Prerequisites

The quantitative part of the course assumes no prior knowledge other than a minimal mathematical background. Students who have not taken any type of quantitative course since high school should read the following text before the course starts:

Those who want to gain some more statistical insight are also strongly encouraged to read:

Objectives and Contextualisation

Aim of course

The aim of this course is for the students to be familiar with and know how to apply a series of the main social science research techniques of collecting and analysing data. In order to meet these objectives we include both quantitative and qualitative techniques. We cannot cover all the research techniques of the social sciences, but centre on those that can be found in the main social science journals. We prioritize issues of practical training and interpretation over very mathematical questions.

ACQUIRED SKILLS

Specific skills

- To identify and know how to affront the main methodological difficulties that occur in a political science analysis
- To work with a complex and diverse set of data and sources of information
- To design a research project that satisfies criteria of excellence and rigorous analysis.
• To apply those qualitative and quantitative research techniques which are necessary for a systematic and rigorous analysis of political reality.

Transversal skills

• To be able to evaluate applied or academic research with relevant criteria.
• To be able to design academic and applied research projects in an independent manner and using the relevant terminology, argumentation and analytical framework.
• Demonstrate the ability to read and understand specialized texts in English.

Skills

• Apply the qualitative and quantitative techniques necessary for the systematic and rigorous analysis of specific aspects of politics today.
• Demonstration reading comprehension for specialist texts in English.
• Design a research project that satisfies the criteria of rigour and academic excellence.
• Design and write projects and technical and academic reports autonomously using the appropriate terminology, arguments and analytical tools in each case.
• Identify the main methodological difficulties that arise in political analysis and know how to deal with them using the existing tools.
• Manage a set of political science data and specific sources, such as statistics, surveys or other documents.
• Using the appropriate criteria make an individual evaluation of reports, documents and research carried out by third parties.

Learning outcomes

1. Access data sources appropriate for the analysis of political science.
2. Demonstration reading comprehension for specialist texts in English.
3. Design and write projects and technical and academic reports autonomously using the appropriate terminology, arguments and analytical tools in each case.
4. Identify appropriate to answer a research question and analyze qualitative data using the main techniques of analysis and appropriate software coding qualitative techniques.
5. Identify the main advantages and difficulties with respect to the validity and reliability of the techniques selected.
6. Identify the most appropriate statistical method to respond to a research question with the data available and analyse quantitative data using the appropriate statistical software.
7. Make socio-political phenomena observable and/or quantifiable.
8. Process and prepare data collected for analysis using the corresponding software.
9. Relate one of more quantitative and/or qualitative techniques to a research question and justify why this was the most appropriate selection.
10. Understand the current debates and challenges of the main quantitative and qualitative research techniques.
11. Understand the main qualitative and quantitative research techniques.
12. Using the appropriate criteria make an individual evaluation of reports, documents and research carried out by third parties.

Content

QUALITATIVE METHODS (Convenor: Eva Østergaard-Nielsen)

Introduction:

Session 1. Introduction to qualitative research techniques
What are the main characteristics of qualitative research? How to assess validity and reliability in qualitative research? What kind of research questions can we ask using qualitative research techniques? Which types of qualitative techniques can best be combined and how may they be triangulated?

**Required Readings:**

- Della Porta, Donatella and Michael Keating, M. 2008. Approaches and methodologies in the social sciences, part I

**Recommended Reading:**

**Data collection:**

### Session 2. Interviews

What are the characteristics and differences between structured, semi-structured and open-ended/narrative interviews? How may the researcher sample the interviewees in a qualitative research project?

**Required Readings:**

**Recommended Readings:**

- How many qualitative interviews is enough? Read the following text: [http://eprints.ncrm.ac.uk/2273/4/how_many_interviews.pdf](http://eprints.ncrm.ac.uk/2273/4/how_many_interviews.pdf)

### Session 3. Focus Groups

In this class, there will be an introduction to focus group, taking into account conceptual considerations, best practices and how to design it.

**Required readings**

- Kitzinger, J. (1994) The methodology of focus groups: the importance of interaction between research participants. Sociology of Health and Illness, 16 (1): 104-121.

**Recommended readings**

### Session 4. Field research
This class will examine methodological and practical issues of ethnographic research. It will cover: typologies of field research, the fieldwork entry, the (participant) observation, the collection of information, and the analyses of qualitative evidence.

Required readings

Recommended Readings:

Data analysis:

Session 5. Discourse analysis

This session will clarify what discourses are, how they function and how we can analyse them. In addition, we will deal with the types of discourse analysis and we will reflect upon the kinds of data we can examine discursively.

Required readings

Recommended readings

Session 6. Further issues in Qualitative Research

We will cover ethical issues, sensitive topics, and transparency in qualitative research (active citation and archiving).

Required readings:

Recommended reading:

Sessions 7, 8, and 9. Analysis of Interviews: Introduction to CAQDAS and ATLAS.ti
The main aim of these sessions is to introduce the CAQDAS and ATLAS.ti software applications' basic elements to analyse qualitative interviews. By doing so, other goals will be reached: on one hand Grounded Theory's methodological approach to data analysis is presented. On the other, we will reflect upon the process of qualitative (inductive or deductive) codification and its link to the research design.

Required Readings (both in the UAB Library):

- Introduction to Atlas.ti. Exercises. PDF uploaded to the Campus Virtual.

Other recommended or alternative readings:

There are different texts by Corbin, J. & Strauss, A.; Friese, S. or Charmaz, K. available from the UAB Library system. They can complement or support the chapter by Birks, M. & Mills, J. on the Grounded Theory approach (see Corbin, Strauss, Charmaz) or be used as an alternative to the Lewins, A. & Silver, C.'s Atlas.ti manual (see Friese).

- Charmaz, Kathy (2001) "Qualitative interviewing and Grounded Theory analysis", in Gubrium, Jaber F.; Holstein, James A. (eds) Handbook of Interview Research: Context and Method, SAGE Publications (UAB Library has it)
- Friese, S. (2012) Qualitative Data Analysis with Atlas.ti, SAGE (UAB Library has it), there is a second edition (2014) including new features of Atlas.ti

QUANTITATIVE METHODS (Convenor: G. RICO)

All sessions take place in the computer lab and are structured in two parts. The first part is devoted to a lecture. The second is intended to provide practical experience with the related lecture topics, mainly through exercises with the statistical software Stata. A short introduction to data analysis and Stata will be offered at the end of the first semester within the Introduction to Research course.

This course draws heavily on the following books:

For some parts we will also make use of:

Pre-course Session A: Introduction to data analysis

Pre-course Session B: Descriptive statistics

Required Reading:
Session 1: Basic bivariate analysis

Required Reading:
- Essentials, pp. 24-43
- Stata, pp. 13-27

Recommended reading:
- Essentials, pp. 48-70

Session 2: Introduction to statistical inference

Required Reading:
- Essentials, pp. 123-153
- Stata, pp. 103-106

Session 3: Bivariate hypothesis testing

Required Reading:
- Essentials, pp. 156-170
- Stata, pp. 106-109, 113-114 & 121-122

Recommended reading:

Session 4: Correlation and bivariate regression

Required Reading:
- Essentials, pp. 183-197
- Stata, pp. 131-136

Session 5: Making controlled comparisons

Required Reading:
- Essentials, pp. 78-97 & 102-118
- Stata, pp. 81-91

Session 6: Multiple regression (I)

Required Reading:
- Stata, pp. 136-138

Session 7: Multiple regression (II): Categorical independent variables

Required Reading:
- Essentials, pp. 198-201
- Stata, pp. 149-154

Recommended reading:

Session 8: MIDTERM EXAM

Session 9: Multiple regression (III): Interactions

Required Reading:

• Essentials, 203-207
• Stata, pp. 154-160

Recommended reading:

• TBA

Session 10: Logistic regression (I)

Required Reading:

• Stata, pp. 167-174
• Essentials, 215-233

Session 11: Logistic regression (II): Postestimation and predicted probabilities

Required Reading:

• Stata, pp. 175-182
• Essentials, 233-238

Recommended reading:

Session 12: Regression model extensions

Required Reading:

• Kellstedt & Whitten, pp. 256-269

Sessions 13 and 14: Limits and alternatives to regression for causal inference

Readings: TBA

Session 15: FINAL EXAM

Methodology

The sessions on quantitative and qualitative research techniques will be taught in parallel over the 8 weeks of the course. The classes combine theoretical lectures with seminars and sessions of practicing different techniques. An important part of the course takes place outside of the classroom in order to consolidate the use of a selection of the research techniques.

### Evaluation

The major part of the evaluation of this module is through continuous practice and feedback on the understanding and use of various research techniques. The evaluation consists of:

- Participation in class (it is obligatory to attend at least at 80% of the sessions in order to pass this module)
- 7 exercises related to the different qualitative and quantitative research techniques.
- Exams related to the quantitative sessions.

**The evaluation on qualitative techniques represents 40% of the final grade:** The students will hand in 4 exercises during the course:

- Exercise 1. Practice of Interviews (25%)
- Exercise 2: Practice of Field research (25%)
- Exercise 3: Practice of Discourse analysis (25%)
- Exercise 4: Practice on the main Atlas.ti functions of support for analysis of qualitative interviews (25%) HU "bundled" project.

**The evaluation on quantitative techniques represents 60% of the final grade:** The students will submit 3 homework assignments during the course:

- Assignment 1: Bivariate analysis (10%) due on 22 February
- Assignment 2: Multiple regression (15%) due on 13 March
- Assignment 3: Logistic regression (15%) due on 22 March

They will also complete two exams:

- Midterm exam (25%) 1 March
- Final exam (35%) 17 April
IMPORTANT: In order to pass the course, it is required for students to obtain a grade of at least 5 over 10 in each of its two parts—qualitative and quantitative. In order to pass the quantitative part, students must obtain a grade of at least 5 over 10 in the final exam.
