**Prerequisites**

No prerequisites. However, it is recommended to have passed the subject "Society, science, culture".

**Objectives and Contextualisation**

"Anthropology and Philosophy of Education" includes the fields of anthropology and philosophy of education needed on the training of pedagogues and social workers.

First, we will discuss basic topics of pedagogy from a philosophical and anthropological perspective and, second, we study contemporary authors and papers about thought and research in education. Finally, the course also aims to critically analyze contemporary society from philosophical and anthropological perspectives, and also from a gender perspective.

**Skills**

**Social Education**

- Adopt ethical behaviour and attitudes and act according to the ethical principles of the profession.
- Contextualize educational action based on the different theoretical paradigms that have developed in science and education in accordance with the socio-historical context of individuals, groups and institutions.
- Develop critical thought and reasoning and be able to communicate them effectively, both in your own language and second or third languages.

- Develop strategies for autonomous learning.
- Know and apply information collection, analysis, processing and evaluation processes, to improve professional practice itself and the foundation of professional action.
- Maintain a respectful attitude to the environment (natural, social and cultural) to promote values, behaviour and sustainable practices that address gender equality, equity and respect for human rights.
- Master the theoretical and applied knowledge of Educational Sciences to develop the capacity for analysis and observation of the social and educational reality.
- Respect the diversity and plurality of ideas, people and situations.
- Use information and knowledge from different sources and contexts (reports, articles, etc.) specific to the social sciences.

### **Education Studies**

- Adopt ethical behaviour and attitudes and act according to the ethical principles of the profession.
- Analyse and understand the theoretical, historical, cultural, political, environmental and legal references and situations involved in education and training proposals.
- Develop critical thinking and reasoning and know how to communicate effectively both in your own tongues and in other languages.
- Develop strategies for autonomous learning.
- Identify educational approaches and problems, inquire about them: obtain, record, process and interpret relevant information to issue supported judgments that enhance education and training.
- Maintain a respectful attitude for the environment (natural, social and cultural) to promote values, behaviours and practices that address gender equality, equity and respect for human rights.
- Respect the diversity and plurality of ideas, people and situations.
- Understand the processes that occur in educational and training activities and their impact on learning.
