Use of languages

Principal working language: catalan (cat)

Other comments on languages

There could be seminars in the three language (Catalan, Spanish, English). Each invited professor could choose the language of their lecture.

Prerequisites

Basic knowledge of Biochemistry, Molecular Biology and Biomedicine

Objectives and Contextualisation

The main objectives of the seminar module are:

The student should be able to understand and analyze the contents of the seminars which the student will attend. The student must integrate knowledge in biochemistry, molecular biology and biomedicine acquired in the master with the contents of these seminars.

The student should be able to ask questions to the professors about content of lecture.

The student should be able to summarize and critically evaluate the scientific content described in the seminars.

Important: If plagiarism is detected in any of the works submitted, the student will fail the whole module.

Content

A program of specific seminars for each course is developed. The list of seminars will be sent at the beginning of each semester to the students of master. In the program of seminars will involve researchers and industry professionals renowned in the field of Biochemistry, Molecular Biology and Biomedicine. The seminars will be taught by visiting professors of the master. Will also be invited to participate in the series of seminars for teachers invited by the departmental units, institutes and research centers involved in the master (CBATEG, CEB, INC IBB, IIB Sant Pau, VHIR ...) and which criteria coordinator are suitable for students of the master.
