Reading texts on the dimensions of the subject.

Whole attendance group sessions
Expositions by teachers on the content and key issues of the syllabus. It is done with the whole group class and allows exposure of the main content through an open and active participation by students.

Planning and organization of exercises and activities to be held later in seminars.

Collective artistic activities: trips / visits (museums, art exhibitions ..), lectures, audiovisual ...

**Seminars**

Workshops in small groups supervised by teachers where there will be specific proposals of the area: individual and group. Delves into the contents and themes worked in the large group.

Reflections of texts and viewing audiovisual documents related to the topics of the subject

Educational projects in the field of art education in Early Childhood education

**Supervised activities**

Tutoring sessions or small groups for monitoring the design, creation and implementation of educational interventions.

The sessions of this course are based on research and experimentation with materials by students, which requires an investigation based image documentation and of recycling materials for art education. In addition, the methodology adopted for its successful development requires that students bring to the classroom especialised materials for the development of artistic activities (brushes and paints, among others). Teachers will recommend the most suitable material for planned activities, which will have a sustainable cost and can be shared among students. We will search for mechanisms to ensure that the student can have it in case they do not have the necessary resources.
