Objectives and Contextualisation

The main objectives of the course External Internships I are:

- a) To contribute to the integral formation of the student complementing the theoretical and practical learning.
- b) To facilitate the knowledge of the working methodology appropriate to the professional reality of any legal field.
- c) To promote the development of technical, methodological, personal and participatory skills.
- (d) To obtain practical experience to facilitate their integration into the labour market and improve their future employability.
- e) To promote the values of innovation, creativity and entrepreneurship.

To this end, each entity collaborating with the Faculty of Law must appoint a tutor, responsible for ensuring the proper functioning of the student's internship. This tutor, who must have the appropriate knowledge, will have to contribute to defining the student's training project, ensure the student's training and, once the internship is over, will have to prepare the final report evaluating the internship.

Content

In view of the diversity of places on offer, there is no single content programme for external internships. The contents of each of the internship places is reflected, in its basic lines, in the offer made by each collaborating entity. All the internship offers are contained in the application you will have to access to select the internship place.

The content will be specified by the collaborating entity with each of the selected students.
