Objectives and Contextualisation

This is a compulsory course, taught during the first semester of year two.

The main goal of the course is to gain knowledge on the Spanish economy mainly from a macroeconomic point of view. The recent evolution and the current situation of the Spanish economy is explained in an international economic context. Attention is devoted to the trajectories of key macroeconomic variables and the accompanying economic policy measures. Students are introduced to the main economic features of the Spanish economy and the interpretation of its developments through the lens of basic theoretical concepts and analytical tools.

The objectives of the course are the following:

1. Increase the students' interest for the study of the economy.
2. Increase the students' knowledge of the general functioning of the economy, its different markets, and its economic institutions.
3. Application of the economic analysis to specific realities.
4. Achievement of a better empirical comprehension of economic dilemmas.

5. Uncover the social dimension of the economy and its relationship with welfare.
6. Stimulate students express their progress in written work, oral communication, and the identification and processing of the relevant information related to the course.
