A GUIDE TO THE HISTORY OF SCIENCE

by George Sarton, Editor of "Isis and Osiris"
Professor in Harvard University.

Devided into two parts, this guide may attract and serve two kinds of readers: on the one hand scientists and scholars, on the other hand historians of science. The first and shorter part explains the purpose and meaning of science, the second may be described as a general bibliography, a first guide to the whole field and to its main sub-divisions, prepared for the guidance of scholars interested in those studies. The first part is meant to be read, the second to be used as a tool by every student.

Royal oct., ca 316 pages cloth \$ 7.50
