- Work in teams and with teams (in the same field or interdisciplinary).

## **Learning outcomes**

1. Establish work teams to develop activities independently.
2. Incorporating the motor skills, body expression, physical conditioning, play and sporting activities as content of school physical education and sequencing them throughout primary education.
3. Know and appreciate appropriate educational software and web sites for the teaching and learning of Physical Education.
4. Learning to work as apart of a team individually, both in theoretical and practical activities, searching for appropriate resources and strategies in every situation.
5. Obtaining the PE resources that encourage inclusive education in contexts of diversity.
6. Presenting work, both individual and from a small group, in formats adjusted to the demands and to personal styles.
7. Programming, organising and applying learning and contents in education for health in physical education health education, designing and developing educational projects or programming units that make it possible to adapt the physical education curriculum to the school and promote the quality of the contexts.
8. Recognising the historical evolution and possibilities of physical education to generate healthy habits and well-being throughout life.
9. Sequencing perception-motor capabilities throughout primary school teaching according to the internal logic of this content.
10. Understand personal differences that arise in PE activities as an aspect to be dealt with using educational criteria.
11. Using ICTs and CLTs to search for information and to develop and draw up practical work and didactic proposals in the field of Physical Education.
12. Using motor skills and body language as elements pertaining to communication skills.
13. Working efficiently as part of a team and individually, both in theoretical and practical activities, seeking resources and strategies that are appropriate for each situation.

## **Content**

1. General introduction to learning and motor development
  - 1.1. Concept of motor skills and interest in education and primary stage.
  - 1.2. Learning and development, esencials baths in education
  - 1.3. Motor learning and motor development, two different concepts. Interrelationships.
2. Motor Development
  - 2.1. terminological problems (growth-maturation, stimulation and reflection, heritage-medium)
  - 2.2. biological development of human beings.
  - 2.3. Theories and models of development (Piaget, Gessel, Wallon, Le Boulch, Gallahue)
  - 2.4. Stages of motor development.
  - 2.5. Motor development in infant and primary education.

2.6. Social determinants in the development of children.

3. Motor learning.

3.1. Perceptual abilities and basic motor skills: conceptualization and classifications. naturalist vision. curricular interpretation. Early stimulation.

3.3. methodological proposals for the development of perceptual skills and motor skills in primary education.

3.4. The evaluation of perceptual skills and motor skills in primary education.

3.5. Programming, timing and delivery of training activities aimed at perceptual skills and motor skills in primary education. Internal competence practices (PCI).

## Methodology

It will promote the participation of students together with the production of innovative materials for understanding the course content through active and participatory teaching methods.

- **Participatory and reflective activity:** conducting lectures and promotion of anàili critical discussions.

- **Experiential activities:** Guided by the teacher. Design by the students themselves practical tasks based Physical Education, experimentation with and implementation in the classroom.

- **Cooperative Activities:** carrying out work in small groups. Internal competence Practices

- **Promotion of work and research processes:** preparation and public presentation of research, formatting and depth proportionate to the time available in the field of development and motor learning in school ages.

## Activities

Title	Hours	ECTS	Learning outcomes
<b>Type: Directed</b>			
Lectures in class group	15	0.6	12
Practical lessons in class group.	30	1.2	3, 11
<b>Type: Supervised</b>			
Mentoring and monitoring academic work and teaching practices internal.	30	1.2	13, 11
<b>Type: Autonomous</b>			
Design and development of research related to own a factor of motor learning.	45	1.8	3, 13, 11
Design, preparation and presentation of practical educational activities related to motor learning.	30	1.2	13, 11

## Evaluation

The evaluation will be ongoing and will be based on individual and group work.

Verification of plagiarism in some of the course work will mean failing the whole course.

Attendance is mandatory. If it exceeds 20% of absences in lectures and / or practices, the student not pass the course.

## Evaluation activities

Title	Weighting	Hours	ECTS	Learning outcomes
Attendance and active participation in lectures and practical classes.	15%	0	0	5, 10, 2, 7, 8, 9, 12
Design, development and delivery of a physical education session with the class group dedicated to motor learning.	20 %	0	0	3, 13, 11, 12
Design, preparation and presentation of research related to learning and motor development	25 %	0	0	3, 1, 2, 13, 11
Self appraisal	10 %	0	0	2, 6, 13
Written exam on the whole course program.	30%	0	0	6, 4, 11, 12
