The screenshot displays the SpringerLink website interface. At the top, there is a search bar with the text "SEARCH FOR" and a "GO" button. Below the search bar, there are tabs for "AUTHOR OR EDITOR", "PUBLICATION", "VOLUME", "ISSUE", and "PAGE". To the right of the search bar, there is a "Springer" logo and a "LOG IN" button. Below the search bar, there are navigation links for "HOME", "MY SPRINGERLINK", "BROWSE", "TOOLS", "HELP", "SHOPPING CART", and "LOG IN".

The main content area is divided into several sections. On the left, there is a "BROWSE" section with a list of "By Collection" categories, including Architecture and Design, Behavioral Science, Biomedical and Life Sciences, Business and Economics, Chemistry and Materials Science, Computer Science, Earth and Environmental Science, Engineering, Humanities, Social Sciences and Law, Mathematics and Statistics, Medicine, and Physics and Astronomy. Below this list, there is a "By Featured Library" section with links to the Chinese Library of Science and the Russian Library of Science.

In the center, there is a "BROWSE PUBLICATIONS BY CONTENT TYPE" section with a grid of buttons for "Journals" (2,577), "Books" (43,613), "Book Series" (1,205), "eReferences" (189), and "Protocols" (22,735). Below this, there is a "BROWSE PUBLICATIONS BY TITLE" section with a grid of buttons for each letter of the alphabet (A-Z) and "0-9".

Below the "BROWSE PUBLICATIONS BY TITLE" section, there are three tabs: "FOR AUTHORS", "FOR LIBRARIANS", and "FOR SOCIETIES". The "FOR LIBRARIANS" tab is selected, and it shows a "Search Within Journals" section with a search bar and a "GO" button. Below the search bar, there is a "Browse Journals" section with a "Show Filters" button and a list of "By Collection" categories, including Behavioral Science, Biomedical and Life Sciences, Business and Economics, Chemistry and Materials Science, Computer Science, Earth and Environmental Science, Engineering, Humanities, Social Sciences and Law, Mathematics and Statistics, and Medicine.

On the right side of the "FOR LIBRARIANS" tab, there is a "Journals" section with a list of "All Titles" and a "Viewing items 1 - 100 of 237 that begin with 'A' of 2,577 in total" message. Below this, there is a grid of buttons for each letter of the alphabet (A-Z) and "0-9". The "A" button is selected, and it shows a list of journals, including "The AAPS Journal", "AAPS PharmSciTech", "Abdominal Imaging", and "Abhandlungen aus dem Mathematischen Seminar der Universität Hamburg".

¿Cómo seleccionar la revista más adecuada donde publicar?

¿Cómo seleccionar la revista más adecuada donde publicar ?

¿Que importancia tienen los siguientes factores para usted cuando decide mandar un manuscrito a una revista en particular?

Top 1 Box (muy importante ; en porcentajes)

- La reputación de la revista
- La calidad de los artículos de la revista
- La calidad del proceso de revisión (peer review)
- Campo Internacional
- La rapidez de la publicación
- Impact Factor
- Sistema electrónico de admisión
- Cobertura de servicios de indexing y abstracting
- Audiencia
- Publicación en línea avanzada
- Editores / editorial board
- Experiencia anterior con la revista
- Diseño
- "Autor paga " modelo acceso abierto

(N = 19,220 respondientes, 2009)

- Compruebe los sitios web de grupos de investigación que trabajan en su área y mire donde han publicado sus resultados de investigación. Compruebe si sus resultados han sido visibles y cuantas veces han sido citados.
- Siga las referencias en artículos de investigación
- Haga uso de bibliotecas digitales, Servicios de Indexado (index) y resúmenes (abstracts), archivos en línea etc [ACM Digital Library](#), [dblp](#), [EBSCO](#), [SCOPUS](#), [arXiv](#)
- Mire los sitios web de los editoriales importantes, la mayoría disponen de una sección para autores donde puede encontrar información muy útil.
- ¿Es un impact factor importante para usted? ¿O le preocupa más la visibilidad?
- Hable con los bibliotecarios de su universidad, tienen mucha experiencia
- Hable con sus compañeros de trabajo sobre las experiencias que ellos tengan con la revista que esté considerando.
- Evite revistas que no tengan un proceso claro de entrega y revisión
- No olvide la importancia que están adquiriendo las redes sociales en internet
- Hágase miembro de grupos relevantes entre las redes sociales: LinkedIn
- Sugerencia: una página en Facebook para todos sus conocidos académicos.

International Network on Social Robotics

Discussions Members Promotions Jobs Search Manage More...

The International Journal of Social Robotics covers a broad spectrum of topics related to the latest technologies, new research results and developments in the area of social robotics on all levels, from developments in core enabling technologies to system integration, aesthetic design, applications and social implications.

The journal publishes original, peer reviewed articles and contributions on innovative ideas and concepts, new discoveries and improvements, as well as novel applications, by leading researchers and developers regarding the latest fundamental advances in the core technologies that form the backbone of social robotics, distinguished developmental projects in the area, as well as seminal works in aesthetic design, ethics and philosophy, studies on social impact and influence, pertaining to social robotics.

It provides an overview of the current state of the social robotics scene, how the field and related technologies are set to evolve in the future, and their impact on society at large. Topics of interest for the scientific papers and letters include but are not limited to:

- Affective and cognitive sciences for socially interactive robots
- Context awareness, expectation and intention understanding
- Design philosophies and socially appealing design methodologies
- Biomechanics, neuro-robotics, and biomedical robotics
- Human factors and ergonomics in human-robot interactions
- Intelligent control and artificial intelligence for social robotics
- Knowledge representation, information acquisition, and decision making
- Learning, adaptation and evolution of intelligence
- Interaction and collaboration between robots, humans and environments

HOW CAN I REQUEST PERMISSION TO RE-USE MATERIAL? 

WHO CAN I CONTACT IF I ENCOUNTER QUESTIONS OR PROBLEMS DURING THE PUBLISHING PROCESS? 

<http://www.springer.com/authors/journal+authors>

DOES SPRINGER PROVIDE TEMPLATES AND STYLE FILES FOR PREPARING A JOURNAL ARTICLE?

Yes, for your convenience Springer has developed macros and templates to help you prepare your manuscript. Information about the preferred format for the individual journals can be found in the specific journal's Instructions for Authors.

- » Word Template (zip, 154 kB)
- » LaTeX Macro Package (zip, 182 kB)

DOES SPRINGER PROVIDE ENGLISH LANGUAGE SUPPORT?

Manuscripts that are accepted for publication will be checked by our copyeditors for spelling and formal style. This may not be sufficient if English is not your native language and substantial editing would be required. In that case, you may want to have your manuscript edited by a native speaker prior to submission. A clear and concise language will help editors and reviewers concentrate on the scientific content of your paper and thus smooth the peer review process.

The following editing service provides language editing for scientific articles in:

Medicine, biomedical and life sciences, chemistry, physics, engineering, business/economics, and humanities

ORIGINAL PAPER

Geospatial analysis for conservation: applications with open-source software in the Natural Parks of Barcelona

Agustín Lobo · Francesc Ara · Francesc Baró · Carlos Camino

Received: 15 November 2010 / Accepted: 8 January 2012
© Società Italiana di Fotogrammetria e Topografia (SIFET) 2012

Abstract We describe some applications of geospatial analysis in which open-source software has been prevalent, with the aim of presenting examples of operational use and discussing past and current limitations. The examples are extracted from a sequence of projects carried out in Natural Parks of the Province of Barcelona (Catalonia, NE Spain), including the use of calibrated satellite vegetation index to monitor recovery after fire, multi-criteria analysis to rank abandoned fields for restoration, generalization of vegetation maps using a double-criteria hierarchical clustering, and planning and initial evaluation of aerial campaigns with a small

remote-controlled aerial vehicle. Our use of open-source software steadily increased through this sequence of projects, with the R language and environment for statistical computing occupying a central position in our set of tools, but our applications also made use of proprietary software.

Keywords Remote Sensing · Satellite · GIS · Fire · Multi-criteria · UAV

Introduction

Open-source software (OSS) is becoming increasingly popular for the analysis of geodata in Ecology, and Environmental and Biological Conservation. OSS is much more than just a cheap solution to disciplines that are often on a tight budget. It has become the basis for the development of a community in which cooperative support is spiced with an exciting and fruitful debate. The interface between users and developers of OSS is becoming wider and fuzzier, providing an excellent environment for scientific and technical advance. In this paper, we describe a sequence of applications of geospatial analysis in which OSS has been prevalent with the aim of presenting examples of operational use, and discuss past and current limitations of OSS in this context. All cases deal with applications of geospatial processing and analysis to conservation and management of protected areas in Catalunya (NE Spain). The four cases (monitoring vegetation recovery after fire, ranking abandoned fields for the restoration of traditional agriculture, generalization of the legend of a vegetation map, and planning and evaluating aerial campaigns) cover a wide range of data and methods, thus providing an interesting test bed for OSS in this context. Appropriate references for all software used are collected in Tables 1 and 2.

- Hay mucho debate sobre impact factors en la comunidad científica. Sin embargo, el impact factor está considerado como punto de referencia de calidad en muchas comunidades académicas. [Thomson ISI](#)
- Impact Factors miden:
 - la popularidad de una ciencia o un tema
 - la cantidad de científicos que publican en ciertas disciplinas

Ejemplo: revistas biomédicas normalmente tienen un impact factor mayor que revistas de ingeniería

- Sin embargo, el uso de una revista también es un factor importante.
- A veces un impact factor puede hasta ser inapropiado.
- Impact factors pueden subir y bajar, p.e. El incremento del número de artículos o tomos de una revista puede causar un descenso en el impact factor del año siguiente.

- Supporting Materials

Conclusión y referencias: **necesarias**

Agradecimiento y material de soporte: opcionales

- Asegúrese que el mensaje de su artículo esté claro
- ¿Es el contenido importante o está ofreciendo algo nuevo?
- ¿Es su artículo relevante a la especialidad de la revista a la que quiere mandar el artículo?
- Compruebe el tiempo de publicación de la revista – ¿tiene muchos retrasos? En caso afirmativo, ¿por qué? (¿un porcentaje de rechazo bajo? ¿Dudosa gestión? ¿Problemas con el proceso de revisión?)
- Sus investigaciones deben cumplir con las garantías de calidad que hayan solicitado los editores y revisores de la revista.
- Asegúrese que la ciencia en la que está basada su investigación es válida y que apoye las conclusiones a las que ha llegado.
- Trabaje con su estilo . Debe ser claro, concreto y conciso . Menos es más.
- Afine sus técnicas revisando artículos de otros compañeros, le ayudará a desarrollar su propio sistema para escribir artículos científicos.

- Construya frases cortas que incluyan una idea o información, evitando múltiples declaraciones en una única frase
- Compruebe que el Inglés utilizado es el correcto, consultando a personas que dominen este idioma, para su revisión antes de enviar el artículo a la revista seleccionada.
- En la introducción debe describir el contexto para convencer a los lectores de que su trabajo es útil y valioso: de esta forma se enfoca la descripción dentro del objetivo general de la publicación
- No describa extensamente procedimientos o metodologías que ya han sido publicadas previamente. En este caso, descríbalas brevemente indicando las referencias bibliograficas pertinentes
- Presente los resultados más relevantes utilizando figuras e ilustraciones (gráficos, tablas, fotos)
- En los reconocimientos: nombre las personas o entidades que han ayudado en alguna fase del trabajo: incluyendo: asesores, soporte financiero, revisores etc.
- En las referencias: cite las publicaciones principales que han servido de base o las más relacionadas con el trabajo.

- Lea bien las instrucciones de la revista y asegúrese de seguirlas.
- Nunca debe mandar un artículo a más de una revista a la vez!
[Publishing Integrity](#)
- Si los revisores de la revista le indican recomendaciones para corregir su artículo de nuevo, seguirlas.
- No se desanime si el artículo es rechazado – simplemente puede ser por el hecho que la revista a la que lo ha mandado tiene un porcentaje de rechazo alto.

Investigadores pertenecientes a una organización Prepay Member pueden publicar sus artículos de investigación en cualquiera de las revistas de BioMed Central, Chemistry Central, PhyMath Central y SpringerOpen sin pagar directamente el importe del procesamiento del artículo.

Los investigadores pertenecientes a instituciones que son Supporter Members de BioMed Central, obtienen un descuento especial del importe del procesamiento del artículo .

The screenshot shows the SpringerOpen website homepage. At the top, there is a search bar with the text "Search SpringerOpen" and a "Go" button. Below the search bar is a navigation menu with links for "Home", "Journals", "Articles", "About SpringerOpen", and "My SpringerOpen". The main content area is divided into several sections:

- Welcome SpringerOpen Authors:** A text block explaining the benefits of publishing open access in all areas of science.
- SpringerOpen journals:** A section titled "Latest journals open for submission" with a list of journals: "Organic and Medicinal Chemistry Letters", "Planetary Science", and "Psychology of Well-Being".
- Articles:** A section with tabs for "Latest" and "Most viewed". It features two article entries, each with a title, authors, and publication details. The first article is "Nano Express" about ultraviolet photodetectors, and the second is "Nano Review" about electronic and magnetic properties of SnO₂/CrO₂ thin superlattices.
- Libraries:** A section titled "Libraries" with a "Learn more" button.
- Submit a manuscript:** A section titled "Submit a manuscript" with a "Submit" button.
- Email alerts:** A section titled "Email alerts" with a "Sign up" button and an input field for an email address.
- Register:** A "Register" button at the bottom right.
- Twitter updates:** A section titled "Twitter updates" with two tweets about open access policies and journal submissions.

Derechos de los autores

- el autor puede archivar la versión pre-editada
- Se deposita en PubMed Central

Híbrido Acceso Abierto

- Mayoría de las revistas de Springer tienen la opción de publicar con Acceso Abierto
- Opción: Open Choice para autores individuales:
honorarios por artículo
€ 2000/ USD \$ 3000

Acceso Abierto total

The fundamental questions arising in mechanics are: Why?, How?, and How much? The aim of this series is to provide lucid accounts written by authoritative researchers giving vision and insight in answering these questions on the subject of mechanics as it relates to solids. The scope of the series covers the entire spectrum of solid mechanics. Thus it includes the foundation of mechanics; variational formulations; computational mechanics; statics, kinematics and dynamics of rigid and elastic bodies; vibrations of solids and structures; dynamical systems and chaos; the theories of elasticity, plasticity and viscoelasticity; composite materials; rods, beams, shells and membranes; structural control and stability; soils, rocks and geomechanics;

Springer es la mayor editorial científico-técnico-médica del mundo

Publicamos más de 2700 revistas y más de 6500 nuevos libros al año

Los mejores investigadores del mundo publican con Springer

Estamos aquí para difundir sus conocimientos

Sabemos lo que hacemos con 170 años de experiencia

Nos encanta ayudarles con sus publicaciones tanto para revistas como para libros.

Nuestros libros se publican en tres formatos: e-libro, Impreso(papel), MyCopy

Su esfuerzo para publicar dispone de toda nuestra atención.

¡ GRACIAS POR CONSIDERARNOS SU EDITORIAL!

- ¿ Preguntas?
- ¿ Quiere publicar con Springer?
- ¿ Tiene ideas para co-publicar?

No dude en contactarme:
