

## SURVEY “AFTER PRISON”

The "Desistance from Crime and Reintegration Policies" research group at the Autonomous University of Barcelona makes available to the academic community the survey used in the "Imprisonment and recidivism" research project, funded by the Spanish Ministry of Economy and Competitiveness (DER2014-55315-P). The primary basis for developing this survey was the initial interview used in the U.S. study "Returning Home: Understanding the Challenges of Prisoner Reentry," provided by Professor Christine Visser, who kindly granted us permission to use it in our research.

The research group's publications that have utilized this survey are as follows:
