

Treball de Fi de Màster**2014/2015**

Code: 43062

ECTS Credits: 15

Degree	Type	Year	Semester
4313784 Estudis Interdisciplinaris en Sostenibilitat Ambiental, Econòmica i Social	OB	0	2

Contact

Name: Carme Miralles Guasch

Email: Carme.Miralles@uab.cat

Use of languages

Principal working language: anglès (eng)

Some groups entirely in English: No

Some groups entirely in Catalan: Yes

Some groups entirely in Spanish: No

Prerequisites

None.

Objectives and Contextualisation

The objective of the Master Thesis is to prepare students for future research work, namely a doctoral thesis or an R + D project in a company. Assessment of students' Master Thesis is not only based on the contents of the paper itself. It also takes into account other essential skills required by a researcher, such as the ability to synthesise information, the discussion of results, the preparation and giving of oral presentations and the appropriate use of language (written and spoken).

Skills

- Analitzar el funcionament del planeta a escala global per comprendre i interpretar els canvis ambientals a escala global i local.
- Analyse, summarise, organise and plan projects related to the environmental improvement of product, processes and services
- Aplicar els coneixements d'enginyeria ambiental a la depuració i al tractaments de la contaminació de diferents ambients.
- Aplicar els coneixements i les metodologies apresos sobre sostenibilitat ambiental, econòmica i social a la planificació i el control de polítiques i projectes de gestió ambiental.
- Aplicar la metodologia de recerca, les tècniques i els recursos específics per a investigar i produir resultats innovadors en l'àmbit dels estudis ambientals.
- Apply knowledge of environmental and ecological economics to the analysis and interpretation of environmental problem areas.
- Buscar informació en la literatura científica fent servir els canals apropiats i integrar aquesta informació per plantejar projectes de recerca en ciències ambientals.
- Communicate and justify conclusions clearly and unambiguously to both specialised and non-specialised audiences.
- Comunicar oralment i per escrit en anglès
- Continue the learning process, to a large extent autonomously
- Integrate knowledge and use it to make judgements in complex situations, with incomplete information, while keeping in mind social and ethical responsibilities.

- Que els estudiants sàpiguen aplicar els coneixements adquirits i la seva capacitat de resolució de problemes en entorns nous o poc coneguts dins de contextos més amplis (o multidisciplinaris) relacionats amb la seva àrea d'estudi.
- Work in an international, multidisciplinary context.

Learning outcomes

1. Analitzar els processos i els problemes ambientals aplicant els coneixements teòrics, metodològics i instrumentals.
2. Aplicar la metodologia de recerca, les tècniques i els recursos específics per a investigar i produir resultats innovadors en l'àmbit dels estudis ambientals.
3. Buscar informació en la literatura científica fent servir els canals apropiats i integrar aquesta informació per plantejar projectes de recerca en ciències ambientals.
4. Communicate and justify conclusions clearly and unambiguously to both specialised and non-specialised audiences.
5. Comunicar oralment i per escrit en anglès
6. Continue the learning process, to a large extent autonomously
7. Emprar el coneixement sobre el funcionament del planeta a escala global en lelaboració del TFM.
8. Emprar els coneixements d'enginyeria ambiental en lelaboració del TFM.
9. Integrate knowledge and use it to make judgements in complex situations, with incomplete information, while keeping in mind social and ethical responsibilities.
10. Interpretar les diversitats i la complexitat dels territoris i el medi ambient amb criteris de tipus econòmic, social i cultural.
11. Que els estudiants sàpiguen aplicar els coneixements adquirits i la seva capacitat de resolució de problemes en entorns nous o poc coneguts dins de contextos més amplis (o multidisciplinaris) relacionats amb la seva àrea d'estudi.
12. Utilitzar els conceptes i els mètodes apresos en els coneixements de leconomia ambiental i ecològica en lelaboració del TFM.
13. Utilitzar els coneixements sobre projectes de millora ambiental en lelaboració de TFM.
14. Work in an international, multidisciplinary context.

Content

There are no theoretical contents for this course.

Methodology

In November/December, there will be a research lines presentation session in order to introduce students the topics available for their Master Thesis. Students will be then contacting the main researchers of the research lines they are interested in to decide who will be their supervisor and the topic of their research.

The research work done by the student and guided by the supervisor will end up with the elaboration of a research paper.

Activities

Title	Hours	ECTS	Learning outcomes
Type: Supervised			
Regular meetings with the supervisor	25	1	1, 2, 3, 5, 7, 8, 10, 9, 11, 4, 6, 14, 12, 13
Type: Autonomous			
Elaboration of a research paper	350	14	1, 2, 3, 5, 7, 8, 10, 9, 11, 4, 6, 14, 12, 13

Evaluation

Students will be assessed based on the written paper as well as on an oral presentation. They are required to submit a research paper not exceeding 8,000 words, which must include the following sections:

- Abstract
- Introduction: antecedents and justification for the Master Thesis
- Objectives
- Research study plan and anticipated results
- Results
- Discussion of results
- Bibliography

Oral presentations will be held between 10 and 20 days after the submission deadline. Students must consider this in order to guarantee their presence at the scheduled date and time.

The final grade for the paper will consist on the average mark of the supervisor's report (30%) and the mark given by the committee (70%) both to the paper itself and to the oral presentation. The committee assesses:

- For the written paper:
 - Appropriate use of language. The paper can be written in English, Catalan or Spanish. Language choice is not a criterion for evaluation and the tribunal will only assess correct and appropriate use of the language chosen.
 - Format: how well this follows the "guidelines for papers" established by the journal chosen by the student.
 - Content and academic originality.
 - Conciseness and meeting the required length (maximum of 8,000 words)
 - Ability to discuss and interpret the results of the research.
 - Interdisciplinary scope of the research.
- For the oral defence:
 - Students' ability to articulate and express him/herself.
 - Conciseness and meeting the established time limit (30 minutes).
 - Quality of the presentation.
 - Ability to answer the questions asked by the committee.

Evaluation activities

Title	Weighting	Hours	ECTS	Learning outcomes
Oral presentation	50%	0	0	1, 2, 3, 5, 7, 8, 10, 9, 11, 4, 6, 14, 12, 13
Submission of a research paper	50%	0	0	1, 2, 3, 5, 7, 8, 10, 9, 11, 4, 6, 14, 12, 13

Bibliography

To be defined.
