## Objectives and Contextualisation

This module introduces a view into the problems, epistemologies and methodologies of research in education from gender studies, postcolonial studies and critical theory. Currently, the research about the construction of identity is being developed in different disciplines that can interact: education, psychology, anthropology, sociology and art, among others. Thus, we will approach to the emerging research topics on the construction of identities from a reading of gender, social class, ethnicity and age positions in the context of spaces and transitional processes in the educational practices.

The module will address the relationship between the epistemological and methodological frameworks to account for decisions in research and seeking the intersectionality of the categories of gender, social class, age and cultural diversity in the analysis. Finally, it focuses on the research of the construction of nomadic-and-in-transit identities in the context of minority communities and social groups (children, youth, women, immigrants, etc.). Moreover, it will analyse the sex-gender system in the dynamics of inclusion and exclusion, in dialogue with the construction of otherness, difference and power relations in educational contexts.
