Prerequisites
General knowledge on public administration and public management

Objectives and Contextualisation
1. To encourage and promote in students an interest in learning about the elements that make up the structure and components of public administration management and organizational systems.

2. To provide students with an understanding of the main theoretical models for analysing the various components of public administration organizational systems.

3. To help students learn about the nature and methods applicable to the study of public administration organization, human resources and management systems.

4. To cultivate a spirit of critical analysis in students that allows them to evaluate the various national and international political and administrative contexts.

5. To provide students with an understanding of how to apply this knowledge to analyse and address the main issues faced by public administrations.

6. To equip students with the necessary knowledge and skills to apply their knowledge in public-sector organizational systems.

7. To help students master the basic concepts in the fields of organization and civil service.

Competences
• Address complex public intervention situations, possibly involving ethical dilemmas, on the basis of proposals founded both on explicit values and on conceptual and methodological rigour.
• Apply concepts, theories and models from various disciplines in the exercise of public administration duties.
• Continue the learning process, to a large extent autonomously
• Design and evaluate processes of public intervention in specific social, political and sectorial situations and problem areas.
• Identify, understand and analyse complex social and political phenomena that are important to the exercise of public administration duties.
• Propose innovative solutions to solve social and political problems.
• Use acquired knowledge as a basis for originality in the application of ideas, often in a research context.

Learning Outcomes

1. Address complex public intervention situations, possibly involving ethical dilemmas, on the basis of proposals founded both on explicit values and on conceptual and methodological rigour.
2. Analyse management systems through simulation techniques that encourage improvements to the working of the organisation.
3. Analyse processes of innovation
5. Apply strategies for innovation and change in organisations
6. Continue the learning process, to a large extent autonomously.
7. Design internal communication systems.
8. Design strategies to evaluate the management models of organisations.
9. Evaluate communication strategies
10. Identify and define different human resources policy instruments.
11. Identify factors affecting the implementation of these policies.
12. Know the techniques of legal analysis.
13. Negotiate processes to implement change in organisations.
14. Propose guidance programmes on innovation and change processes in the management of public organisations.
15. Propose innovative solutions to solve social and political problems.
16. Use acquired knowledge as a basis for originality in the application of ideas, often in a research context.

Content

Topic 1. The institutional problems of public administrations. Lecturer: Carles Ramió (support materials will be provided to work on after the session). 10/01/2020

Topic 2. The public administration of the future. Lecturer: Carles Ramió (support materials will be provided to work on after the two sessions and an activity will be assigned). January 17

Topic 3. The organizational dimensions of public administration. Lecturer: Carles Ramió (support materials will be provided to work on after the two sessions and an activity will be assigned). Jan 24

Topic 4. Strategic management of organizations. Lecturer: David Sancho (support materials will be provided to work on after the session and two activities will be assigned). Jan 31

Topic 5. Organizational analysis from a quality perspective. Lecturer: David Sancho (support materials will be provided to work on after the session and two activities will be assigned). Feb 7

Topic 6. Innovation areas in public management (to be specified at the start of the subject). Previous editions have included institutional visits to consulting firms and specific sessions on innovation or digital competences, amongst other things. Feb 14

Topic 7. The personnel function in public organizations. Lecturer: Miquel Salvador (support materials will be provided to work on after the session and a group activity will be assigned). Feb 21
Topic 8. Emerging areas in human resource management. Lecturer: Miquel Salvador (support materials will be provided to work on after the session). Feb 28

Topic 9. Organizational and civil service law. Lecturer: Antonio Morales (support materials will be provided to work on after the session). March 6

Topic 10. Administrative law. Lecturer: Antonio Morales (support materials will be provided to work on after the session and a final activity will be assigned). March 13

The standard timetable for all sessions is from 9 a.m. to 2 p.m., at the Public Administration School of Catalonia (EAPC) (except the 15 February session, which will be held from 9 a.m. to 1 p.m.).

Syllabus

The syllabus consists of nine topics and one special session on innovation, which will be organized around the main content to be presented and discussed. The aim of the learning process is for students to finish each topic having acquired the basic knowledge and operational tools to address each of the presented areas of organization, human resources and management. This learning process will result from the recommended reading and from listening to the lecturers’ presentations, discussing all content and applying it to case studies.

Topic 1. The institutional problems of public administrations

Lecturer: Dr Carles Ramió

- Evolution of public administrations since 1977
- Public administration models: clientelist, bureaucratic and managerial
- Institutional problems
- Institutional successes
- Corruption
- Clientelism
- The lack of institutional quality

Topic 2. The public administration of the future

Lecturer: Dr Carles Ramió

- Technological, economic, social and political changes
- Governance and meta-leadership
- Future public administration scenarios

Topic 3. The organizational dimensions of public administration

Lecturer: Dr Carles Ramió

- The socio-technical dimension, the political and cultural dimension, and the control and improvement dimension of public organizations
- Informal organization management, intraorganizational conflict management and administrative culture management. Tools for managing and motivating public employees.

Topic 4. Strategic management of organizations

Lecturer: Dr David Sancho
• Organizational strategy: definition of organizational goals and relational networks at public institutions
• Structure: divisionalization, agencies and new organizational formulae

Topic 5. Organizational analysis from a quality perspective
Lecturer: Dr David Sancho

• Information and communication technology procedures and impact
• Modernization and change: market strategies, outsourcing, leadership and change
• Control of the organization: service quality control, control and impact assessment

Topic 6. Innovation areas in public management
Lecturers: Drs David Sancho and Miquel Salvador

• Innovation in public management and information and communication technologies
• E-government, e-administration and e-governance. The dimensions of e-government and e-administration

Topic 7. The personnel function in public organizations
Lecturer: Dr Miquel Salvador

• The concept of the personnel function in public organizations
• Personnel management and people management
• An integrated vision of the personnel function: personnel policy, management and administration

Topic 8. Emerging areas in human resource management
Lecturer: Dr Miquel Salvador

• The areas or subsystems of the personnel function and their interconnections: planning, jobs and competency-based management; recruitment and selection; mobility and civil service careers; training and socialization; human resource assessment in public administrations
• Human resource management assessment systems: methodologies and experiences

Topic 9. Organizational and civil service law
Lecturer: Dr Antonio Morales

• Rules limiting the government's power to self-organize
• The government and its bodies. In particular: rules of procedure of corporate bodies and the distribution of powers amongst bodies
• The different administrations: territorial, corporate and institutional. In particular: the proliferation of independent entities or private forms of personification
• Classification of personnel who provide services to the government
• Civil servant statute
• Civil servant situations and responsibility regimes for the exercise of their offices
• Senior officials

Topic 10. Administrative law
Lecturer: Dr Antonio Morales

• Principles governing the activity of administrative agencies
• Main types of administrative activities
• In particular: the activity of limitation through authorization
• In particular: the activity of providing citizen services
\* In particular: the activity of promotion
\* In particular: the activity of inspection and sanction

**Methodology**

Learning is based on the review, questioning and constant construction of theoretical and practical knowledge. The learning objective is to acquire the ability to generate questions and give (provisional) answers. To achieve this objective, students must play an active role in the autonomous approach to the information, reading and reflecting on what they have read in order to establish an informed and enriching dialogue with the teacher.

In this module, this preliminary autonomous work will be required, in the form of reading and the writing of short papers, for each topic. This work will be supplemented with seminar discussions and the preparation and presentation of oral presentations, as well as case studies and presentations of real-life experiences to better consolidate students’ knowledge and ability to reconsider it.

The learning time is organized around a combination of face-to-face time and autonomous work: 25 hours of student work per ECTS credit (total of 250 hours), of which 20% (50 hours) will be face-to-face, 30% (75 hours) will not be face-to-face but will be supervised by the teacher, and 50% (125 hours) will not be face-to-face and will consist of autonomous work by the student.

Teacher-supervised face-to-face learning will consist of a combination of master classes and discussion seminars on both theoretical aspects and their application to both real and simulated case studies. Teacher-supervised non-face-to-face learning will consist of specific tutoring for the short papers and preparation of oral presentations.

**Assessment**

The assessment will be continuous and based on demonstration by the student of the competences acquired during the following activities and the corresponding results:

1. Preparation of short papers throughout the module (60% of the mark).
2. Participation in the seminar and case-discussion sessions (20% of the mark).
3. Oral presentations (20% of the mark).

**Assessment Activities**

Preparation of short papers throughout the module 60% 0 0 1, 3, 2, 5, 4, 9, 8, 7, 11, 10, 13, 14, 15, 6, 16

### Bibliography

The following bibliography is of an introductory nature for the entire module and is organized into generic reading, reading by policy sector and recommended journals. For each topic, the lecturers will recommend specific reading, which will mainly consist of excerpts from some of these references, but may also include other texts.
