Objectives and Contextualisation

"Anthropology and Philosophy of Education" includes the fields of anthropology and philosophy of education needed on the training of pedagogues and social workers.

First, we will discuss basic topics of pedagogy from a philosophical and anthropological perspective and, second, we study contemporary authors and papers about thought and research in education. Finally, the course also aims to critically analyze contemporary society from philosophical and anthropological perspectives, and also from a gender perspective.

Competences

Social Education
• Adopt ethical behaviour and attitudes and act according to the ethical principles of the profession.
• Contextualize educational action based on the different theoretical paradigms that have developed in science and education in accordance with the socio-historical context of individuals, groups and institutions.
• Develop critical thought and reasoning and be able to communicate them effectively, both in your own language and second or third languages.
• Develop strategies for autonomous learning.
• Know and apply information collection, analysis, processing and evaluation processes, to improve professional practice itself and the foundation of professional action.
• Maintain a respectful attitude to the environment (natural, social and cultural) to promote values, behaviour and sustainable practices that address gender equality, equity and respect for human rights.
• Master the theoretical and applied knowledge of Educational Sciences to develop the capacity for analysis and observation of the social and educational reality.
• Respect the diversity and plurality of ideas, people and situations.
• Use information and knowledge from different sources and contexts (reports, articles, etc.) specific to the social sciences.

Education Studies
• Adopt ethical behaviour and attitudes and act according to the ethical principles of the profession.
• Analyse and understand the theoretical, historical, cultural, political, environmental and legal references and situations involved in education and training proposals.
• Develop critical thinking and reasoning and know how to communicate effectively both in your own tongues and in other languages.
• Develop strategies for autonomous learning.
• Identify educational approaches and problems, inquire about them: obtain, record, process and interpret relevant information to issue supported judgments that enhance education and training.
• Maintain a respectful attitude for the environment (natural, social and cultural) to promote values, behaviours and practices that address gender equality, equity and respect for human rights.
• Respect the diversity and plurality of ideas, people and situations.
• Understand the processes that occur in educational and training activities and their impact on learning.

Learning Outcomes

1. Adopt ethical behaviour and attitudes in relation to sources of knowledge and primary data collection.
2. Analyse the current educational reality by properly applying the philosophical and anthropological concepts.
3. Approach educational contexts through sources of philosophical and anthropological theories.
4. Approach educational reality through the application of techniques for obtaining primary data on educational activities, describe them ethnographically and analyse them critically.
5. Demonstrate academic knowledge of different languages in use.
6. Demonstrating knowledge of socio-cultural diversities and the possibilities of an anthropological approach.
7. Develop assays or expositions that reflect the creation of one's own independent and well informed thinking through different sources of knowledge.
8. Discern the educational particularities of environments and subjects according to different variables (life cycle, sex, social group).
9. Having a respectful attitude and using language that respects all diversities.
10. Know the main philosophical and anthropological theories and their most important concepts.
11. Knowing how to defend one's own ideas without the use of evaluative elements.
12. Knowing how to defend or refute the assigning or use of philosophical and anthropological paradigms based on one's own interests and objects of educational interest.
14. Making philosophical-pedagogical proposals for improving the educational action.
15. Master different techniques for obtaining primary or secondary information.
