Prerequisites

It is recommended to have passed the subject Constitutional Law beforehand

Objectives and Contextualisation

The right to data protection is perhaps the most relevant right related to information and communication technologies (ICTs), along with the right to privacy and freedom of expression. In labour law, a large number of personal information about the professional life of the workers are collected, such as degrees, positions and compensation, as well as other personal aspects such as family life, marital status, DNI and name of children, among others. In addition, sensitive information about trade union affiliation, usually serving to discount the union quota, and health data such as casualties and illnesses, are often also stored. This allows you to create a personal profile that deserves to be protected.

This course aims at describing the general principles applicable to legal problems related to fundamental rights at workplace, as well as possible protective measures and their effectiveness. The common situations of risk for the fundamental rights are:

- Selection processes
- Business controls, with biometric technology, monitoring and video surveillance
- Interception of communications and navigation on the Internet
- Sensitive data

The question to answer in this course is none other than the level of real protection of the fundamental rights of workers in the company. Possible solutions will often be regulatory, but we will occasionally mention other complementary options, such as Privacy Enhancing Technologies.

Competences

- Applying the information and communication technologies to the different areas of action.
- Clearly expressing ideas or facts in a compelling way.
- Identify the foundations of the main legal and organisational areas in the field of human work.

- Identifying, analysing and solving complex problems and situations from an (economic, historical, legal, psychological, and sociological) interdisciplinary perspective.
- Properly analysing the specific situations of reconciliation of work and family life, and implementing the corresponding regulations.
- Self-motivating by undertaking specific training programs to acquire new knowledge.
- Students must be capable of deciding, sharply taking decisions and judging.
- Students must be effective in a changing environment and when facing new tasks, responsibilities or people.
- Working autonomously.
- Working effectively in teams.
