## To Our Valued Shareholders:

Albert Einstein once remarked that “In the middle of difficulty lies opportunity.” I believe he was telling us that even in the toughest environments, hard work and continuous improvement can pay off.

I am proud to say that's what McDonald's continues to do. Our determination and pursuit of excellence drive our success in any operating environment.

As this Annual Report indicates, 2011 was another strong year for McDonald's. Global comparable sales increased 5.6%, our ninth consecutive year of same store sales growth. Operating income grew 10% in constant currencies and we continued to extend our market share lead around the world. In addition, we returned \$6 billion to shareholders through share repurchases and dividends paid, and we delivered a 35% total return to investors, making us the top performing company in the Dow Jones Industrial Average for 2011.

Today, McDonald's is serving a record number of guests—nearly 68 million people every day. Our menus are more extensive, diverse, and relevant than any time in our history. We are elevating our brand experience in entirely new ways, from digital ordering to delivery to newly reimaged restaurants. And we are strengthening our commitment to both the communities we serve and the larger world around us.

In short, McDonald's is positively touching more lives and meeting the needs of more people in more ways than we ever have.

Our success continues to be truly global, with all areas of the world contributing. Some highlights include the U.S. adding more than 350 million customer visits in 2011, Europe continuing to grow and now generating about 40% of our overall revenue, and Asia/Pacific, Middle East, and Africa doubling its income contribution to our business over the past six years. Such balanced growth highlights our deepening connection with customers everywhere, as well as the underlying strength of our business in today's ever increasing global economy.

Our performance is driven by two key factors. The first is our ongoing commitment to the Plan to Win, which has served as our operations roadmap for the past nine years. The plan focuses on the core drivers of our business—People, Products, Place, Price, and Promotion, or the five “P's.” It keeps us disciplined around building our brand holistically and enhancing the customer experience across our entire business—from our menu and service to our value and convenience. For us, success continues to be about listening to customers and getting better at all the things—large and small—that matter most to them.

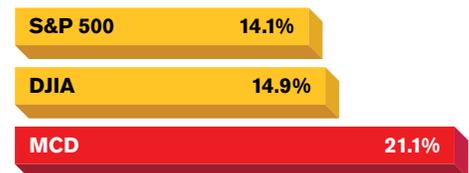

**Jim Skinner,**  
Vice Chairman and CEO

**Don Thompson,**  
President and COO

### Operating Income (In billions)

### 3-Year Compound Annual Total Return (2009-2011)

The second is the collaboration of our System partners. From our world-class franchisees, who are dedicated to running great restaurants and being leaders in their communities; to our unparalleled global suppliers, who provide us with safe and high quality products each and every day; to our talented company employees led by President and Chief Operating Officer Don Thompson and our exceptional global leadership team. And, of course, our restaurant managers and crew—the 1.7 million men and women who work to deliver the best experience every day in our more than 33,000 restaurants worldwide.

All of these groups remain strongly aligned around our common goals, while making their unique contributions to our success. In addition, our talented and diverse Board of Directors provides sensible guidance and strong corporate governance as we work together to deliver shareholder value.

With our entire System united and focused, we intend to keep building our business by capturing the tremendous opportunities identified in the Plan to Win.

We'll do it by delivering even greater excitement around our food, beginning with our iconic core favorites—Big Mac, Chicken McNuggets and French Fries—and evolving our menu with new and innovative local offerings. We'll continue expanding our growing line of McCafé beverages, from specialty coffees to real fruit smoothies, differentiating our brand as a beverage destination. We'll stay focused on adding greater choice and balanced options around the world, from wraps to oatmeal to new Happy Meal alternatives, as we stay in step with our customers' needs.

We also will continue to modernize our restaurants to provide a superior experience for our customers, as well as our managers and crew. We're adding new features and technologies that are making the drive-thru, ordering, and payment processes easier. In addition, we're moving ahead on our reimagining efforts, remodeling a growing number of restaurants with our contemporary new designs. With roughly 45% of our interiors and 25% of our exteriors reimaged around the world, we still have ample opportunity to keep reshaping our brand and delighting our guests with our updated restaurants.

# 104

Consecutive months  
of global comparable  
sales increases through  
December 2011

Of course, making the McDonald's brand even more accessible is another important priority. Continuing to deliver strong value across every price tier, extending our operating hours at more locations, and strategically opening new restaurants in both emerging and mature markets will make us more available more often, when and where our customers want us.

As we keep elevating all of these aspects of our business, we're strengthening our brand as well. We will continue to use our size, scope and resources to make a positive difference for children, families, and communities around the world. Giving back is a part of our heritage, so we remain committed to taking leadership action across the broad spectrum of sustainability—including nutrition and well-being, a sustainable supply chain, environmental responsibility, employee experience, and the community.

As McDonald's Chief Executive, I am immensely proud of our performance and greatly appreciative of your investment in our brand. We do not take your support—or our continued success—for granted. We know the business environment remains challenging, with struggling economies and consumer confidence still fragile. Our gains will continue to be hard won.

So we will keep heeding Mr. Einstein's words and seizing the opportunities to succeed. We remain relentlessly focused on our customers and delivering even better ways to meet their needs. With our strong System alignment, our proven Plan to Win, and our commitment to outstanding execution, I am confident we will continue to grow and deliver sustainable business results for the long-term benefit of our shareholders.

As always, thank you for your investment in Brand McDonald's. I look forward to future success for this great brand.

Sincerely,

**Jim Skinner**  
Vice Chairman and CEO

**Dear Fellow Shareholders:**

**McDonald's Corporation continued its strong momentum in 2011, as we stayed focused on delivering an outstanding experience for our customers across the globe.**

Your Board of Directors is pleased with the Company's performance, achieved once again in a challenging economic environment. Maintaining success requires strong plans, adept leadership, and unwavering alignment—all of which McDonald's continues to demonstrate.

The Plan to Win remains the guiding strategy for the McDonald's System and continues to keep us focused on the customer and elevating the entire dining experience. Around the world, we are delivering on the Plan in highly local ways—from our menus to our marketing—helping to make us a more relevant and meaningful brand in all the communities we serve. Our System partners are as unified as ever, with our franchisees, suppliers, and employees all working together toward our shared goals under the Plan to Win.

Vice Chairman and CEO Jim Skinner and his global leadership team continue to direct the Company in an outstanding manner. Jim is a passionate brand advocate and skilled manager of our business, with a team that is talented, seasoned, and aligned. This strong continuity of management—and the consistency, stability, and focus it brings—has been instrumental in our ongoing success.

Taking all of this into account, we believe in McDonald's ability to keep achieving results and delivering shareholder value. With a focus on the right priorities and plans, the right people in place, and a commitment to the highest level of execution, the Company is well-positioned to drive the business further and achieve continued profitable growth.

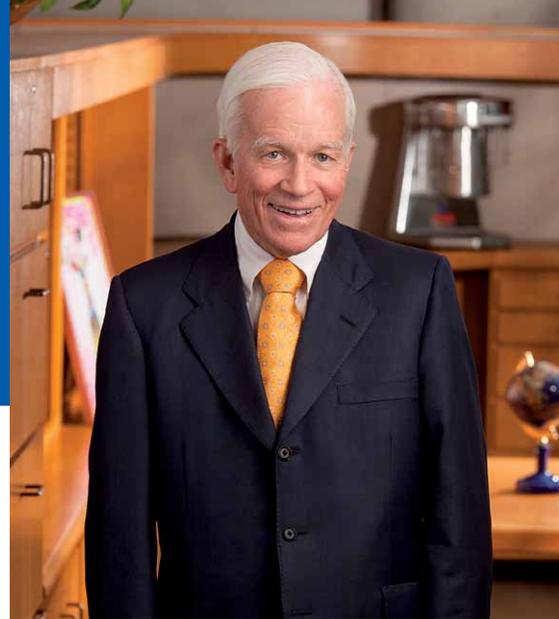

Our Board—comprised of diverse and experienced leaders across the business landscape—remains committed to overseeing the Company's direction and promoting strong corporate governance. We eagerly embrace our responsibilities to help ensure the strength of this great brand moving forward.

Speaking on behalf of the Board of Directors, it is an honor and privilege to serve you, our shareholders.

Very truly yours,

**Andy McKenna**  
Chairman

(1) Includes pretax income due to Impairment and other charges (credits), net of \$61.1 million (\$91.4 million after tax or \$0.08 per share) primarily related to the resolution of certain liabilities retained in connection with the 2007 Latin America developmental license transaction.

(2) Includes income of \$58.8 million (\$0.05 per share) in Gain on sale of investment related to the sale of the Company's minority ownership interest in Redbox Automated Retail, LLC.

(3) Includes income of \$109.0 million (\$0.09 per share) in Gain on sale of investment from the sale of the Company's minority ownership interest in U.K.- based Pret A Manger.

(4) Includes pretax operating charges of \$1.7 billion (\$1.32 per share) due to Impairment and other charges (credits), net primarily as a result of the Company's sale of its businesses in 18 Latin American and Caribbean markets to a developmental licensee.

(5) Includes a tax benefit of \$316.4 million (\$0.26 per share) resulting from the completion of an Internal Revenue Service (IRS) examination of the Company's 2003-2004 U.S. federal tax returns.

(6) Includes income of \$60.1 million (\$0.05 per share) related to discontinued operations primarily from the sale of the Company's investment in Boston Market.

(7) Includes pretax operating charges of \$134 million (\$98 million after tax or \$0.08 per share) due to Impairment and other charges (credits), net.

(8) Includes income of \$678 million (\$0.54 per share) related to discontinued operations primarily resulting from the disposal of the Company's investment in Chipotle.

(9) Represents treasury stock purchases as reflected in Shareholders' equity.

(10) While franchised sales are not recorded as revenues by the Company, management believes they are important in understanding the Company's financial performance because these sales are the basis on which the Company calculates and records franchised revenues and are indicative of the financial health of the franchisee base.

## Stock performance graph

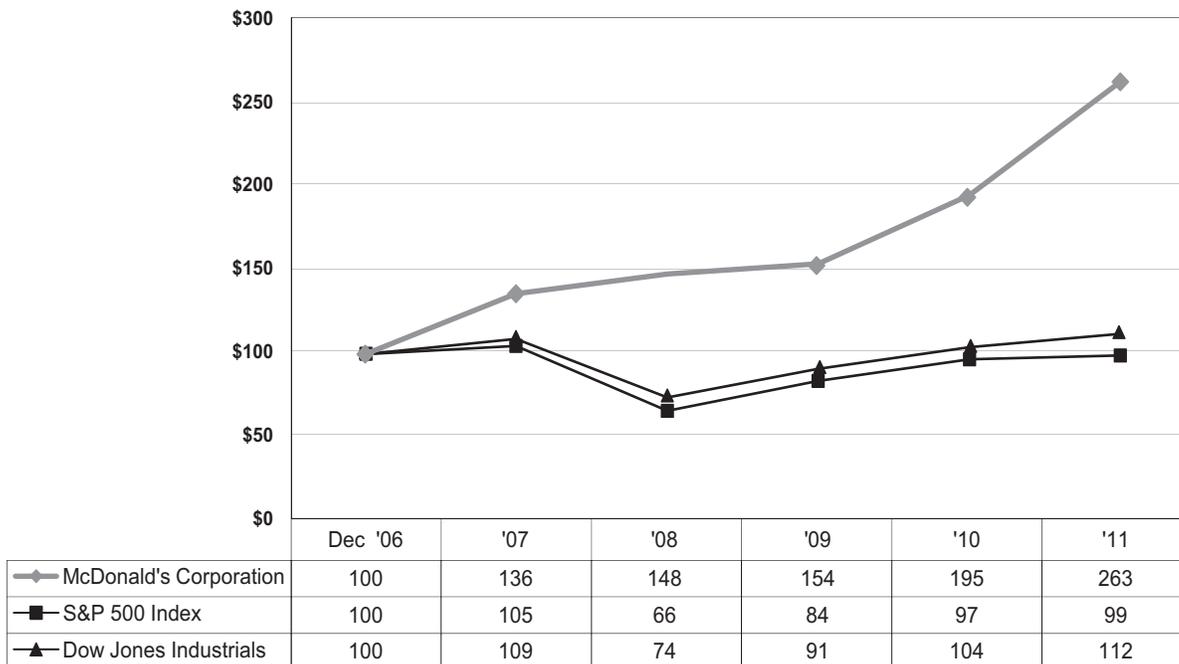

At least annually, we consider which companies comprise a readily identifiable investment peer group. McDonald's is included in published restaurant indices; however, unlike most other companies included in these indices, which have no or limited international operations, McDonald's does business in more than 100 countries and a substantial portion of our revenues and income is generated outside the U.S. In addition, because of our size, McDonald's inclusion in those indices tends to skew the results. Therefore, we believe that such a comparison is not meaningful.

Our market capitalization, trading volume and importance in an industry that is vital to the U.S. economy have resulted in McDonald's inclusion in the Dow Jones Industrial Average (DJIA) since 1985. Like McDonald's, many DJIA companies generate

meaningful revenues and income outside the U.S. and some manage global brands. Thus, we believe that the use of the DJIA companies as the group for comparison purposes is appropriate.

The following performance graph shows McDonald's cumulative total shareholder returns (i.e., price appreciation and reinvestment of dividends) relative to the Standard & Poor's 500 Stock Index (S&P 500 Index) and to the DJIA companies for the five-year period ended December 31, 2011. The graph assumes that the value of an investment in McDonald's common stock, the S&P 500 Index and the DJIA companies (including McDonald's) was \$100 at December 31, 2006. For the DJIA companies, returns are weighted for market capitalization as of the beginning of each period indicated. These returns may vary from those of the Dow Jones Industrial Average Index, which is not weighted by market capitalization, and may be composed of different companies during the period under consideration.

**COMPARISON OF CUMULATIVE FIVE YEAR TOTAL RETURN**

Source: S&P Capital IQ

# Management's Discussion and Analysis of Financial Condition and Results of Operations

## Overview

### DESCRIPTION OF THE BUSINESS

The Company franchises and operates McDonald's restaurants. Of the 33,510 restaurants in 119 countries at year-end 2011, 27,075 were franchised or licensed (including 19,527 franchised to conventional franchisees, 3,929 licensed to developmental licensees and 3,619 licensed to foreign affiliates (affiliates)—primarily Japan) and 6,435 were operated by the Company. Under our conventional franchise arrangement, franchisees provide a portion of the capital required by initially investing in the equipment, signs, seating and décor of their restaurant business, and by reinvesting in the business over time. The Company owns the land and building or secures long-term leases for both Company-operated and conventional franchised restaurant sites. This maintains long-term occupancy rights, helps control related costs and assists in alignment with franchisees. In certain circumstances, the Company participates in reinvestment for conventional franchised restaurants. Under our developmental license arrangement, licensees provide capital for the entire business, including the real estate interest, and the Company has no capital invested. In addition, the Company has an equity investment in a limited number of affiliates that invest in real estate and operate and/or franchise restaurants within a market.

We view ourselves primarily as a franchisor and believe franchising is important to delivering great, locally-relevant customer experiences and driving profitability. However, directly operating restaurants is paramount to being a credible franchisor and is essential to providing Company personnel with restaurant operations experience. In our Company-operated restaurants, and in collaboration with franchisees, we further develop and refine operating standards, marketing concepts and product and pricing strategies, so that only those that we believe are most beneficial are introduced in the restaurants. We continually review, and as appropriate adjust, our mix of Company-operated and franchised (conventional franchised, developmental licensed and foreign affiliated) restaurants to help optimize overall performance.

The Company's revenues consist of sales by Company-operated restaurants and fees from restaurants operated by franchisees. Revenues from conventional franchised restaurants include rent and royalties based on a percent of sales along with minimum rent payments, and initial fees. Revenues from restaurants licensed to affiliates and developmental licensees include a royalty based on a percent of sales, and generally include initial fees. Fees vary by type of site, amount of Company investment, if any, and local business conditions. These fees, along with occupancy and operating rights, are stipulated in franchise/license agreements that generally have 20-year terms.

The business is managed as distinct geographic segments. Significant reportable segments include the United States (U.S.), Europe, and Asia/Pacific, Middle East and Africa (APMEA). In addition, throughout this report we present "Other Countries & Corporate" that includes operations in Canada and Latin America, as well as Corporate activities. The U.S., Europe and APMEA segments account for 32%, 40% and 22% of total revenues, respectively. The United Kingdom (U.K.), France and Germany,

collectively, account for over 50% of Europe's revenues; and China, Australia and Japan (a 50%-owned affiliate accounted for under the equity method), collectively, account for over 55% of APMEA's revenues. These six markets along with the U.S. and Canada are referred to as "major markets" throughout this report and comprise approximately 70% of total revenues.

In analyzing business trends, management considers a variety of performance and financial measures, including comparable sales and comparable guest count growth, Systemwide sales growth and returns.

- Constant currency results exclude the effects of foreign currency translation and are calculated by translating current year results at prior year average exchange rates. Management reviews and analyzes business results in constant currencies and bases certain incentive compensation plans on these results because we believe this better represents the Company's underlying business trends.
- Comparable sales and comparable guest counts are key performance indicators used within the retail industry and are indicative of acceptance of the Company's initiatives as well as local economic and consumer trends. Increases or decreases in comparable sales and comparable guest counts represent the percent change in sales and transactions, respectively, from the same period in the prior year for all restaurants, whether operated by the Company or franchisees, in operation at least thirteen months, including those temporarily closed. Some of the reasons restaurants may be temporarily closed include reimagining or remodeling, rebuilding, road construction and natural disasters. Comparable sales exclude the impact of currency translation. Growth in comparable sales is driven by guest counts and average check, which is affected by changes in pricing and product mix. Generally, the goal is to achieve a balanced contribution from both guest counts and average check.

McDonald's reports on a calendar basis and therefore the comparability of the same month, quarter and year with the corresponding period of the prior year will be impacted by the mix of days. The number of weekdays and weekend days in a given timeframe can have a positive or negative impact on comparable sales and guest counts. The Company refers to these impacts as calendar shift/trading day adjustments. In addition, the timing of holidays can impact comparable sales and guest counts. These impacts vary geographically due to consumer spending patterns and have the greatest effect on monthly comparable sales and guest counts while the annual impacts are typically minimal.

- Systemwide sales include sales at all restaurants. While franchised sales are not recorded as revenues by the Company, management believes the information is important in understanding the Company's financial performance because these sales are the basis on which the Company calculates and records franchised revenues and are indicative of the financial health of the franchisee base.
- Return on incremental invested capital (ROIIC) is a measure reviewed by management over one-year and three-year time periods to evaluate the overall profitability of the business units, the effectiveness of capital deployed and the future allocation of capital. The return is calculated by dividing the change in operating income plus depreciation and amortization (numerator) by the adjusted cash used for investing activities

(denominator), primarily capital expenditures. The calculation uses a constant average foreign exchange rate over the periods included in the calculation.

## **STRATEGIC DIRECTION AND FINANCIAL PERFORMANCE**

The strength of the alignment between the Company, its franchisees and suppliers (collectively referred to as the System) has been key to McDonald's success. This business model enables McDonald's to consistently deliver locally-relevant restaurant experiences to customers and be an integral part of the communities we serve. In addition, it facilitates our ability to identify, implement and scale innovative ideas that meet customers' changing needs and preferences.

McDonald's customer-focused Plan to Win—which concentrates on being better, not just bigger—provides a common framework for our global business while allowing for local adaptation. Through the execution of multiple initiatives surrounding the five elements of our Plan to Win—People, Products, Place, Price and Promotion—we have enhanced the restaurant experience for customers worldwide and grown comparable sales and customer visits in each of the last eight years. This Plan, combined with financial discipline, has delivered strong results for our shareholders.

We have exceeded our long-term, constant currency financial targets of average annual Systemwide sales growth of 3% to 5%; average annual operating income growth of 6% to 7%; and annual returns on incremental invested capital in the high teens every year since the Plan's implementation in 2003, after adjusting for the loss in 2007 from the Latin America developmental license transaction. Given the size and scope of our global business, we believe these financial targets are realistic and sustainable over time, keeping us focused on making the best decisions for the long-term benefit of our System.

In 2011, we remained focused on customers' needs and accelerated efforts within the Plan to Win where the greatest opportunity exists. The Company's key global priorities of optimizing our menu, modernizing the customer experience, and broadening accessibility to our Brand represent areas where we are intensifying our efforts to drive the business further. Initiatives supporting these priorities resonated with consumers, driving increases in sales and customer visits despite challenging economies and a contracting Informal Eating Out (IEO) segment in many markets. As a result, every area of the world contributed to 2011 global comparable sales and guest counts increasing 5.6% and 3.7%, respectively.

Specific menu pricing actions across our system reflect local market conditions as well as other factors, notably the food away from home and food at home inflation indices. In our Company-operated restaurants, we manage menu board prices to ensure value at all price points, increase profitability and mitigate inflation, all while trying to maintain guest count momentum. In order to accomplish these objectives, we utilize a strategic pricing tool that balances price, product mix and promotion. Franchisees also have access to, and many utilize, this strategic pricing tool. In general, we believe franchisees employ a similar pricing strategy. In 2011, we increased average price at Company-operated restaurants in each area of the world, although increases varied by market and region. We look to optimize product mix by utilizing a menu with entry-point value, core, premium and fourth-tier offerings. We also introduce new products that meet customer needs, which can expand average check and increase guest counts.

In the U.S., we grew sales, guest counts and market share with comparable sales up for the ninth consecutive year, rising 4.8% in 2011, while comparable guest counts rose 3.3%. These results were achieved despite a slight decline in the IEO segment. We remained focused on maximizing our core business while providing customers with affordable products and value throughout our menu including options available on the Dollar Menu at breakfast and the rest of the day. We highlighted core menu items like Chicken McNuggets that featured new sauces, breakfast products including our new Fruit & Maple Oatmeal, additions to the McCafé beverage line and limited-time offerings such as the McRib sandwich. The national launch of the McCafé Frozen Strawberry Lemonade and Mango Pineapple real-fruit smoothie provided meaningful extensions to the McCafé beverage line. Convenient locations also continued to provide a competitive advantage with extended hours and efficient drive-thru service. Modernizing the customer experience remained a focus with the expansion of our major remodeling program to enhance the appearance and functionality of our restaurants and make our restaurants more relevant to our customers' daily lives. Over 900 existing restaurants were remodeled during 2011 with the majority adding drive-thru capacity to capture additional guest counts. We also completed our two-year, Systemwide roll-out of a new point-of-sale system. This allows us to continue expanding our menu offerings while making it easier for our crew to fulfill every order accurately.

In Europe, comparable sales rose 5.9%, marking the eighth consecutive year of comparable sales increases, and comparable guest counts rose 3.4%. Major contributors were the U.K., France, Russia and Germany. Initiatives that helped drive our business included leveraging our tiered menu featuring everyday affordable prices, menu variety including new and limited-time offerings, and reimaging over 900 restaurants. We continue to expand our coffee business and have over 1,500 McCafé locations, which in Europe are generally separate areas inside the restaurants that serve specialty coffees, indulgent desserts and snacks. We completed the rollout of the new drive-thru customer order display system in over 4,500 restaurants. In addition, we increased our accessibility and convenience with extended operating hours. We offered new premium menu items such as the 1955 burger and expanded McWraps across several European markets. In many markets, we have continued to offer a fourth-tier platform—such as Little Tasters in the U.K.—a range of tasty and appealing items in smaller portion sizes. Finally, we continued building customer trust in our brand through communications that emphasized the quality and origin of McDonald's food and our commitment to sustainable business practices.

In APMEA, our momentum continued with nearly every country delivering positive comparable sales, led by China and Australia. Comparable sales rose 4.7% and comparable guest counts rose 4.3% with performance driven by strategies emphasizing value, breakfast, convenience, core menu extensions, desserts and promotional food events. Australia launched a Value Lunch program that features meals at discounted price points for certain hours while China and Japan concentrated on affordability by continuing their Value Lunch platforms. New menu items such as real-fruit smoothies and frappés in Australia and the extension of the Value Breakfast program in China were popular with customers. Japan executed another successful U.S. themed burger promotion and celebrated its 40<sup>th</sup> anniversary by offering popular core menu items at reduced prices. Desserts

continue to play a meaningful role as we seek to deliver on customers' menu expectations through products such as the McFlurry and unique delivery storefronts like the dessert kiosks in China, where we are now one of the largest ice cream retailers. Our breakfast business continues to evolve and is now offered in approximately 75% of APMEA restaurants. In Japan, rotational breakfast items, including the Chicken Muffin and Tuna Muffin, were offered during several months, while Australia launched new breakfast menu items such as bagel sandwiches. Nearly two-thirds of APMEA restaurants are now offering some form of extended operating hours and over 4,600 restaurants are open 24 hours. Delivery is offered in many APMEA markets and is now available in over 1,500 restaurants, including nearly 500 in China. McDonald's Japan was negatively impacted by the natural disaster last March and as a result, continued to face some challenges throughout 2011. However, we remain confident that the market will continue to drive long-term profitable growth.

Our approach to offering affordable value to our customers is complemented by a focus on driving operating efficiencies and effectively managing restaurant-level food and paper costs by leveraging our scale, supply chain infrastructure and risk management practices. Our ability to execute our strategies in every area of the world, grow comparable sales and control selling, general & administrative expenses resulted in combined operating margin (operating income as a percent of total revenues) of 31.6% in 2011, an improvement of 0.6 percentage points over 2010.

In 2011, strong global sales and margin performance grew cash from operations, which rose \$808 million to \$7.2 billion. Our substantial cash flow, strong credit rating and continued access to credit provide us flexibility to fund capital expenditures and debt repayments as well as return cash to shareholders. Capital expenditures of approximately \$2.7 billion were invested in our business primarily to open new restaurants and reimagine existing restaurants. Across the System, 1,150 restaurants were opened and over 2,500 existing locations were reimaged. In addition, we returned \$6.0 billion to shareholders consisting of \$3.4 billion in share repurchases and \$2.6 billion in dividends.

Cash from operations continues to benefit from our heavily franchised business model as the rent and royalty income received from owner/operators is a very stable revenue stream that has relatively low costs. In addition, the franchise business model is less capital intensive than the Company-owned model. We believe locally-owned and operated restaurants maximize brand performance and are at the core of our competitive advantages, making McDonald's not just a global brand but also a locally-relevant one.

#### **HIGHLIGHTS FROM THE YEAR INCLUDED:**

- Comparable sales grew 5.6% and guest counts rose 3.7%, building on 2010 increases of 5.0% and 4.9%, respectively.
- Revenues increased 12% (8% in constant currencies).
- Operating income increased 14% (10% in constant currencies).
- Combined operating margin increased 0.6 percentage points to 31.6%.
- Diluted earnings per share was \$5.27, an increase of 15% (11% in constant currencies).
- Cash provided by operations increased \$808 million to \$7.2 billion.

- One-year ROIC was 37.6% and three-year ROIC was 37.8% for the period ended December 31, 2011 (see reconciliation on page 25).
- The Company increased the quarterly cash dividend per share 15% to \$0.70 for the fourth quarter—bringing our current annual dividend to \$2.80 per share.
- The Company returned \$6.0 billion to shareholders through share repurchases and dividends paid.

#### **OUTLOOK FOR 2012**

We will continue to drive success in 2012 and beyond by enhancing the customer experience across all elements of our Plan to Win. Our global System continues to be energized by our ongoing momentum and significant growth opportunities.

We hold a strong competitive position in the market place, and we intend to further differentiate our brand by striving to become our customers' favorite place and way to eat and drink. Growing market share will continue to be a focus as we execute our three global priorities: optimizing our menu, modernizing the customer experience and broadening our accessibility. The menu efforts will include expanding destination beverages and desserts and enhancing our food image. The customer experience efforts will include accelerating our interior and exterior reimaging efforts and providing our restaurant teams with the appropriate tools, training, technology and staffing. The accessibility efforts will include increasing the level and variety of conveniences provided to our customers through greater proximity, extended operating hours and stronger value platforms. We will execute these priorities to increase McDonald's brand relevance with operational and financial discipline. Consequently, we are confident we can again meet or exceed our long-term constant currency financial targets.

In the U.S., our 2012 initiatives focus on balancing core menu classics with new products and promotional food events such as Chicken McBites, made with bite-sized pieces of premium chicken breast, Blueberry Banana Nut Oatmeal, and additional McCafé beverage offerings such as the Cherry Berry Chiller. We will continue offering value across the menu at breakfast and the rest of the day. Opportunities around additional staffing at peak hours during the breakfast and lunch day parts and increasing restaurants that operate 24 hours per day will allow us to broaden accessibility to our customers. In addition, our plans to elevate the brand experience include leveraging our new point-of-sale system with other technology enhancements such as using hand-held order takers and advancements to improve our front counter service system. We also will expand our major remodel program to another 800 locations in 2012.

Our business plans in Europe are focused on building market share with the right mix of guest counts, average check, strategic restaurant reimaging and expansion. We will increase our local relevance by complementing our tiered menu with a variety of promotional food events as well as new snack and dessert options. In 2012, we will reimage approximately 900 restaurants as we progress towards our goal of having 90% of our interiors and over 65% of our exteriors reimaged by the end of the year. We will leverage service innovations by continuing the deployment of technologies such as updating the point-of-sale system, self-order kiosks and hand-held order devices to enhance the customer experience and help drive increased transactions and labor efficiency. We will also continue working to reduce our

impact on the environment with energy management tools that enable us to use green energy in markets where available. In addition, the U.K. will be the proud host of our Olympic sponsorship, marking the ninth consecutive time that McDonald's will serve as the Official Restaurant of the Olympic Games. In 2012, our European business will continue to face headwinds due to economic uncertainty and additional government-initiated austerity measures implemented in many countries. While we will closely monitor consumer reactions to these measures, we remain confident that our business model will continue to drive profitable growth.

In APMEA, we will continue our efforts to become our customers' first choice for eating out by continuing to provide robust value platforms and focusing on menu variety, restaurant experience and convenience. Value will continue to be a key growth driver as we reinforce the affordability of our menu to consumers across all dayparts, by building on our successful Value Lunch platforms and expanding our breakfast offerings. The markets will continue to execute against a combination of core menu items, promotional food events, desserts and limited-time offerings to provide a balanced mix of products to our customers. We will grow our business by opening approximately 750 new restaurants and reimagining about 475 existing restaurants while elevating our focus on service and operations to drive efficiencies. In China, we will continue to build a foundation for long-term growth by opening 225 to 250 restaurants in 2012 toward our goal of reaching 2,000 restaurants by the end of 2013. Convenience initiatives will focus on expanding delivery service across the region and building on the success of our extended operating hours.

We continue to maintain strong financial discipline by effectively managing spending in order to maximize financial performance. In making capital allocation decisions, our goal is to make investments that elevate the McDonald's experience and drive sustainable growth in sales and market share while earning strong returns. We remain committed to returning all of our free cash flow (cash from operations less capital expenditures) to shareholders over the long-term via dividends and share repurchases.

McDonald's does not provide specific guidance on diluted earnings per share. The following information is provided to assist in analyzing the Company's results:

- Changes in Systemwide sales are driven by comparable sales and net restaurant unit expansion. The Company expects net restaurant additions to add approximately 2 percentage points to 2012 Systemwide sales growth (in constant currencies), most of which will be due to about 870 net traditional restaurants added in 2011.

- The Company does not generally provide specific guidance on changes in comparable sales. However, as a perspective, assuming no change in cost structure, a 1 percentage point increase in comparable sales for either the U.S. or Europe would increase annual diluted earnings per share by about 3-4 cents.
- With about 75% of McDonald's grocery bill comprised of 10 different commodities, a basket of goods approach is the most comprehensive way to look at the Company's commodity costs. For the full year 2012, the total basket of goods cost is expected to increase 4.5-5.5% in the U.S. and 2.5-3.5% in Europe, with more pressure expected in the first half.
- The Company expects full-year 2012 selling, general & administrative expenses to increase about 6% in constant currencies, driven by certain technology investments, primarily to accelerate future restaurant capabilities, and costs related to the 2012 Worldwide Owner/Operator Convention and Olympics. The Company expects the magnitude of the increase to be confined to 2012. Fluctuations will be experienced between quarters due to the timing of certain items such as the Worldwide Owner/Operator Convention and the Olympics.
- Based on current interest and foreign currency exchange rates, the Company expects interest expense for the full year 2012 to increase approximately 6-8% compared with 2011.
- A significant part of the Company's operating income is generated outside the U.S., and about 40% of its total debt is denominated in foreign currencies. Accordingly, earnings are affected by changes in foreign currency exchange rates, particularly the Euro, British Pound, Australian Dollar and Canadian Dollar. Collectively, these currencies represent approximately 65% of the Company's operating income outside the U.S. If all four of these currencies moved by 10% in the same direction, the Company's annual diluted earnings per share would change by about 24 cents.
- The Company expects the effective income tax rate for the full-year 2012 to be 31% to 33%. Some volatility may be experienced between the quarters resulting in a quarterly tax rate that is outside the annual range.
- The Company expects capital expenditures for 2012 to be approximately \$2.9 billion. About half of this amount will be used to open new restaurants. The Company expects to open more than 1,300 restaurants including about 450 restaurants in affiliated and developmental licensee markets, such as Japan and Latin America, where the Company does not fund any capital expenditures. The Company expects net additions of about 900 restaurants. The remaining capital will be used for reinvestment in existing restaurants. Nearly half of this reinvestment will be used to reimagine more than 2,400 locations worldwide, some of which will require no capital investment from the Company.

### IMPACT OF FOREIGN CURRENCY TRANSLATION ON REPORTED RESULTS

While changes in foreign currency exchange rates affect reported results, McDonald's mitigates exposures, where practical, by financing in local currencies, hedging certain foreign-denominated cash flows, and purchasing goods and services in local currencies.

In 2011, foreign currency translation had a positive impact on consolidated operating results driven by the stronger Euro and Australian Dollar as well as most other currencies. In 2010, foreign currency translation had a positive impact on consolidated operating results driven by stronger global currencies, primarily the Australian Dollar and Canadian Dollar, partly offset by the weaker Euro. In 2009, foreign currency translation had a negative impact on consolidated operating results, primarily caused by the weaker Euro, British Pound, Russian Ruble, Australian Dollar and Canadian Dollar.

### Impact of foreign currency translation on reported results

<i>In millions, except per share data</i>	<i>Reported amount</i>			<i>Currency translation benefit/(cost)</i>		
	<b>2011</b>	<b>2010</b>	<b>2009</b>	<b>2011</b>	<b>2010</b>	<b>2009</b>

## NET INCOME AND DILUTED EARNINGS PER COMMON SHARE

In 2011, net income and diluted earnings per common share were \$5.5 billion and \$5.27. Foreign currency translation had a positive impact of \$0.19 on diluted earnings per share.

In 2010, net income and diluted earnings per common share were \$4.9 billion and \$4.58. Results included after tax charges due to Impairment and other charges (credits), net of \$25 million or \$0.02 per share, primarily related to the Company's share of restaurant closing costs in McDonald's Japan (a 50%-owned affiliate) in conjunction with the strategic review of the market's restaurant portfolio, partly offset by income related to the resolution of certain liabilities retained in connection with the 2007 Latin America developmental license transaction. Foreign currency translation had a positive impact of \$0.01 per share on diluted earnings per share.

In 2009, net income and diluted earnings per common share were \$4.6 billion and \$4.11. Results benefited by after tax income due to Impairment and other charges (credits), net of \$91 million or \$0.08 per share, primarily due to the resolution of certain liabilities retained in connection with the 2007 Latin America developmental license transaction. Results also benefited by an after tax gain of \$59 million or \$0.05 per share due to the sale of the Company's minority ownership interest in Redbox, reflected in Gain on sale of investment. Results were negatively impacted by \$0.15 per share due to the effect of foreign currency translation.

The Company repurchased 41.9 million shares of its stock for \$3.4 billion in 2011 and 37.8 million shares of its stock for nearly \$2.7 billion in 2010, driving reductions of over 3% and 2% of total shares outstanding, respectively, net of stock option exercises.

## REVENUES

The Company's revenues consist of sales by Company-operated restaurants and fees from restaurants operated by franchisees. Revenues from conventional franchised restaurants include rent and royalties based on a percent of sales along with minimum rent payments, and initial fees. Revenues from franchised restaurants that are licensed to foreign affiliates and developmental licensees include a royalty based on a percent of sales, and generally include initial fees.

In 2011 and 2010, constant currency revenue growth was driven primarily by positive comparable sales as well as expansion.

### Revenues

<i>Dollars in millions</i>	<i>Amount</i>			<i>Increase/(decrease)</i>		<i>Increase/(decrease) excluding currency translation</i>

In the U.S., revenues in 2011 and 2010 were positively impacted by the ongoing appeal of our iconic core products and the success of new products, as well as continued focus on everyday value, convenience and modernizing the customer experience. New products introduced in 2011 included Fruit & Maple Oatmeal and additions to the McCafé beverage line, while new products introduced in 2010 included McCafé frappés and smoothies as well as the Angus Snack Wraps. Refranchising activity negatively impacted revenue growth in 2010.

Europe's constant currency increase in revenues in 2011 was primarily driven by comparable sales increases in Russia (which is

entirely Company-operated), the U.K., France and Germany, as well as expansion in Russia. The 2010 increase was primarily driven by comparable sales increases in the U.K., France and Russia, as well as expansion in Russia, partly offset by the impact of refranchising activity primarily in the U.K.

In APMEA, the constant currency increase in revenues in 2011 was primarily driven by comparable sales increases in China and most other markets. The 2010 increase was primarily driven by comparable sales increases in China, Australia and most other markets. In addition, expansion in China contributed to the increases in both years.

The following tables present comparable sales, comparable guest counts and Systemwide sales increases:

*Comparable sales and guest count increases*

	2011		2010		2009	
	Sales	Guest Counts	Sales	Guest Counts	Sales	Guest Counts
U.S.	4.8%	3.3%	3.8%	5.3%	2.6%	0.5%
Europe	5.9	3.4	4.4	2.7	5.2	2.8
APMEA	4.7	4.3	6.0	4.9	3.4	1.4
Other Countries & Corporate	10.1	4.5	11.3	8.3	5.5	2.4
Total	5.6%	3.7%	5.0%	4.9%	3.8%	1.4%

*Systemwide sales increases*

			Excluding currency translation	
	2011	2010	2011	2010
U.S.	5%	4%	5%	4%
Europe	14	3	9	7
APMEA	16	15	7	7
Other Countries & Corporate	17	13	12	13
Total	11%	7%	7%	6%

Franchised sales are not recorded as revenues by the Company, but are the basis on which the Company calculates and records franchised revenues and are indicative of the health of the franchisee base. The following table presents Franchised sales and the related increases:

*Franchised Sales*

Dollars in millions	Amount			Increase		Increase excluding currency translation	
	2011	2010	2009	2011	2010	2011	2010
U.S.	\$29,739	\$28,166	\$26,737	6%	5%	6%	5%
Europe	17,243	15,049	14,573	15	3	9	8
APMEA	13,041	11,373	9,871	15	15	6	7
Other Countries & Corporate	7,625	6,559	5,747	16	14	12	15
Total	\$67,648	\$61,147	\$56,928	11%	7%	7%	7%

**RESTAURANT MARGINS**

▪ **Franchised margins**

Franchised margin dollars represent revenues from franchised restaurants less the Company's occupancy costs (rent and depreciation) associated with those sites. Franchised margin dollars represented about two-thirds of the combined restaurant margins in 2011, 2010 and 2009. Franchised margin dollars increased \$768 million or 12% (9% in constant currencies) in 2011 and \$479 million or 8% (8% in constant currencies) in 2010. Positive comparable sales were the primary driver of the constant currency growth in franchised margin dollars in both years.

*Franchised margins*

In millions	2011	2010	2009
U.S.	\$3,436	\$3,239	\$3,031
Europe	2,400	2,063	1,998
APMEA	858	686	559
Other Countries & Corporate	538	476	397
Total	\$7,232	\$6,464	\$5,985

*Percent of revenues*

U.S.	83.9%	83.4%	83.1%
Europe	79.1	78.2	78.3
APMEA	89.5	89.3	89.6
Other Countries & Corporate	86.1	86.0	86.1
Total	83.0%	82.4%	82.1%

In the U.S., the franchised margin percent increase in 2011 and 2010 was primarily due to positive comparable sales, partly offset by higher occupancy costs.

In Europe, the franchised margin percent increase in 2011 was primarily due to positive comparable sales, partly offset by

higher occupancy costs. Europe's franchised margin percent decreased in 2010 as positive comparable sales were more than offset by higher occupancy expenses, the cost of strategic brand and sales building initiatives and the refranchising strategy.

In APMEA, the franchised margin percent increase in 2011 was primarily due to a contractual escalation in the royalty rate for Japan in addition to positive comparable sales in most markets, partly offset by a negative impact from the strengthening of the Australian dollar. The 2010 decrease was primarily driven by a negative impact from the strengthening of the Australian dollar.

The franchised margin percent in APMEA and Other Countries & Corporate is higher relative to the U.S. and Europe due to a larger proportion of developmental licensed and/or affiliated restaurants where the Company receives royalty income with no corresponding occupancy costs.

#### ▪ **Company-operated margins**

Company-operated margin dollars represent sales by Company-operated restaurants less the operating costs of these restaurants. Company-operated margin dollars increased \$282 million or 9% (5% in constant currencies) in 2011 and increased \$366 million or 13% (12% in constant currencies) in 2010. The constant currency growth in Company-operated margin dollars in 2011 was driven by positive comparable sales partially offset by higher costs, primarily commodity costs, in all segments. Positive comparable sales and lower commodity costs were the primary drivers of the constant currency growth in Company-operated margin dollars in 2010.

#### *Company-operated margins*

<i>In millions</i>	<b>2011</b>	<i>2010</i>	<i>2009</i>
U.S.	<b>\$ 914</b>	\$ 902	\$ 832
Europe	<b>1,514</b>	1,373	1,240
APMEA	<b>876</b>	764	624
Other Countries & Corporate	<b>151</b>	134	111
<b>Total</b>	<b>\$3,455</b>	\$3,173	\$2,807

#### *Percent of sales*

U.S.	<b>20.6%</b>	21.3%	19.4%
Europe	<b>19.3</b>	19.8	18.4
APMEA	<b>17.3</b>	17.8	16.8
Other Countries & Corporate	<b>16.0</b>	17.2	15.2
<b>Total</b>	<b>18.9%</b>	19.6%	18.2%

In the U.S., the Company-operated margin percent decreased in 2011 due to higher commodity and occupancy costs, partially offset by positive comparable sales. The margin percent increased in 2010 due to lower commodity costs and positive comparable sales, partly offset by higher labor costs. Refranchising also had a positive impact on the margin percent in 2010.

Europe's Company-operated margin percent decreased in 2011 primarily due to higher commodity, labor, and occupancy costs, partially offset by positive comparable sales. The margin percent increased in 2010 primarily due to positive comparable sales and lower commodity costs, partly offset by higher labor costs.

In APMEA, the Company-operated margin percent in 2011 reflected positive comparable sales, offset by higher commodity, labor and occupancy costs. Acceleration of new restaurant openings in China negatively impacted the margin percent. Similar to

other markets, new restaurants in China initially open with lower margins that grow significantly over time. The APMEA margin percent increased in 2010 due to positive comparable sales and lower commodity costs, partly offset by higher occupancy & other costs and increased labor costs.

#### **Supplemental information regarding Company-operated restaurants**

We continually review our restaurant ownership mix with a goal of improving local relevance, profits and returns. In most cases, franchising is the best way to achieve these goals, but as previously stated, Company-operated restaurants are also important to our success.

We report results for Company-operated restaurants based on their sales, less costs directly incurred by that business including occupancy costs. We report the results for franchised restaurants based on franchised revenues, less associated occupancy costs. For this reason and because we manage our business based on geographic segments and not on the basis of our ownership structure, we do not specifically allocate selling, general & administrative expenses and other operating (income) expenses to Company-operated or franchised restaurants. Other operating items that relate to the Company-operated restaurants generally include gains/losses on sales of restaurant businesses and write-offs of equipment and leasehold improvements.

We believe the following information about Company-operated restaurants in our most significant segments provides an additional perspective on this business. Management responsible for our Company-operated restaurants in these markets analyzes the Company-operated business on this basis to assess its performance. Management of the Company also considers this information when evaluating restaurant ownership mix, subject to other relevant considerations.

The following table seeks to illustrate the two components of our Company-operated margins. The first of these relates exclusively to restaurant operations, which we refer to as "Store operating margin." The second relates to the value of our brand and the real estate interest we retain for which we charge rent and royalties. We refer to this component as "Brand/real estate margin." Both Company-operated and conventional franchised restaurants are charged rent and royalties, although rent and royalties for Company-operated restaurants are eliminated in consolidation. Rent and royalties for both restaurant ownership types are based on a percentage of sales, and the actual rent percentage varies depending on the level of McDonald's investment in the restaurant. Royalty rates may also vary by market.

As shown in the following table, in disaggregating the components of our Company-operated margins, certain costs with respect to Company-operated restaurants are reflected in Brand/real estate margin. Those costs consist of rent payable by McDonald's to third parties on leased sites and depreciation for buildings and leasehold improvements and constitute a portion of occupancy & other operating expenses recorded in the Consolidated statement of income. Store operating margins reflect rent and royalty expenses, and those amounts are accounted for as income in calculating Brand/real estate margin.

While we believe that the following information provides a perspective in evaluating our Company-operated business, it is not intended as a measure of our operating performance or as an alternative to operating income or restaurant margins as reported by the Company in accordance with accounting principles

generally accepted in the U.S. In particular, as noted previously, we do not allocate selling, general & administrative expenses to our Company-operated business. However, we believe that about \$50,000 per restaurant, on average, is the typical cost to support this business in the U.S. The actual costs in markets outside the

U.S. will vary depending on local circumstances and the organizational structure of the market. These costs reflect the indirect services we believe are necessary to provide the appropriate support of the restaurant.

Outside rent expense <sup>(1)</sup>	(56)	(60)	(65)	(242)	(223)	(222)
Depreciation—buildings & leasehold improvements <sup>(1)</sup>	(69)	(65)	(70)	(118)	(105)	(100)
Brand/real estate margin	\$526	\$494	\$499	\$1,238	\$1,081	\$1,041

(1) Represents certain costs recorded as occupancy & other operating expenses in the Consolidated statement of income – rent payable by McDonald's to third parties on leased sites and depreciation for buildings and leasehold improvements. This adjustment is made to reflect these occupancy costs in Brand/real estate margin. The relative percentage of sites that are owned versus leased varies by country.

(2) Reflects average Company-operated rent and royalties (as a percent of sales: U.S.: 2011 – 14.7%; 2010 – 14.6%; 2009 – 14.8%; Europe: 2011 – 20.4%; 2010 – 20.3%; 2009 – 20.3%). This adjustment is made to reflect expense in Store operating margin and income in Brand/real estate margin. Countries within Europe have varying economic profiles and a wide range of rent and royalty rates as a percentage of sales.

## SELLING, GENERAL & ADMINISTRATIVE EXPENSES

Consolidated selling, general & administrative expenses increased 3% (flat in constant currencies) in 2011 and increased 4% (4% in constant currencies) in 2010. The growth rate for 2011 was flat as higher employee and other costs were offset by lower incentive based compensation and costs in 2010 related to the Vancouver Olympics and the Company's biennial Worldwide Owner/Operator Convention. The Olympics and Convention contributed to the increase in 2010.

### Selling, general & administrative expenses

Dollars in millions	Amount			Increase/(decrease)		Increase/(decrease) excluding currency translation	
	2011	2010	2009	2011	2010	2011	2010
U.S.	\$779	\$781	\$751	0%	4%	0%	4%
Europe	699	653	655	7	0	2	2
APMEA	341	306	276	12	10	5	4
Other Countries & Corporate <sup>(1)</sup>	575	593	552	(3)	7	(4)	5
Total	\$2,394	\$2,333	\$2,234	3%	4%	0%	4%

(1) Included in Other Countries & Corporate are home office support costs in areas such as facilities, finance, human resources, information technology, legal, marketing, restaurant operations, supply chain and training.

Selling, general & administrative expenses as a percent of revenues were 8.9% in 2011 compared with 9.7% in 2010 and 9.8% in 2009. Selling, general & administrative expenses as a percent of Systemwide sales were 2.8% in 2011 compared with 3.0% in 2010 and 3.1% in 2009. Management believes that analyzing selling, general & administrative expenses as a percent of Systemwide sales, as well as revenues, is meaningful because these costs are incurred to support Systemwide restaurants.

## IMPAIRMENT AND OTHER CHARGES (CREDITS), NET

The Company recorded impairment and other charges (credits), net of (\$4) million in 2011, \$29 million in 2010 and (\$61) million in 2009. Management does not include these items when reviewing business performance trends because we do not believe these items are indicative of expected ongoing results.

### Impairment and other charges (credits), net

<i>In millions, except per share data</i>	2011	2010	2009
Europe		\$ 1	\$ 4
APMEA	\$ (4)	49	
Other Countries & Corporate		(21)	(65)
Total	\$ (4)	\$ 29	\$ (61)
After tax <sup>(1)</sup>	\$ 17	\$ 25	\$ (91)
Earnings per common share-diluted	\$0.01	\$0.02	\$(0.08)

(1) Certain items were not tax affected.

In 2010, the Company recorded expense of \$29 million primarily related to its share of restaurant closing costs in McDonald's Japan in conjunction with the strategic review of the market's restaurant portfolio, partly offset by income related to the resolution of certain liabilities retained in connection with the 2007 Latin America developmental license transaction.

In 2009, the Company recorded income of \$61 million related primarily to the resolution of certain liabilities retained in connection with the 2007 Latin America developmental license transaction. The Company also recognized a tax benefit in 2009 in connection with this income, mainly related to the release of a tax valuation allowance.

## OTHER OPERATING (INCOME) EXPENSE, NET

Total	\$8,530	\$7,473	\$6,841	14%	9%	10%	9%

nm Not meaningful.

In the U.S., 2011 and 2010 results increased primarily due to higher combined restaurant margin dollars, primarily franchised margin dollars.

## ▪ Gains on sales of restaurant businesses

Gains on sales of restaurant businesses include gains from sales of Company-operated restaurants as well as gains from exercises of purchase options by franchisees with business facilities lease arrangements (arrangements where the Company leases the businesses, including equipment, to franchisees who generally have options to purchase the businesses). The Company's purchases and sales of businesses with its franchisees are aimed at achieving an optimal ownership mix in each market. Resulting gains or losses are recorded in operating income because the transactions are a recurring part of our business. The Company realized lower gains on sales of restaurant businesses in 2010 compared with 2009 primarily as a result of selling fewer Company-operated restaurants to franchisees.

## ▪ Equity in earnings of unconsolidated affiliates

Unconsolidated affiliates and partnerships are businesses in which the Company actively participates, but does not control. The Company records equity in earnings from these entities representing McDonald's share of results. For foreign affiliated markets—primarily Japan—results are reported after interest expense and income taxes. McDonald's share of results for partnerships in certain consolidated markets such as the U.S. is reported before income taxes. These partnership restaurants are operated under conventional franchise arrangements and, therefore, are classified as conventional franchised restaurants. Results in 2011 reflected a benefit from stronger foreign currencies partly offset by the decline in the number of unconsolidated partnerships in the U.S. Results in 2010 reflected a reduction in the number of unconsolidated partnerships worldwide partly offset by improved operating performance in Japan.

## ▪ Asset dispositions and other expense

Asset dispositions and other expense consists of gains or losses on excess property and other asset dispositions, provisions for restaurant closings and uncollectible receivables, asset write-offs due to restaurant reinvestment, and other miscellaneous income and expenses. Asset dispositions and other expense declined in 2011 primarily due to higher gains on unconsolidated partnership dissolutions in the U.S.

In Europe, results for 2011 and 2010 were driven by stronger operating performance in France, the U.K., Russia and Germany. The increases in 2011 and 2010 were driven by higher combined

restaurant margin dollars, primarily franchised margin dollars in 2011 and Company-operated margin dollars in 2010.

In APMEA, 2011 results increased due to stronger operating results in many markets. Results for 2010 were primarily driven by stronger results in Australia and many other markets. Impairment charges in 2010 positively impacted the constant currency growth rate for 2011 by 4 percentage points and negatively impacted the 2010 growth rate by 4 percentage points.

#### ▪ **Combined operating margin**

Combined operating margin is defined as operating income as a percent of total revenues. Combined operating margin for 2011, 2010 and 2009 was 31.6%, 31.0% and 30.1%, respectively.

#### **INTEREST EXPENSE**

Interest expense increased in 2011 primarily due to higher average debt balances and stronger foreign currencies, partly offset by lower average interest rates. Interest expense decreased in 2010 primarily due to lower average interest rates slightly offset by higher average debt balances.

#### **NONOPERATING (INCOME) EXPENSE, NET**

##### *Nonoperating (income) expense, net*

<i>In millions</i>	<b>2011</b>	<b>2010</b>	<b>2009</b>
Interest income	<b>\$(39)</b>	<b>\$(20)</b>	<b>\$(19)</b>
Foreign currency and hedging activity	<b>9</b>	<b>(2)</b>	<b>(32)</b>
Other expense	<b>55</b>	<b>44</b>	<b>27</b>
<b>Total</b>	<b>\$ 25</b>	<b>\$ 22</b>	<b>\$(24)</b>

Interest income consists primarily of interest earned on short-term cash investments. Foreign currency and hedging activity includes net gains or losses on certain hedges that reduce the exposure to variability on certain intercompany foreign currency cash flow streams. Other expense primarily consists of miscellaneous nonoperating income and expense items such as amortization of debt issuance costs.

#### **GAIN ON SALE OF INVESTMENT**

In 2009, the Company sold its minority ownership interest in Redbox to Coinstar, Inc., the majority owner, for total consideration of \$145 million. As a result of the transaction, the Company recognized a nonoperating pretax gain of \$95 million (after tax – \$59 million or \$0.05 per share).

#### **PROVISION FOR INCOME TAXES**

In 2011, 2010 and 2009, the reported effective income tax rates were 31.3%, 29.3% and 29.8%, respectively.

In 2011, the effective income tax rate increased due to lower tax benefits related to certain foreign tax credits, partially offset by nonrecurring deferred tax benefits related to certain foreign operations.

In 2010, the effective income tax rate decreased due to higher tax benefits related to foreign operations.

In 2009, the effective income tax rate benefited by 0.7 percentage points primarily due to the resolution of certain liabilities retained in connection with the 2007 Latin America developmental license transaction.

Consolidated net deferred tax liabilities included tax assets, net of valuation allowance, of \$1.5 billion and \$1.6 billion in 2011 and 2010, respectively. Substantially all of the net tax assets are expected to be realized in the U.S. and other profitable markets.

#### **ACCOUNTING CHANGES**

##### ▪ **Fair value measurements**

In May 2011, the Financial Accounting Standards Board (FASB) issued an update to Topic 820 – Fair Value Measurement of the Accounting Standards Codification (ASC). This update provides guidance on how fair value accounting should be applied where its use is already required or permitted by other standards and does not extend the use of fair value accounting. The Company will adopt this guidance effective January 1, 2012, as required, and does not expect the adoption to have a significant impact on its consolidated financial statements.

##### ▪ **Comprehensive Income**

In June 2011, the FASB issued an update to Topic 220 – Comprehensive Income of the ASC. The update is intended to increase the prominence of other comprehensive income in the financial statements. The guidance requires that the Company presents components of comprehensive income in either one continuous statement or two separate consecutive statements and no longer permits the presentation of comprehensive income in the Consolidated statement of shareholders' equity. The Company will adopt this new guidance effective January 1, 2012, as required.

##### ▪ **Variable interest entities and consolidation**

In June 2009, the FASB issued amendments to the guidance on variable interest entities and consolidation, codified primarily in the Consolidation Topic of the FASB ASC. This guidance modifies the method for determining whether an entity is a variable interest entity as well as the methods permitted for determining the primary beneficiary of a variable interest entity. In addition, this guidance requires ongoing reassessments of whether a company is the primary beneficiary of a variable interest entity and enhanced disclosures related to a company's involvement with a variable interest entity. The Company adopted this guidance as of January 1, 2010.

On an ongoing basis, the Company evaluates its business relationships such as those with franchisees, joint venture partners, developmental licensees, suppliers, and advertising cooperatives to identify potential variable interest entities. Generally, these businesses qualify for a scope exception under the consolidation guidance. The Company has concluded that consolidation of any such entities is not appropriate for the periods presented. As a result, the adoption did not have any impact on the Company's consolidated financial statements.

#### **Cash Flows**

The Company generates significant cash from its operations and has substantial credit availability and capacity to fund operating and discretionary spending such as capital expenditures, debt repayments, dividends and share repurchases.

Cash provided by operations totaled \$7.2 billion and exceeded capital expenditures by \$4.4 billion in 2011, while cash provided by operations totaled \$6.3 billion and exceeded capital expenditures by \$4.2 billion in 2010. In 2011, cash provided by operations increased \$808 million or 13% compared with 2010 primarily due to higher operating results. In 2010, cash provided by operations increased \$591 million or 10% compared with 2009 primarily due to higher operating results.

Cash used for investing activities totaled \$2.6 billion in 2011, an increase of \$515 million compared with 2010. This reflects higher capital expenditures, partly offset by higher proceeds from sales of restaurant businesses. Cash used for investing activities totaled \$2.1 billion in 2010, an increase of \$401 million compared with 2009. This reflects higher capital expenditures and lower proceeds from sales of investments and restaurant businesses.

Cash used for financing activities totaled \$4.5 billion in 2011, an increase of \$804 million compared with 2010, primarily due to higher treasury stock purchases, an increase in the common stock dividend, and lower proceeds from stock option exercises, partly offset by higher net debt issuances. Cash used for financing activities totaled \$3.7 billion in 2010, a decrease of \$692 million compared with 2009, primarily due to higher net debt issuances, higher proceeds from stock option exercises and lower treasury stock purchases, partly offset by an increase in the common stock dividend.

As a result of the above activity, the Company's cash and equivalents balance decreased \$51 million in 2011 to \$2.3 billion, compared with an increase of \$591 million in 2010. In addition to cash and equivalents on hand and cash provided by operations, the Company can meet short-term funding needs through its continued access to commercial paper borrowings and line of credit agreements.

#### RESTAURANT DEVELOPMENT AND CAPITAL EXPENDITURES

In 2011, the Company opened 1,118 traditional restaurants and 32 satellite restaurants (small, limited-menu restaurants for which the land and building are generally leased), and closed 246 traditional restaurants and 131 satellite restaurants. In 2010, the Company opened 957 traditional restaurants and 35 satellite restaurants, and closed 406 traditional restaurants and 327 satellite restaurants. Of these closures, there were over 400 in McDonald's Japan due to the strategic review of the market's restaurant portfolio. The majority of restaurant openings and closings occurred in the major markets in both years. The Company closes restaurants for a variety of reasons, such as existing sales and profit performance or loss of real estate tenure.

#### Systemwide restaurants at year end<sup>(1)</sup>

	2011	2010	2009
U.S.	14,098	14,027	13,980
Europe	7,156	6,969	6,785
APMEA	8,865	8,424	8,488
Other Countries & Corporate	3,391	3,317	3,225
<b>Total</b>	<b>33,510</b>	<b>32,737</b>	<b>32,478</b>

(1) Includes satellite units at December 31, 2011, 2010 and 2009 as follows: U.S.—1,084, 1,112, 1,155; Europe—240, 239, 241; APMEA (primarily Japan)—949, 1,010, 1,263; Other Countries & Corporate—459, 470, 464.

Approximately 65% of Company-operated restaurants and over 75% of franchised restaurants were located in the major markets at the end of 2011. Over 80% of the restaurants at year-end 2011 were franchised.

Capital expenditures increased \$595 million or 28% in 2011 primarily due to higher reinvestment in existing restaurants and higher investment in new restaurants. Capital expenditures increased \$183 million or 9% in 2010 primarily due to higher investment in new restaurants. In both years, capital expenditures

reflected the Company's commitment to grow sales at existing restaurants, including reinvestment initiatives such as reimaging in many markets around the world.

Capital expenditures invested in major markets, excluding Japan, represented over 65% of the total in 2011, 2010 and 2009. Japan is accounted for under the equity method, and accordingly its capital expenditures are not included in consolidated amounts.

#### Capital expenditures

In millions	2011	2010	2009
New restaurants	\$ 1,193	\$ 968	\$ 809
Existing restaurants	1,432	1,089	1,070
Other <sup>(1)</sup>	105	78	73
<b>Total capital expenditures</b>	<b>\$ 2,730</b>	<b>\$ 2,135</b>	<b>\$ 1,952</b>
<b>Total assets</b>	<b>\$32,990</b>	<b>\$31,975</b>	<b>\$30,225</b>

(1) Primarily corporate equipment and other office-related expenditures.

New restaurant investments in all years were concentrated in markets with acceptable returns or opportunities for long-term growth. Average development costs vary widely by market depending on the types of restaurants built and the real estate and construction costs within each market. These costs, which include land, buildings and equipment, are managed through the use of optimally sized restaurants, construction and design efficiencies, and leveraging best practices. Although the Company is not responsible for all costs for every restaurant opened, total development costs (consisting of land, buildings and equipment) for new traditional McDonald's restaurants in the U.S. averaged approximately \$2.7 million in 2011.

The Company owned approximately 45% of the land and about 70% of the buildings for restaurants in its consolidated markets at year-end 2011 and 2010.

#### SHARE REPURCHASES AND DIVIDENDS

For the last three years, the Company returned a total of \$16.1 billion to shareholders through a combination of shares repurchased and dividends paid.

#### Shares repurchased and dividends

In millions, except per share data	2011	2010	2009
Number of shares repurchased	41.9	37.8	50.3
Shares outstanding at year end	1,021	1,054	1,077
Dividends declared per share	\$ 2.53	\$ 2.26	\$ 2.05
Dollar amount of shares repurchased	\$3,373	\$2,648	\$2,854
Dividends paid	2,610	2,408	2,235
<b>Total returned to shareholders</b>	<b>\$5,983</b>	<b>\$5,056</b>	<b>\$5,089</b>

In September 2009, the Company's Board of Directors approved a \$10 billion share repurchase program with no specified expiration date. In 2009, 2010 and 2011 combined, approximately 87 million shares have been repurchased for \$6.5 billion under this program.

The Company has paid dividends on its common stock for 36 consecutive years and has increased the dividend amount every year. The 2011 full year dividend of \$2.53 per share reflects the quarterly dividend paid for each of the first three quarters of \$0.61 per share, with an increase to \$0.70 per share paid in the fourth quarter. This 15% increase in the quarterly dividend

equates to a \$2.80 per share annual dividend and reflects the Company's confidence in the ongoing strength and reliability of its cash flow. As in the past, future dividend amounts will be considered after reviewing profitability expectations and financing needs, and will be declared at the discretion of the Company's Board of Directors.

## Financial Position and Capital Resources

### TOTAL ASSETS AND RETURNS

Total assets increased \$1.0 billion or 3% in 2011. Excluding the effect of changes in foreign currency exchange rates, total assets increased \$1.4 billion in 2011. Over 75% of total assets were in major markets at year-end 2011. Net property and equipment increased \$774 million in 2011 and represented about 70% of total assets at year end. Excluding the effect of changes in foreign currency exchange rates, net property and equipment increased \$1.1 billion primarily due to capital expenditures, partly offset by depreciation.

Operating income is used to compute return on average assets, while net income is used to calculate return on average common equity. Month-end balances are used to compute both average assets and average common equity.

	2011	2010	2009
Return on average assets	26.0%	24.7%	23.4%
Return on average common equity	37.7	35.3	34.0

In 2011, 2010, and 2009, return on average assets and return on average common equity benefited from strong global operating results. Operating income, as reported, does not include interest income; however, cash balances are included in average assets. The inclusion of cash balances in average assets reduced return on average assets by about two percentage points for all years presented.

### FINANCING AND MARKET RISK

The Company generally borrows on a long-term basis and is exposed to the impact of interest rate changes and foreign currency fluctuations. Debt obligations at December 31, 2011 totaled \$12.5 billion, compared with \$11.5 billion at December 31, 2010. The net increase in 2011 was primarily due to net issuances of \$1.0 billion.

#### Debt highlights<sup>(1)</sup>

	2011	2010	2009
Fixed-rate debt as a percent of total debt <sup>(2,3)</sup>	69%	66%	68%
Weighted-average annual interest rate of total debt <sup>(3)</sup>	4.2	4.3	4.5
Foreign currency-denominated debt as a percent of total debt <sup>(2)</sup>	40	41	43
Total debt as a percent of total capitalization (total debt and total shareholders' equity) <sup>(2)</sup>	46	44	43
Cash provided by operations as a percent of total debt <sup>(2)</sup>	57	55	55

(1) All percentages are as of December 31, except for the weighted-average annual interest rate, which is for the year.

(2) Based on debt obligations before the effect of fair value hedging adjustments. This effect is excluded as these adjustments have no impact on the obligation at maturity. See Debt financing note to the consolidated financial statements.

(3) Includes the effect of interest rate swaps.

Fitch, Standard & Poor's and Moody's currently rate, with a stable outlook, the Company's commercial paper F1, A-1 and P-1, respectively; and its long-term debt A, A and A2, respectively.

Certain of the Company's debt obligations contain cross-acceleration provisions and restrictions on Company and subsidiary mortgages and the long-term debt of certain subsidiaries. There are no provisions in the Company's debt obligations that would accelerate repayment of debt as a result of a change in credit ratings or a material adverse change in the Company's business. Under existing authorization from the Company's Board of Directors, at December 31, 2011, the Company had \$1.7 billion of authority remaining to borrow funds, including through (i) public or private offering of debt securities; (ii) direct borrowing from banks or other financial institutions; and (iii) other forms of indebtedness. In addition to debt securities available through a medium-term notes program registered with the U.S. Securities and Exchange Commission (SEC) and a Global Medium-Term Notes program, the Company has \$1.5 billion available under committed line of credit agreements as well as authority to issue commercial paper in the U.S. and global markets (see Debt financing note to the consolidated financial statements). Debt maturing in 2012 is approximately \$964 million of long-term corporate debt. In 2012, the Company expects to issue commercial paper and long-term debt to refinance this maturing debt. Consequently, in February 2012, the Company issued \$250.0 million of 10-year U.S. Dollar-denominated notes at a coupon rate of 2.625%, and \$500.0 million of 30-year U.S. Dollar-denominated notes at a coupon rate of 3.70%. The Company also has \$640 million of foreign currency bank line borrowings outstanding at year-end 2011.

The Company uses major capital markets, bank financings and derivatives to meet its financing requirements and reduce interest expense. The Company manages its debt portfolio in response to changes in interest rates and foreign currency rates by periodically retiring, redeeming and repurchasing debt, terminating swaps and using derivatives. The Company does not use derivatives with a level of complexity or with a risk higher than the exposures to be hedged and does not hold or issue derivatives for trading purposes. All swaps are over-the-counter instruments.

In managing the impact of interest rate changes and foreign currency fluctuations, the Company uses interest rate swaps and finances in the currencies in which assets are denominated. The Company uses foreign currency debt and derivatives to hedge the foreign currency risk associated with certain royalties, inter-company financings and long-term investments in foreign subsidiaries and affiliates. This reduces the impact of fluctuating foreign currencies on cash flows and shareholders' equity. Total foreign currency-denominated debt was \$5.0 billion and \$4.7 billion for the years ended December 31, 2011 and 2010, respectively. In addition, where practical, the Company's restaurants purchase goods and services in local currencies resulting in natural hedges. See Summary of significant accounting policies note to the consolidated financial statements related to financial instruments and hedging activities for additional information regarding the accounting impact and use of derivatives.

The Company does not have significant exposure to any individual counterparty and has master agreements that contain netting arrangements. Certain of these agreements also require each party to post collateral if credit ratings fall below, or aggregate exposures exceed, certain contractual limits. At

December 31, 2011, neither the Company nor its counterparties were required to post collateral on any derivative position, other than on hedges of certain of the Company's supplemental benefit plan liabilities where our counterparty was required to post collateral on its liability position.

The Company's net asset exposure is diversified among a broad basket of currencies. The Company's largest net asset exposures (defined as foreign currency assets less foreign currency liabilities) at year end were as follows:

#### Foreign currency net asset exposures

In millions of U.S. Dollars	2011	2010
Euro	\$5,905	\$5,465
Australian Dollars	2,409	2,075
Canadian Dollars	1,224	1,123
British Pounds Sterling	726	547
Russian Ruble	594	589

The Company prepared sensitivity analyses of its financial instruments to determine the impact of hypothetical changes in interest rates and foreign currency exchange rates on the Company's results of operations, cash flows and the fair value of its financial instruments. The interest rate analysis assumed a one percentage point adverse change in interest rates on all financial instruments, but did not consider the effects of the reduced level of economic activity that could exist in such an environment. The foreign currency rate analysis assumed that each foreign currency rate would change by 10% in the same direction relative to the U.S. Dollar on all financial instruments; however, the analysis did not include the potential impact on revenues, local currency prices or the effect of fluctuating currencies on the Company's anticipated foreign currency royalties and other payments received in the U.S. Based on the results of these analyses of the Company's financial instruments, neither a one percentage point adverse change in interest rates from 2011 levels nor a 10% adverse change in foreign currency rates from 2011 levels would materially affect the Company's results of operations, cash flows or the fair value of its financial instruments.

#### CONTRACTUAL OBLIGATIONS AND COMMITMENTS

The Company has long-term contractual obligations primarily in the form of lease obligations (related to both Company-operated and franchised restaurants) and debt obligations. In addition, the Company has long-term revenue and cash flow streams that relate to its franchise arrangements. Cash provided by operations (including cash provided by these franchise arrangements) along with the Company's borrowing capacity and other sources of cash will be used to satisfy the obligations. The following table summarizes the Company's contractual obligations and their aggregate maturities as well as future minimum rent payments due to the Company under existing franchise arrangements as of December 31, 2011. See discussions of cash flows and financial position and capital resources as well as the Notes to the consolidated financial statements for further details.

In millions	Contractual cash outflows		Contractual cash inflows
	Operating leases	Debt obligations <sup>(1)</sup>	Minimum rent under franchise arrangements
2012	\$ 1,247	\$ 367	\$ 2,425
2013	1,167	1,026	2,357
2014	1,075	738	2,273
2015	965	656	2,157
2016	852	2,158	2,037
Thereafter	6,248	7,499	15,949
Total	\$11,554	\$12,444	\$27,198

(1) The maturities reflect reclassifications of short-term obligations to long-term obligations of \$1.5 billion, as they are supported by a long-term line of credit agreement expiring in November 2016. Debt obligations do not include \$56 million of noncash fair value hedging adjustments or \$218 million of accrued interest.

The Company maintains certain supplemental benefit plans that allow participants to (i) make tax-deferred contributions and (ii) receive Company-provided allocations that cannot be made under the qualified benefit plans because of IRS limitations. At December 31, 2011, total liabilities for the supplemental plans were \$482 million, and total liabilities for gross unrecognized tax benefits were \$565 million.

There are certain purchase commitments that are not recognized in the consolidated financial statements and are primarily related to construction, inventory, energy, marketing and other service related arrangements that occur in the normal course of business. The amounts related to these commitments are not significant to the Company's financial position. Such commitments are generally shorter term in nature and will be funded from operating cash flows.

## Other Matters

#### CRITICAL ACCOUNTING POLICIES AND ESTIMATES

Management's discussion and analysis of financial condition and results of operations is based upon the Company's consolidated financial statements, which have been prepared in accordance with accounting principles generally accepted in the U.S. The preparation of these financial statements requires the Company to make estimates and judgments that affect the reported amounts of assets, liabilities, revenues and expenses as well as related disclosures. On an ongoing basis, the Company evaluates its estimates and judgments based on historical experience and various other factors that are believed to be reasonable under the circumstances. Actual results may differ from these estimates under various assumptions or conditions.

The Company reviews its financial reporting and disclosure practices and accounting policies quarterly to ensure that they provide accurate and transparent information relative to the current economic and business environment. The Company believes that of its significant accounting policies, the following involve a higher degree of judgment and/or complexity:

#### • Property and equipment

Property and equipment are depreciated or amortized on a straight-line basis over their useful lives based on management's estimates of the period over which the assets will generate revenue (not to exceed lease term plus options for leased property). The useful lives are estimated based on historical experience with

similar assets, taking into account anticipated technological or other changes. The Company periodically reviews these lives relative to physical factors, economic factors and industry trends. If there are changes in the planned use of property and equipment, or if technological changes occur more rapidly than anticipated, the useful lives assigned to these assets may need to be shortened, resulting in the accelerated recognition of depreciation and amortization expense or write-offs in future periods.

#### ▪ **Share-based compensation**

The Company has a share-based compensation plan which authorizes the granting of various equity-based incentives including stock options and restricted stock units (RSUs) to employees and nonemployee directors. The expense for these equity-based incentives is based on their fair value at date of grant and generally amortized over their vesting period.

The fair value of each stock option granted is estimated on the date of grant using a closed-form pricing model. The pricing model requires assumptions, which impact the assumed fair value, including the expected life of the stock option, the risk-free interest rate, expected volatility of the Company's stock over the expected life and the expected dividend yield. The Company uses historical data to determine these assumptions and if these assumptions change significantly for future grants, share-based compensation expense will fluctuate in future years. The fair value of each RSU granted is equal to the market price of the Company's stock at date of grant less the present value of expected dividends over the vesting period.

#### ▪ **Long-lived assets impairment review**

Long-lived assets (including goodwill) are reviewed for impairment annually in the fourth quarter and whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable. In assessing the recoverability of the Company's long-lived assets, the Company considers changes in economic conditions and makes assumptions regarding estimated future cash flows and other factors. Estimates of future cash flows are highly subjective judgments based on the Company's experience and knowledge of its operations. These estimates can be significantly impacted by many factors including changes in global and local business and economic conditions, operating costs, inflation, competition, and consumer and demographic trends. A key assumption impacting estimated future cash flows is the estimated change in comparable sales. If the Company's estimates or underlying assumptions change in the future, the Company may be required to record impairment charges. Based on the annual goodwill impairment test, conducted in the fourth quarter, the Company does not have any reporting units (defined as each individual country) with goodwill currently at risk of impairment.

#### ▪ **Litigation accruals**

In the ordinary course of business, the Company is subject to proceedings, lawsuits and other claims primarily related to competitors, customers, employees, franchisees, government agencies, intellectual property, shareholders and suppliers. The Company is required to assess the likelihood of any adverse judgments or outcomes to these matters as well as potential ranges of probable losses. A determination of the amount of accrual required, if any, for these contingencies is made after

careful analysis of each matter. The required accrual may change in the future due to new developments in each matter or changes in approach such as a change in settlement strategy in dealing with these matters. The Company does not believe that any such matter currently being reviewed will have a material adverse effect on its financial condition or results of operations.

#### ▪ **Income taxes**

The Company records a valuation allowance to reduce its deferred tax assets if it is more likely than not that some portion or all of the deferred assets will not be realized. While the Company has considered future taxable income and ongoing prudent and feasible tax strategies, including the sale of appreciated assets, in assessing the need for the valuation allowance, if these estimates and assumptions change in the future, the Company may be required to adjust its valuation allowance. This could result in a charge to, or an increase in, income in the period such determination is made.

The Company operates within multiple taxing jurisdictions and is subject to audit in these jurisdictions. The Company records accruals for the estimated outcomes of these audits, and the accruals may change in the future due to new developments in each matter. In 2010, the Internal Revenue Service (IRS) concluded its field examination of the Company's U.S. federal income tax returns for 2007 and 2008. In connection with this examination, the Company received notices of proposed adjustments from the IRS related to certain foreign tax credits of about \$400 million, excluding interest and potential penalties. The Company disagrees with the IRS' proposed adjustments. The Company has filed a protest with the IRS Appeals Office and expects resolution on this issue in 2012. The Company does not believe that the resolution will have a material impact on its results of operations or cash flows. The Company's 2009 and 2010 U.S. federal income tax returns are currently under examination and the completion of the examination is expected in 2013.

Deferred U.S. income taxes have not been recorded for temporary differences totaling \$12.6 billion related to investments in certain foreign subsidiaries and corporate affiliates. The temporary differences consist primarily of undistributed earnings that are considered permanently invested in operations outside the U.S. If management's intentions change in the future, deferred taxes may need to be provided.

#### **EFFECTS OF CHANGING PRICES—INFLATION**

The Company has demonstrated an ability to manage inflationary cost increases effectively. This ability is because of rapid inventory turnover, the ability to adjust menu prices, cost controls and substantial property holdings, many of which are at fixed costs and partly financed by debt made less expensive by inflation.

#### **RISK FACTORS AND CAUTIONARY STATEMENT ABOUT FORWARD-LOOKING INFORMATION**

This report includes forward-looking statements about our plans and future performance, including those under Outlook for 2012. These statements use such words as "may," "will," "expect," "believe" and "plan." They reflect our expectations and speak only as of the date of this report. We do not undertake to update them. Our expectations (or the underlying assumptions) may change or not be realized, and you should not rely unduly on

forward-looking statements. We have identified the principal risks and uncertainties that affect our performance in the Company's filings with the Securities and Exchange Commission, and

investors are urged to consider these risks and uncertainties when evaluating our historical and expected performance.

## RECONCILIATION OF RETURNS ON INCREMENTAL INVESTED CAPITAL

Return on incremental invested capital (ROIC) is a measure reviewed by management over one-year and three-year time periods to evaluate the overall profitability of the business units, the effectiveness of capital deployed and the future allocation of capital. This measure is calculated using operating income and constant foreign exchange rates to exclude the impact of foreign currency translation. The numerator is the Company's incremental operating income plus depreciation and amortization from the base period.

The denominator is the weighted-average adjusted cash used for investing activities during the applicable one-or three-year period. Adjusted cash used for investing activities is defined as cash used for investing activities less cash generated from investing activities related to the Pret A Manger and Redbox transactions. The weighted-average adjusted cash used for investing activities is based on a weighting applied on a quarterly basis. These weightings are used to reflect the estimated contribution of each quarter's investing activities to incremental operating income. For example, fourth quarter 2011 investing activities are weighted less because the assets purchased have only recently been deployed and would have generated little incremental operating income (12.5% of fourth quarter 2011 investing activities are included in the one-year and three-year calculations). In contrast, fourth quarter 2010 is heavily weighted because the assets purchased were deployed more than 12 months ago, and therefore have a full year impact on 2011 operating income, with little or no impact to the base period (87.5% and 100.0% of fourth quarter 2010 investing activities are included in the one-year and three-year calculations, respectively). Management believes that weighting cash used for investing activities provides a more accurate reflection of the relationship between its investments and returns than a simple average.

The reconciliations to the most comparable measurements, in accordance with accounting principles generally accepted in the U.S., for the numerator and denominator of the one-year and three-year ROIC are as follows:

### One-year ROIC calculation (dollars in millions):

Years ended December 31,	2011	2010	Incremental change
<b>NUMERATOR:</b>			
Operating income	\$8,529.7	\$7,473.1	\$1,056.6
Depreciation and amortization	1,415.0	1,276.2	138.8
Currency translation <sup>(1)</sup>			(331.4)
<b>Incremental operating income plus depreciation and amortization (at constant foreign exchange rates)</b>	<b>\$ 864.0</b>		
<b>DENOMINATOR:</b>			
Weighted-average cash used for investing activities <sup>(2)</sup>			\$2,311.7
Currency translation <sup>(1)</sup>			(11.3)
<b>Weighted-average cash used for investing activities (at constant foreign exchange rates)</b>	<b>\$2,300.4</b>		
<b>One-year ROIC<sup>(3)</sup></b>			<b>37.6%</b>

(1) Represents the effect of foreign currency translation by translating results at an average exchange rate for the periods measured.

(2) Represents one-year weighted-average cash used for investing activities, determined by applying the weightings below to the cash used for investing activities for each quarter in the two-year period ended December 31, 2011.

	Years ended December 31,	
	2010	2011
Cash used for investing activities	\$2,056.0	\$2,570.9
<b>AS A PERCENT</b>		
Quarters ended:		
March 31	12.5%	87.5%
June 30	37.5	62.5
September 30	62.5	37.5
December 31	87.5	12.5

(3) The impact of impairment and other charges (credits), net between 2011 and 2010 positively impacted the one-year ROIC by 3.4 percentage points.

### Three-year ROIC calculation (dollars in millions):

Years ended December 31,	2011	2008	Incremental change
<b>NUMERATOR:</b>			
Operating income	\$8,529.7	\$6,442.9	\$2,086.8
Depreciation and amortization	1,415.0	1,207.8	207.2
Currency translation <sup>(4)</sup>			0.2
<b>Incremental operating income plus depreciation and amortization (at constant foreign exchange rates)</b>	<b>\$2,294.2</b>		
<b>DENOMINATOR:</b>			
Weighted-average adjusted cash used for investing activities <sup>(5)</sup>			\$6,026.6
Currency translation <sup>(4)</sup>			38.1
<b>Weighted-average adjusted cash used for investing activities (at constant foreign exchange rates)</b>	<b>\$6,064.7</b>		
<b>Three-year ROIC<sup>(6)</sup></b>			<b>37.8%</b>

(4) Represents the effect of foreign currency translation by translating results at an average exchange rate for the periods measured.

(5) Represents three-year weighted-average adjusted cash used for investing activities, determined by applying the weightings below to the adjusted cash used for investing activities for each quarter in the four-year period ended December 31, 2011.

	Years ended December 31,			
	2008	2009	2010	2011
Cash used for investing activities	\$1,624.7	\$1,655.3	\$2,056.0	\$2,570.9
Less: Cash generated from investing activities related to				
Pret A Manger transaction				(229.4)
Redbox transaction				(144.9)
<b>Adjusted cash used for investing activities</b>	<b>\$1,854.1</b>	<b>\$1,800.2</b>	<b>\$2,056.0</b>	<b>\$2,570.9</b>
<b>AS A PERCENT</b>				
Quarters ended:				
March 31	12.5%	100.0%	100.0%	87.5%
June 30	37.5	100.0	100.0	62.5
September 30	62.5	100.0	100.0	37.5
December 31	87.5	100.0	100.0	12.5

(6) The impact of impairment and other charges (credits), net between 2011 and 2008 positively impacted the three year ROIC by 1.2 percentage points.

# Notes to Consolidated Financial Statements

## Summary of Significant Accounting Policies

### NATURE OF BUSINESS

The Company franchises and operates McDonald's restaurants in the global restaurant industry. All restaurants are operated either by the Company or by franchisees, including conventional franchisees under franchise arrangements, and foreign affiliates and developmental licensees under license agreements.

The following table presents restaurant information by ownership type:

<i>Restaurants at December 31,</i>	<b>2011</b>	<b>2010</b>	<b>2009</b>
Conventional franchised	<b>19,527</b>	19,279	19,020
Developmental licensed	<b>3,929</b>	3,485	3,160
Foreign affiliated	<b>3,619</b>	3,574	4,036
Franchised	<b>27,075</b>	26,338	26,216
Company-operated	<b>6,435</b>	6,399	6,262
<b>Systemwide restaurants</b>	<b>33,510</b>	32,737	32,478

### CONSOLIDATION

The consolidated financial statements include the accounts of the Company and its subsidiaries. Investments in affiliates owned 50% or less (primarily McDonald's Japan) are accounted for by the equity method.

In June 2009, the Financial Accounting Standards Board (FASB) issued amendments to the guidance on variable interest entities and consolidation, codified in the Consolidation Topic of the FASB Accounting Standards Codification (ASC). This guidance modifies the method for determining whether an entity is a variable interest entity as well as the methods permitted for determining the primary beneficiary of a variable interest entity. In addition, this guidance requires ongoing reassessments of whether a company is the primary beneficiary of a variable interest entity and enhanced disclosures related to a company's involvement with a variable interest entity. The Company adopted this guidance as of January 1, 2010.

On an ongoing basis, the Company evaluates its business relationships such as those with franchisees, joint venture partners, developmental licensees, suppliers, and advertising cooperatives to identify potential variable interest entities. Generally, these businesses qualify for a scope exception under the variable interest entity consolidation guidance. The Company has concluded that consolidation of any such entity is not appropriate for the periods presented. As a result, the adoption did not have any impact on the Company's consolidated financial statements.

### ESTIMATES IN FINANCIAL STATEMENTS

The preparation of financial statements in conformity with accounting principles generally accepted in the U.S. requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Actual results could differ from those estimates.

### REVENUE RECOGNITION

The Company's revenues consist of sales by Company-operated restaurants and fees from franchised restaurants operated by conventional franchisees, developmental licensees and foreign affiliates.

Sales by Company-operated restaurants are recognized on a cash basis. The Company presents sales net of sales tax and other sales-related taxes. Revenues from conventional franchised restaurants include rent and royalties based on a percent of sales with minimum rent payments, and initial fees. Revenues from restaurants licensed to foreign affiliates and developmental licensees include a royalty based on a percent of sales, and may include initial fees. Continuing rent and royalties are recognized in the period earned. Initial fees are recognized upon opening of a restaurant or granting of a new franchise term, which is when the Company has performed substantially all initial services required by the franchise arrangement.

### FOREIGN CURRENCY TRANSLATION

Generally, the functional currency of operations outside the U.S. is the respective local currency.

### ADVERTISING COSTS

Advertising costs included in operating expenses of Company-operated restaurants primarily consist of contributions to advertising cooperatives and were (in millions): 2011—\$768.6; 2010—\$687.0; 2009—\$650.8. Production costs for radio and television advertising are expensed when the commercials are initially aired. These production costs, primarily in the U.S., as well as other marketing-related expenses included in selling, general & administrative expenses were (in millions): 2011—\$74.4; 2010—\$94.5; 2009—\$94.7. In addition, significant advertising costs are incurred by franchisees through contributions to advertising cooperatives in individual markets.

### SHARE-BASED COMPENSATION

Share-based compensation includes the portion vesting of all share-based awards granted based on the grant date fair value.

Share-based compensation expense and the effect on diluted earnings per common share were as follows:

<i>In millions, except per share data</i>	<b>2011</b>	<b>2010</b>	<b>2009</b>
Share-based compensation expense	<b>\$86.2</b>	\$83.1	\$112.9
After tax	<b>\$59.2</b>	\$56.2	\$ 76.1
Earnings per common share-diluted	<b>\$0.05</b>	\$0.05	\$ 0.07

Compensation expense related to share-based awards is generally amortized on a straight-line basis over the vesting period in selling, general & administrative expenses in the Consolidated statement of income. As of December 31, 2011, there was \$84.7 million of total unrecognized compensation cost related to nonvested share-based compensation that is expected to be recognized over a weighted-average period of 2.1 years.

The fair value of each stock option granted is estimated on the date of grant using a closed-form pricing model. The following table presents the weighted-average assumptions used in the option pricing model for the 2011, 2010 and 2009 stock option grants. The expected life of the options represents the period of time the options are expected to be outstanding and is based on historical trends. Expected stock price volatility is generally based on the historical volatility of the Company's stock for a period approximating the expected life. The expected dividend yield is based on the Company's most recent annual dividend payout. The risk-free interest rate is based on the U.S. Treasury yield curve in effect at the time of grant with a term equal to the expected life.

### Weighted-average assumptions

	2011	2010	2009
Expected dividend yield	3.2%	3.5%	3.2%
Expected stock price volatility	21.5%	22.1%	24.4%
Risk-free interest rate	2.8%	2.8%	2.0%
Expected life of options <i>In years</i>	6.3	6.2	6.2
Fair value per option granted	\$12.18	\$9.90	\$9.66

### GOODWILL

Goodwill represents the excess of cost over the net tangible assets and identifiable intangible assets of acquired restaurant businesses. The Company's goodwill primarily results from purchases of McDonald's restaurants from franchisees and ownership increases in subsidiaries or affiliates, and it is generally assigned to the reporting unit expected to benefit from the synergies of the combination. If a Company-operated restaurant is sold within 24 months of acquisition, the goodwill associated with the acquisition is written off in its entirety. If a restaurant is sold beyond 24 months from the acquisition, the amount of goodwill written off is based on the relative fair value of the business sold compared to the reporting unit (defined as each individual country).

The Company conducts goodwill impairment testing in the fourth quarter of each year or whenever an indicator of impairment

### PROPERTY AND EQUIPMENT

Property and equipment are stated at cost, with depreciation and amortization provided using the straight-line method over the following estimated useful lives: buildings—up to 40 years; leasehold improvements—the lesser of useful lives of assets or lease terms, which generally include option periods; and equipment—three to 12 years.

exists. If an indicator of impairment exists (e.g., estimated earnings multiple value of a reporting unit is less than its carrying value), the goodwill impairment test compares the fair value of a reporting unit, generally based on discounted future cash flows, with its carrying amount including goodwill. If the carrying amount of a reporting unit exceeds its fair value, an impairment loss is measured as the difference between the implied fair value of the reporting unit's goodwill and the carrying amount of goodwill. Historically, goodwill impairment has not significantly impacted the consolidated financial statements.

The following table presents the 2011 activity in goodwill by segment:

<i>In millions</i>	U.S.	Europe	APMEA <sup>(1)</sup>	Other Countries & Corporate <sup>(2)</sup>	Consolidated
Balance at December 31, 2010	\$1,212.0	\$785.5	\$385.0	\$203.6	\$2,586.1
Net restaurant purchases (sales)	37.3	37.1	29.8	(4.6)	99.6
Ownership changes and other	5.1		(7.7)	(3.0)	(5.6)
Currency translation		(21.0)	(1.7)	(4.2)	(26.9)
<b>Balance at December 31, 2011</b>	<b>\$1,254.4</b>	<b>\$801.6</b>	<b>\$405.4</b>	<b>\$191.8</b>	<b>\$2,653.2</b>

(1) APMEA represents Asia/Pacific, Middle East and Africa.

(2) Other Countries & Corporate represents Canada, Latin America and Corporate.

### LONG-LIVED ASSETS

Long-lived assets are reviewed for impairment annually in the fourth quarter and whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable. For purposes of annually reviewing McDonald's restaurant assets for potential impairment, assets are initially grouped together at a television market level in the U.S. and at a country level for each of the international markets. The Company manages its restaurants as a group or portfolio with significant common costs and promotional activities; as such, an individual restaurant's cash flows are not generally independent of the cash flows of others in a market. If an indicator of impairment (e.g., negative operating cash flows for the most recent trailing 24-month period) exists for any grouping of assets, an estimate of undiscounted future cash flows produced by each individual restaurant within the asset grouping is compared to its carrying value. If an individual restaurant is determined to be impaired, the loss is measured by the excess of the carrying amount of the restaurant over its fair value as determined by an estimate of discounted future cash flows.

Losses on assets held for disposal are recognized when management and the Board of Directors, as required, have approved and committed to a plan to dispose of the assets, the assets are available for disposal, the disposal is probable of occurring within 12 months, and the net sales proceeds are expected to be less than its net book value, among other factors.

Generally, such losses relate to restaurants that have closed and ceased operations as well as other assets that meet the criteria to be considered "available for sale".

### FAIR VALUE MEASUREMENTS

The Company measures certain financial assets and liabilities at fair value on a recurring basis, and certain non-financial assets and liabilities on a nonrecurring basis. Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in the principal or most advantageous market in an orderly transaction between market participants on the measurement date. Fair value disclosures are reflected in a three-level hierarchy, maximizing the use of observable inputs and minimizing the use of unobservable inputs.

The valuation hierarchy is based upon the transparency of inputs to the valuation of an asset or liability on the measurement date. The three levels are defined as follows:

- Level 1 – inputs to the valuation methodology are quoted prices (unadjusted) for an identical asset or liability in an active market.
- Level 2 – inputs to the valuation methodology include quoted prices for a similar asset or liability in an active market or model-derived valuations in which all significant inputs are observable for substantially the full term of the asset or liability.

- Level 3 – inputs to the valuation methodology are unobservable and significant to the fair value measurement of the asset or liability.

Certain of the Company's derivatives are valued using various pricing models or discounted cash flow analyses that incorporate observable market parameters, such as interest rate yield curves, option volatilities and currency rates, classified as Level 2 within the valuation hierarchy. Derivative valuations incorporate credit risk adjustments that are necessary to reflect the probability of default by the counterparty or the Company.

#### ▪ **Certain Financial Assets and Liabilities Measured at Fair Value**

The following tables present financial assets and liabilities measured at fair value on a recurring basis by the valuation hierarchy as defined in the fair value guidance:

December 31, 2011

<i>In millions</i>	<i>Level 1</i>	<i>Level 2</i>	<i>Level 3</i>	<i>Carrying Value</i>
Cash equivalents	\$581.7			\$581.7
Investments	132.4*			132.4
Derivative assets	154.5*	\$ 71.1		225.6
<b>Total assets at fair value</b>	<b>\$868.6</b>	<b>\$ 71.1</b>		<b>\$939.7</b>
Derivative payables		\$(15.6)		\$(15.6)
<b>Total liabilities at fair value</b>		<b>\$(15.6)</b>		<b>\$(15.6)</b>

December 31, 2010

<i>In millions</i>	<i>Level 1</i>	<i>Level 2</i>	<i>Level 3</i>	<i>Carrying Value</i>
Cash equivalents	\$722.5			\$ 722.5
Investments	131.6*			131.6
Derivative assets	104.4*	\$88.5		192.9
<b>Total assets at fair value</b>	<b>\$958.5</b>	<b>\$88.5</b>		<b>\$1,047.0</b>
Derivative payables		\$(8.4)		\$(8.4)
<b>Total liabilities at fair value</b>		<b>\$(8.4)</b>		<b>\$(8.4)</b>

\* Includes investments and derivatives that hedge market driven changes in liabilities associated with the Company's supplemental benefit plans.

#### ▪ **Non-Financial Assets and Liabilities Measured at Fair Value on a Nonrecurring Basis**

Certain assets and liabilities are measured at fair value on a nonrecurring basis; that is, the assets and liabilities are not measured at fair value on an ongoing basis, but are subject to fair value adjustments in certain circumstances (e.g., when there is evidence of impairment). For the year ended December 31, 2011, no material fair value adjustments or fair value measurements were required for non-financial assets or liabilities.

#### ▪ **Certain Financial Assets and Liabilities not Measured at Fair Value**

At December 31, 2011, the fair value of the Company's debt obligations was estimated at \$14.2 billion, compared to a carrying amount of \$12.5 billion. This fair value was estimated using

pricing models and discounted cash flow analyses that incorporated quoted market prices, Level 2 within the valuation hierarchy. The carrying amount for both cash equivalents and notes receivable approximate fair value.

#### **FINANCIAL INSTRUMENTS AND HEDGING ACTIVITIES**

The Company is exposed to global market risks, including the effect of changes in interest rates and foreign currency fluctuations. The Company uses foreign currency denominated debt and derivative instruments to mitigate the impact of these changes. The Company does not use derivatives with a level of complexity or with a risk higher than the exposures to be hedged and does not hold or issue derivatives for trading purposes.

The Company documents its risk management objective and strategy for undertaking hedging transactions, as well as all relationships between hedging instruments and hedged items. The Company's derivatives that are designated as hedging instruments consist mainly of interest rate swaps, foreign currency forwards and foreign currency options. Interest rate swaps are entered into to manage the interest rate risk associated with the Company's fixed and floating-rate borrowings. Foreign currency forwards and foreign currency options are entered into to mitigate the risk that forecasted foreign currency cash flows (such as royalties denominated in foreign currencies) will be adversely affected by changes in foreign currency exchange rates. Certain foreign currency denominated debt is used, in part, to protect the value of the Company's investments in certain foreign subsidiaries and affiliates from changes in foreign currency exchange rates.

The Company also enters into certain derivatives that are not designated as hedging instruments. The Company has entered into equity derivative contracts to hedge market-driven changes in certain of its supplemental benefit plan liabilities. Changes in the fair value of these derivatives are recorded in selling, general & administrative expenses together with the changes in the supplemental benefit plan liabilities. In addition, the Company uses foreign currency forwards to mitigate the change in fair value of certain foreign currency denominated assets and liabilities. Since these derivatives are not designated for hedge accounting, the changes in the fair value of these derivatives are recognized immediately in nonoperating (income) expense together with the currency gain or loss from the hedged balance sheet position. A portion of the Company's foreign currency options (more fully described in the Cash Flow Hedging Strategy section) are undesignated as hedging instruments as the underlying foreign currency royalties are earned.

All derivative instruments designated as hedging instruments are classified as fair value, cash flow or net investment hedges. All derivatives (including those not designated for hedge accounting) are recognized on the Consolidated balance sheet at fair value and classified based on the instruments' maturity date. Changes in the fair value measurements of the derivative instruments are reflected as adjustments to other comprehensive income (OCI) and/or current earnings.

The following table presents the fair values of derivative instruments included on the Consolidated balance sheet as of December 31, 2011 and 2010:

<i>In millions</i>	Derivative Assets			Derivative Liabilities		
	<i>Balance Sheet Classification</i>	2011	2010	<i>Balance Sheet Classification</i>	2011	2010
Derivatives designated as hedging instruments						
Foreign currency	Prepaid expenses and other current assets	\$ 6.7	\$ 7.5	Accrued payroll and other liabilities	\$ (0.3)	\$(4.6)
Interest rate	Prepaid expenses and other current assets	9.4	0.5			
Foreign currency	Miscellaneous other assets	0.7		Other long-term liabilities	(0.3)	
Interest rate	Miscellaneous other assets	46.0	72.1	Other long-term liabilities	(14.0)	(0.3)
Total derivatives designated as hedging instruments		\$ 62.8	\$ 80.1			\$(14.6) \$(4.9)
Derivatives not designated as hedging instruments						
Foreign currency	Prepaid expenses and other current assets	\$ 8.3	\$ 6.0	Accrued payroll and other liabilities	\$ (1.0)	\$(3.8)
Equity	Prepaid expenses and other current assets		104.4			
Foreign currency	Miscellaneous other assets		2.7			
Equity	Miscellaneous other assets	154.5				
Total derivatives not designated as hedging instruments		\$ 162.8	\$ 113.1			\$ (1.0) \$(3.8)
Total derivatives		\$ 225.6	\$ 193.2			\$(15.6) \$(8.7)

The following table presents the pretax amounts affecting income and OCI for the years ended December 31, 2011 and 2010, respectively:

<i>In millions</i>							
<i>Derivatives in Fair Value Hedging Relationships</i>	<i>Gain (Loss) Recognized in Income on Derivative</i>		<i>Hedged Items in Fair Value Hedging Relationships</i>	<i>Gain (Loss) Recognized in Income on Related Hedged Items</i>			
	2011	2010		2011	2010		
Interest rate	\$ (11.1)	\$ 7.0	Fixed-rate debt	\$ 11.1	\$ (7.0)		
<i>Derivatives in Cash flow Hedging Relationships</i>	<i>Gain (Loss) Recognized in Accumulated OCI on Derivative (Effective Portion)</i>		<i>Gain (Loss) Reclassified from Accumulated OCI into Income (Effective Portion)</i>		<i>Gain (Loss) Recognized in Income on Derivative (Amount Excluded from Effectiveness Testing and Ineffective Portion)</i>		
	2011	2010	2011	2010	2011	2010	
Foreign currency	\$ (5.1)	\$ 11.2	\$ 5.1	\$ 13.4	\$ (7.7)	\$ (25.1)	
Interest rate <sup>(1)</sup>	(14.0)		(2.2)	0.9		0.3	
Total	\$ (19.1)	\$ 11.2	\$ 2.9	\$ 14.3	\$ (7.7)	\$ (24.8)	
<i>Net Investment Hedging Relationships</i>	<i>Gain (Loss) Recognized in Accumulated OCI on Derivative (Effective portion)</i>		<i>Gain (Loss) Reclassified from Accumulated OCI into Income (Effective Portion)</i>		<i>Derivatives Not Designated as Hedging Instruments</i>	<i>Gain (Loss) Recognized in Income on Derivative</i>	
	2011	2010	2011	2010		2011	2010
Foreign currency denominated debt	\$ (130.8)	\$ (144.3)			Foreign currency	\$ (2.2)	\$ 16.4
Foreign currency derivatives <sup>(2)</sup>	(9.4)	(4.3)	\$ (8.2)		Equity <sup>(3)</sup>	36.9	18.8
Total	\$ (140.2)	\$ (148.6)	\$ (8.2)		Interest Rate	1.5	
					Total	\$ 36.2	\$ 35.2

Gains (losses) recognized in income on derivatives are recorded in "Nonoperating (income) expense, net" unless otherwise noted.

(1) The amount of gain (loss) reclassified from accumulated OCI into income is recorded in Interest expense.

(2) The amount of gain (loss) reclassified from accumulated OCI into income is recorded in Impairment and other charges (credits), net.

(3) The amount of gain (loss) recognized in income on the derivatives used to hedge the supplemental benefit plan liabilities is recorded in Selling, general & administrative expenses.

### ▪ **Fair Value Hedges**

The Company enters into fair value hedges to reduce the exposure to changes in the fair values of certain liabilities. The fair value hedges the Company enters into consist of interest rate swaps which convert a portion of its fixed-rate debt into floating-rate debt. All of the Company's interest rate swaps meet the shortcut method requirements. Accordingly, changes in the fair values of the interest rate swaps are exactly offset by changes in the fair value of the underlying debt. No ineffectiveness has been recorded to net income related to interest rate swaps designated as fair value hedges for the year ended December 31, 2011. A total of \$2.0 billion of the Company's outstanding fixed-rate debt was effectively converted to floating-rate debt resulting from the use of interest rate swaps.

### ▪ **Cash Flow Hedges**

The Company enters into cash flow hedges to reduce the exposure to variability in certain expected future cash flows. The types of cash flow hedges the Company enters into include interest rate swaps, foreign currency forwards and foreign currency options.

The Company periodically uses interest rate swaps to effectively convert a portion of floating-rate debt, including forecasted debt issuances, into fixed-rate debt and the agreements are intended to reduce the impact of interest rate changes on future interest expense. At December 31, 2011, \$250.0 million of the Company's anticipated debt issuances were effectively converted to fixed-rate resulting from the use of interest rate swaps.

To protect against the reduction in value of forecasted foreign currency cash flows (such as royalties denominated in foreign currencies), the Company uses foreign currency forwards and foreign currency options to hedge a portion of anticipated exposures.

When the U.S. dollar strengthens against foreign currencies, the decline in value of future foreign denominated royalties is offset by gains in the fair value of the foreign currency forwards and/or foreign currency options. Conversely, when the U.S. dollar weakens, the increase in the value of future foreign denominated royalties is offset by losses in the fair value of the foreign currency forwards and/or foreign currency options.

Although the fair value changes in the foreign currency options may fluctuate over the period of the contract, the Company's total loss on a foreign currency option is limited to the upfront premium paid for the contract. However, the potential gains on a foreign currency option are unlimited as the settlement value of the contract is based upon the difference between the exchange rate at inception of the contract and the spot exchange rate at maturity. In limited situations, the Company uses foreign currency collars, which limit the potential gains and lower the upfront premium paid, to protect against currency movements.

The hedges cover the next 15 months for certain exposures and are denominated in various currencies. As of December 31, 2011, the Company had derivatives outstanding with an equivalent notional amount of \$228.0 million that were used to hedge a portion of forecasted foreign currency denominated royalties.

The Company excludes the time value of foreign currency options, as well as the forward points on foreign currency forwards, from its effectiveness assessment on its cash flow

hedges. As a result, changes in the fair value of the derivatives due to these components, as well as the ineffectiveness of the hedges, are recognized in earnings currently. The effective portion of the gains or losses on the derivatives is reported in the cash flow hedging component of OCI in shareholders' equity and reclassified into earnings in the same period or periods in which the hedged transaction affects earnings.

The Company recorded after tax adjustments to the cash flow hedging component of accumulated OCI in shareholders' equity. The Company recorded a net decrease of \$10.4 million and \$1.5 million for the years ended December 31, 2011 and 2010, respectively. Based on interest rates and foreign exchange rates at December 31, 2011, the \$4.6 million in cumulative cash flow hedging gains, after tax, at December 31, 2011, is not expected to have a significant effect on earnings over the next 12 months.

### ▪ **Net Investment Hedges**

The Company primarily uses foreign currency denominated debt (third party and intercompany) to hedge its investments in certain foreign subsidiaries and affiliates. Realized and unrealized translation adjustments from these hedges are included in shareholders' equity in the foreign currency translation component of OCI and offset translation adjustments on the underlying net assets of foreign subsidiaries and affiliates, which also are recorded in OCI. As of December 31, 2011, a total of \$4.3 billion of the Company's foreign currency denominated debt was designated to hedge investments in certain foreign subsidiaries and affiliates.

### ▪ **Credit Risk**

The Company is exposed to credit-related losses in the event of non-performance by the counterparties to its hedging instruments. The counterparties to these agreements consist of a diverse group of financial institutions. The Company continually monitors its positions and the credit ratings of its counterparties and adjusts positions as appropriate. The Company did not have significant exposure to any individual counterparty at December 31, 2011 and has master agreements that contain netting arrangements. Some of these agreements also require each party to post collateral if credit ratings fall below, or aggregate exposures exceed, certain contractual limits. At December 31, 2011, neither the Company nor its counterparties were required to post collateral on any derivative position, other than on hedges of certain of the Company's supplemental benefit plan liabilities where its counterparties were required to post collateral on their liability positions.

### **INCOME TAX UNCERTAINTIES**

The Company, like other multi-national companies, is regularly audited by federal, state and foreign tax authorities, and tax assessments may arise several years after tax returns have been filed. Accordingly, tax liabilities are recorded when, in management's judgment, a tax position does not meet the more likely than not threshold for recognition. For tax positions that meet the more likely than not threshold, a tax liability may be recorded depending on management's assessment of how the tax position will ultimately be settled.

The Company records interest and penalties on unrecognized tax benefits in the provision for income taxes.

## PER COMMON SHARE INFORMATION

Diluted earnings per common share is calculated using net income divided by diluted weighted-average shares. Diluted weighted-average shares include weighted-average shares outstanding plus the dilutive effect of share-based compensation calculated using the treasury stock method, of (in millions of shares): 2011–12.8; 2010–14.3; 2009–15.2. Stock options that were not included in diluted weighted-average shares because they would have been antidilutive were (in millions of shares): 2011–0.0; 2010–0.0; 2009–0.7.

The Company has elected to exclude the pro forma deferred tax asset associated with share-based compensation in earnings per share.

## STATEMENT OF CASH FLOWS

The Company considers short-term, highly liquid investments with an original maturity of 90 days or less to be cash equivalents.

## SUBSEQUENT EVENTS

The Company evaluated subsequent events through the date the financial statements were issued and filed with the U.S. Securities and Exchange Commission (SEC). There were no subsequent events that required recognition or disclosure except for the debt issuances in February 2012 (see Debt financing note).

## Property and Equipment

Net property and equipment consisted of:

<i>In millions</i>	<i>December 31, 2011</i>	<i>2010</i>
Land	\$ 5,328.3	\$ 5,200.5
Buildings and improvements on owned land	13,079.9	12,399.4
Buildings and improvements on leased land	12,021.8	11,732.0
Equipment, signs and seating	4,757.2	4,608.5
Other	550.4	542.0
	<b>35,737.6</b>	34,482.4
Accumulated depreciation and amortization	(12,903.1)	(12,421.8)
Net property and equipment	\$ 22,834.5	\$ 22,060.6

Depreciation and amortization expense was (in millions): 2011–\$1,329.6; 2010–\$1,200.4; 2009–\$1,160.8.

## Impairment and Other Charges (Credits), Net

<i>In millions, except per share data</i>	<i>2011</i>	<i>2010</i>	<i>2009</i>
Europe	\$ 0.3	\$ 1.6	\$ 4.3
APMEA	(4.2)	48.5	(0.2)
Other Countries & Corporate		(21.0)	(65.2)
Total	\$ (3.9)	\$ 29.1	\$(61.1)
After tax <sup>(1)</sup>	\$17.1	\$ 24.6	\$(91.4)
Earnings per common share-diluted	\$0.01	\$ 0.02	\$(0.08)

(1) Certain items were not tax effected.

In 2010, the Company recorded after tax charges of \$39.3 million related to its share of restaurant closing costs in McDonald's Japan (a 50%-owned affiliate) in conjunction with the strategic review of the market's restaurant portfolio. These actions were designed to enhance the brand image, overall profitability and returns of the market. The Company also recorded pretax income of \$21.0 million related to the resolution of certain liabilities retained in connection with the 2007 Latin America developmental license transaction.

In 2009, the Company recorded pretax income of \$65.2 million related primarily to the resolution of certain liabilities retained in connection with the 2007 Latin America developmental license transaction. The Company also recognized a tax benefit in 2009 in connection with this income, mainly related to the release of a tax valuation allowance.

## Other Operating (Income) Expense, Net

<i>In millions</i>	<i>2011</i>	<i>2010</i>	<i>2009</i>
Gains on sales of restaurant businesses	\$ (81.8)	\$ (79.4)	\$(113.3)
Equity in earnings of unconsolidated affiliates	(178.0)	(164.3)	(167.8)
Asset dispositions and other expense	26.9	45.5	58.8
Total	\$ (232.9)	\$(198.2)	\$(222.3)

### ▪ Gains on sales of restaurant businesses

Gains on sales of restaurant businesses include gains from sales of Company-operated restaurants as well as gains from exercises of purchase options by franchisees with business facilities lease arrangements (arrangements where the Company leases the businesses, including equipment, to franchisees who generally have options to purchase the businesses). The Company's purchases and sales of businesses with its franchisees are aimed at achieving an optimal ownership mix in each market. Resulting gains or losses are recorded in operating income because the transactions are a recurring part of our business.

### ▪ Equity in earnings of unconsolidated affiliates

Unconsolidated affiliates and partnerships are businesses in which the Company actively participates but does not control. The Company records equity in earnings from these entities representing McDonald's share of results. For foreign affiliated markets—primarily Japan—results are reported after interest expense and income taxes. McDonald's share of results for partnerships in certain consolidated markets such as the U.S. are reported before income taxes. These partnership restaurants are operated under conventional franchise arrangements and, therefore, are classified as conventional franchised restaurants.

### ▪ Asset dispositions and other expense

Asset dispositions and other expense consists of gains or losses on excess property and other asset dispositions, provisions for restaurant closings and uncollectible receivables, asset write-offs due to restaurant reinvestment, and other miscellaneous income and expenses.

## Gain on Sale of Investment

In 2009, the Company sold its minority ownership interest in Redbox Automated Retail, LLC to Coinstar, Inc., the majority owner, for total consideration of \$144.9 million. As a result of the transaction, the Company recognized a nonoperating pretax gain of \$94.9 million (after tax—\$58.8 million or \$0.05 per share).

## Contingencies

In the ordinary course of business, the Company is subject to proceedings, lawsuits and other claims primarily related to competitors, customers, employees, franchisees, government agencies, intellectual property, shareholders and suppliers. The Company is required to assess the likelihood of any adverse judgments or outcomes to these matters as well as potential ranges of probable losses. A determination of the amount of accrual required, if any, for these contingencies is made after careful analysis of each matter. The required accrual may change in the future due to new developments in each matter or changes in approach such as a change in settlement strategy in dealing with these matters.

In connection with the sale in 2007 of its businesses in 18 countries in Latin America and the Caribbean to a developmental licensee organization, the Company agreed to indemnify the buyers for certain tax and other claims, certain of which are reflected on McDonald's Consolidated balance sheet (2011 and 2010: other long-term liabilities—\$49.4 million and \$49.6 million, respectively; 2011 and 2010: accrued payroll and other liabilities—\$21.2 million and \$28.4 million, respectively).

The Company believes any other matters currently being reviewed will not have a material adverse effect on its financial condition or results of operations.

## Franchise Arrangements

Conventional franchise arrangements generally include a lease and a license and provide for payment of initial fees, as well as continuing rent and royalties to the Company based upon a percent of sales with minimum rent payments that parallel the Company's underlying leases and escalations (on properties that are leased). Under this arrangement, franchisees are granted the right to operate a restaurant using the McDonald's System and, in most cases, the use of a restaurant facility, generally for a period of 20 years. These franchisees pay related occupancy costs including property taxes, insurance and maintenance. Affiliates and developmental licensees operating under license agreements pay a royalty to the Company based upon a percent of sales, and may pay initial fees.

The results of operations of restaurant businesses purchased and sold in transactions with franchisees were not material either individually or in the aggregate to the consolidated financial statements for periods prior to purchase and sale.

Revenues from franchised restaurants consisted of:

<i>In millions</i>	<b>2011</b>	2010	2009
Rents	<b>\$5,718.5</b>	\$5,198.4	\$4,841.0
Royalties	<b>2,929.8</b>	2,579.2	2,379.8
Initial fees	<b>64.9</b>	63.7	65.4
Revenues from franchised restaurants	<b>\$8,713.2</b>	\$7,841.3	\$7,286.2

Future minimum rent payments due to the Company under existing franchise arrangements are:

<i>In millions</i>	<i>Owned sites</i>	<i>Leased sites</i>	<i>Total</i>
2012	\$ 1,277.9	\$ 1,147.2	\$ 2,425.1
2013	1,245.7	1,111.2	2,356.9
2014	1,207.2	1,065.3	2,272.5
2015	1,150.9	1,005.9	2,156.8
2016	1,090.5	946.4	2,036.9
Thereafter	8,914.2	7,035.1	15,949.3
Total minimum payments	<b>\$14,886.4</b>	<b>\$12,311.1</b>	<b>\$27,197.5</b>

At December 31, 2011, net property and equipment under franchise arrangements totaled \$13.8 billion (including land of \$4.0 billion) after deducting accumulated depreciation and amortization of \$7.1 billion.

## Leasing Arrangements

At December 31, 2011, the Company was the lessee at 14,139 restaurant locations through ground leases (the Company leases the land and the Company or franchisee owns the building) and through improved leases (the Company leases land and buildings). Lease terms for most restaurants, where market conditions allow, are generally for 20 years and, in many cases, provide for rent escalations and renewal options, with certain leases providing purchase options. Escalation terms vary by geographic segment with examples including fixed-rent escalations, escalations based on an inflation index, and fair-value market adjustments. The timing of these escalations generally ranges from annually to every five years. For most locations, the Company is obligated for the related occupancy costs including property taxes, insurance and maintenance; however, for franchised sites, the Company requires the franchisees to pay these costs. In addition, the Company is the lessee under non-cancelable leases covering certain offices and vehicles.

Future minimum payments required under existing operating leases with initial terms of one year or more are:

<i>In millions</i>	<i>Restaurant</i>	<i>Other</i>	<i>Total</i>
2012	\$ 1,172.6	\$ 74.4	\$ 1,247.0
2013	1,104.8	62.8	1,167.6
2014	1,019.5	55.4	1,074.9
2015	921.9	43.1	965.0
2016	813.9	37.9	851.8
Thereafter	6,039.1	208.8	6,247.9
Total minimum payments	<b>\$11,071.8</b>	<b>\$482.4</b>	<b>\$11,554.2</b>

The following table provides detail of rent expense:

<i>In millions</i>	<b>2011</b>	2010	2009
Company-operated restaurants:			
U.S.	\$ 55.9	\$ 60.4	\$ 65.2
Outside the U.S.	620.4	545.0	506.9
Total	676.3	605.4	572.1
Franchised restaurants:			
U.S.	420.0	409.7	393.9
Outside the U.S.	514.7	463.5	431.4
Total	934.7	873.2	825.3
Other	101.7	98.1	98.9
Total rent expense	\$1,712.7	\$1,576.7	\$1,496.3

Rent expense included percent rents in excess of minimum rents (in millions) as follows—Company-operated restaurants: 2011—\$165.2; 2010—\$142.5; 2009—\$129.6. Franchised restaurants: 2011—\$173.4; 2010—\$167.3; 2009—\$154.7.

## Income Taxes

Income before provision for income taxes, classified by source of income, was as follows:

<i>In millions</i>	<b>2011</b>	2010	2009
U.S.	\$3,202.8	\$2,763.0	\$2,700.4
Outside the U.S.	4,809.4	4,237.3	3,786.6
Income before provision for income taxes	\$8,012.2	\$7,000.3	\$6,487.0

The provision for income taxes, classified by the timing and location of payment, was as follows:

<i>In millions</i>	<b>2011</b>	2010	2009
U.S. federal	\$1,173.4	\$1,127.1	\$ 792.0
U.S. state	165.2	161.1	152.1
Outside the U.S.	982.1	841.5	788.9
Current tax provision	2,320.7	2,129.7	1,733.0
U.S. federal	189.0	(66.8)	186.9
U.S. state	8.6	13.8	8.6
Outside the U.S.	(9.2)	(22.7)	7.5
Deferred tax provision (benefit)	188.4	(75.7)	203.0
Provision for income taxes	\$2,509.1	\$2,054.0	\$1,936.0

Net deferred tax liabilities consisted of:

<i>In millions</i>	<i>December 31, 2011</i>		2010
Property and equipment	\$ 1,651.3	\$ 1,655.2	
Other	541.7	489.8	
Total deferred tax liabilities	2,193.0	2,145.0	
Property and equipment	(355.4)	(352.4)	
Employee benefit plans	(406.3)	(356.4)	
Intangible assets	(256.2)	(268.6)	
Deferred foreign tax credits	(173.9)	(310.7)	
Capital loss carryforwards	(26.0)	(37.5)	
Operating loss carryforwards	(71.1)	(56.8)	
Indemnification liabilities	(33.4)	(36.5)	
Other	(312.6)	(284.0)	
Total deferred tax assets before valuation allowance	(1,634.9)	(1,702.9)	
Valuation Allowance	102.0	104.7	
Net deferred tax liabilities	660.1	546.8	
Balance sheet presentation:			
Deferred income taxes	1,344.1	1,332.4	
Other assets-miscellaneous	(606.3)	(590.4)	
Current assets-prepaid expenses and other current assets	(77.7)	(195.2)	
Net deferred tax liabilities	\$ 660.1	\$ 546.8	

The statutory U.S. federal income tax rate reconciles to the effective income tax rates as follows:

	<b>2011</b>	2010	2009
Statutory U.S. federal income tax rate	35.0%	35.0%	35.0%
State income taxes, net of related federal income tax benefit	1.4	1.6	1.6
Benefits and taxes related to foreign operations	(4.7)	(6.9)	(6.3)
Other, net	(0.4)	(0.4)	(0.5)
Effective income tax rates	31.3%	29.3%	29.8%

As of December 31, 2011 and 2010, the Company's gross unrecognized tax benefits totaled \$565.0 million and \$572.6 million, respectively. After considering the deferred tax accounting impact, it is expected that about \$420 million of the total as of December 31, 2011 would favorably affect the effective tax rate if resolved in the Company's favor.

The following table presents a reconciliation of the beginning and ending amounts of unrecognized tax benefits:

<i>In millions</i>	<b>2011</b>	<b>2010</b>
Balance at January 1	<b>\$572.6</b>	\$492.0
Decreases for positions taken in prior years	<b>(50.6)</b>	(27.1)
Increases for positions taken in prior years	<b>24.3</b>	53.3
Increases for positions related to the current year	<b>54.8</b>	102.0
Settlements with taxing authorities	<b>(14.4)</b>	(17.4)
Lapsing of statutes of limitations	<b>(21.7)</b>	(30.2)
<b>Balance at December 31<sup>(1)</sup></b>	<b>\$565.0</b>	<b>\$572.6</b>

(1) Of this amount, \$564.3 and \$535.9 are included in long-term liabilities on the Consolidated balance sheet for 2011 and 2010, respectively. The remainder is included in deferred income taxes and income taxes payable on the Consolidated balance sheet.

In 2010, the Internal Revenue Service (IRS) concluded its field examination of the Company's U.S. federal income tax returns for 2007 and 2008. In connection with this examination, the Company received notices of proposed adjustments from the IRS related to certain foreign tax credits of about \$400 million, excluding interest and potential penalties. The Company disagrees with the IRS' proposed adjustments. The Company has filed a protest with the IRS Appeals Office and expects resolution on this issue in 2012. The Company believes that the liabilities recorded related to this matter are appropriate and adequate and have been determined in accordance with ASC 740 – Income Taxes.

The Company is also under audit in multiple state tax jurisdictions where it is reasonably possible that the audits could be completed within 12 months. Due to the expected resolution of the 2007 and 2008 IRS Appeals process, the possible completion of the aforementioned audits and the expiration of the statute of limitations in multiple tax jurisdictions, it is reasonably possible that the total amount of unrecognized tax benefits could decrease

within the next 12 months by \$130 million to \$140 million, of which \$30 million to \$40 million could favorably affect the effective tax rate.

In addition, the Company is currently under audit in multiple tax jurisdictions where completion of the tax audits is not expected within 12 months. However, it is reasonably possible that, as a result of audit progression within the next 12 months, there may be new information that causes the Company to reassess the total amount of unrecognized tax benefits recorded. While the Company cannot estimate the impact that new information may have on our unrecognized tax benefit balance, we believe that the liabilities that are recorded are appropriate and adequate as determined under ASC 740.

The Company is generally no longer subject to U.S. federal, state and local, or non-U.S. income tax examinations by tax authorities for years prior to 2005.

The Company had \$39.6 million and \$44.4 million accrued for interest and penalties at December 31, 2011 and 2010, respectively. The Company recognized interest and penalties related to tax matters of \$4.8 million in 2011, \$29.0 million in 2010, and \$1.5 million in 2009, which are included in the provision for income taxes.

Deferred U.S. income taxes have not been recorded for temporary differences related to investments in certain foreign subsidiaries and corporate joint ventures. These temporary differences were approximately \$12.6 billion at December 31, 2011 and consisted primarily of undistributed earnings considered permanently invested in operations outside the U.S. Determination of the deferred income tax liability on these unremitted earnings is not practicable because such liability, if any, is dependent on circumstances existing if and when remittance occurs.

## Segment and Geographic Information

The Company operates in the global restaurant industry and manages its business as distinct geographic segments. All inter-company revenues and expenses are eliminated in computing revenues and operating income. Corporate general & administrative expenses are included in Other Countries & Corporate and consist of home office support costs in areas such as facilities, finance, human resources, information technology, legal, marketing, restaurant operations, supply chain and training. Corporate assets include corporate cash and equivalents, asset portions of financial instruments and home office facilities.

<i>In millions</i>	<b>2011</b>	<i>2010</i>	<i>2009</i>

(1) Includes expense due to Impairment and other charges (credits), net of \$39.3 million related to the Company's share of restaurant closings in McDonald's Japan (a 50%-owned affiliate).

(2) Includes income due to Impairment and other charges (credits), net of \$21.0 million related to the resolution of certain liabilities retained in connection with the 2007 Latin America developmental license transaction.

(3) Includes income due to Impairment and other charges (credits), net of \$65.2 million primarily related to the resolution of certain liabilities retained in connection with the 2007 Latin America developmental license transaction.

Total long-lived assets, primarily property and equipment, were (in millions)—Consolidated: 2011—\$27,587.6; 2010—\$26,700.9; 2009—\$25,896.1; U.S. based: 2011—\$10,724.9; 2010—\$10,430.2; 2009—\$10,376.4.

## Debt Financing

### LINE OF CREDIT AGREEMENTS

At December 31, 2011, the Company had a \$1.5 billion line of credit agreement expiring in November 2016 with fees of 0.065% per annum on the total commitment, which remained unused. Fees and interest rates on this line are based on the Company's long-term credit rating assigned by Moody's and Standard & Poor's. In addition, the Company, including certain subsidiaries outside the U.S., had unused lines of credit totaling \$838.9 million at December 31, 2011; these lines of credit were primarily uncommitted, short-term and denominated in various currencies at local market rates of interest.

The weighted-average interest rate of short-term borrowings was 4.6% at December 31, 2011 (based on \$640.3 million of foreign currency bank line borrowings and \$250.0 million of commercial paper) and 4.3% at December 31, 2010 (based on \$595.0 million of foreign currency bank line borrowings).

### DEBT OBLIGATIONS

The Company has incurred debt obligations principally through public and private offerings and bank loans. There are no provisions in the Company's debt obligations that would accelerate repayment of debt as a result of a change in credit ratings or a material adverse change in the Company's business. Certain of the Company's debt obligations contain cross-acceleration provisions, and restrictions on Company and subsidiary mortgages and the long-term debt of certain subsidiaries. Under certain agreements, the Company has the option to retire debt prior to maturity, either at par or at a premium over par. The Company has no current plans to retire a significant amount of its debt prior to maturity.

In February 2012, the Company issued \$250.0 million of 10-year U.S. Dollar-denominated notes at a coupon rate of 2.625%, and \$500.0 million of 30-year U.S. Dollar-denominated notes at a coupon rate of 3.7%.

### ESOP LOANS

Borrowings related to the leveraged Employee Stock Ownership Plan (ESOP) at December 31, 2011, which include \$39.6 million of loans from the Company to the ESOP, are reflected as debt with a corresponding reduction of shareholders' equity (additional paid-in capital included a balance of \$34.4 million and \$41.7 million at December 31, 2011 and 2010, respectively). The ESOP is repaying the loans and interest through 2018 using Company contributions and dividends from its McDonald's common stock holdings. As the principal amount of the borrowings is repaid, the debt and the unearned ESOP compensation (additional paid-in capital) are reduced.

The following table summarizes the Company's debt obligations. (Interest rates and debt amounts reflected in the table include the effects of interest rate swaps.)

In millions of U.S. Dollars	Maturity dates	Interest rates <sup>(1)</sup> December 31		Amounts outstanding December 31	
		2011	2010	2011	2010

<b>Total Japanese Yen</b>	<b>2013-2030</b>			<b>1,201.8</b>	<b>1,324.1</b>
<b>Total British Pounds Sterling-Fixed</b>	<b>2020-2032</b>	<b>6.0</b>	<b>6.0</b>	<b>697.8</b>	<b>700.7</b>
Fixed		2.8	2.5	495.8	451.6
Floating		5.6	4.1	723.9	752.6
<b>Total other currencies<sup>(2)</sup></b>	<b>2012-2021</b>			<b>1,219.7</b>	<b>1,204.2</b>
<b>Debt obligations before fair value adjustments<sup>(3)</sup></b>				<b>12,444.5</b>	<b>11,427.9</b>
<b>Fair value adjustments<sup>(4)</sup></b>				<b>55.9</b>	<b>77.4</b>
<b>Total debt obligations<sup>(5)</sup></b>				<b>\$12,500.4</b>	<b>\$11,505.3</b>

(1) Weighted-average effective rate, computed on a semi-annual basis.

(2) Primarily consists of Swiss Francs, Chinese Renminbi and Korean Won.

(3) Aggregate maturities for 2011 debt balances, before fair value adjustments, were as follows (in millions): 2012—\$366.6; 2013—\$1,026.0; 2014—\$737.9; 2015—\$656.3; 2016—\$2,158.6; Thereafter—\$7,499.1. These amounts include a reclassification of short-term obligations totaling \$1.5 billion to long-term obligations as they are supported by a long-term line of credit agreement expiring in November 2016.

(4) The carrying value of underlying items in fair value hedges, in this case debt obligations, are adjusted for fair value changes to the extent they are attributable to the risk designated as being hedged. The related hedging instrument is also recorded at fair value in prepaid expenses and other current assets, miscellaneous other assets or other long-term liabilities. A portion (\$0.5 million) of the adjustments at December 31, 2011 related to interest rate swaps that were terminated in December 2002 and will amortize as a reduction of interest expense over the remaining life of the debt.

(5) Includes notes payable, current maturities of long-term debt and long-term debt included on the Consolidated balance sheet. The increase in debt obligations from December 31, 2010 to December 31, 2011 was primarily due to net issuances of \$1.0 billion.

## Share-based Compensation

The Company maintains a share-based compensation plan which authorizes the granting of various equity-based incentives including stock options and restricted stock units (RSUs) to employees and nonemployee directors. The number of shares of common stock reserved for issuance under the plans was 61.4 million at December 31, 2011, including 27.6 million available for future grants.

### STOCK OPTIONS

Stock options to purchase common stock are granted with an exercise price equal to the closing market price of the Company's stock on the date of grant. Substantially all of the options become exercisable in four equal installments, beginning a year

from the date of the grant, and generally expire 10 years from the grant date. Options granted between May 1, 1999 and December 31, 2000 (approximately 3.5 million options outstanding at December 31, 2011) expire 13 years from the date of grant.

Intrinsic value for stock options is defined as the difference between the current market value of the Company's stock and the exercise price. During 2011, 2010 and 2009, the total intrinsic value of stock options exercised was \$416.5 million, \$500.8 million and \$302.5 million, respectively. Cash received from stock options exercised during 2011 was \$334.0 million and the actual tax benefit realized for tax deductions from stock options exercised totaled \$110.6 million. The Company uses treasury shares purchased under the Company's share repurchase program to satisfy share-based exercises.

A summary of the status of the Company's stock option grants as of December 31, 2011, 2010 and 2009, and changes during the years then ended, is presented in the following table:

Options	2011				2010		2009	
	Shares in millions	Weighted-average exercise price	Weighted-average remaining contractual life in years	Aggregate intrinsic value in millions	Shares in millions	Weighted-average exercise price	Shares in millions	Weighted-average exercise price
Outstanding at beginning of year	37.4	\$42.47			47.8	\$38.16	53.4	\$34.88
Granted	3.9	75.97			4.5	63.26	5.6	56.94
Exercised	(9.0)	37.46			(13.6)	33.84	(10.7)	31.17
Forfeited/expired	(0.6)	55.00			(1.3)	46.03	(0.5)	47.22
Outstanding at end of year	31.7	\$47.77	5.1	\$1,667.6	37.4	\$42.47	47.8	\$38.16
Exercisable at end of year	21.9	\$39.53	3.7	\$1,328.8	26.4		35.4	

## RSUs

RSUs generally vest 100% on the third anniversary of the grant and are payable in either shares of McDonald's common stock or cash, at the Company's discretion. Certain executives have been awarded RSUs that vest based on Company performance. The fair value of each RSU granted is equal to the market price of the Company's stock at date of grant less the present value of expected dividends over the vesting period.

A summary of the Company's RSU activity during the years ended December 31, 2011, 2010 and 2009 is presented in the following table:

RSUs	2011		2010		2009	
	Shares in millions	Weighted-average grant date fair value	Shares in millions	Weighted-average grant date fair value	Shares in millions	Weighted-average grant date fair value
Nonvested at beginning of year	2.3	\$51.17	2.8	\$46.33	3.0	\$40.88
Granted	0.6	67.96	0.7	56.09	0.9	50.34
Vested	(0.7)	49.88	(1.1)	42.08	(1.0)	34.56
Forfeited	(0.1)	50.16	(0.1)	49.61	(0.1)	43.87
Nonvested at end of year	2.1	\$56.78	2.3	\$51.17	2.8	\$46.33

The Company realized tax deductions of \$6.1 million from RSUs vested during 2011. The total fair value of RSUs vested during 2011, 2010 and 2009 was \$55.5 million, \$66.8 million and \$59.9 million, respectively.

## Employee Benefit Plans

The Company's Profit Sharing and Savings Plan for U.S.-based employees includes a 401(k) feature, a regular employee match feature, and a discretionary employer profit sharing match. The 401(k) feature allows participants to make pretax contributions that are matched each pay period from shares released under the ESOP. The Profit Sharing and Savings Plan also provides for a discretionary employer profit sharing match after the end of the year for those participants eligible to share in the match.

All current account balances and future contributions and related earnings can be invested in several investment alternatives as well as McDonald's common stock in accordance with each participant's elections. Participants' contributions to the 401(k) feature and the discretionary employer matching contribution feature are limited to 20% investment in McDonald's common stock. Participants may choose to make separate investment choices for current account balances and for future contributions.

The Company also maintains certain supplemental benefit plans that allow participants to (i) make tax-deferred contributions and (ii) receive Company-provided allocations that cannot be made under the Profit Sharing and Savings Plan because of Internal Revenue Service limitations. The investment alternatives and returns are based on certain market-rate investment alternatives under the Profit Sharing and Savings Plan. Total liabilities were \$482.5 million at December 31, 2011, and \$439.3 million at

December 31, 2010, and were primarily included in other long-term liabilities on the Consolidated balance sheet.

The Company has entered into derivative contracts to hedge market-driven changes in certain of the liabilities. At December 31, 2011, derivatives with a fair value of \$154.5 million indexed to the Company's stock were included in miscellaneous other assets and an investment totaling \$98.3 million indexed to certain market indices was included in prepaid expenses and other current assets on the Consolidated balance sheet. All changes in liabilities for these nonqualified plans and in the fair value of the derivatives are recorded in selling, general & administrative expenses. Changes in fair value of the derivatives indexed to the Company's stock are recorded in the income statement because the contracts provide the counterparty with a choice to settle in cash or shares.

Total U.S. costs for the Profit Sharing and Savings Plan, including nonqualified benefits and related hedging activities, were (in millions): 2011—\$41.3; 2010—\$51.4; 2009—\$51.3. Certain subsidiaries outside the U.S. also offer profit sharing, stock purchase or other similar benefit plans. Total plan costs outside the U.S. were (in millions): 2011—\$58.3; 2010—\$57.6; 2009—\$45.2.

The total combined liabilities for international retirement plans were \$125.4 million and \$153.2 million at December 31, 2011 and 2010, respectively, primarily in the U.K. and Canada.

Other postretirement benefits and post-employment benefits were immaterial.

(3) Includes a \$0.55 per share dividend declared and paid in third quarter and a \$0.61 per share dividend declared in third quarter and paid in fourth quarter.

## Management's Assessment of Internal Control Over Financial Reporting

---

The financial statements were prepared by management, which is responsible for their integrity and objectivity and for establishing and maintaining adequate internal controls over financial reporting.

The Company's internal control over financial reporting is designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. The Company's internal control over financial reporting includes those policies and procedures that:

- I. pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the Company;
- II. provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the Company are being made only in accordance with authorizations of management and directors of the Company; and
- III. provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of the Company's assets that could have a material effect on the financial statements.

There are inherent limitations in the effectiveness of any internal control, including the possibility of human error and the circumvention or overriding of controls. Accordingly, even effective internal controls can provide only reasonable assurances with respect to financial statement preparation. Further, because of changes in conditions, the effectiveness of internal controls may vary over time.

Management assessed the design and effectiveness of the Company's internal control over financial reporting as of December 31, 2011. In making this assessment, management used the criteria set forth by the Committee of Sponsoring Organizations of the Treadway Commission ("COSO") in Internal Control – Integrated Framework.

Based on management's assessment using those criteria, as of December 31, 2011, management believes that the Company's internal control over financial reporting is effective.

Ernst & Young, LLP, independent registered public accounting firm, has audited the financial statements of the Company for the fiscal years ended December 31, 2011, 2010 and 2009 and the Company's internal control over financial reporting as of December 31, 2011. Their reports are presented on the following pages. The independent registered public accountants and internal auditors advise management of the results of their audits, and make recommendations to improve the system of internal controls. Management evaluates the audit recommendations and takes appropriate action.

McDONALD'S CORPORATION

February 24, 2012

## Report of Independent Registered Public Accounting Firm

---

The Board of Directors and Shareholders of McDonald's Corporation

We have audited the accompanying consolidated balance sheets of McDonald's Corporation as of December 31, 2011 and 2010, and the related consolidated statements of income, shareholders' equity, and cash flows for each of the three years in the period ended December 31, 2011. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the consolidated financial position of McDonald's Corporation at December 31, 2011 and 2010, and the consolidated results of its operations and its cash flows for each of the three years in the period ended December 31, 2011, in conformity with U.S. generally accepted accounting principles.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), McDonald's Corporation's internal control over financial reporting as of December 31, 2011, based on criteria established in Internal Control-Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission, and our report dated February 24, 2012, expressed an unqualified opinion thereon.

# Report of Independent Registered Public Accounting Firm on Internal Control Over Financial Reporting

---

The Board of Directors and Shareholders of McDonald's Corporation

We have audited McDonald's Corporation's internal control over financial reporting as of December 31, 2011, based on criteria established in Internal Control – Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (the COSO criteria). McDonald's Corporation's management is responsible for maintaining effective internal control over financial reporting, and for its assessment of the effectiveness of internal control over financial reporting included in the accompanying report on Management's Assessment of Internal Control over Financial Reporting. Our responsibility is to express an opinion on the Company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, McDonald's Corporation maintained, in all material respects, effective internal control over financial reporting as of December 31, 2011, based on the COSO criteria.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated financial statements of McDonald's Corporation as of December 31, 2011 and 2010 and for each of the three years in the period ended December 31, 2011, and our report dated February 24, 2012, expressed an unqualified opinion thereon.
