Madrid, 16th December 1985

From: GP Spain, Jordi Bigas
To: GP Switzerland
On: Palomares case
Ref: RP 519

Dear friends,

I send you an article about Palomares that could be interesting for you. We keep on working on the consequences of the accident of the 17th of January 1966.

Our main aims are:

1. try to break the extinction term of the nuclear damage claim which ends the 17th of January 1986.
2. to ask for a public investigation of the health risks, residual contamination of plutonium and americium, and for a good examination of all the persons who were submitted to nuclear damage in the zone.
3. keep on investigating on how the accident happened, on the confidential agreements that were made, on how the army descontaminated the zone, etc.
4. to make clear that nuclear risks are not reduced to war danger only: nuclear transports!

We hope we can send you, as soon as possible, a general report on the item. We are convinced that there is a large documentation on the case in the United States to which we don't have access, and we would like to interest you for our problem.

All the best,

Jordi Bigas,
campaigner GP Spain.
