibarra O, Morillo R. Madrid (coordinators), Montse Masip (collaborator),
- ▶ SEFH model for the selection and pharmaceutical care of chronic patients, Spanish Hospital Pharmacy Society (SEFH), 2013.
- ▶ M. Antonia Mangues, Oncogenesis and Antitumour Drugs Consolidated Research Group, Generalitat de Catalunya (AGAUR) 2009-SGR-1437, HSCSP RI, 2009-2013.

## Active Grants

- ▶ Ana Juanes Borrego (PI), Pharmaceutical care programme for patients with heart failure and/or COPD users of emergency department versus conventional monitoring, Catalan Society of Clinical Pharmacy (Joaquim Bonal Grant), 2012-2014, €18,000.
- ▶ Daniel Serrano Barrena (PI), Clinical and economic impact of the systematic review of pharmacological treatment of chronic complex and fragile patients, IIBSP-REV-2013-73, HSCSP RI (MIA grants), 2013-2014, €55,000.
- ▶ Daniel Cardona (PI), Comparative study of the impact of two lipid emulsions, one formulated with MCT, LCT, olive oil and omega 3 fatty acids versus another lipid emulsion formulated with MCT or LCT parenterally administered in the clinical course of severe acute pancreatitis, 2007-005611-26, Fresenius SENPE grant, 2007-2014, €6,000.
- ▶ Isabel Castro Cels (co-investigator), Randomized double-blind study of the efficacy of the administration of somatostatin followed by a short intravenous infusion for prophylaxis of acute pancreatitis after performing endoscopic retrograde cholangiopancreatography, EudraCT 2008-003338-41, FIS, Carlos III Health Institute, 2009-2013.
- ▶ Ainhoa Rodríguez-Arias (co-investigator), Multicentre, randomized, double-blind, placebo-controlled trial to prevent progression of portal hypertension in compensated cirrhosis using selective hepatic vasodilators, EudraCT 2010-021593-11, FIS, Carlos III Health Institute, 2011-.
- ▶ Elena Juanes Borrego, Laura Tuneu Valls (co-investigators), Double-blind study of preventive treatment with allopurinol 3% cream versus placebo of palmoplantar erythrodysesthesia secondary to treatment with capecitabine, EudraCT2010-022095-31, FIS, Carlos III Health Institute, 2011-.
- ▶ Ainhoa Rodríguez-Arias (co-investigator), Prevention of postoperative bleeding in massive bone tumour resection surgery: multicentre, randomized, open, parallel clinical trial with three treatment arms evaluating the efficacy of topical tranexamic acid versus topical Evisel and normal haemostasis (Tranextum), IIBSP-EVI-2011 (independent clinical research), 2011-.

## Main Lines of Research

- ▶ Genetics applied to male infertility.
- ▶ Optimisation of preimplantation genetics diagnosis and in vitro fertilization techniques.
- ▶ Clinical research into new surgical procedures, drugs and medical devices applied

to andrological diseases and conditions (male sexual dysfunction, hypogonadism, Peyronie disease, premature ejaculation, sexually transmitted diseases).

## Challenges

- ▶ Our multidisciplinary team of professionals develops translational research in the field of diagnosis and treatment of andrological disorders. To improve our knowledge and thereby improve healthcare for patients, we seek to continue active projects, develop new lines of investigation,

increase the number of international publications, train professionals and enhance collaboration with hospital and university groups inside and outside the IIB Sant Pau.

## Active Grants

- ▶ Krausz, C, X-linked copy variations and spermatogenesis candidate genes in male infertility, PI11/02254, Carlos III Health Institute, 2012-2014, €94,380.

## Transfer Products

- ▶ Active participation in the International Network for Young Researchers in Male Fertility (INYRMF) in scientific divulgation.

## Patents

- ▶ Dr Lluís Bassas, Dr Sara Larriba (inventors), IDIBELL and Puigvert Foundation (co-titleholders), In vitro method for predicting fecundity of semen, PCT/ES2012/070268.

## Collaborations

**Collaborations with IIB Sant Pau Groups**

- ▶ Nephrology Group.

**External Collaborations****National**

- ▶ Medical and Molecular Genetics Centre (RI)-IDIBELL: genetics applied to infertility.
- ▶ Cellular Biology and Medical Genetics Unit-UAB: preimplantation genetic diagnosis techniques.

**International**

- ▶ Mario Serio Experimental and Clinical Biomedical Sciences Unit, University of Florence: genetics applied to male infertility.
- ▶ Reproductive Genomics Laboratory, Human Genetics Centre (KU Leuven): genetics applied to male infertility.
- ▶ New England Research Institutes: hypogonadism.
- ▶ European Academy of Andrology: radiology examinations of the male genital tract.

**Private**

- ▶ Participation in clinical studies including clinical trials and post-authorization studies sponsored by national and international pharmaceutical companies.

## Doctoral Theses

- ▶ Deborah Grazia Lo Giacco, Genetics of male infertility: molecular study of non-syndromic cryptorchidism and spermatogenic impairment, Autonomous University of Barcelona, C Krausz (co-supervisor), Puigvert Foundation.

## Collaborations

### Collaborations with IIB Sant Pau Groups

- ▶ Nephrology: genetic predisposition to prostate cancer.
- ▶ Clinical Epidemiology and Healthcare: epidemiological studies of urological cancers.
- ▶ Clinical Oncology: detection of prognosis biomarkers for drug response in kidney cancer.

### External Collaborations

#### National academic

- ▶ IDIBELL Molecular Genetics Laboratory: cystine lithiasis.
- ▶ CNIO: biomarkers in bladder cancer.

- ▶ National scientific societies (Spanish Urology Association, etc): clinical studies.

#### International academic

- ▶ Aarhus University Molecular Genetics Department: bladder cancer.
- ▶ International Robotic Cystectomy Consortium: robotic cystectomy.
- ▶ International Renal Cell Carcinoma-Venous Thrombus Consortium: renal-cava thrombus in kidney cancer.

#### Private national and international collaborations

- ▶ Clinical trials and postauthorization studies promoted by national and international pharmaceutical companies.

## Awards

- ▶ Palou J, Breda A, Prostate health index (PHI) and %p2PSA for prediction of prostate cancer in men younger than 60 years of age. A nested-case control study from the pro-PSA multicentric European study (PROMEtheuS project), Best Poster, 28th Annual European Association of Urology Congress.
- ▶ Palou J, Clinical performance of serum isoform [-2]pro-PSA (p2PSA) and its derivatives, namely %p2PSA and the prostate health index (PHI) in men with a family history of prostate cancer. Results from a multicentric European study (PROMEtheuS project), Best Poster, 28th Annual European Association of Urology Congress.

- ▶ Breda A, Living-donor renal transplantation. Experience in our centre, Best Oral Communication, 29th Annual Meeting of the Catalan Nephrology Society.
- ▶ Caffaratti J, Villavicencio H, Robotics diverticulectomy in a paediatric patient with paraurethral diverticulum, Best Presentation, 28th National Meeting of the European Association of Urology Uropaediatrics Group.

## Doctoral Theses

- ▶ Marco Cosentino, Radical cystectomy and urinary diversion: is there a role for the bowel in the future? Autonomous University of Barcelona, Palou, J (supervisor), Autonomous University of Barcelona-Hospital del Mar Teaching Unit.

# Multiple Sclerosis and Epilepsy Research

## Coordinator

Antonio Escartín HSCSP  
aescartin@santpau.cat

## Researchers

Luis Querol	HSCSP RI
Mariana López	HSCSP RI
Alejandro Martínez	HSCSP RI
Nuria Vidal	HSCSP RI

## Main Lines of Research

- ▶ Neuropsychological impairment in patients with multiple sclerosis.
- ▶ Pharmacogenetics in epilepsy.
- ▶ Neuropsychological impairment in juvenile myoclonic epilepsy.

## Challenges

- ▶ Study cognitive evoked potentials in early detection of cognitive impairment in patients with radiologically isolated syndrome, clinically isolated syndrome and newly diagnosed multiple sclerosis.
- ▶ Study the effects of immunomodulatory and immunosuppressive treatments on the cognitive functions of patients with multiple sclerosis.
- ▶ Determine pharmacogenetic variations involving different responses to antiepileptic treatment.
- ▶ Study neuropsychological alterations in patients diagnosed with juvenile myoclonic epilepsy.

## Scientific Production

**\*TIF: 2.486 \*\*MIF: 2.486**

### ISI Web of Knowledge Indexed Publications with an IF

- 01 Munoz D., Escartín A., Dapena D., Coret F., Fernandez-Uria D., Perez D., Casanova B., Guijarro-Castro C., Munteis E., del-Campo Amigo M., Pego R., Calles C., Garcia-Rey C., Monsalve N., Sanchez-Matienzo D. Adverse events during the titration phase of interferon-beta in remitting-relapsing multiple sclerosis are not predicted by body mass index nor by pharmacodynamic biomarkers. (2013) BMC Neurol., 13.  
**IF: 2.486**

# Translational Molecular Oncology

**Coordinator**

Matilde Parreño HSCSP RI  
mparreno@santpau.cat

**Collaborators**

Adrián Martínez	UAB
Pau Queralt	UB
Virginia Gómez	UB

**Main Lines of Research**

- ▶ In vitro and in vivo studies by genetic manipulation of putative biomarkers of prognosis in squamous cell carcinoma (SCC) in tumour progression and as potential therapeutic targets.
- ▶ Preclinical cancer models to identify resistance subpopulations of tumour-initiating cells and study alternative treatments.

**Challenges**

- ▶ Evaluate survival pathways, epithelial-mesenchymal transition, enrichment of cancer stem cells and the resistance to chemotherapeutic treatment involving the studied genes.
- ▶ Improve a mouse model of cancer, based on implantation of human primary tumour.
- ▶ Reinforce and encourage translational research in tumour progression through collaboration with internal and external research groups.

**Active Grants**

- ▶ Parreño, M (PI). Title: Study of molecular markers of poor prognosis in head and neck squamous cell carcinomas (HNSCC) and searching of therapeutic alternatives. Finanacing entity: Institut de Salut Carlos III. Fondos de Investigación Sanitaria (FIS). Period: January 2010-Setembre 2014. Expedient #: PI09/0334. Total amount: 183315€

**Collaborations**
**Collaboration with other IIB Sant Pau Groups**

- ▶ Josep F Nomdedeu of Diagnostic Hematologic Group, IIB Sant Pau in establishment of "in vivo" model of leukomogenesis.
- ▶ Xavier Leon from ORL Cancer group, IIB Sant Pau in studies of HNSCC.

**External Collaborations**

- ▶ Alberto Villanueva of the Translational Research Laboratory of the Catalan Institute of Oncology (ICO) - IDIBELL in studies of orthotopic tumor models.

# Radiation Oncology

HSCSP

## Researchers

Josep Balart	HSCSP
Manuel De Vega	HSCSP
Núria Farré	HSCSP
Josefina Fuentes	HSCSP
Gerardo Gomez	HSCSP
Josep Isern	HSCSP
Gemma Sancho	HSCSP

## Main Lines of Research

Research is partially conducted on the premises of the Translational Research Laboratory of the Catalan Oncology Institute (ICO)-Bellvitge Biomedical Research Institute (IDIBELL) under a framework agreement between the HSCSP and the ICO.

### Modulation of radiosensitivity

- ▶ Modulation of radiosensitivity by SRC protein inhibitors in combination with anti-EGFR.
- ▶ Modulation of radiosensitivity by HMG-CoA reductase inhibitors in combination with anti-EGFR.

### SBRT for patients with lung cancer and with oligometastases

- ▶ Stereotactic body radiotherapy techniques in

radical treatment of patients with early-stage non-surgical lung cancer and selected patients with non-surgical oligometastases.

### Radiation therapy based on PET/CT functional imaging of tumours

- ▶ Implementation of planning techniques for radiotherapy treatment with PET/CT for chest locations and head and neck tumours squamous cell tumours.
- ▶ Image-guided radiotherapy and respiratory movement control.
- ▶ Salvage brachytherapy for local recurrence after external beam radiotherapy in prostate cancer.
- ▶ Hypofractionated intensity-modulated GRT in prostate cancer.

## Challenges

- ▶ Establish relatively radioresistant cell lines compared with the parental cells from which they derive (by clonal selection).
- ▶ Determine the resistant phenotype in cultures and xenografts.
- ▶ Determine molecular radioresistance.

- ▶ Evaluate the effect on carcinomas of SRC and HMG-CoA reductase inhibitors in combination with anti-EGFR.
- ▶ Explore signal transduction changes in the EGFR-MAPK pathway and SRC-EGFR/SRC-STAT3 cooperation induced by SRC and HMG-CoA reductase inhibitors.

# Nursing Care Research

## Coordinator

?

## Nursing researchers

Laura López	HSCSP
Gemma Berga	HSCSP
Rafael Calvo	HSCSP
Queralt Cebrià	HSCSP
Dolores Gil	HSCSP
Ana Gómez	HSCSP
Carme Jover	HSCSP
Maria Lacueva	HSCSP
M. José Pirla	HSCSP
Maite Ricart	HSCSP
Gemma Robleda	HSCSP
Amalia Sillero	HSCSP

## Main Lines of Research

- ▶ Fall prevention and analysis of fall-related factors.
- ▶ Translation and validation of care evaluation questionnaires.
- ▶ Constipation and ageing.
- ▶ Quality of life related to nursing care.
- ▶ Development and application of health science methods: qualitative and qualita-

tive methods, text analysis and discourse analysis.

- ▶ Patient satisfaction with nursing care.
- ▶ Attention to the family.
- ▶ Pain.
- ▶ Technological innovations in nursing care.

## Challenges

- ▶ Strengthen implemented research lines and disseminate the results of active projects.
- ▶ Explore the impact of nursing care for patients, strategies for care improvement and the application of results in care models.

- ▶ Improve the development and understanding of qualitative research in the context of the health sciences and disseminate qualitative methods and analyses of text and discourse as tools in health science research.
- ▶ Create the synergies necessary to consolidate the group's activities.

# Nursing Care Research

## Patents

- ▶ Robleda G, Post-resuscitation lemon ice with saccharin for patients with dry mouth, IIB Sant Pau Transfer and Innovation Unit, start date Oct 2013.

## Awards

- ▶ Berga Congost G, Murillo Miranda P, Márquez López A, Casajús Pérez G, Vascular complications in patients undergoing percutaneous cardiovascular procedures, Best Oral Communication, 2nd place, 34th National Congress of the Spanish Association of Cardiology Nursing, May 2013.
- ▶ Iris Viñoles Soria; Monica De San Nicolas de San Francisco; Ines Loder; Teresa Pujol Serra; M. Angels Sendra Lluis; Marta Navarro Colom; Ana Castillo Masa; Ferran Roche Campo; Gemma Robleda Font, How do intensive care service professionals treat fever?, Best Poster Award,
- ▶ HSCSP Nursing Workshop, Spanish Society of Intensive and Coronary Nursing (SEECIUC).
- ▶ Robleda, G, Special studies in teaching and research into pain in critical care, School of Nursing, University of California, San Francisco, USA (BEQUES MIA predoctoral funding for a 1-month stay at a centre of excellence), HSCSP Healthcare Management Foundation, 2013-2014.

## Doctoral Theses

- ▶ Carme Jover Sancho.
- ▶ Gemma Robleda Font.

## Other Publications

- ▶ Berga Congost G, Murillo Miranda P, Márquez López A, Casajús Pérez G. Complicaciones vasculares en el paciente sometido a procedimientos cardiovasculares percutáneos. Enferm Cardiol. 2013;20(58-59):56-61. | Best Oral Communication, 2nd place, 34th National Congress of the Spanish Association of Cardiology Nursing, Girona 8-10 May 2013.

# Molecular Physiology of the Synapse

**Coordinator**

Àlex Bayés HSCSP RI  
abayesp@santpau.cat

**Technicians**

Eva Olmedo HSCSP RI  
Rita Reig HSCSP RI

**Research Students**

Gemma Gou HSCSP RI  
Marcos Arranz HSCSP RI  
Javier Luis HSCSP RI

## Main Lines of Research

- ▶ Molecular and cellular analyses of the vertebrate synapse.
- ▶ Molecular and cellular dysfunctions underlying intellectual disability and autism.
- ▶ Research into animal models of mental and behavioural disorders.
- ▶ New biochemical methods to study the synapse.

## Challenges

- ▶ Characterize the molecular roots of cognition and behaviour.
- ▶ Identify the synaptic molecules and mechanisms involved in mental and behavioural disorders, mainly intellectual disabilities and autism spectrum disorders.
- ▶ Identify drugs which might help treat mental and behavioural disorders.
- ▶ Study the reversibility after birth of neurodevelopmental disorders affecting cognition.

## Active Grants

- ▶ Bayés A, Proteomic and bioinformatic studies of synaptic function and dysfunction in the context of human intellectual disabilities, BFU2012-34398, Programme to Support Non-Oriented Research Projects, Spanish Ministry of Economy and Competitiveness, 2013-2015, €150,000 (including salary for a doctoral student).
- ▶ Bayés A, Molecular analysis of synaptic dysfunctions underlying human intellectual disabilities, 304111, European Commission, 7FP Career Integration Grant, 2012-2016, €100,000.
- ▶ Bayés A, Proteomic and bioinformatic studies of synaptic function in the context of human mental and behavioural disorders, Start-up associated with Ramon y Cajal Career Development Fellowship, RYC-2011-08391, Spanish Ministry of Economy and Competitiveness, 2012-2017, €15,000.

**Collaborations****Collaborations with IIB Sant Pau Groups**

- ▶ Neurobiology of Dementias

**External Collaborations**

- ▶ Prof Seth GN Grant, University of Edinburgh, UK.
- ▶ Dr Noboru Komiyama, University of Edinburgh, UK.
- ▶ Dr Gavin Rumbaugh, Scripps Research Institute, USA.
- ▶ Dr Richard Emes, University of Nottingham, UK.

- ▶ Dr Nael Nadif-Kasri, Radboud University, The Netherlands
- ▶ Prof Jesus Giraldo, Universitat Autònoma de Barcelona, Spain.
- ▶ Dr Montserrat Milà, Hospital Clínic de Barcelona, Spain.
- ▶ Dr Angels García-Cazorla, Hospital Sant Joan de Déu, Barcelona, Spain.
- ▶ Dr Maria Pilar Armengol, Germans Trias i Pujol Research Institute, Badalona, Spain.

**Books or Chapters****With ISBN**

- ▶ Josep Vendrell, Francesc X Aviles, Àlex Bayés, Insect gut carboxypeptidase-3 (Ch. 36), in Neil D. Rawlings and Guy Salvesen (eds), Handbook of Proteolytic Enzymes (3rd ed), Academic Press, ISBN: 978-0-12-382219-2.
