Evaluation

The approach we propose aims to bring different marks on participation in the course in a continuous assessment of students.

Therefore we will create discussion tasks in which we will be assessing the students. A continuous assessment, measured through practice, written comments and a final exam it will be held.

To pass the course students will have pass with at least a mark of 5 each of the tasks evaluated:

a) 2 INDIVIDUAL DEDUCTION / DISCUSSION PAPERS (30% of FINAL MARK)

This work will be requested during the semester and will focus on answering questions about two papers (Available on Moodle).

b) 1 GROUP PAPER (30% OF FINAL MARK)

Students will analyze a case proposed at the beginning of the course. According to this case, students will develop some aspects throughout the semester.

c) 1 FINAL EXAM (40% OF FINAL MARK)

Focused on the theoretical content taught in the course.

d) ATTENDANCE

1. Attendance is mandatory 100% (Grade regulations). There will be a control system.
2. If a student does not attend at least 80% of the teaching activities can not be evaluated.
3. Excused absences not adversely counted and the teacher will allow the student to recover the work done in class in the case of excused absence.

An excused absence must be documented. Excused absences can only be derived from illness or similar situations.

4. If the teaching activity cannot be performed by student strike or teachers, students shall be required to prepare the content on their own and will be assessed.

Teachers can provide students with specific material to prepare the content that had been discussed in the lecture class. (Agreement of the Committee , June 2012).

Those who fail the continuous assessment they can try to pass the course in the final weeks of the course.

According to papers or exams, they can be passed in the sessions scheduled for this purpose

If during an exam, any student is detected copying from another student or from any other material, automatically will fail the course without the option of recovery at the end of the semester. In case of plagiarism in a paper, each case will be analyzed, and the student could eventually fail the entire course without the option of recovery.

UNIVERSITAT A L'ABAST

Because of its special status in this course, we beg the students of the Universitat a l'Abast to contact the head of the subject at the beginning of the course to set targets for evaluation
