Use of Languages

Principal working language: spanish (spa)
Some groups entirely in English: No
Some groups entirely in Catalan: Yes
Some groups entirely in Spanish: No

Other comments on languages

Although the classes and the syllabus are in Spanish, verbal and written doubts in Catalan will be solved.

Prerequisites

There are no prerequisites.

Objectives and Contextualisation

A correct risk management goes through the analysis of the same, its correct evaluation, its reduction or cancellation, the correct assessment and its financing in case a mishap occurs.

In this subject, the necessary skills for a risk manager will be worked on so that, once incorporated into a company, he will develop his activities controlling the risks and being prepared for any setback.

For this, and based on the existing risks, the student will acquire the basic knowledge to:

- Identify and evaluate the risks.
- Know the preventive systems capable of organizing the human and material means to be able to face the risks that the developed activities entail and, should they occur, that the consequences and the period of involvement be the minimum.
- Prevent them and protect themselves against risks in the most appropriate way.
- Assess the possible consequences of a loss both direct and indirect.
- Propose adequate financing systems to be able to face the possible contingencies that may arise.
- Know how to develop the investigation of the causes of a disaster.

Competences

- Be able to adapt to unexpected situations.
- Carry out analyses of preventative measures in the area of security.
- Generate innovative and competitive proposals in research and in professional activity developing curiosity and creativity.

- Have a general understanding of basic knowledge in the area of prevention and integral safety and security.
- Respond to problems applying knowledge to practice.
- Use the capacity for analysis and synthesis to solve problems.
- Work and learn autonomously.

Learning Outcomes

1. Be able to adapt to unexpected situations.
2. Design and implement recovery plans following disasters and mechanisms for contingencies.
3. Generate innovative and competitive proposals in research and in professional activity developing curiosity and creativity.
4. Identify the key elements in processes to define the security policies of organisations.
5. Respond to problems applying knowledge to practice.
6. Use the capacity for analysis and synthesis to solve problems.
7. Work and learn autonomously.

Content

0. Presentation.
1. The insurance institution. The Consortium.
2. The insurance contract.
3. Policies sold.
4. The loss. The Expertise. The rescue.
5. Risk management. Industrial security and heritage risk prevention.
6. Identification and evaluation of risks in continuity plans.
7. Fire risk assessment.
8. Elaboration of Continuity Plans.
9. Investigation of claims.
10. Practical cases.

Methodology

The theoretical classes will be done with ICT support and encouraging group participation and debate.

The practical classes consist, commenting on the solutions, on:

- Resolution of cases.
- Job submission.
- Preparation of reports.
- Comments on current issues.

Tutorials with the faculty will be arranged by email.

Activities

Title	Hours	ECTS	Learning Outcomes
-------	-------	------	-------------------

Type: Directed			
Theoretical and practical classes with the participation of students	44	1.76	1, 2, 5, 3, 4, 6
Type: Supervised			
Tutorials with the students	12	0.48	1, 2, 5, 3, 4, 6
Type: Autonomous			
Resolution of practical cases. Realization of works. Personal Study	94	3.76	1, 2, 5, 3, 4, 7, 6

Assessment

Theoretical individual tests (40%):

- Insurance: Written and / or oral test with a weight of 20% of the final grade.
- Disaster recovery plans: Written and / or oral test with a weight of 20% of the final grade.

Continuous evaluation of topics worked in the classroom (60%):

- Insurance: a series of exercises will be proposed throughout the classes, its resolution will mean 30% of the final grade.
- Disaster recovery plans: a series of exercises will be proposed throughout the classes, its resolution will suppose 30% of the final grade.

In case of not passing the subject according to the aforementioned criteria (continuous evaluation), a recovery test may be done on the scheduled date to the schedule, and it will cover the entire contents of the program.

To participate in the recovery the students must have been previously evaluated in a set of activities, the weight of which equals a minimum of two thirds of the total grade of the subject. However, the grade that will be included in the student's file is a maximum of 5-Pass.

Students who need to change an evaluation date have to submit the request by filling in the document that you will find in the moodle space of Tutorització EPSI.

Without prejudice to other disciplinary measures deemed appropriate, and in accordance with current academic regulations, "in the event that the student performs any irregularity that could lead to a significant variation in the grade of an evaluation act, it will be graded with a 0 this evaluation act, regardless of the disciplinary process that can be instructed. In case of several irregularities occur in the evaluation acts of the same subject, the final grade of this subject will be "0".

The tests / exams may be written and / or oral at the discretion of the teaching staff.

Assessment Activities

Title	Weighting	Hours	ECTS	Learning Outcomes
Written and / or oral tests that allow to value the knowledge acquired by the student	40%	0	0	1, 2, 5, 3, 4, 6
Delivery of works	60%	0	0	1, 2, 5, 3, 4, 7, 6
