Contents

DDD

- UAB Institutional Repository
- Nearly 200,000 records
- Heritage, research and institutional documentation
- Collection management by Library Service
- UAB research groups' /centres' customised collections
- Open access granted
- Publishers' policies “taken into account”
- Well positioned in rankings
- [Digital Preservation Policy](#)

Institutional Open Access Policy

- Drawn up by the Library Service and approved by the Governing Council
- For academic-research staff and students.
- Academic and scientific publications and educational resources.

Open Access Commission

Stakeholders:

- Vice-Rector for Research and Transfer
- Vice-Rector for Institutional Relations and Culture
- Rector's Commissioner for ICT
- Deputy Executive Administrator for Research
- Information and Communications Technologies Manager
- Publishing Service Director
- Library Services Director
- Teaching and Research Staff members
- Library Service members
- Members of Research Management Area

The Action Plan for Open Access at the UAB:

The plan is the Commission's roadmap detailing the actions to perform at UAB to promote open access

Highlighted Actions:

- ORCID at the UAB
- [CC licenses recommendations](#)
- [UAB open access journals](#)
- CRIS-UAB connected to DDD
- DDD self-archiving forms
- [Intellectual Property and Open Access Information Platform](#)

Institutional Open Access web

Scientific output in Open Access

Gathers together all information about OA:

advantages, legal framework, funding for publication, good practices, OA data, funding agencies, etc.

Open access monitoring

Open Research Thermometer

Open access monitoring

OA Observatory

Working towards Plan S

1. All publications under a CC license

All UAB journals are published under CC licenses. UAB Publishing Service encourages use of the CC-BY license, in line with the Budapest Open Access initiative

[UAB CC licenses recommendations](#)

4. Publication fees covered by funders or research institutions.

Financial aid thanks to bonuses and discounts on APC prices with membership fee: MDPI, RSC...

Working towards Plan S

6. Aligned strategies, policies and practices of all stakeholders

[The Strategic plan of the Library Service](#) (2019-2022), within the framework of the 2018-2030 UAB Strategic Plan, sets two main objectives in this regard.

- Make progress in the open science field.
- Contribute actively to spotlighting all scientific output.

The DDD has been implementing quality improvements according to the needs that arise (eg: hosting datasets and DMP) and Plan S criteria established.

Plan S and repositories

Mandatory criteria for compliance

PIDs for deposited versions of publications	
High quality article metadata / non proprietary format / CC0	
Machine readable information on the OA status and license in the article	
Continuous availability (uptime at least 99.7%)	
Helpdesk	

Plan S and repositories

Strongly recommended additional criteria for compliance

Manuscript submission system: individual and bulk uploads	
Full text stored in a machine-readable community standard format	
Support for PIDs for authors, funders...	
Openly accessible data on citations in accordance with the standards set by the Initiative for Open Citations (I4OC)	
Open API to allow others to access the content	
OpenAIRE compliance of the metadata	
Link with authoritative bibliographic metadata from third party systems: PubMed, Crossref, Scopus...	

Institutional Research Data Policy

- **Written by all stakeholders**
- **This policy will address the following points:**
 - Who is affected
 - Intellectual property (or Copyright issues)
 - FAIR principles
 - Technical issues of publication: DOI for datasets, mandatory ORCID for authors, open licenses...
 - Stakeholders' responsibilities
 - Preservation period
 - Review of the policy

Contents

Future

- Approve the Institutional Open Access Research Data Policy
- Transform the current Institutional Open Access Policy into an Institutional Open Science Policy.
- Open Access Board → Open Science Board, and extension of new fields
- Improve the interconnection CRIS-DDD
- More financial incentives in the UAB, regarding:
 1. researchers (Phd students included) publishing in Open Access journals (Gold route)
 2. new open access memberships
- Set reward systems to deposit articles post-prints to DDD
- Negotiate, with our Consortia, transformative subscriptions with publishers

Thank you!
