

Practicum I: Introduction to Speech Therapy in Practice

Code: 104145
ECTS Credits: 6

Degree	Type	Year	Semester
2500893 Speech therapy	OB	2	A

Contact

Name: Cristina Andrés Carrillo
Email: Cristina.Andres@uab.cat

Use of Languages

Principal working language: catalan (cat)
Some groups entirely in English: No
Some groups entirely in Catalan: Yes
Some groups entirely in Spanish: No

Teachers

Santiago Crespo Alonso
Maria Isabel Fernández Cano
Carmen García Sánchez
Marina Bataller Fernández

Prerequisites

This is an annual subject, without any prerequisites.

Objectives and Contextualisation

The subject is divided into two blocks.

Objectives of Part I: General Aspects of Speech Therapy.

Know the basic concepts of the health sciences, of which speech therapy is a part.

Describe the general aspects of the practice of speech therapy

Know the professional aspects of speech therapy

Objectives of Part II: Knowledge of the framework of the practice of speech therapy.

Make contact with the practice of speech therapy.

Make reflective exercises about the experience in the healthcare environment

Analyse practical experience

Competences

- Act appropriately with respect to the professions ethical code: respect professional confidentiality, apply professional criteria in the completion and referral of treatment.
- Adapt to new situations.
- Advise on the development and implementation of care and education policies on issues relating to speech therapy in school, welfare and medical teams.
- Appraise personal intervention and that of others so as to optimise this.
- Develop independent-learning strategies
- Establish interpersonal relationships with patients affected by communication, language, speech and voice disorders, and their caregivers.
- Ethically commit oneself to quality of performance.
- Have a strategic and flexible attitude to learning.
- Identify, analyze and solve ethical problems in complex situations.
- Observe and listen actively throughout the various processes of speech therapy intervention.
- Organise and plan with the aim of establishing a plan for development within a set period.
- Respect the diversity and plurality of ideas, people and situations.
- Use non-verbal communication techniques to optimise communicative situations.
- Working in intra- and interdisciplinary teams.

Learning Outcomes

1. Adapt to new situations.
2. Appraise personal intervention and that of others so as to optimise this.
3. Demonstrate respect for the ethical code of the profession when carrying out professional practicals.
4. Develop independent-learning strategies
5. Ethically commit oneself to quality of performance.
6. Explain measures that speech professionals can use in advising on the development and implementation of policies for the prevention and care of communication disorders.
7. Have a strategic and flexible attitude to learning.
8. Hold oral interviews with patients and their caregivers, in which issues concerning both speech-therapy symptoms and the impact of these on quality of life and family and social relationships arise.
9. Identify, analyze and solve ethical problems in complex situations.
10. Keep the identity of patients confidential and do not post photographs either of patients or other features that permit their identification in reports on their period of stay in the centres holding the practicals.
11. Observe professional performance in the centre and describe that performance in the report on the work-placement period in the training centre.
12. Organise and plan with the aim of establishing a plan for development within a set period.
13. Respect the diversity and plurality of ideas, people and situations.
14. Use non-verbal communication techniques to optimise communicative situations.
15. Working in intra- and interdisciplinary teams.

Content

The subject is divided into two blocks.

Module I: General Aspects of Speech Therapy

Part 1: Basic concepts in Health Sciences (CS)

CS and its objectives

Interdisciplinarity of the CS

Health and illness

Ecological factors of health and illness

Natural history of the disease

Prevention levels

Lifestyles, environment and health

Health indicators

Part 2: Introduction to Speech Therapy

Profile and professional competencies of speech therapy

Areas of speech therapy

General aspects of the evaluation, diagnosis and intervention in speech therapy

Research in speech therapy

Part 3: The profession of Speech Therapy (PST)

Genesis, transformation and current structuring of PST

Professionalism

Work models in PST (public, private, mixed)

Entrepreneurship in PST

Ethical-legal principles in PST

Professional organizations of speech therapists

Module II: Knowledge of the framework of the speech therapy practice.

Practices for observation, data collection and analysis of speech therapy services.

Methodology

Module I

The methodology used in Block I combines mastery with participatory teaching methodologies through various classroom exercises, readings and discussions. The sessions will be held at the Bellaterra Campus.

Module II

Module II is eminently practical and reflective. Students will be in touch with the world of clinical practice in the form of clinical case seminars or visits to services. In addition, they will be guided in a reflective process around the clinical experience.

Activities

Title	Hours	ECTS	Learning Outcomes
Type: Directed			
Clinical Practice	15	0.6	1, 2, 5, 3, 4, 6, 8, 9, 10, 11, 12, 13, 7, 15, 14
Lectures	28	1.12	1, 2, 5, 3, 4, 6, 8, 9, 10, 11, 12, 13, 7, 15, 14
Specialized seminars	5	0.2	1, 2, 5, 4, 6, 9, 10, 11, 13
Type: Supervised			
Tutories	18.5	0.74	1, 2, 3, 4, 6, 8, 9, 10, 11, 7, 15, 14
Type: Autonomous			
Personal Study	43.5	1.74	1, 5, 3, 4, 6, 8, 9, 10, 12, 13, 7, 15
Preparation of learning evidences	40	1.6	1, 2, 5, 3, 4, 6, 8, 9, 10, 11, 12, 13, 7, 15, 14

Assessment

A) Definition of the subject passed: To successfully complete this subject, it is necessary to obtain a rating of 5 points out of 10 or higher, in each of the following learning evidences (EVs):

Module 1. Assessment. Consists of an exam (EV1) that has a weight of 50% of the final grade.

Assessment of Module II. The evaluation of this block has a weight of 50% of the final mark of the subject. To be able to participate in the assessment activities of this block, it will be necessary to have attended at least 80% of the practical activities. The EV will consist of presenting the practical activities that the teacher indicates in a presentation format at a conference that will be held at the end of the course.

B) Recovery process: Those students who have not passed the subject may have the option of resit when they have a continuous assessment rating greater than or equal to 3.5 points, provided they have submitted a minimum of 2/3 of EVs. The resit system will only be able to increase the qualification already obtained during the course by the student, and will be focused on the learning evidences in which each student has not shown a satisfactory performance.

Assessment Activities

Title	Weighting	Hours	ECTS	Learning Outcomes
Evaluation Part I	50%	0	0	1, 2, 5, 3, 4, 6, 8, 9, 10, 11, 12, 13, 7, 15, 14
Evaluation Part II	50%	0	0	1, 5, 3, 4, 9, 10, 12, 13, 7, 15
