Uso de idiomas

Lengua vehicular mayoritaria: inglés (eng)

Prerequisitos

If not native English speaker: valid IELTS (with a minimum score of 6.5) or TOEFL (minimum 550 paper based, 213 computer based, 79 web-based) score report or a Cambridge Certificate of Proficiency in English or Cambridge Certificate in Advanced English.

The students must hold an undergraduate degree with relevance to environmental or urban studies. Preferably with previous training in a social science (i.e., business, sociology, political science, economics)

Objetivos y contextualización

In this course we will explore the interdisciplinary field of Political Ecology. Political Ecology is a theoretical and methodological approach for the study of socio-ecological systems that focuses on conflict, power and the uneven distribution of environmental costs and benefits. This course will familiarize students with the key concepts and tools used by political ecologists. At the end of the course students should be able to do political ecology research themselves. They will also be introduced to profoundly new, critical, ways of looking at and understanding environmental problems and policies.

Training objectives of the course:

- Use social theory to analyse environmental problems
- Design case-study research and use qualitative research tools
- Understand the role of power in shaping environmental change

Competencias

- Aplicar los conocimientos de economía ambiental y ecológica al análisis e interpretación de problemáticas ambientales.
- Comunicar oralmente y por escrito en inglés.
- Que los estudiantes posean las habilidades de aprendizaje que les permitan continuar estudiando de un modo que habrá de ser en gran medida autodirigido o autónomo.
- Que los estudiantes sean capaces de integrar conocimientos y enfrentarse a la complejidad de formular juicios a partir de una información que, siendo incompleta o limitada, incluya reflexiones sobre las responsabilidades sociales y éticas vinculadas a la aplicación de sus conocimientos y juicios.

- Que los estudiantes sepan aplicar los conocimientos adquiridos y su capacidad de resolución de problemas en entornos nuevos o poco conocidos dentro de contextos más amplios (o multidisciplinares) relacionados con su área de estudio.
- Trabajar en un contexto internacional y multidisciplinar.

Resultados de aprendizaje

1. Comunicar oralmente y por escrito en inglés.
2. Conocer las diferencias en el acercamiento a los problemas ambientales por parte de la ecología política.
3. Desarrollar una visión integradora de la relación economía, política y sistemas biofísicos.
4. Que los estudiantes posean las habilidades de aprendizaje que les permitan continuar estudiando de un modo que habrá de ser en gran medida autodirigido o autónomo.
5. Que los estudiantes sean capaces de integrar conocimientos y enfrentarse a la complejidad de formular juicios a partir de una información que, siendo incompleta o limitada, incluya reflexiones sobre las responsabilidades sociales y éticas vinculadas a la aplicación de sus conocimientos y juicios.
6. Que los estudiantes sepan aplicar los conocimientos adquiridos y su capacidad de resolución de problemas en entornos nuevos o poco conocidos dentro de contextos más amplios (o multidisciplinares) relacionados con su área de estudio.
7. Trabajar en un contexto internacional y multidisciplinar.

Week 13 - Exam

21/1

Metodología

Classes will follow a seminar format with a combination of teaching by the instructor and discussion in class of assigned readings. For each class we will read and discuss two articles. Typically one of them will be more theoretical, presenting the main concept to be discussed in this class, and the second will include a case-study, applying the concept in an environmental problem or conflict.

All students are expected to have read these articles in advance and write short commentaries (see assignments). In each class a critical discussion of the key ideas of the articles will take place under the facilitation of the instructor. This might also include discussion in small groups, games, use of audiovisual material (movies, lectures by famous political ecologists, videos, etc).

Evaluación

1. Weekly homework

Each week you will have to write a 250 words essay, answering to a question related to the readings for that week. You should hand in the assignment to Brototi at the beginning of each class. The assignment will be graded (1-10) and returned in the next class with comments. If you want to discuss your assignments or our evaluation you can ask for an appointment with Brototi during her office hours.

The grade of the assignments will not be taken into account in your final grade, unless it is higher than that of your final exam, in which case it will count for 20% of your overall grade. The weekly assignments will help you recognize weaknesses and improve your writing, given that the final exam will consist of questions with the same style as the weekly assignments. In case you miss a class, you are sick, etc, you have to inform us in advance and then deliver the essay the following week or later as agreed with the instructor (it won't be graded though).

Failure to deliver the essay completely will have an impact on your overall final grade, half a point taken out of your final grade for each essay left undelivered.

Auditors have also to write the weekly assignment but are exempt from the final essay and exam.

2. Participation in class

Participation in class is encouraged, though it won't be evaluated or graded. Different people have different communication styles, some like to talk a lot, others less. We encourage discussion and participation with our teaching style, and we will try to encourage as many of you to speak up and position yourself with respect to the readings and the discussion.

3. Exam

This will take place on the 21st of January 2019 and will count for 70% of your final grade. The material under examination will consist of all the articles read and discussed during the semester. The style of the questions will be similar to those handed in the weekly homework, i.e. short questions which you will have 250 words to answer. The exam will be "take-home", and you will be expected to use whatever resources you wish to answer the questions. It will be sent by email to all of you at 9 a.m the day of the exam and should be handed in by email by 6 p.m. the same day. The exams will be graded anonymously.

3. Essay

This will count for 30% of your final grade. In due time, and before Christmas, you will be assigned a movie to watch or a text to read and write a 1000 words essay on it from a political ecology perspective. We will grade essays first and foremost for originality and creativity. You should deliver the essay after the final exam on the 27th of January.
