**Contact**

Name: Enric Roca Casas  
Email: Enric.Roca@uab.cat

**Teachers**

Maria del Carme Gaspar Pellin

**Prerequisites**

None

**Objectives and Contextualisation**

**Objectives and contextualization**

The objectives of this module are:

1. Identify and explain the requirements of the tutorials and guide candidates in personal, academic and professional / vocational areas.

2. Design and develop study plans and programs as well as give personal, academic and professional guidance.

3. Evaluate psycho-pedagogically variables and programs related to orientation and future action to be taken in tutorials.

4. Identify, explain and plan activities in specialized teaching teams, and in conjunction with external agencies and families, in order to optimize tutorials in schools.

**Skills**

- Advise teaching professionals on measures for attention to diversity in the organisation and the design, implementation and evaluation of teaching and learning processes.
- Analyse data obtained in educational psychology assessment and write reports in accordance with the nature of the data.
- Analyse the organisation and functioning of schools in order to coordinate personal, academic and professional guidance for all pupils and the educational community.
- Assess the educational psychology needs of pupils, groups and organisations by applying different methodologies, instruments and techniques.
• Continue the learning process, to a large extent autonomously
• Critically analyse one's own work and use resources for professional development.
• Develop skills and techniques for guiding and counselling families.
• Use acquired knowledge as a basis for originality in the application of ideas, often in a research context.
• Work in and with unidisciplinary or multidisciplinary teams and participate actively as a member of the community.

Learning outcomes

1. Apply the standpoints of social and educational inclusion, identifying its possibilities and limitations.
2. Continue the learning process, to a large extent autonomously
3. Critically analyse one's own work and use resources for professional development.
4. Design professional orientation strategies for employability and making the transition into the labour market.
5. Design the process of collaboration between the different educational agents on curriculum development and institutional plans, especially the tutorial action plan in secondary, upper-secondary and vocational education.
6. Develop the plan for (personal, academic and professional) educational guidance within the secondary school's educational project.
7. Draw up or revise educational psychology reports that include guidelines on educational intervention in secondary school.
8. Establish guidelines for the design of proposals on teaching and organisational planning in order to improve the educational response of secondary-school pupils.
9. Exemplify the key steps in preparing and implementing educational guidance and counselling programmes and actions.
10. Identify the educational needs of secondary pupils, especially those related to conflict and companionship.
11. Implement educational monitoring programmes that include educational guidance and counselling for families, to reinforce their role in guiding children’s progress.
12. Prepare diagnostic reports and schooling recommendations for all pupils in early-childhood and primary education with special educational needs.
13. Set up and plan guidance and counselling programmes/services with the aim of optimising teaching-learning processes and the academic performance of secondary-school pupils.
14. Use acquired knowledge as a basis for originality in the application of ideas, often in a research context.
15. Work in and with unidisciplinary or multidisciplinary teams and participate actively as a member of the community.

Content

1. Giving educational guidance and tutorials to secondary school students. Personal, academic and professional guidance. The relationship between educational guidance and how tutorials work.

3. Educational needs of students in relation to personal, social, academic and career development: the concept of self and self-esteem; coexistence, participation, climate and conflicts; curricular competences; techniques and study habits; motivation; knowledge of the environment; vocational maturity and life projects (personal, academic and professional).

4. Guidance through programs and services. ICT resources. Design and development of programs for personal, academic and professional guidance.
5. Educational project. Tutorials and teaching teams in high schools. Coordination and relevance of tutorials. Roles and functions of the team: the counselor and the psycho-pedagogue. Tutorial models. The role of the tutorial in the process of assessing the results of student learning.

Methodology

The teaching methodology will combine the presentation of key issues and concepts by the instructor in seminars or via the analysis of documents. Situations, study cases and problems will be introduced and candidates will have to analyze, debate and address the relevant issues that arise dealing with them from a psycho-pedagogical standpoint.

Classwork and assignments will help candidates in their tasks through direct participation. Simulations and case studies will be analyzed from a conceptual point of view; strategies will be activated and skills honed.

Moreover, the process of acquiring the necessary knowledge and skills presented in the module will include the preparation of exercises and small individual assignments which will be collected in a portfolio.

Evaluation

The master’s program is based on cumulative, continuous assessment. It will consist of the following elements:

- **Attendance: 10%**

Attendance: 100% = +0,3; 93% = +0,2; 86% = +0,1.
• **Self-assessment: 5%**

Two questionnaires of self-assessment (one at the start, the other at the end of the module).

• **Portfolio: 85%**

The documents in the portfolio express the practical application of the contents of the module. The portfolio consists of four exercises in the form of small assignments related to the contents presented and developed in the seminars/workshops/classes. Candidates must submit all the exercises and obtain an average score of 50% for each in order to pass that part of the module.

Exercises will be done and delivered on time and according to the requests. They are included into the portfolio. Exercises will be returned with a brief evaluation in order to improve them. Exercises only will be evaluated once.

Results will be published on “Campus Virtual” no later than one month after being submitted by the candidate after which time the candidate will be able to go over their work with their tutor. The entire portfolio, with the four assignments, will constitute the practical synthesis of the candidate’s work developed during the module. In accordance with UAB regulations, individual or group plagiarism or copying of any work or written test will be penalized with a zero score (“0”) which means the student(s) will forfeit the possibility of repeating the assignment or test in the future (in the case of group plagiarism each student of the group will receive a zero score (“0”) for the assignment or test).

Attendance is compulsory and a minimum of 80% is required; otherwise the assessment will correspond to “unsatisfactory”.

In special cases any doubts or suggestions should be discussed with the instructors of the module and the coordinator(s).

**The assignment activities for the portfolio will be the following:**

<table>
<thead>
<tr>
<th>Nº</th>
<th>Assignment activity</th>
<th>Assessment criteria</th>
