

History of Biology

Code: 101902
ECTS Credits: 6

Degree	Type	Year	Semester
2501230 Biomedical Sciences	OT	4	0

Contact

Name: Sara Lugo Márquez
Email: Sara.Lugo@uab.cat

Use of Languages

Principal working language: spanish (spa)
Some groups entirely in English: No
Some groups entirely in Catalan: Yes
Some groups entirely in Spanish: No

Prerequisites

None

Objectives and Contextualisation

History of Biology is taken in the 4th year of the Degree of Biology and is part of the group of optional subjects.

The main objectives are:

Introduce the student to the consideration and experimentation of history as a vehicle for reflection and cultural construction, as an instrument of research, documentation and popularization, and as a pedagogical tool in the field of science. Within the specific scope of the history of biology, give the student the necessary tools to identify and critically analyze the main historiographical currents related to the natural sciences.

Introduce the student to the knowledge of the processes of generation, circulation, communication and management of scientific knowledge (particularly in the natural sciences), as well as his impact on socio-cultural transformations throughout history.

Introduce the student to the analysis of the role and the situation of the natural sciences and their social relations today and throughout history. Consider the social, cultural, strategic and economic importance of life sciences in society. And thus, give the student the necessary tools to synthesize, from the historical consideration of the natural sciences, a perspective of the current and future reach of these sciences.

Competences

- Contribute to public discussions on cultural matters.
- Develop critical thinking and reasoning and communicate ideas effectively, both in the mother tongue and in other languages.
- Develop independent learning habits and motivation to continue training at postgraduate level.
- Develop scientific knowledge, critical reasoning and creativity.
- Display knowledge of the concepts and language of biomedical sciences in order to follow biomedical literature correctly.
- Identify and understand the advances and challenges of research.
- Respect diversity in ideas, people and situations.

- Show respect for the ethical and legal aspects of research and professional activities.
- Work as part of a group with members of other professions, understanding their viewpoint and establishing a constructive collaboration.

Learning Outcomes

1. Analyse and describe, in general terms, the role and position of biology and its presence in society, now and across history.
2. Contribute to public discussions on cultural matters.
3. Develop critical thinking and reasoning and communicate ideas effectively, both in the mother tongue and in other languages.
4. Develop independent learning habits and motivation to continue training at postgraduate level.
5. Develop scientific knowledge, critical reasoning and creativity.
6. Identify and critically analyse the principal historiographic currents in biology.
7. Identify and understand the advances and challenges of research.
8. Respect diversity in ideas, people and situations.
9. Show respect for the ethical and legal aspects of research and professional activities.
10. Work as part of a group with members of other professions, understanding their viewpoint and establishing a constructive collaboration.

Content

Distributive blocks

A. Introduction to the history of natural sciences and biological thought in the field of history of science.

B. Mythical narratives, daily narratives.

C. East / West.

D. The mathematization of nature.

E. The two cultures.

F. The construction of contemporary biology.

G. The historical vision of life.

H. Individuals, society and information.

I. Urban narratives about nature.

J. Conclusion: debates and challenges.

Methodology

LEARNING ACTIVITIES

Type of activity	Activity	Date and title
Directed	3 Theoretical Classes (60 min each)	Block A. Introduction to the history of natural sciences and biological thought in the field of history of science
	3 Theoretical Classes (60 min each)	Block B. Mythical narratives, daily narratives
	3 Theoretical Classes (60 min each)	Bloc C. East / West
	6 Theoretical Classes (60 min each)	Block D. The mathematization of nature
	6 Theoretical Classes (60 min each)	Block E. The two cultures
	4 Theoretical Classes (60 min each)	Block F. The construction of contemporary biology
	6 Theoretical Classes (60 min each)	Block G. The historical vision of life
	6 Theoretical Classes (60 min each)	Block H. Individuals, society and information
	6 Theoretical Classes (60 min each)	Block I. Urban narratives about nature
	2 Theoretical Classes (60 min each)	Block J. Conclusion: debates and challenges

Subtotal: Theoretical Classes 45,00 horas

Supervised	Individual problem solving and active participation in the discussions	Every one of the lectures and activities scheduled
------------	--	--

Subtotal: active participation in the discussions: 7,50 horas

AUTONOMOUS ACTIVITIES

Autonomous	Individual study, bibliography consultation and performance of works
------------	--

Subtotal: 90,00 horas

DELIVERABLES

DATE	DELIVARABLE	PLACE	MATERIAL	LEARNING OUTCOMES
To determine throughout the semester	Assays integrated to the contents and competences of the course	Campus Virtual	Email	Collect, organize and present in a standardized format the outcomes of the activities' performance during the course

Activities

Title	Hours	ECTS	Learning Outcomes
Type: Directed			
Theoretical classes / Discussion sessions with TIC support	45	1.8	1, 5, 6, 7, 8
Type: Supervised			
Solving problems and tasks autonomously, participation in discussions	7.5	0.3	9, 1, 2, 5, 4, 3, 6, 7, 8, 10
Type: Autonomous			
Independent study, consultation of bibliography and realization of works	90	3.6	9, 1, 2, 5, 4, 3, 6, 7, 8, 10

Assessment

The course evaluation is continued in relation to:

The active participation in the course, and the presentation of two brief essays which will be assigned during the semester (40% of final grade)

A final and brief essay preparation (40% of final grade) and its oral presentation (20% of final grade) about some concrete topic of the course's themes and competences, in which the students have to evidence their capacity of historically locating and critically analyzing any issue related with the history of biology.

To the effectiveness of evaluation, the students have to approve each one of the proves separately.

The student who has not approve the course could present a recuperation prove. To that the student should be previously evaluated minimums to the three quarters of the total evaluation of the course. Additionally, the student must obtain, at least, 3.5 in the total evaluation of the course.

Assessment Activities

Title	Weighting	Hours	ECTS	Learning Outcomes
Active participation in class (two short essays)	40%	2	0.08	9, 1, 2, 5, 4, 3, 6, 7, 8, 10
Final essay	40%	3.5	0.14	9, 1, 2, 4, 3, 7, 8, 10
Oral exposition	20%	2	0.08	9, 1, 2, 5, 4, 3, 7, 8, 10
